Subject: RE: EOLAS v. Adobe et al. - YAHOO Production

Josh:

We reviewed our previous production and are somewhat confused by your request. I note that there are only two documents in Yahoo!'s recent production which do not bear custodial information. These appear to bear Bates numbers: 1) YahooE03114531 - which should be David Filo, and 2) YahooE03114607-4692 - which is a publicly filed SEC document from 1996. My understanding is that the publicly filed document does not have any custodial information as the other publicly filed documents that have been produced throughout this litigation do not have custodial information either. It is my understanding that you had previously requested this document at the deposition of David Filo. Let me know if you have any further questions about these documents.

With respect to the prior art native files (PA-NAT), which have been produced in this case, we have re-reviewed that recent production. With respect to PA-NAT 100 through 108 and 112, the Viola and MediaView source code from those files has already previously been produced in this litigation a number of times. It is my understanding that those same prior MediaView and Viola source code files also did not bear any custodial information. Nevertheless, to extent that the custodial information for those files is required, it would be Dick Phillips, Perry Wei, Scott Silvey, Dale Dougherty, and/or David Filo.

If you have any further questions, please let me know.

Thanks,
Josh

Jose/Jennifer/Ed -

Please immediately provide custodian information for this code production, as well as all of the recent code productions (i.e. all of those made in the last 30 days by Yahoo or under the "PA NAT" production prefix). I've asked for this information repeatedly, and my requests have largely been ignored.

Thank you.

Counsel,

In the below listed ftp site, within the Yahoo section please find Yahoo!'s most recent production (YAHOO-E073.rar).
