Go Daddy's servers transmit a series of communications to client workstations in the distributed hypermedia network. Go Daddy's servers format the communications so that the client workstation receives, from the network server over the network environment, at least one file containing information to enable a browser application to display at least a portion of a distributed hypermedia document within a browser-controlled window. In addition, Go Daddy provides the infrastructure (e.g. servers, Go Daddy's websites, etc.), in addition to instructions to users, and causes them to use Go Daddy's websites in an infringing manner in its default and expected use.

		 <p>The screenshot shows a Mozilla Firefox browser window displaying the GoDaddy website. The address bar contains the URL http://www.godaddy.com/gdshop/jobs.asp?ci=10731. The page features the GoDaddy logo and navigation menus. A prominent yellow banner reads: "Applying for a tech job but don't have an online résumé? Put your qualifications online with a .ME or .COM domain name and WebSite Tonight! (includes résumé template). Act now and SAVE 10% on your entire order. Enter code CAREER10". Below this is a "CAREER Central" section with the tagline "Make it big with GoDaddy.com!". A testimonial from Kitty, Senior Software Test Engineer, is displayed, stating: "I've worked at enough companies, both large and small, to think GoDaddy is terrific. I like my co-workers, I like my job. We work hard, but we have fun. I feel like my work is appreciated and I've been rewarded for that." A video player is embedded on the right side of the testimonial, showing a group of people in a GoDaddy office setting. The video player interface includes a play button, a progress bar, and a volume control icon.</p> <p>Source: http://www.godaddy.com/gdshop/jobs.asp?ci=10731</p>

1c	displaying at least a portion of the document within the browser-controlled window;	<p>Users of Go Daddy's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Go Daddy's servers transmit a series of communications to client workstations in the distributed hypermedia network. Go Daddy's servers format the communications such that if the communications are received by a client workstation, they cause the browser to display at least a portion of the document within the browser-controlled window. In addition, Go Daddy provides the infrastructure (e.g. servers, Go Daddy's websites, etc.), in addition to instructions to users, and causes them to use Go Daddy's websites in an infringing manner in its default and expected use.</p>
