Josh, we were able to work around the hardware problems we encountered last night during the inspection and have the machines and code available for inspection now. Please let us know when your team would like to come by to inspect. We can run the "ls -laRF /" command your technical staff requested as our technical staff walk them through the steps used to run the demonstrations.

Best,
Andrew

Thanks Josh -- Yes, as you know, apparently one of the computers failed while you were there. These are very delicate, old machines. We are endeavoring to meet your requests and will advise in the morning. JD

Jennifer -

At your invitation, we stopped by your office for an inspection tonight. And, contrary to your express representations, not all of the code and machines shown in the videos were present. Our technical team also noted other serious deficiencies which were explained to Sonal.

Please let us know immediately once the noted deficiencies are corrected and all of the machines and code are available for inspection.

Thank you.

Josh:

You should be able to access all of the code. Call me with any questions

Jennifer
