

Exhibit 7

Claim	Claim Language	Evidence from www.youtube.com
1f	<p>and wherein said embed text format is parsed by said browser to automatically invoke said executable application to execute on said client workstation in order to display said object</p>	<p>Users of YouTube's website, the website itself and/or the servers hosting that website (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. YouTube's servers transmit a series of communications to client workstations in the distributed hypermedia network. YouTube's servers format the communications so that when said embed text format is parsed by said browser it automatically invokes said executable application to execute on said client workstation in order to display said object. In addition, YouTube provides the infrastructure (e.g. servers, YouTube's website, etc.), in addition to instructions to users, and causes them to use YouTube's website in an infringing manner in its default and expected use.</p>

* Allegation not limited to the browser in use
