COURT REPORTERS:

MS. JUDY WERLINGER
MS. SHEA SLOAN

Proceedings taken by Machine Stenotype; transcript was
produced by a Computer.

1 deletion used by Yahoo!?

2 A. Yes, sir.

3 Q. Does Yahoo! identify and remove some of the
4 expired ones of the records?

5 A. Yes, they do. These are these records that
6 are changing where the generation has changed and no
7 longer matches.

8 Q. Does Yahoo! do that by adjusting the pointer
9 in the linked list to bypass the previously identified
10 expired records?

11 A. Yes, sir.

12 Q. Is that what you showed when you moved the
13 pointer over?

14 A. Yes, sir.

15 Q. And I circled in my definitions -- I forgot
16 why the words, same access -- I think it was something
17 that Yahoo!'s attorney argued.

18 Do you remember that?

19 A. Yes, sir.

20 Q. The Court has said both identification and
21 removal of the expired records occurs during the same
22 access of the linked list.

23 Does that happen here?

24 A. Yes, it does.

25 Q. Is it the same access?

1 A. Yes.

2 Q. How do you know it's the same access?

3 A. I can look, for example, the locks indicate
4 that it's the same access. The list is locked at the
5 beginning of the access and unlocked at the end of the
6 access.

7 Q. And I think as the computer went down the
8 linked list, as it was finding expired generation
9 records, was it removing it right then and there?

10 A. Yes, sir.

11 Q. So do you find this function to be identically
12 met by Yahoo!

13 A. Yes, I do.

14 Q. Let's talk now about the structure.

15 Has the Court given us a definition for the
16 structure of this element?

17 A. Yes, sir.

18 Q. Will you read the definition or -- why don't
19 we first turn to the definition, which is on Page 2 of
20 the Court's claim constructions.

21 Again, at a higher level, how has the Court
22 defined the structure?

23 A. Again, this is essentially hardware and
24 software.

25 Q. And how has the Court defined hardware?
