Summary

I have extensive experience and a lifelong and passionate interest in analyzing, designing, and building large-scale systems of all types (computer softwares systems, data and telecommunications networks, energy systems, ecosystems, etc.). I have a large publication record (on request) including three books, published approximately 10 years apart. My latest book is entitled "Wireless Internet Security: Architecture and Protocols" and is published by Cambridge University Press in October 2008. You can find a description of the book here:

<http://www.cambridge.org/catalogue/catalogue.asp?isbn=9780521887830>

Specialties

Programming languages (C, C++, Java, Objective C), operating systems design and implementation, network protocol design and implementation, network architecture, wireless networking, security protocols and systems for networking, technical writing, strategic technical management
