Claim	Claim Language	Exemplary Evidence from Sun's websites
5pre	A method for running an application program in a computer network environment, comprising:	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers and comprises a method for running an application program in a computer network environment, comprising the following elements. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1pre supra which is expressly incorporated herein.</i></p>
5a	providing at least one client workstation and one network server coupled to said network environment, wherein said network environment is a distributed hypermedia environment;	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes at least one client workstation and one network server coupled to said network environment, wherein said network environment is a distributed hypermedia environment. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1a supra which is expressly incorporated herein.</i></p>

Claim	Claim Language	Exemplary Evidence from Sun's websites
5b	executing, at said client workstation, a browser application, that parses a first distributed hypermedia document to identify text formats included in said distributed hypermedia document and for responding to predetermined text formats to initiate processing specified by said text formats;	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that the browser parses a first distributed hypermedia document to identify text formats included in said distributed hypermedia document and for responding to predetermined text formats to initiate processing specified by said text formats. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1b supra which is expressly incorporated herein.</i></p>
5c	utilizing said	Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the

Claim	Claim Language	Exemplary Evidence from Sun's websites
	<p>browser to display, on said client workstation, at least a portion of a first hypermedia document received over said network from said server, wherein the portion of said first hypermedia document is displayed within a first browser-controlled window on said client workstation,</p>	<p>combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that the browser displays, on said client workstation, at least a portion of a first hypermedia document received over said network from said server, wherein the portion of said first hypermedia document is displayed within a first browser-controlled window on said client workstation. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1c supra which is expressly incorporated herein.</i></p>
5d	<p>wherein said first distributed hypermedia document includes an embed text</p>	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that the said first distributed hypermedia document includes an embed text format, located at a first location in said first</p>

*Allegation not limited to the browser in use

Claim	Claim Language	Exemplary Evidence from Sun's websites
	<p>format, located at a first location in said first distributed hypermedia document, that specifies the location of at least a portion of an object external to the first distributed hypermedia document,</p>	<p>distributed hypermedia document, that specifies the location of at least a portion of an object external to the first distributed hypermedia document. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1d supra which is expressly incorporated herein.</i></p>
<p>5e</p>	<p>wherein said object has type information associated with it utilized by said browser to identify and locate an executable application external to the first</p>	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that said object has type information associated with it utilized by said browser to identify and locate an executable application external to the first distributed hypermedia document. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1e supra which is expressly incorporated</i></p>

Claim	Claim Language	Exemplary Evidence from Sun's websites
	distributed hypermedia document,	<i>herein.</i>
5f	and wherein said embed text format is parsed by said browser to automatically invoke said executable application to execute on said client workstation in order to display said object	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that when said embed text format is parsed by said browser, it automatically invokes said executable application to execute on said client workstation in order to display said object. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1f supra which is expressly incorporated herein.</i></p>
5g	and enable interactive processing of said object within a display area	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that interactive processing of said object is enabled within a display area created at said first location within the portion</p>

*Allegation not limited to the browser in use

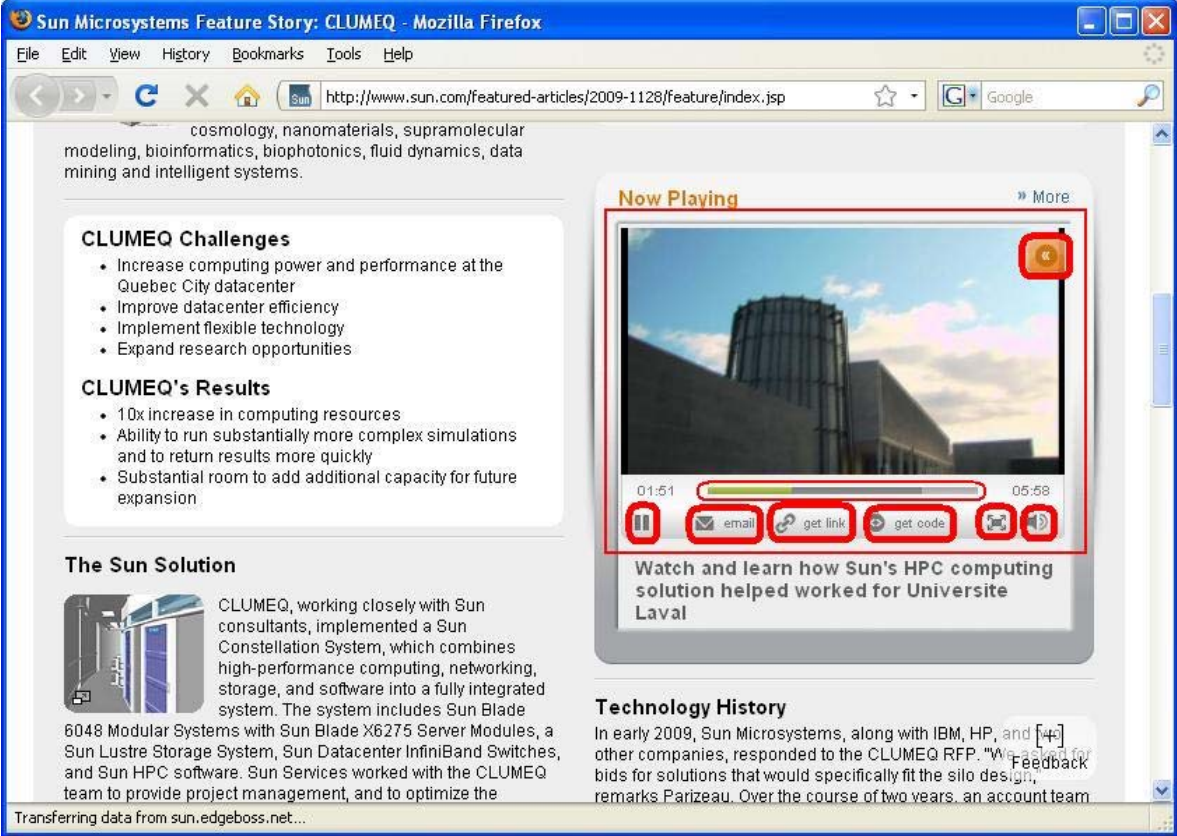

Claim	Claim Language	Exemplary Evidence from Sun's websites
	<p>created at said first location within the portion of said first distributed hypermedia document being displayed in said first browser-controlled window.</p>	<p>of said first distributed hypermedia document being displayed in said first browser-controlled window. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1g supra which is expressly incorporated herein.</i></p>
<p>5h</p>	<p>wherein said executable application is a controllable application and further comprising the step of:</p>	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network and format the communications so that said executable application is a controllable application further comprising the following steps. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 2pre supra which is expressly incorporated herein.</i></p>

Claim	Claim Language	Exemplary Evidence from Sun's websites
5i	interactively controlling said controllable application on said client workstation via inter-process communications between said browser and said controllable application;	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network and format the communications so that interactive controlling of said controllable application on said client workstation occurs via inter-process communications between said browser and said controllable application. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 2a supra which is expressly incorporated herein.</i></p>
5j	wherein the communications to interactively control said controllable application continue to be exchanged between the controllable application and the browser even after	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network and format the communications so that communications to interactively control said controllable application continue to be exchanged between the controllable application and the browser even after the controllable application program has been launched. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for the claim elements 1g and 2a supra which is expressly</i></p>

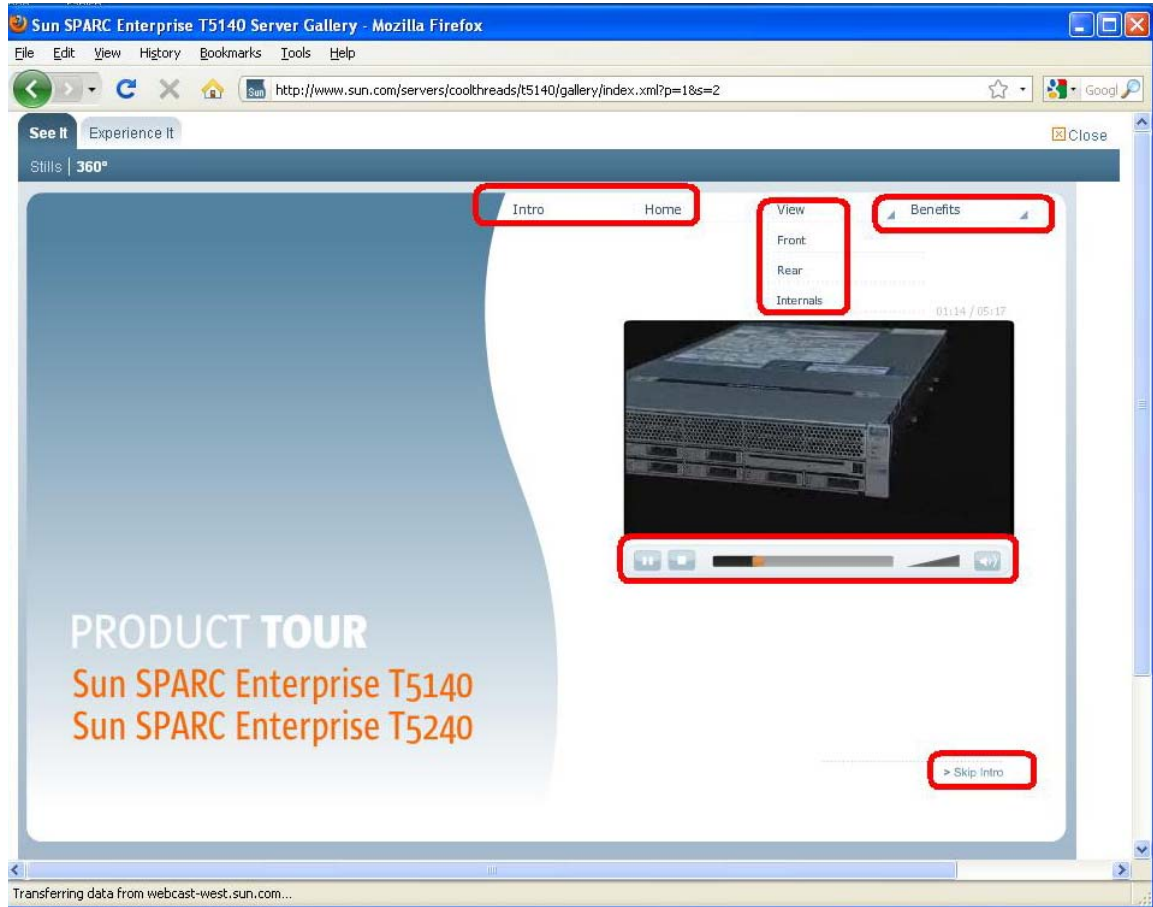

Claim	Claim Language	Exemplary Evidence from Sun's websites
	the controllable application program has been launched;	<i>incorporated herein.</i>
5k	wherein additional instructions for controlling said controllable application reside on said network server, wherein said step of interactively controlling said controllable application includes the following substeps:	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that the additional instructions for controlling said controllable application reside on said network server, wherein said step of interactively controlling said controllable application includes the following sub-steps identified below. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for the claim element 4k supra which is expressly incorporated herein.</i></p>
5l	issuing, from the client workstation,	Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations

Claim	Claim Language	Exemplary Evidence from Sun's websites
	one or more commands to the network server;	<p>executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that the client workstation is caused to issue one or more commands to the network server. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for the claim element 4l supra which is expressly incorporated herein</i></p>
5m	executing, on the network server, one or more instructions in response to said commands;	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that the network server executes one or more instructions in response to said commands. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for the claim element 4m supra which is expressly incorporated herein.</i></p>
5n	sending information from said network server to said client workstation in	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that information is sent</p>

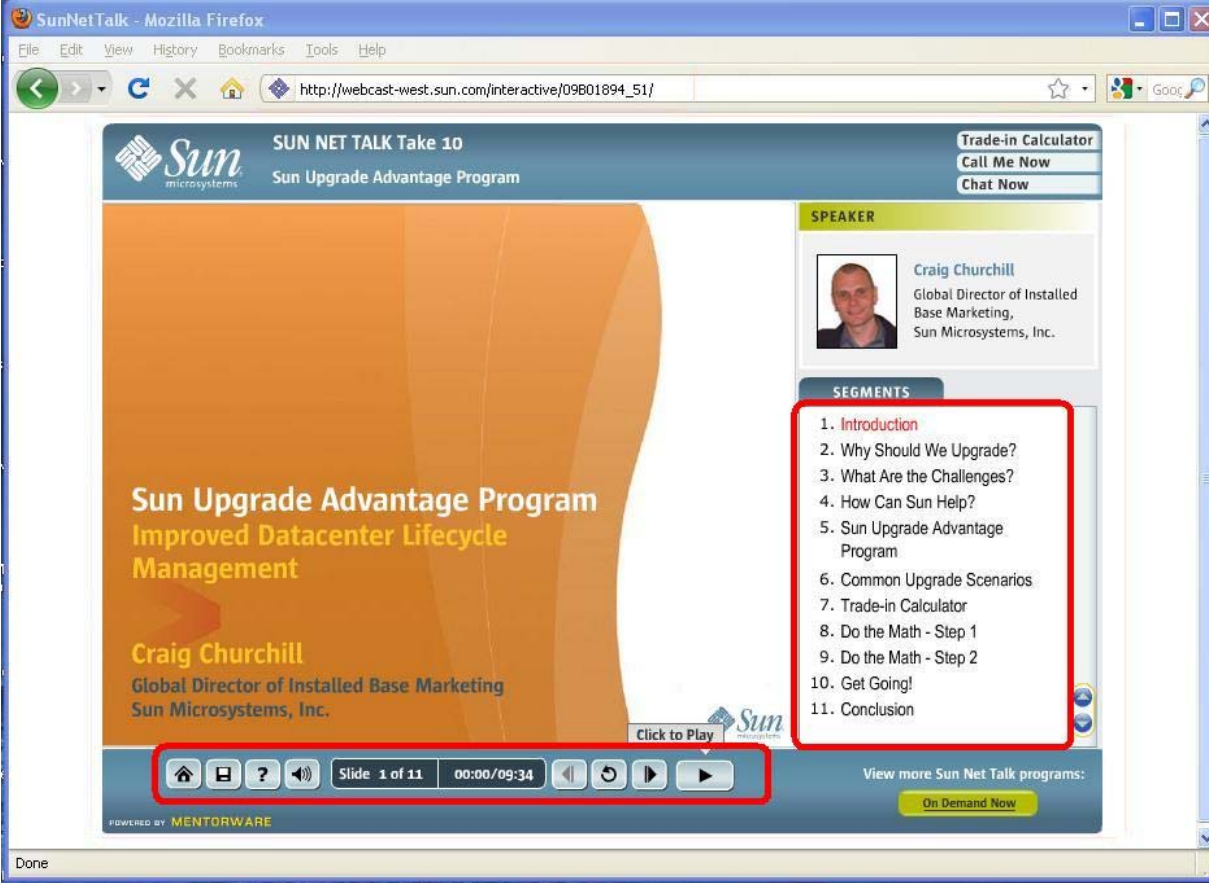

Claim	Claim Language	Exemplary Evidence from Sun's websites
	response to said executed instructions;	<p>from said network server to said client workstation in response to said executed instructions. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for the claim element 4n supra which is expressly incorporated herein.</i></p>
5o	and processing said information at the client workstation to interactively control said controllable application; and	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that the client workstation processes said information at the client workstation to interactively control said controllable application. In addition, Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for the claim element 4o supra which is expressly incorporated herein.</i></p>
5p	wherein said additional instructions for controlling said controllable	<p>Users of Sun's websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. Sun's servers transmit a series of communications to client workstations in the distributed hypermedia network. Sun's servers format the communications so that the additional instructions for controlling said controllable application reside on said client workstation. In addition,</p>

Claim	Claim Language	Exemplary Evidence from Sun's websites
	<p>application reside on said client workstation.</p>	<p>Sun provides the infrastructure (e.g. servers, Sun's websites, etc.), in addition to instructions to users, and causes them to use Sun's websites in an infringing manner in its default and expected use.</p>  <p>Source: http://www.sun.com/featured-articles/2009-1128/feature/index.jsp</p>
