

## ANSWER

Perot Systems denies any allegation of patent infringement by Perot Systems in the opening, unnumbered paragraph of the Complaint. Perot Systems is without sufficient knowledge or information either to admit or deny any allegations of this paragraph of the Complaint as to the other defendants and, therefore, denies the allegations of this paragraph of the Complaint as to the other defendants. Perot Systems denies the remaining allegations of this paragraph of the Complaint.

### **I. PARTIES<sup>1</sup>**

1. Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

2. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

3. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

4. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to

<sup>1</sup> In its Answer, Perot Systems repeats the headings of the Complaint for ease of reference. No response is necessary to the headings, but to the extent that they allege or imply any improper conduct on the part of Perot Systems, any such averments are denied.

admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

5. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

6. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

7. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

8. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

9. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

10. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

11. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

12. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

13. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

14. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

15. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to

admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

16. Perot Systems admits the allegations of this paragraph of the Complaint.

17. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

18. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

19. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

20. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

21. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

22. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

23. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

## **II. JURISDICTION AND VENUE**

24. Perot Systems repeats and incorporates by reference each of the responses to the allegations contained in Paragraphs 1 through 23 above as though fully set forth here.

25. Perot Systems admits that this action involves an allegation of patent infringement under the patent laws of the United States, Title 35, United States Code § 1 *et seq.* Perot Systems admits that this Court has subject matter jurisdiction over this case under 28 U.S.C. §§ 1331 and 1338(a). Perot Systems denies the remaining allegations of this paragraph of the Complaint.

26. Perot Systems admits that Perot Systems is subject to personal jurisdiction in this judicial district in this case. Perot Systems denies that it has infringed the patents-in-suit anywhere, including within the State of Texas and within the Eastern District of Texas. Perot Systems is without sufficient knowledge of the activities of the other defendants to either admit or deny the allegations in this paragraph of the Complaint as to the other defendants and, therefore, denies the allegations of this paragraph of the Complaint as to the other defendants. Perot Systems denies the remaining allegations of this paragraph of the Complaint.

27. Reserving all rights pursuant to 28 U.S.C. § 1404(a), Perot Systems admits that venue is proper in the Eastern District of Texas under 28 U.S.C. §§ 1391(b)-(c). Perot Systems denies that it has committed acts of infringement in this or any judicial district. Perot Systems is without sufficient knowledge of the activities of the other defendants to either admit or deny the allegations of this paragraph of the Complaint as to the other defendants and, therefore, denies the allegations of this paragraph of the Complaint as to the other defendants.

### **III. ALLEGED PATENT INFRINGEMENT**

28. Perot Systems repeats and incorporates by reference each of the responses to the allegations contained in Paragraphs 1 through 27 above as though fully set forth here.

29. Perot Systems admits that the face of United States Patent No. 5,838,906 (“the ‘906 Patent”) indicates that its title is “Distributed hypermedia method for automatically invoking external application providing interaction and display of embedded objects within a hypermedia document” and that it issued on November 17, 1998. Perot Systems admits that the face of United States Patent No. 7,599,985 (“the ‘985 Patent”) indicates that its title is “Distributed hypermedia method and system for automatically invoking external application providing interaction and display of embedded objects within a hypermedia document” and that it issued on October 6, 2009. Perot Systems admits that the ‘906 Patent and the ‘985 Patent may be collectively referred to hereafter as “the patents” or “the patents-in-suit.” Perot Systems is without sufficient knowledge or information to either admit or deny the remaining allegations of this paragraph of the Complaint and, therefore, denies the remaining allegations of this paragraph of the Complaint.

30. Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

31. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

32. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

33. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

34. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

35. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

36. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

37. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

38. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

39. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

40. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

41. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either

admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

42. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

43. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

44. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

45. Perot Systems denies the allegations of this paragraph of the Complaint.

46. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

47. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

48. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

49. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

50. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

51. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

52. The allegations of this paragraph of the Complaint relate solely to another defendant. Accordingly, Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint and, therefore, denies the allegations of this paragraph of the Complaint.

53. Perot Systems denies the allegations set forth in this paragraph of the Complaint with respect to Perot Systems. Perot Systems is without sufficient knowledge or information to either admit or deny the allegations of this paragraph of the Complaint as to the other defendants

and, therefore, denies the allegations of this paragraph of the Complaint as to the other defendants.

54. Perot Systems denies the allegations set forth in this paragraph of the Complaint with respect to Perot Systems. Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint as to the other defendants and, therefore, denies the allegations of this paragraph of the Complaint as to the other defendants.

55. Perot Systems denies the allegations set forth in this paragraph of the Complaint with respect to Perot Systems. Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint as to the other defendants and, therefore, denies the allegations of this paragraph of the Complaint as to the other defendants.

56. Perot Systems denies the allegations set forth in this paragraph of the Complaint with respect to Perot Systems. Perot Systems is without sufficient knowledge or information either to admit or deny the allegations of this paragraph of the Complaint as to the other defendants and, therefore, denies the allegations of this paragraph of the Complaint as to the other defendants.

#### **IV. PLAINTIFF'S PRAYER FOR RELIEF**

Perot Systems denies that Plaintiff is entitled to be awarded any of the relief sought in Paragraphs A-E of its Prayer for Relief against Perot Systems. Plaintiff's Prayer for Relief with regard to Perot Systems should, therefore, be denied in its entirety and with prejudice, and Plaintiff should take nothing. With respect to the other defendants, Perot Systems is without sufficient knowledge or information to form a belief as to whether Plaintiff is entitled to the relief sought or any relief whatsoever, and on that basis denies the same.

#### **V. PLAINTIFF'S DEMAND FOR JURY TRIAL**

57. Perot Systems admits that the Plaintiff has demanded that all issues be determined by a jury.

#### **VI. ADDITIONAL DEFENSES**

58. Perot Systems repeats and incorporates by reference each of the responses to the allegations contained in Paragraphs 1 through 57 above as though fully set forth here. Perot Systems asserts the following additional defenses.

59. Plaintiff has failed to state a claim upon which relief can be granted.

60. Plaintiff lacks standing to bring the present cause of action to the extent it does not have a sufficient interest, or any interest, in the '906 Patent.

61. Plaintiff lacks standing to bring the present cause of action to the extent it does not have a sufficient interest, or any interest, in the '985 Patent.

62. Perot Systems does not and has not infringed (literally or by equivalents), contributed to the infringement of, induced infringement of, or willfully infringed any valid claim of the '906 Patent.

63. Perot Systems does not and has not infringed (literally or by equivalents), contributed to the infringement of, induced infringement of, or willfully infringed any valid claim of the '985 Patent.

64. The claims of the '906 Patent are invalid for failure to comply with one or more of the requirements of Title 35 of the United States Code, including, without limitation, 35 U.S.C. §§ 41, 101, 102, 103, 112, 115, 116 and/or 256.

65. The claims of the '985 Patent are invalid for failure to comply with one or more of the requirements of Title 35 of the United States Code, including, without limitation, 35 U.S.C. §§ 41, 101, 102, 103, 112, 115, 116 and/or 256.

66. By reason of proceedings in the United States Patent and Trademark Office, and by reasons of the statements, admissions, and/or amendments made by the applicants or on the applicants' behalf, Plaintiff is estopped from construing any claim of the '906 Patent to cover any Perot Systems product or service that is alleged to infringe the '906 Patent.

67. By reason of proceedings in the United States Patent and Trademark Office, and by reasons of the statements, admissions, and/or amendments made by the applicants or on the applicants' behalf, Plaintiff is estopped from construing any claim of the '906 Patent to cover any Perot Systems product or service that is alleged to infringe the '985 Patent.

68. Plaintiff's claims regarding the '906 Patent are barred, in whole or in part, under the doctrines of laches and/or waiver.

69. Plaintiff's claims regarding the '906 Patent are barred, in whole or in part, under the doctrine of estoppel.

70. Plaintiff's claims regarding the '985 Patent are barred, in whole or in part, under the doctrine of estoppel.

71. On information and belief, Perot Systems enjoys an actual and/or an implied license to the '906 Patent.

72. On information and belief, Perot Systems enjoys an actual and/or an implied license to the '985 Patent.

73. Plaintiff's claims regarding the '906 Patent are barred, in whole or in part, by a covenant not to sue.

74. Plaintiff's claims regarding the '985 Patent are barred, in whole or in part, by a covenant not to sue.

75. Plaintiff's claims regarding the '906 Patent are barred, in whole or in part, by a release.

76. Plaintiff's claims regarding the '985 Patent are barred, in whole or in part, by a release.

77. Plaintiff's claims regarding the '906 Patent are barred, in whole or in part, under the doctrines of exhaustion and/or the full compensation rule.

78. Plaintiff's claims regarding the '985 Patent are barred, in whole or in part, under the doctrines of exhaustion and/or the full compensation rule.

79. Plaintiff's claims for relief regarding the '906 Patent are limited due to legal and/or equitable intervening rights under 35 U.S.C. §§ 252 and 307(b).

80. Plaintiff is prohibited from recovering damages for activities alleged to have occurred before Plaintiff complies with 35 U.S.C. § 287 with respect to the '906 Patent.

81. Plaintiff is prohibited from recovering damages for activities alleged to have occurred before Plaintiff complies with 35 U.S.C. § 287 with respect to the '985 Patent.

82. Plaintiff is prohibited from recovering damages for activities alleged to have occurred before Plaintiff provides actual notice of the '906 Patent and the specific activities alleged to infringe.

83. Plaintiff is prohibited from recovering damages for activities alleged to have occurred before Plaintiff provides actual notice of the '985 Patent and the specific activities alleged to infringe.

84. The claims of the '906 Patent are unenforceable due to inequitable conduct and/or unclean hands. For this defense, Perot Systems incorporates by reference the allegations contained in Paragraphs 106 through 357 of its Counterclaims.

85. The claims of the '985 Patent are unenforceable due to inequitable conduct and/or unclean hands. For this defense, Perot Systems incorporates by reference the allegations contained in Paragraphs 358 through 387 of its Counterclaims.

86. Pursuant to 35 U.S.C. § 286, Plaintiff's claims are barred in whole or in part for all events occurring more than six years prior to the filing of this action.

87. The Plaintiff is not entitled to injunctive relief because any injury to the Plaintiff is not immediate or irreparable, and the Plaintiff has an adequate remedy at law.

88. Perot Systems hereby reserves the right to assert further additional defenses and/or counterclaims consistent with the facts discovered in this case.

### **COUNTERCLAIMS**

Perot Systems counterclaims against Plaintiff for declaratory judgment and alleges the following:

## **I. PARTIES**

89. Perot Systems is a corporation organized and existing under the laws of the State of Delaware, with its principal place of business at 2300 West Plano Parkway, Plano, Texas 75075-8499.

90. On information and belief, Plaintiff is a corporation organized and existing under the laws of Texas, with its principal place of business at 313 East Charnwood Street, Tyler, Texas 75701.

## **II. JURISDICTION AND VENUE**

91. The counterclaims herein include claims for declaratory judgment of patent non-infringement and patent invalidity. Thus, jurisdiction is proper under the Federal Declaratory Judgment Act, 28 U.S.C. §§ 2201 and 2202, the Patent Laws of the United States, 35 U.S.C. § 1 *et seq.*, concerning actions related to patents, and 28 U.S.C. §§ 1331, 1338, and 2201(a).

92. Venue is proper in this Court under 28 U.S.C. § 1391.

93. This Court has personal jurisdiction over Plaintiff by virtue of Plaintiff's filing of the Complaint against Perot Systems in this Court.

## **III. GENERAL ALLEGATIONS**

94. On October 6, 2009, Plaintiff filed the Complaint naming Perot Systems as a defendant.

95. Plaintiff has alleged that Perot Systems infringes the '906 Patent.

96. Plaintiff has alleged that Perot Systems infringes the '985 Patent.

97. An actual and justiciable case or controversy has arisen and presently exists between Plaintiff and Perot Systems to which Perot Systems desires a declaration of rights pursuant to 28 U.S.C. § 2201(a) and Rule 57 of the Federal Rules of Civil Procedure.

**IV. DECLARATORY RELIEF REGARDING  
NON-INFRINGEMENT OF THE '906 Patent**

98. Perot Systems does not and has not infringed (literally or by equivalents), contributed to the infringement of, induced infringement of, or willfully infringed any valid claim of the '906 Patent.

99. Perot Systems is entitled to a declaratory judgment that it is not infringing any valid claim of the '906 Patent literally or under the Doctrine of Equivalents, that it is not infringing any valid claim of the '906 Patent contributorily, that it is not inducing infringement of any valid claim of the '906 Patent, and that it is not willfully infringing any valid claim of the '906 Patent. Perot Systems is further entitled to a declaratory judgment that it has not previously infringed any valid claim of the '906 Patent literally or under the Doctrine of Equivalents, that it has not previously infringed any valid claim of the '906 Patent contributorily, that it has not previously induced infringement of any valid claim of the '906 Patent, and that it has not willfully infringed any valid claim of the '906 Patent.

**V. DECLARATORY RELIEF REGARDING  
NON-INFRINGEMENT OF THE '985 Patent**

100. Perot Systems does not and has not infringed (literally or by equivalents), contributed to the infringement of, induced infringement of, or willfully infringed any valid claim of the '985 Patent.

101. Perot Systems is entitled to a declaratory judgment that it is not infringing any valid claim of the '985 Patent literally or under the Doctrine of Equivalents, that it is not infringing any valid claim of the '985 Patent contributorily, that it is not inducing infringement of any valid claim of the '985 Patent, and that it is not willfully infringing any valid claim of the '985 Patent. Perot Systems is further entitled to a declaratory judgment that it has not previously

infringed any valid claim of the '985 Patent literally or under the Doctrine of Equivalents, that it has not previously infringed any valid claim of the '985 Patent contributorily, that it has not previously induced infringement of any valid claim of the '985 Patent, and that it has not willfully infringed any valid claim of the '985 Patent.

**VI. DECLARATORY RELIEF REGARDING  
INVALIDITY OF THE '906 Patent**

102. The claims of the '906 Patent are invalid for failure to comply with one or more of the requirements of Title 35 of the United States Code, including, without limitation, 35 U.S.C. §§ 41, 101, 102, 103, 112, 115, 116 and/or 256.

103. Perot Systems is entitled to a declaratory judgment that the claims of the '906 Patent are invalid.

**VII. DECLARATORY RELIEF REGARDING  
INVALIDITY OF THE '985 Patent**

104. The claims of the '985 Patent are invalid for failure to comply with one or more of the requirements of Title 35 of the United States Code, including, without limitation, 35 U.S.C. §§ 41, 101, 102, 103, 112, 115, 116 and/or 256.

105. Perot Systems is entitled to a declaratory judgment that the claims of the '985 Patent are invalid.

**VIII. DECLARATORY RELIEF REGARDING  
UNENFORCEABILITY OF THE '906 Patent**

106. An actual controversy exists between the parties with respect to the unenforceability of the '906 Patent.

107. Although Eolas alleges in its Complaint that the '906 Patent was duly and legally issued by the United States Patent and Trademark Office after full and fair examination, each and

every claim of the '906 Patent is unenforceable due to inequitable conduct before the United States Patent and Trademark Office.

**A. Overview**

**1. Doyle had a duty of candor and good faith in dealing with the Patent Office**

108. Michael D. Doyle ("Doyle") is one of the named inventors of the patents-in-suit, U.S. Patent Nos. 5,838,906 and 7,599,985.

109. As a named inventor, Doyle had a duty of candor and good faith in dealing with the United States Patent and Trademark Office ("the Patent Office") during prosecution of the '906 and '985 Patents.

110. Doyle's duty of candor and good faith also existed during the reexaminations of the '906 Patent.

111. The duty of candor and good faith owed by Doyle included a duty to disclose to the Patent Office all information known to that individual to be material to patentability as defined in 37 C.F.R. § 1.56.

**2. Doyle had a financial incentive to deceive the Patent Office**

112. Doyle had a financial incentive to deceive the Patent Office during prosecution of the '906 Patent, during the reexaminations of the '906 Patent, and during the prosecution of the '985 Patent.

113. Doyle worked at the University of California, San Francisco when he allegedly conceived of the inventions claimed in the '906 and '985 Patents.

114. The '906 and '985 Patents are owned by The Regents of the University of California.

115. Doyle and his co-inventors are entitled to receive a portion of any royalties paid to The Regents of the University of California related to the '906 and/or '985 Patents.

116. Doyle is a founder of the plaintiff in this action, Eolas Technologies Incorporated ("Eolas").

117. Doyle quit his job to found Eolas, and personally invested time and money in Eolas.

118. Doyle has had a financial interest in Eolas since at least August 21, 1995.

119. On or about August 21, 1995, Eolas acquired rights to the patent application that matured into the '906 Patent.

120. Doyle was personally involved in the prosecution of the '906, the reexaminations of the '906 Patent, and the prosecution of the '985 Patent at the same time that he had a financial interest in Eolas and a financial interest in any royalties on the '906 and/or '985 Patents paid to The Regents of the University of California.

**3. Doyle breached his duty of candor and good faith with an intent to deceive the Patent Office**

121. As explained in more detail below, Doyle breached his duty of candor and good faith in dealing with the Patent Office. Doyle failed to disclose material information and made affirmative misrepresentations of material facts. Doyle did so with knowledge of the information he withheld, with knowledge of the falsity of his misrepresentations, and with the specific intent to deceive the Patent Office. The circumstances of Doyle's actions confirm an intent to deceive the Patent Office.

**B. Doyle failed to disclose material information related to the ViolaWWW browser**

122. As explained in more detail below, Doyle breached his duty of candor and good faith in dealing with the Patent Office by failing to disclose material information related to the

ViolaWWW browser. Doyle did so with knowledge of the information he withheld and with the specific intent to deceive the Patent Office. The circumstances of Doyle's actions confirm an intent to deceive the Patent Office.

123. As explained in more detail below, the ViolaWWW browser was material to the patentability of all the claims of the '906 Patent because it disclosed limitations that the Patent Office believed were missing in the prior art, including interactivity *embedded within* the webpage (as opposed to a separate window), *automatic* invocation of the interactivity (as opposed to requiring a mouse click to enable the interactivity), and use of a separate executable application (as opposed to a script). Doyle knew that the ViolaWWW browser disclosed these limitations, yet he withheld this information from the Patent Office at the same time that he argued to the Patent Office that these limitations were missing from the prior art.

1. **Doyle knew about the ViolaWWW browser before the application for his '906 Patent was filed on October 17, 1994**

124. The application for the '906 Patent was filed on October 17, 1994.

125. Thus the critical date for purposes of 35 U.S.C. § 102(b) was October 17, 1993. Any printed publication describing the claimed invention, or any public use of the claimed invention in the United States, before October 17, 1993, would be an absolute bar to patentability.

126. Doyle knew before the application for the '906 Patent was filed that an individual in Northern California named Pei Wei had developed a browser called "ViolaWWW" before the critical date of October 17, 1993.

127. On May 20, 1994, David Raggett sent an e-mail to Doyle regarding object level embedding in web browsers. In this email, Raggett advised Doyle that he "might want to look at

Viola which [Raggett] seem[s] to remember takes advantage of the tk tool kit to provide a certain level of embedding.”

128. Raggett further advised Doyle that he could “find a pointer to Viola off the CERN WWW project page.”

129. Thus by May 20, 1994 — several months before the application for the ‘906 Patent was filed — Doyle knew about Pei Wei’s ViolaWWW browser.

130. Doyle learned even more about the ViolaWWW browser before the application for the ‘906 Patent was filed.

131. On August 30, 1994, at approximately 11:15 p.m. California time, Doyle posted a “Press Release” to the publicly-accessible VRML e-mail distribution list that included the following statements:

Researchers at the U. of California have created software for embedding interactive program objects within hypermedia documents. Previously, object linking and embedding (OLE) has been employed on single machines or local area networks using MS Windows -TM-. This UC software is the first instance where program objects have been embedded in documents over an open and distributed hypermedia environment such as the World Wide Web on the Internet.

132. On August 31, 1994, at approximately 6:52 p.m. California time, Pei Wei posted a response on the publicly-accessible VRML e-mail distribution list that included the following statements: “I don’t think this is the first case of program objects embedded in docs and transported over the WWW. ViolaWWW has had this capabilities for months and months now.”

133. Pei Wei’s response included a link to an FTP site where anyone “interested in learning more about how ViolaWWW does this embedded objects thing can get a paper on it.”

134. The paper cited by Pei Wei was entitled “A Brief Overview of the VIOLA Engine, and its Applications.”

135. The paper cited by Pei Wei was dated August 16, 1994 — over two months before the application for the '906 Patent was filed.

136. The paper cited by Pei Wei included the following statements and graphics:

### **Embedding mini applications**

Viola's language and toolkit allows ViolaWWW to render documents with embedded viola objects. Although the viola language is not part of the World Wide Web standard (yet?), having this capability provides a powerful extension mechanism to the basic HTML.

For example, if the HTML's input-forms do not do exactly what you want, you have the option to build a mini customized inputform application. And it could have special scripts to check for the validity of the entered data before even making a connection to the server.

Or, if your document needs to show data that is continuously updated, you could build a small application such as this which display the CPU load of a machine. Note that only the graph field is continuously updated, but not the rest of the document.

Other possible applications include front-ends to the stock market quotes, new wire updates, tele-video style service, etc.

Here's another example of a mini interactive application that is embedded into a HTML document. It's a chess board in which the chess pieces are actually active and movable. And, illegal moves can be checked and denied straight off by the intelligence of the scripts in the application. Given more work, this chess board application can front-end a chess server, connected to it using the socket facility in viola.

## A Chess Board

This is a demo a viola "application" (the chess board) being retrieved via HTTP, instantiated, and plugged into this HTML document.

What follows is a screendump of a demo of an embedded viola application that lets readers of this HTML page communicate by typing or drawing. Like the chess board application above, this chat application can stand-alone (and have nothing to do with the World Wide Web), or be embedded into a HTML document.

By the way, to make this possible, a multi-threaded/persistent server was written to act as a message relay (and to handle HTTP as well).

This next mini application front-ends a graphing process (on the same machine as the viola process). An important thing to note is that, like all the other document-embeddable mini applications shown, no special modification to the viola engine is required for ViolaWWW to support them. All the bindings are done via the viola language, provided that the necessary primitives are available in the interpreter, of course.

Put it another way, because of the scripting capability, the ViolaWWW browser has become very flexible, and can take on many new features dynamically. C-code patches and recompilation of the browser can frequently be avoided.

This attribute can be very important for several reasons. It keeps the size of the core software small, yet can grow dynamically as less frequently used features are occasionally used, or as new accessories/components are added.

Such new accessories can be as simple as little applets that accompany documents, or conceivably as complicated as a news or mail reader. An analogy is how Emacs's programming environment allows that text editor to become much more than just a text editor.

Not only can mini applications be embedded inside of documents, they can even be plugged into the ViolaWWW's "toolbar".

The following picture shows a "bookmark tool" that acts as a mini table of contents for the page. In this case, the bookmark is linked to the document (by using the <LINK> tag of HTML 3.0), and the bookmark will appear and disappear with the document.

One can imagine many plug-in accessories/applets/tools possible with this facility. Like, a self guiding slideshow tool. Or, document set specific navigational tools/icons that are not pasted onto the page so that the navigational icons don't scroll away from view. Etc.

137. “Doyle downloaded and read the paper.” 399 F.3d 1325, 1330 (Fed. Cir. 2005).

138. On August 31, 1994, at approximately 9:06 p.m. California time, Doyle responded to Pei Wei’s statement at approximately 6:52 p.m. that “I don’t think this is the first case of program objects embedded in docs and transported over the WWW. ViolaWWW has had this capabilities for months and months now.” Doyle responded by asking Pei Wei, “How many months and months? We demonstrated our technology in 1993.”

139. On August 31, 1994, at approximately 11:16 p.m. California time, Pei Wei responded to the message that Doyle had sent at approximately 9:06 p.m. Pei Wei’s response included the following statements:

Definitely by May 8, 1993 we had demonstrated that plotting demo (the very one shown in the viola paper) to visitors from a certain computer manufacturer... This demo was memorable because someone and I at ORA had lost sleep the night before the meeting, in order to cook up that particular plotting demo :) We had to show something cool.

That demo wasn't very hard to do because by that time the basic capability was already in place for violaWWW to fetch viola objects over HTTP (or whatever) and plug them into documents. Of course, our wire-frame plotting demo isn't anywhere as comprehensive as yours. But, the point was that there was a way to

embed programmable & interactive objects into HTML documents.

140. On information and belief, when Pei Wei referred to the “plotting demo (the very one shown in the viola paper),” he was referring to the plot of the fighter jet shown above in the window titled “XPlot.”

141. When Pei Wei referred to a demonstration “by May 8, 1993” to “visitors from a certain computer manufacturer,” he was referring to a demonstration of the plotting demo to Karl Jacob and James Kempf from Sun Microsystems on May 7, 1993. This demonstration took place in Northern California. There was no limitation, restriction or obligation of secrecy on Karl Jacob or James Kempf.

142. The Federal Circuit has held that “Wei’s May 7, 1993 demonstration to two Sun Microsystems employees without confidentiality agreements was a public use under [35 U.S.C. § 102(b)].” 399 F.3d 1325, 1335 (Fed. Cir. 2005).

143. On August 31, 1994, at approximately 11:13 p.m. California time, Doyle responded again to the message that Pei Wei had sent at approximately 6:52 p.m.

144. Doyle’s response was sent after Doyle had read Pei Wei’s paper about the ViolaWWW browser dated August 16, 1994.

145. Doyle’s response included the following statements: “Pei is mistaken on two counts, as I describe below . . . . As Pei’s paper on Viola states, that package did not support what it calls ‘embeddable program objects’ until 1994. . . . Furthermore, Viola merely implements an internal scripting language . . . .”

146. On August 31, 1994, at approximately 11:36 p.m. California time, Doyle responded to the message that Pei Wei had sent at approximately 11:16 p.m. Doyle’s response

included the following statements: “Out of curiosity, did you publicly demonstrate this or publish any results before 1994?”

147. On September 1, 1994, at approximately 12:08 a.m. California time, Pei Wei responded to the message that Doyle had sent at approximately 11:13 p.m.

148. Pei Wei’s message at approximately 12:08 a.m. was also responsive to the message that Doyle had sent at approximately 11:36 p.m.

149. Pei Wei’s message to Doyle at 12:08 a.m. included the following statements:

Well. Viola’s model was \*demonstrated\* in 1993, \*released\* freely in 1994. . . . And, as for the plotting demo, it actually is really just a front-end that fires up a back-end plotting program (and the point is that that back-end could very well be running on a remote super computer instead of the localhost). For that demo, there is a simple protocol such that the front-end app could pass an X window ID to the back-end, and the back-end draws the graphics directly onto the window violaWWW has opened for it.

150. Doyle deleted from his computer his emails with Pei Wei on August 31 and September 1, 1994, and the copy of the Viola paper dated August 16, 1994, that he had downloaded and read. Doyle kept on his computer other emails from that timeframe, however.

151. Doyle was living in Northern California on August 31, 1994, when he exchanged messages with Pei Wei about the ViolaWWW browser.

152. Pei Wei was living in Northern California on August 31, 1994, when he exchanged messages with Doyle about the ViolaWWW browser.

153. There was no limitation, restriction or obligation of secrecy on the recipients of Pei Wei’s messages on August 31 and September 1, 1994, about the ViolaWWW browser.

154. There was no limitation, restriction or obligation of secrecy on the readers of Pei Wei’s paper about the ViolaWWW browser dated August 16, 1994.

155. On October 17, 1994, the application for the '906 Patent was filed. Doyle was among those named as inventors.

156. The application for the '906 Patent discloses the Mosaic browser and the Cello browser, but not the ViolaWWW browser.

157. On or about November 3, 1994, an Information Disclosure Statement ("IDS") was submitted in the application for the '906 Patent that cited several pieces of prior art, but the IDS did not identify the ViolaWWW browser.

158. On November 22, 1994, Doyle signed a declaration under penalty of perjury that included the following statements: "I believe I am . . . an original, first and joint inventor . . . of the subject matter which is claimed and for which a patent is sought . . . the specification of which . . . was filed on October 17, 1994 as Application Serial No. 08/324,443. . . . I acknowledge the duty to disclose information which is material to the examination of this application in accordance with Title 37, Code of Federal Regulations, Section 1.56."

159. No disclosure about the ViolaWWW browser was ever provided to the Patent Office during prosecution of application number 08/324,443, which matured into the '906 Patent.

**2. Doyle was reminded about the ViolaWWW browser in 1995 during prosecution of the '906 Patent**

160. Doyle was reminded about Pei Wei and the ViolaWWW browser in 1995, during prosecution of the '906 Patent, but still no disclosure about the ViolaWWW browser was provided to the Patent Office.

161. On August 21, 1995, at approximately 11:42 a.m. California time, Doyle posted a "Press Release" to the publicly-accessible WWW-talk e-mail distribution list. Doyle's post included the following statements: "Eolas Technologies Inc. announced today that it has

completed a licensing agreement with the University of California for the exclusive rights to a pending patent covering the use of embedded program objects, or ‘applets,’ within World Wide Web documents.”

162. On August 21, 1995, at approximately 12:54 p.m. California time, Pei Wei responded on the publicly-accessible WWW-talk e-mail distribution list to Doyle’s “Press Release.” Pei Wei’s response included the following statements: “[F]or the record, I just want to point out that the ‘technology which enabled Web documents to contain fully-interactive “inline” program objects’ was existing in ViolaWWW and was \*released\* to the public, and in full source code form, even back in 1993... Actual conceptualization and existence occurred before ‘93.”

163. On August 21, 1995, at approximately 1:14 p.m. California time, Doyle responded to the message Pei Wei had sent at approximately 12:54 p.m. Doyle’s response included the following statements: “We’ve had this discussion before (last September, remember?). You admitted then that you did NOT release or publish anything like this before the Eolas demonstrations.”

164. On August 21, 1995, at approximately 4:09 p.m. California time, Pei Wei responded to the message that Doyle had sent at approximately 1:14 p.m. Pei Wei’s response included the following statements:

Please carefully re-read my letter to you... I said Viola was demonstrated in smaller settings, but before your demo. The applets stuff was demo’ed to whomever wanted to see it and had visited our office at O’Reilly & Associates (where I worked at the time).

This is what I wrote on the VRML list:

.....

- > Definitely by May 8, 1993 we had demonstrated that plotting demo
- > (the very one shown in the viola paper) to visitors from a certain
- > computer manufacturer... This demo was memorable because someone and I
- > at ORA had lost sleep the night before the meeting, in order to cook up
- > that particular plotting demo :) We had to show something cool.

That date (May 93), at least, predates your demo if I'm not mistaken. Then around August 93, it was shown to a bunch of attendees at the first Web Conference in Cambridge. . . .

. . . .

If you're talking about interactive apps \*specifically\* on the web, ie applets in-lined into HTML documents etc., and with bi-directional communications, then look at ViolaWWW as it existed around late '92 early '93.

165. On information and belief, when Pei Wei referred to the “plotting demo (the very one shown in the viola paper),” he was referring to the plot of the fighter jet shown above in the window titled “XPlot.”

166. On information and belief, when Pei Wei referred to a demonstration “by May 8, 1993,” he was referring to the demonstration of the plotting demo to two Sun Microsystems employees that the Federal Circuit has held “was a public use under [35 U.S.C. § 102(b)].” 399 F.3d 1325, 1335 (Fed. Cir. 2005).

167. When Pei Wei referred to the “first Web Conference in Cambridge” “around August 1993,” he was referring to the “World-Wide Web Wizards Workshop” held in Cambridge, Massachusetts on July 28–30, 1993.

168. People attending the Wizards workshop included Tim Berners-Lee, Marc Andreessen, Eric Bina, Dale Dougherty, Scott Silvey, and Pei Wei.

169. Tim Berners-Lee and Dale Dougherty were the organizers of the Wizards workshop.

170. Dale Dougherty worked at O'Reilly & Associates in Northern California.

171. In 1992, Dale Dougherty learned about Viola and recruited Pei Wei to join O'Reilly & Associates. Pei Wei's job at O'Reilly & Associates was to continue developing the ViolaWWW browser.

172. Scott Silvey worked with Pei Wei at O'Reilly & Associates in Northern California.

173. When Pei Wei wrote "This demo was memorable because someone and I at ORA had lost sleep the night before the meeting, in order to cook up that particular plotting demo," the other person he was referring to was Scott Silvey.

174. Tim Berners-Lee is the person generally attributed to be the inventor of the World Wide Web.

175. Marc Andreessen and Eric Bina were the authors of Mosaic, a popular browser for the World Wide Web created at the National Center for Supercomputing Applications (NCSA) at the University of Illinois at Urbana-Champaign.

176. Marc Andreessen and Eric Bina went on to found Netscape, the manufacturer of another popular browser for the World Wide Web.

177. Pei Wei and Scott Silvey demonstrated the ViolaWWW browser and its ability to automatically invoke interactive objects embedded within a webpage using the "VOBJF" tag to at least Marc Andreessen and Tim Berners-Lee at the Wizards workshop in Cambridge, Massachusetts in July 1993 — over one year before the application for the '906 Patent was filed.

178. There was no limitation, restriction or obligation of secrecy on anyone at the Wizards workshop.

179. Pei Wei's demonstration at the Wizards workshop of the ViolaWWW browser and its ability to automatically invoke interactive objects embedded within a webpage using the "VOBJF" tag was a public use under 35 U.S.C. § 102(b).

180. Despite Pei Wei's communications to Doyle repeatedly providing evidence that the ViolaWWW browser was material prior art under 35 U.S.C. § 102(b), Doyle never disclosed the ViolaWWW browser to the Patent Office during prosecution of application number 08/324,443, which matured into the '906 Patent.

181. Instead, Doyle deleted from his computer his emails with Pei Wei on August 21, 1995. Doyle kept on his computer other emails from that timeframe, however.

**3. In 1998, during prosecution of the '906 Patent, Doyle collected additional information about the ViolaWWW browser**

182. In 1998, during prosecution of the '906 Patent, Doyle collected additional information about the ViolaWWW browser, but he still did not disclose any information about the ViolaWWW browser to the Patent Office, as explained in more detail below.

183. During prosecution of the '906 Patent, Doyle maintained a folder called "Viola stuff."

184. The "Viola stuff" folder included a printout of Pei Wei's message to Doyle on August 31, 1994, at approximately 6:52 p.m. California time, in which Pei Wei told Doyle, "I don't think this is the first case of program objects embedded in docs and transported over the WWW. ViolaWWW has had this capabilities for months and months now."

185. The "Viola stuff" folder included a printout of Doyle's message to Pei Wei on August 31, 1994, at approximately 11:36 p.m. California time, in which Doyle asked Pei Wei, "Out of curiosity, did you publicly demonstrate this or publish any results before 1994?"

186. The “Viola stuff” folder included a printout from the URL <http://www.w3.org/History/1994/WWW/WorkingNotes/>. This webpage has a heading for the “WWWizardsWorkshop” “Cambridge, Mass, July 1993” and includes links to “Announcement,” “Agenda,” and “Photos of attendees.”

187. “WWWizardsWorkshop” refers to the World-Wide Web Wizards Workshop held in Cambridge, Massachusetts on July 28–30, 1993, that Pei Wei attended.

188. The “Announcement” link links to a webpage at [http://www.w3.org/History/1994/WWW/WorkingNotes/1993\\_Workshop/Announcement.html](http://www.w3.org/History/1994/WWW/WorkingNotes/1993_Workshop/Announcement.html) that states that “Interactive objects” would be discussed at the Wizards workshop.

189. The “Agenda” link links to a webpage at [http://www.w3.org/History/1994/WWW/WorkingNotes/1993\\_Workshop/Agenda.html](http://www.w3.org/History/1994/WWW/WorkingNotes/1993_Workshop/Agenda.html) that states that “Interactive objects” was on the agenda for discussion at the Wizards workshop.

190. The webpages for the Wizards workshop corroborate Pei Wei’s statement to Doyle on August 21, 1995, that the plotting demo described in the Viola paper dated August 16, 1994, was “shown to a bunch of attendees at the first Web Conference in Cambridge” “around August 93” — over one year before the application for the ‘906 Patent was filed.

191. The “Viola stuff” folder included a printout of a webpage with a link to the source code for viola-2.1.2, archived on September 2, 1993 — over one year before the application for the ‘906 Patent was filed.

192. The “Viola stuff” folder included a printout of a webpage with the “README” file for viola-2.1.2. The date at the top of the “README” file is July 27, 1992. The “README” file includes instructions for building the binary code for the “viola” program, and instructions for running the ViolaWWW browser. The “README” file states at the bottom:

Comments and questions:

Please send WWW specific bugs to [www-bugs@info.cern.ch](mailto:www-bugs@info.cern.ch), general comments to [www-talk@info.cern.ch](mailto:www-talk@info.cern.ch), and anything to [wei@xcf.Berkeley.EDU](mailto:wei@xcf.Berkeley.EDU).

Pei Y. Wei  
[wei@xcf.berkeley.edu](mailto:wei@xcf.berkeley.edu)

193. The “Viola stuff” folder included a printout of a message that Pei Wei had sent to the publicly-accessible WWW-talk e-mail distribution list on January 28, 1994, that included the following statements: “Right now, the ViolaWWW that is under development can embed viola objects/applications inside of HTML documents.”

194. The “Viola stuff” folder included a printout of a message that Pei Wei had sent to the publicly-accessible WWW-talk e-mail distribution list on February 25, 1994, that included the following statements:

The new ViolaWWW is now available for ftp'ing. It's beta and feedback is very welcomed. The README file follows...

=====  
ViolaWWW, Version 3.0 Beta

Feb 23 1994

=====  
ViolaWWW is an extensible World Wide Web hypermedia browser for XWindows.

....

Notable features in the new ViolaWWW

....

\* Embeddable in-document and in-toolbar programmable viola objects. A document can embed mini viola applications (ie: a chess board), or can cause mini apps to be placed in the toolbar.

....

Availability

-----  
Source and binary can be found in <ftp://ora.com/pub/www/viola>.  
Sparc binary is supplied.

....

Pei Y. Wei (wei@ora.com)  
O'Reilly & Associates, Inc.

195. The "Viola stuff" folder included a printout from the URL  
<<http://xcf.berkeley.edu/ht/projects/viola/>>. The printout included the following statements:

ViolaWWW, Version 3.1 Beta Mar 23 1994  
=====

ViolaWWW is an extensible World Wide Web hypermedia  
browser for XWindows.

....

Notable features in the new ViolaWWW  
-----

....

\* Embeddable in-document and in-toolbar programmable viola  
objects. A document can embed mini viola applications (ie: a  
chess board), or can cause mini apps to be placed in the toolbar.

....

Availability  
-----

Source and binary can be found in <ftp://ora.com/pub/www/viola>.  
Sparc binary is supplied.

....

Pei Y. Wei (wei@ora.com)  
O'Reilly & Associates, Inc.

196. The “Viola stuff” folder included a printout from the URL <<http://xcf.berkeley.edu/ht/projects/viola/docs/viola/>>. One of the files listed in the printout is named “plotDemo.html”.

197. The “Viola stuff” folder included a printout from the URL <<http://xcf.berkeley.edu/ht/projects/viola/docs/objs/>>. One of the files listed in the printout is named “plot.v”.

198. On information and belief, the following is a screenshot of the ViolaWWW browser after parsing the file plotDemo.html:

199. On information and belief, the files plotDemo.html and plot.v include code for the plotting demo described in the Viola paper dated August 16, 1994.

200. On information and belief, the file plotDemo.html specifies the location of the file plot.v, which in turn specifies the location of a separate executable application named vplot.

201. Pei Wei had told Doyle on August 31, 1994 how the plotting demo worked: “[A]s for the plotting demo, it actually is really just a front-end that fires up a back-end plotting program (and the point is that that back-end could very well be running on a remote super computer instead of the localhost). For that demo, there is a simple protocol such that the front-end app could pass an X window ID to the back-end, and the back-end draws the graphics directly onto the window violaWWW has opened for it.”

202. Pei Wei had told Doyle on August 31, 1994 and again on August 21, 1995 that the plotting demo described in the Viola paper dated August 16, 1994, was the “very one” demonstrated “to visitors from a certain computer manufacturer” by May 8, 1993.

203. On information and belief, when Pei Wei referred to a demonstration “by May 8, 1993,” he was referring to the demonstration of the plotting demo to two Sun Microsystems employees that the Federal Circuit has held “was a public use under [35 U.S.C. § 102(b)].” 399 F.3d 1325, 1335 (Fed. Cir. 2005).

204. Thus, during prosecution of the ‘906 Patent, Doyle knew about Pei Wei’s demonstration of the plotting demo that the Federal Circuit has held was a “public use” under 35 U.S.C. § 102(b); Doyle knew how the plotting demo worked; and Doyle had access to the code for that plotting demo.

205. During prosecution of the '906 Patent, Doyle printed webpages containing information about a talk that Pei Wei gave at Stanford University in Northern California in September 1994.

206. The webpages that Doyle printed included the following statements and graphic:

**WWW Browsers: Extensibility Issues**

**Pei Wei, O'Reilly & Associates**

**Stanford Computer Forum WWW Workshop - September 20-21, 1994**

....

**Extensibility in WWW Browsers**

The WorldWideWeb is a powerful medium which has many applications beyond just publishing static documents. It is certainly an interface to the space of "documents." But already, with established features such as input-forms and server-side scripting, we see that the web is also increasingly becoming an interface to the space of what is traditionally called "applications."

....

In this talk I'll describe a few possible approaches for a browser to gain more flexibility, and to briefly describe one particular approach as implemented by a system known as ViolaWWW.

....

**Possible Ways to Extend Browsers**

We already do "extend" browsers with things like "external viewers." But there's not a very good integration with the browser. Ideally those external viewers should be rendering inplace inside the document, and be working together with the browser, be tightly integrated with the browser and other parts...

....

**Work at O'Reilly & Associates: VIOLA-WWW**

....

This is the Viola system that is being developed at O'Reilly and Associates. This system has the following interesting characteristics:

....

Three, program objects can be embedded into documents and the toolbar. ....

....

The next example is a front-end application to a backend. And the back-end is what actually does the computation and the drawing.

....

207. There was no limitation, restriction or obligation of secrecy on anyone attending the talk that Pei Wei gave at Stanford University in September 1994.

208. The plotting demo described in the talk at Stanford University in September 1994 is the same plotting demo described in the Viola paper dated August 16, 1994.

209. Pei Wei had told Doyle on August 31, 1994 and again on August 21, 1995 that the plotting demo described in the Viola paper dated August 16, 1994, was the “very one” demonstrated “to visitors from a certain computer manufacturer” by May 8, 1993.

210. When Pei Wei referred to a demonstration “by May 8, 1993,” he was referring to the demonstration of the plotting demo to two Sun Microsystems employees that the Federal Circuit has held “was a public use under [35 U.S.C. § 102(b)].” 399 F.3d 1325, 1335 (Fed. Cir. 2005).

211. Thus, during prosecution of the ‘906 Patent, Doyle was repeatedly confronted with evidence that the ViolaWWW browser was material prior art under 35 U.S.C. § 102(b), yet Doyle never disclosed the ViolaWWW browser to the Patent Office during prosecution of application number 08/324,443, which matured into the ‘906 Patent.

**4. The ViolaWWW browser was material to the patentability of the ‘906 Patent**

212. The ViolaWWW browser was material to the patentability of the claimed inventions in the ‘906 Patent.

213. There is a remarkable similarity between the ViolaWWW browser and the preferred embodiment of the ‘906 Patent:

**ViolaWWW**

**Fig. 9 of U.S. Patent No. 5,838,906**

Both the ViolaWWW browser (on the left) and the preferred embodiment of the '906 Patent (on the right) enabled a user to interact with a 3-dimensional image embedded in the middle of a webpage. In the ViolaWWW screenshot above, there are three slide controls to the right of the embedded image that move up and down; these rotate the embedded image on the X, Y, and Z axes. Similarly, in the preferred embodiment of the '906 Patent shown above, box 354 has three slide controls to the right of the embedded image that rotate the image on the X, Y, and Z axes. Thus, ViolaWWW, like the '906 Patent, teaches a browser capable of displaying embedded interactive objects.

214. The Manual of Patent Examining Procedure in force at the time the application for the '906 Patent was filed included the following statements:

Materiality is defined in 37 CFR 1.56(b) and discussed herein at MPEP § 2001.05. In addition to prior art such as patents and publications, 37 CFR 1.56 includes, for example, information on *possible prior public uses*, sales, offers to sell, derived knowledge,

**prior invention by another**, inventorship conflicts, and the like.  
[emphasis in bold added]

215. The Manual of Patent Examining Procedure in force today contains similar language:

Materiality is defined in 37 CFR 1.56(b) and discussed herein at MPEP § 2001.05. In addition to prior art such as patents and publications, 37 CFR 1.56 includes, for example, information on >enablement, <**possible prior public uses**, sales, offers to sell, derived knowledge, **prior invention by another**, inventorship conflicts, and the like.>“Materiality is not limited to prior art but embraces any information that a reasonable examiner would be substantially likely to consider important in deciding whether to allow an application to issue as a patent.” *Bristol-Myers Squibb Co. v. Rhone-Poulenc Rorer, Inc.*, 326 F.3d 1226, 1234, 66 USPQ2d 1481, 1486 (Fed. Cir. 2003) (emphasis in original) (finding article which was not prior art to be material to enablement issue).< [emphasis in bold added]

216. The Federal Circuit has confirmed that the ViolaWWW browser was material to the patentability of the claimed inventions in the ‘906 Patent.

217. The Federal Circuit held that a reasonable jury could find at least claims 1 and 6 of the ‘906 Patent anticipated by the ViolaWWW browser under 35 U.S.C. § 102(a), (b), and/or (g). *See* 399 F.3d 1325, 1329, 1332–35 (Fed. Cir. 2005).

218. The Federal Circuit held that “Wei’s May 7, 1993 demonstration to two Sun Microsystems employees without confidentiality agreements was a public use under [35 U.S.C. § 102(b)].” 399 F.3d 1325, 1335 (Fed. Cir. 2005).

219. The Federal Circuit held that a reasonable jury could find at least claims 1 and 6 of the ‘906 Patent obvious in light of the ViolaWWW browser. *See* 399 F.3d 1325, 1335 (Fed. Cir. 2005).

220. The Federal Circuit held that a district court could find that Doyle had committed inequitable conduct by failing to disclose the ViolaWWW browser to the Patent Office. *See* 399 F.3d 1325, 1336 (Fed. Cir. 2005).

221. The Patent Office has also confirmed that the ViolaWWW browser was material to the patentability of the claimed inventions in the '906 Patent.

222. On or about July 30, 2007, during the 2005 reexamination of the '906 Patent, the Patent Office rejected all claims of the '906 Patent as being anticipated by DX95, which includes a copy of the text found in Pei Wei's Viola paper dated August 16, 1994.

223. Pei Wei had told Doyle on August 31, 1994, about the Viola paper dated August 16, 1994 and Doyle had downloaded and read that paper the same day yet Doyle never disclosed the Viola paper to the Patent Office during the original examination of the '906 Patent.

224. The fact that Doyle may have conceived of the inventions claimed in the '906 Patent before August 16, 1994, does not render the Viola paper immaterial, because the Viola paper describes features of the ViolaWWW browser that existed before the invention date for the '906 Patent and/or over one year before the application for the '906 Patent was filed.

225. For example, the plotting demo described in the Viola paper dated August 16, 1994, was part of the ViolaWWW browser software that was demonstrated to Sun Microsystems on May 7, 1993 — over one year before the application for the '906 Patent was filed.

226. None of the claimed inventions in the '906 Patent was conceived before August 1993.

227. Thus, the ViolaWWW browser software that was described in the Viola paper dated August 16, 1994, and demonstrated to Sun Microsystems on May 7, 1993, also corroborates anticipation of the claimed inventions in the '906 Patent under 35 U.S.C. § 102(g).

228. Neither reexamination of the '906 Patent considered whether the claimed inventions were anticipated by "Wei's May 7, 1993 demonstration to two Sun Microsystems employees without confidentiality agreements" which the Federal Circuit has held was a "public use under [35 U.S.C. § 102(b)]." 399 F.3d 1325, 1335 (Fed. Cir. 2005).

229. In an ex parte reexamination, "[r]ejections will not be based on matters other than patents or printed publications, such as public use." *See* Manual of Patent Examining Procedure (MPEP) § 2258(I).

230. The Patent Office had the authority during the original examination of the '906 Patent to issue a rejection based on the "public use" provision of 35 U.S.C. § 102(b), but Doyle never disclosed to the Patent Office during that examination the evidence he had in his possession that the ViolaWWW browser was in "public use" more than one year before the application for the '906 Patent was filed.

231. On information and belief, the Patent Office would not have allowed the claims of the '906 Patent if Doyle had not engaged in inequitable conduct and instead had fulfilled his duty of candor and good faith in dealing with the Patent Office.

**5. Doyle intended to deceive the Patent Office during prosecution of the '906 Patent**

232. During prosecution of application number 08/324,443, which matured into the '906 Patent, Doyle withheld extensive evidence about the ViolaWWW browser.

233. For example, Doyle failed to disclose the following material information: the message from Raggett about the ViolaWWW browser and embedded objects; the communications with Pei Wei in 1994 about the ViolaWWW browser and the embedded interactive plotting demo that was in public use in May 1993; the Viola paper describing the ViolaWWW browser and the embedded interactive plotting demo that was in public use in May

1993; the communications with Pei Wei in 1995 about the ViolaWWW browser and the embedded interactive plotting demo that was in public use in May 1993 and again at the Wizards conference in July 1993; the contents of the “Viola stuff” folder that Doyle maintained, which included information about the Wizards conference in July 1993 and links to the ViolaWWW browser software, including source code for the embedded interactive plotting demo that was in public use in May 1993; and Pei Wei’s talk at Stanford in September 1994 about the embedded interactive plotting demo that was in public use in May 1993.

234. Doyle withheld information about the ViolaWWW browser with the specific intent to deceive the Patent Office.

235. Doyle had a financial interest in the patentability of the claimed inventions in the ‘906 Patent.

236. The ViolaWWW browser threatened the patentability of the claimed inventions in the ‘906 Patent, and thus threatened Doyle’s financial interests.

237. Doyle was personally involved in the prosecution of application number 08/324,443, which matured into the ‘906 Patent.

238. For example, Doyle signed a declaration on or about November 22, 1994, stating that he was an inventor and acknowledging his duty of candor and good faith in dealing with the Patent Office.

239. On or about January 2, 1997, Doyle signed a declaration that was submitted to the Patent Office in an effort to establish an earlier date of invention for the claims of the ‘906 Patent application.

240. On or about February 24, 1997, Doyle participated in an examiner interview in an effort to secure allowance of the claims of the ‘906 Patent application.

241. On or about May 27, 1997, Doyle signed a 28-page declaration (including an appendix) that was submitted to the Patent Office in an effort to establish himself as an “expert” in the subject matter of the claimed invention and to overcome various obviousness rejections to the claims of the ‘906 Patent application.

242. On or about October 29, 1997, Doyle signed another declaration that was submitted to the Patent Office in an effort to establish an earlier date of invention for the claims of the ‘906 Patent application.

243. On or about November 6, 1997, Doyle participated in another examiner interview in an effort to secure allowance of the claims of the ‘906 Patent application.

244. The prosecuting attorney for the ‘906 Patent lacked a technical degree in computer science or electrical engineering, and thus he relied on Doyle to understand and describe the subject matter of the claimed invention and the prior art.

245. Doyle personally reviewed and approved papers submitted to the Patent Office during prosecution of the ‘906 Patent.

246. Despite Doyle’s extensive personal involvement in the prosecution of application number 08/324,443, which matured into the ‘906 Patent, Doyle never disclosed the ViolaWWW browser to the Patent Office during that prosecution.

247. The circumstances of Doyle’s actions demonstrate an intent to deceive the Patent Office.

248. For example, during prosecution of the ‘906 Patent, Doyle made arguments for patentability that could not have been made if he had disclosed the ViolaWWW browser to the Patent Office.

249. On or about May 6, 1996, the Patent Office rejected several claims as being anticipated by the University of Southern California's "Mercury Project."

250. On or about August 6, 1996, a response to this rejection was submitted to the Patent Office.

251. Doyle personally reviewed and approved the response submitted to the Patent Office on or about August 6, 1996.

252. The response submitted on or about August 6, 1996, included the following statements:

The claimed combination is fundamentally different from the Mercury Project. In the claimed combination, the external object and executable object are embedded by reference in the HTML document and the object is displayed and processed within the same window where a portion of the original document is displayed. In the Mercury Project information is passed back to the server and a new document is generated and displayed. There is no display and processing the external object within the window in which a portion of the original document is displayed.

253. If Doyle had disclosed the ViolaWWW prior art to the Patent Office, it would not have been possible to distinguish the claims of the '906 Patent over the prior art on the basis that the prior art failed to disclose "display[ing] and processing the external object within the window in which a portion of the original document is displayed."

254. On or about March 26, 1997, the Patent Office rejected several claims as being obvious in light of "Khoyi et al. US Patent 5,206,951" in combination with other prior art.

255. On or about June 2, 1997, a response to this rejection was submitted to the Patent Office.

256. Doyle personally reviewed and approved the response submitted to the Patent Office on or about June 2, 1997.

257. The response submitted on or about June 2, 1997, included the following statements:

[T]here is no suggestion in Khoyi of modifying Mosaic so that an external application . . . is invoked to display and interactively process the object within the document window while the document is displayed by Mosaic in the same window.

258. If Doyle had disclosed the ViolaWWW prior art to the Patent Office, it would not have been possible to distinguish the claims of the '906 Patent over the prior art on the basis that the prior art failed to disclose "an external application [that] is invoked to display and interactively process the object within the document window while the document is displayed by [the browser] in the same window."

259. On or about August 25, 1997, the Patent Office rejected several claims as being obvious in light of "Koppolu et al. US Patent 5,581,686" in combination with other prior art.

260. On or about December 23, 1997, a response to this rejection was submitted to the Patent Office.

261. Doyle personally reviewed and approved the response submitted to the Patent Office on or about December 23 1997.

262. The response submitted on or about December 23, 1997, included the following statements:

[T]here is no disclosure or suggestion in Mosaic or Koppolu of automatically invoking an external application when an embed text format is parsed. Each of those references require user input, specifically clicking with a mouse pointer, to activate external applications to allow display and interaction with an external object.

263. If Doyle had disclosed the ViolaWWW prior art to the Patent Office, it would not have been possible to distinguish the claims of the '906 Patent on the basis that the prior art

failed to disclose “automatically invoking an external application when an embed text format is parsed.”

264. Doyle’s repeated use of arguments that could not have been made if Doyle had disclosed the ViolaWWW prior art demonstrates an intent to deceive the Patent Office.

265. Doyle’s intent to deceive the Patent Office is also demonstrated by comparing what he told an audience of web developers on or about March 27, 1995, to what he told the Patent Office on or about May 27, 1997.

266. On or about March 27, 1995, Doyle responded to a post on the publicly-accessible WWW-talk e-mail distribution list in which another author had written, under the heading “HotJava is here! And it \*rocks\*,” “It’s the most exciting thing to happen to the Web since viola.” Doyle’s response included the following statements: “If you take a close look at Java, you’ll realize that it bears a close similarity to Viola, since the ‘applets’ must be coded from a predefined language, downloaded and locally interpreted.”

267. On or about May 27, 1997, Doyle signed a declaration that was submitted to the Patent Office. Doyle’s declaration included the following statements:

The three exemplary products which incorporate the features of the claimed invention include Netscape Navigator 2.0 (or newer versions), Java, from Sun Microsystems, and ActiveX, from Microsoft. . . . [T]he success of these products is directly attributable to the claimed features of the invention.

. . . .

A good indicator that Sun Microsystems felt that enabling interactivity in Web pages was the key feature of Java is given in the first chapter of “Hooked on Java,” which was written by members of the original Java development team. They say, “With applets written in the Java programming language, Web users can design Web pages that include animation, graphics, games, and other special effects. **Most important, Java applets can make Web pages highly interactive.**”

This statement shows that the developers of Java felt that the most important feature of the Java technology was the ability of Java to allow an embed text format (the applet tag) within a Web document to be parsed by a Web browser to automatically invoke an external executable application to execute on the client workstation in order to display an external object and enable interactive processing of that object within a display window created at the applet tag's location within the hypermedia document being displayed in the browser-controlled window. The book's authors further emphasize the novelty and nonobviousness of this technology when they say, "Quite simply, Java-powered pages are Web pages that have Java applets embedded in them. They are also the Web pages with the coolest special effects around .... Remember, **you need a Java-compatible Web browser such as HotJava to view and hear these pages and to interact with them; otherwise, all you'll access is static Web pages** minus the special effects."

.....

The above citations, as well as the additional details given in Appendix A, provide ample evidence of the commercial success of products incorporating features of the claimed invention, as well as evidence of the widespread acclaim that these products have garnered for the technical innovations which the features of the claimed invention allowed them to provide. They further show that the successes of these products was a direct result of the features of the claimed invention, which they incorporated *through implementation of an embed text format that is parsed by a Web browser to automatically invoke an external executable application to execute on the client workstation in order to display an external object and enable interactive processing of that object within a display window created at the embed text format's location within the hypermedia document being displayed in the browser-controlled window.*

268. The declaration Doyle signed on or about May 27, 1997, made no mention of Viola or the ViolaWWW browser.

269. Doyle's disclosure of Java for purposes of commercial success, but not the ViolaWWW browser which Doyle knew was prior art that existed over one year before the application for the '906 Patent was filed, demonstrates an intent to deceive the Patent Office,

especially given Doyle's belief that Viola was similar to Java and that Java embodied the claimed invention.

**6. Between 1999 and 2003, Doyle learned about additional Viola prior art, and learned that an expert in the field believed that the plotting demo for the ViolaWWW browser anticipated the asserted claims of the '906 Patent**

270. Between 1999 and 2003, a third party disputed the validity of the '906 Patent.

271. On information and belief, Doyle personally guided Eolas through the litigation concerning the validity of the '906 Patent.

272. Throughout the litigation, the third party asserted that the plotting demo involving the ViolaWWW browser anticipated the asserted claims of the '906 Patent.

273. The plotting demo relied on by the third party to prove anticipation of the asserted claims of the '906 Patent was the same plotting demo that Pei Wei had repeatedly described to Doyle and which the Federal Circuit has held was a "public use" on May 7, 1993, 399 F.3d 1325, 1335 (Fed. Cir. 2005), and which Doyle himself came across from his own research into Viola.

274. In its contentions that the plotting demo involving the ViolaWWW browser anticipated the asserted claims of the '906 Patent, the third party specifically identified the VOBJF tag, the plot.v file, and the vplot executable application.

275. For example, on or about December 14, 2001, the third party served an expert report by Dr. John P.J. Kelly, that included the following statements:

When ViolaWWW encountered the tag <VOBJF>/usr/work/viola/apps/plot.v</VOBJF>, an embed text format specifying the location of an object, it looked in the specified path for at least part of the object, parsed the path, and automatically loaded the object into the program. The file (plot.v) also contained type information associated with the object, such as the name and location of an external executable application, vplot, that also was automatically invoked to enable display of and user interaction with the object at a location within a display area within the document being displayed in the browser-controlled window

corresponding to the location of the embed text format in the document. Subsequently, when the user interacted with the object, ViolaWWW sent messages to vplot based on the user input and received output from vplot, thus updating the display of the object.

276. Similarly, at a trial in 2003 concerning the validity of the '906 Patent, Dr. Kelly testified that the plotting demo involving the ViolaWWW browser anticipated the asserted claims of the '906 Patent, and he specifically identified the VOBJF tag, the plot.v file, and the vplot executable application for purposes of his anticipation analysis.

277. Pei Wei also testified at the trial in 2003 about the ViolaWWW browser and the plotting demo.

278. At the trial, exhibit DX34 included source code for the ViolaWWW browser dated May 12, 1993.

279. At the trial, exhibit DX37 included source code for the ViolaWWW browser dated May 27, 1993.

280. DX34 contains the code for the plotting demo that Pei Wei demonstrated to Sun Microsystems on May 7, 1993, in Northern California.

281. DX37 contains code for a plotting demo similar to the plotting demo in DX34.

282. On May 31, 1993, Pei Wei posted DX37 on a publicly-accessible Internet site and notified an engineer at Sun Microsystems that DX37 was available for downloading.

283. Under 35 U.S.C. § 102(b), DX37 was a "printed publication" over one year before the application for the '906 Patent was filed.

284. Dr. Kelly testified that the plotting demo in DX34 and DX37 anticipates the asserted claims of the '906 Patent. Dr. Kelly specifically identified the VOBJF tag, the plot.v file, and the vplot executable application for purposes of his anticipation analysis of DX37.

285. The Federal Circuit has held that Dr. Kelly's testimony would allow a reasonable jury to conclude that DX37 anticipates at least claims 1 and 6 of the '906 Patent. *See* 399 F.3d 1325, 1335 (Fed. Cir. 2005).

286. Neither Dr. Kelly nor the third party ever relied on anything other than the plotting demo involving plot.v and vplot to prove anticipation by the ViolaWWW browser.

287. For example, Dr. Kelly never discussed clock.v during the trial in July and August 2003.

288. Doyle attended the trial involving the third party held in July and August 2003.

289. By the end of the trial in August 2003, Doyle knew about and understood the third party's contention that the plotting demo involving the ViolaWWW browser in DX37 anticipated the asserted claims of the '906 Patent.

290. By the end of the trial in August 2003, Doyle knew about and understood Pei Wei's testimony that on May 31, 1993 — over one year before the application for the '906 Patent was filed — he posted DX37 on a publicly-accessible Internet site and notified an engineer at Sun Microsystems that DX37 was available for downloading.

7. **During the 2003 reexamination of the '906 Patent, Doyle concealed material information about the ViolaWWW plotting demo that Pei Wei and an expert had repeatedly contended anticipated the '906 Patent**

291. On or about October 30, 2003, the Director of the Patent Office initiated a reexamination of the '906 Patent. The control number for this reexamination was 90/006,831.

292. During the 2003 reexamination, Doyle withheld information about the ViolaWWW browser with the specific intent to deceive the Patent Office.

293. Doyle had a financial interest in the patentability of the claimed inventions in the '906 Patent.

294. The ViolaWWW browser threatened the patentability of the claimed inventions in the '906 Patent, and thus threatened Doyle's financial interests.

295. Doyle was personally involved in the 2003 reexamination of the '906 Patent.

296. For example, on or about April 27, 2004, Doyle participated in an examiner interview in an effort to confirm the patentability of the claims of the '906 Patent application. Doyle gave the examiner a presentation supported by approximately 22 slides, none of which discussed DX37 or the ViolaWWW browser.

297. On or about May 6, 2004, Doyle signed a declaration that was submitted to the Patent Office in an effort to confirm the patentability of the claims of the '906 Patent application. This declaration made no mention of DX37 or the ViolaWWW browser.

298. On or about August 18, 2005, Doyle participated in an examiner interview in an effort to confirm the patentability of the claims of the '906 Patent application. Doyle gave the examiner a presentation supported by approximately 36 slides, none of which discussed DX37 or the ViolaWWW browser.

299. During the 2003 reexamination, Doyle submitted selected information from the litigation with the third party concerning the validity of the '906 Patent, but he withheld information that would have identified for the examiner the key features of the prior art ViolaWWW browser and how they matched up to the asserted claims of the '906 Patent. This proved critical during the 2003 reexamination because when the examiner decided to look at the source code for the ViolaWWW browser, he missed the key points.

300. On or about December 30, 2003, Doyle submitted to the Patent Office a CD containing two compressed zip files, one for the "DX34" version of the ViolaWWW source code

dated May 12, 1993, and the other for the “DX37” version of the ViolaWWW source code dated May 27, 1993.

301. The compressed zip file for DX34 that Doyle submitted to the Patent Office was named `viola930512.tar.gz.zip`. When unzipped, it contained 1,027 files in 35 folders consisting of 8 total megabytes in size.

302. The compressed zip file for DX37 that Doyle submitted to the Patent Office was named `violaTOGO.tar.Z.zip`. When unzipped, it contained 1,030 files in 34 folders consisting of 7.7 total megabytes in size.

303. DX34 and DX37 contained source code for the ViolaWWW browser.

304. Source code cannot be executed by a computer. Source code must be compiled into binary code before it can be executed by a computer.

305. Without the compiled binary code, and without a suitable computer capable of executing that binary code (such as a Sun SPARCstation from the early 1990s), the Patent Office had no practical way to see the ViolaWWW browser in operation.

306. Given the voluminous nature of the contents of DX34 and DX37, and the practical inability of the Patent Office to run the ViolaWWW browser on a computer, it was especially important for Doyle to be candid with the Patent Office about the contents of DX34 and DX37 so that the Patent Office could focus on the relevant files.

307. Doyle was not candid and instead withheld material information that would have assisted the Patent Office in understanding the contents of DX34 and DX37.

308. For example, during the 2003 reexamination, Doyle did not disclose to the Patent Office the trial testimony of Pei Wei, who testified about the plotting demo in DX34 and DX37; Doyle did not disclose the trial testimony of Dr. Kelly, who testified that the plotting demo in

DX34 and DX37 anticipated the asserted claims of the '906 Patent; and Doyle did not disclose that Dr. Kelly specifically identified the VOBJF tag, the plot.v file, and the vplot executable application for purposes of his anticipation analysis.

309. On March 2, 2005 — while the 2003 reexamination was still pending — the Federal Circuit held that Dr. Kelly's testimony would allow a reasonable jury to conclude that DX37 anticipates at least claims 1 and 6 of the '906 Patent. 399 F.3d 1325, 1335 (Fed. Cir. 2005).

310. Even after the Federal Circuit's decision, however, Doyle still did not disclose Dr. Kelly's testimony to the Patent Office during the 2003 reexamination, nor did he disclose to the Patent Office that Dr. Kelly's anticipation analysis relied upon the VOBJF tag, the plot.v file, and the vplot executable application.

311. On or about September 27, 2005, the examiner issued a statement for reasons of patentability in which the examiner confirmed the patentability of claims 1–10 of the '906 Patent.

312. The examiner's statement never discussed the plotting demo that Dr. Kelly had testified anticipated the asserted claims of the '906 Patent.

313. When the examiner considered DX37, the examiner did not know where to look or what to look for. There were too many files in DX37 for the examiner to read himself. Thus the examiner was forced to resort to running text searches across all the files in DX37 in the hope of stumbling across relevant information.

314. The examiner used the "dtSearch" program to index and text search all DX37 files that contained textual content. *See* <http://www.dtsearch.com/>.

315. It is unclear what words the examiner searched for or how he came up with his search terms.

316. Doyle knew precisely what to look for, but he never told the examiner. For example, if Doyle had told the examiner to look for plot.v, the examiner's text searches would have quickly found the plotting demo that Dr. Kelly had testified anticipated the asserted claims of the '906 Patent.

317. The examiner's text searches did not lead him to the plotting demo, but instead led him to a clock application that used the file clock.v.

318. The file clock.v is a script file that displays the image of a clock. The clock application does not involve any separate executable application. It just involves a webpage and the clock.v script file.

319. The examiner reasoned that a script file like clock.v does not satisfy the "executable application" requirement of the claims of the '906 Patent, and thus the examiner concluded that DX37 does not anticipate the asserted claims of the '906 Patent.

320. The ViolaWWW source code teaches two ways of creating interactive webpages using embedded applications. One way is by using a simple script file, such as clock.v. All that is required is a webpage (such as violaApps.html) and the script file (such as clock.v). No binary executable application is involved. The other way taught by the ViolaWWW source code does use a binary executable application (such as vplot) in addition to a webpage and a file that contains the object (such as plot.v). The examiner did not consider this second way during the 2003 reexamination; he only considered the first way, and thus erroneously confirmed the patentability of the asserted claims of the '906 Patent.

321. The examiner's reasons for patentability included the following statements:

The Viola system uses “C-like” Viola scripts that must be INTERPRETED by the browser and then TRANSLATED or CONVERTED into binary native executable machine code that can be understood by the CPU. Alternately, the Viola script is precompiled into intermediate byte-code form and the byte-code is interpreted (i.e., translated) into binary native executable machine code at runtime. This extra step of translation results in an unavoidable performance penalty, as interpreted applications run much slower than compiled native binary executable applications.

Accordingly, the “C-like” Viola scripts (or corresponding bytecode representations) are not “executable applications” . . . .

322. The examiner’s reasoning overlooked the fact that the plotting demo in DX37 does use a separate executable application: vplot.

323. Doyle knew that the plotting demo used a separate executable application, but Doyle did not bring this fact to the examiner’s attention and instead allowed the examiner to confirm the patentability of the claims of the ‘906 Patent on the basis of an incomplete understanding of DX37.

324. Doyle knew that the plotting demo used a separate executable application for at least the following reasons:

- The Viola paper dated August 16, 1994, which states “This next mini application front-ends a graphing process (on the same machine as the viola process)” and which shows the plot of a fighter jet in a window titled “XPlot.”
- Pei Wei’s message to Doyle on September 1, 1994, which included the following statements: “[A]s for the plotting demo, it actually is really just a front-end that fires up a back-end plotting program (and the point is that that back-end could very well be running on a remote super computer instead of the localhost). For that demo, there is a simple protocol such that the frontend

app could pass an X window ID to the back-end, and the back-end draws the graphics directly onto the window violaWWW has opened for it.”

- The source code listed in the “Viola stuff” file included the file plotDemo.html, which states, “This is a demo of ViolaWWW embedding a viola front-ending object that is programmed to start up and communicate with a plot process. The front-end tells the plot program the window ID to draw to, and gives it the camera coordinate changes.” When the file plotDemo.html is parsed, it shows the plot of a fighter jet in a window titled “XPlot.”
- Pei Wei’s presentation at Stanford in September 1994, which included the following statements: “The next example is a front-end application to a backend. And the back-end is what actually does the computation and the drawing.” Included with the presentation was a screenshot of the ViolaWWW browser after parsing the file plotDemo.html. The screenshot shows the plot of a fighter jet in a window titled “XPlot.” The text in the webpage states, “This is a demo of ViolaWWW embedding a viola front-ending object that is programmed to start up and communicate with a plot process. The front-end tells the plot program the window ID to draw to, and gives it the camera coordinate changes.”
- The trial testimony of Pei Wei.
- The expert opinion of Dr. Kelly.

325. Doyle’s failure to tell the examiner about the vplot and plot.v files, and failure to disclose documents from the litigation that identified how Dr. Kelly matched up the plotting

demo in DX37 with the claims of the '906 Patent, both alone and in combination with Doyle's prior failure to disclose the ViolaWWW browser during the original prosecution of the '906 Patent, constituted a knowing and intentional violation of his duty of candor and good faith in dealing with the Patent Office.

326. On information and belief, the Patent Office would not have confirmed the patentability of the claims of the '906 Patent that were the subject of the 2003 reexamination if Doyle had not engaged in inequitable conduct and instead had fulfilled his duty of candor and good faith in dealing with the Patent Office.

**8. Doyle's inequitable conduct during the 2003 reexamination infected the 2005 reexamination**

327. On or about December 22, 2005, a third party filed a request to reexamine the '906 Patent.

328. On or about February 9, 2006, the Patent Office granted the request to reexamine the '906 Patent. The control number for this reexamination was 90/007,858.

329. Doyle had a financial interest in the patentability of the claimed inventions in the '906 Patent.

330. The ViolaWWW browser threatened the patentability of the claimed inventions in the '906 Patent, and thus threatened Doyle's financial interests.

331. Doyle was personally involved in the 2005 reexamination of the '906 Patent.

332. For example, on or about September 6, 2007, Doyle participated in an examiner interview in an effort to confirm the patentability of the claims of the '906 Patent application.

333. On or about October 1, 2007, Doyle submitted a declaration to the Patent Office in an effort to establish an earlier date of invention for the claims of the '906 Patent application.

334. Doyle's inequitable conduct during the 2003 reexamination infected the 2005 reexamination.

335. Although Doyle disclosed material information about the ViolaWWW browser to the Patent Office during the 2005 reexamination, by that time it was too late.

336. For example, Doyle disclosed the Viola paper dated August 16, 1994, to the Patent Office on or about August 21, 2006.

337. This was the first time Doyle had disclosed the Viola paper dated August 16, 1994 to the Patent Office.

338. Doyle knew about the Viola paper no later than August 31, 1994, but Doyle waited over 10 years — and two prosecutions of the '906 Patent — to disclose that paper to the Patent Office.

339. Shortly after Doyle disclosed the Viola paper dated August 16, 1994, to the Patent Office during the 2005 reexamination, the Patent Office rejected all claims of the '906 Patent.

340. In particular, on or about July 30, 2007, the Patent Office rejected all claims of the '906 Patent as being anticipated by DX95, which includes a copy of the text found in Pei Wei's Viola paper dated August 16, 1994.

341. The rejection based on the Viola paper dated August 16, 1994, confirms that the ViolaWWW browser was material prior art.

342. Doyle did not respond to the merits of the rejection based on the Viola paper dated August 16, 1994, however. Instead Doyle filed a declaration asserting that his date of invention was before August 16, 1994.

343. In response to Doyle's declaration, the examiner withdrew the rejection based on the Viola paper dated August 16, 1994.

344. The 2005 examiner could have entered a new rejection based on DX37, which was a printed publication before the alleged conception of the inventions claimed in the '906 Patent, but the 2005 examiner did not independently examine DX37 because the 2003 examiner had already concluded that DX37 did not invalidate the asserted claims of the '906 Patent.

345. The conclusions about DX37 reached in the 2003 reexamination were erroneous due to Doyle's inequitable conduct during that reexamination.

346. Thus, Doyle's inequitable conduct during the 2003 reexamination infected the 2005 reexamination.

**C. Doyle submitted false statements about the secondary considerations of non-obviousness**

347. During the original prosecution of the '906 Patent, Doyle submitted a declaration to the Patent Office containing false and misleading statements in an effort to obtain allowance of the claims.

348. Specifically, on or about June 2, 1997, Doyle submitted to the Patent Office a sworn declaration executed on or about May 27, 1997, for the purpose of overcoming the examiner's rejection on March 26, 1997.

349. On page 12 of the declaration, Doyle asserted that his claimed invention would not have been obvious over the cited prior art in view of "secondary considerations, including, in part, commercial success of products incorporating features of the claimed invention and industry recognition of the innovative nature of these products."

350. In support of his assertion, Doyle declared to the Patent Office that Sun Microsystems and Netscape had incorporated his invention into their Java software and Navigator Web browser, respectively. He stated: "Approximately 12 to 18 months after the applicants initially demonstrated the first Web plug-in and applet technology to the founders of

Netscape and engineers employed by Sun Microsystems in November and December of 1993, as described in reference #4 from Appendix A (Dr. Dobb's Journal, 2/96), both Netscape and Sun released software products that incorporated features of the claimed invention . . . .”

351. This statement was false. Neither Doyle nor any of the other named inventors of the '906 Patent demonstrated Web plug-in technology to any of the founders of Netscape in November or December of 1993.

352. When Doyle made these statements under oath, he also did not know whether any engineer employed by Sun Microsystems ever saw any of his demonstrations in November or December of 1993.

353. Doyle made these same false assertions in slides that he prepared and presented to the examiner in a personal interview on or about February 24, 1997. On a slide entitled “Relevant History of DHOE” (Doyle's name for his invention), Doyle included as a bullet point: “1993 Demos to Sun & Netscape's Founders.”

354. Doyle's false statements in his declaration were material to the patentability of the pending claims. These statements purported to provide evidence of copying by others and thus objective evidence of nonobviousness, a factor to be considered in determining whether an alleged invention is patentable over the prior art. Without these false assertions, Doyle had no support for his argument that Netscape and Sun copied his alleged invention or that his technology was responsible for their commercial success.

355. By making these false statements under oath to the Patent Office, Doyle intended to mislead the Patent Office to believe that responsible persons at Netscape and Sun saw his alleged invention, appreciated its supposed merits, and therefore incorporated it into the Navigator browser and Java. Moreover, by making these false statements, Doyle was trying to

convince the Patent Office that the Netscape and Sun products succeeded because they incorporated his alleged invention.

356. Doyle's submission of false statements under oath in his declaration to the Patent Office constituted a knowing and intentional violation of his duty of candor and good faith in dealing with the Patent Office.

**D. Conclusion**

357. A judicial determination of the respective rights of the parties with respect to the unenforceability of the claims of the '906 Patent is now necessary and appropriate under 28 U.S.C. § 2201.

**IX. DECLARATORY RELIEF REGARDING  
UNENFORCEABILITY OF THE '985 Patent**

358. An actual controversy exists between the parties with respect to the unenforceability of the '985 Patent.

359. Although Eolas alleges in its Complaint that the '985 Patent was duly and legally issued by the United States Patent and Trademark Office after full and fair examination, each and every claim of the '985 Patent is unenforceable due to inequitable conduct before the United States Patent and Trademark Office.

360. Perot Systems incorporates by reference the allegations contained in Paragraphs 106-357.

361. The actions of Doyle demonstrate a broad pattern of inequitable conduct that infected the prosecution of the '906 Patent, the reexaminations of the '906 Patent, and the prosecution of the '985 Patent.

362. The application that matured into the '985 Patent was filed on August 9, 2002.

363. The application number for the '985 Patent was 10/217,955. This application was a continuation of a continuation of the application that had matured into the '906 Patent.

364. Eolas had and still has rights to the patent application that matured into the '985 Patent.

365. Doyle was personally involved in the prosecution of the '985 Patent at the same time that he had a financial interest in Eolas.

366. Doyle knew that Eolas could assert the '985 Patent in litigation to seek substantial settlements and/or damage awards, and thus the prosecution of the '985 Patent was relevant to Doyle's financial interest in Eolas.

367. Doyle and his co-inventors are entitled to receive a portion of any royalties paid to The Regents of the University of California related to the '985 Patent, and for this reason as well, the prosecution of the '985 Patent was relevant to Doyle's financial interests.

368. The claims at issue during prosecution of the '985 Patent were similar to the claims at issue during the reexaminations of the '906 Patent.

369. Accordingly, the information that Doyle withheld during prosecution of the '906 Patent was material to the patentability of the claims at issue during prosecution of the '985 Patent for the same reasons previously stated.

370. As a result of the similarity between the claims at issue during prosecution of the '985 Patent, and the claims of the '906 Patent, the Patent Office issued a "double patenting" rejection during prosecution of the '985 Patent. The rejection was issued on or about July 20, 2004.

371. To overcome the "double patenting" rejection during prosecution of the '985 Patent, a terminal disclaimer was filed on or about March 7, 2005. As a result of the terminal

disclaimer, the '985 Patent may be in force up until November 17, 2015, the date on which the '906 Patent will expire.

372. For at least this reason, Doyle's inequitable conduct during the prosecution of the '906 Patent infected the prosecution of the '985 Patent.

373. On or about May 5, 2005, the Patent Office suspended prosecution of the '985 Patent in light of the 2003 reexamination of the '906 Patent. The Patent Office determined that the outcome of the 2003 reexamination had a material bearing on the patentability of the claims at issue during prosecution of the '985 Patent.

374. For at least this reason, Doyle's inequitable conduct during the 2003 reexamination of the '906 Patent infected the prosecution of the '985 Patent.

375. On or about January 18, 2006, the Patent Office suspended prosecution of the '985 Patent in light of the 2005 reexamination of the '906 Patent. The Patent Office determined that the outcome of the 2005 reexamination had a material bearing on the patentability of the claims at issue during prosecution of the '985 Patent.

376. For at least this reason, Doyle's inequitable conduct during the 2005 reexamination of the '906 Patent infected the prosecution of the '985 Patent.

377. On or about April 11, 2008, the claims at issue during prosecution of the '985 Patent were amended to claim substantially the same subject matter claimed in the '906 Patent.

378. Accordingly, the Patent Office did not undertake a separate substantive examination of the patentability of the claims in the '985 Patent. Instead, the Patent Office simply applied the results of the prosecution of the '906 Patent (including the results of the two reexaminations of the '906 Patent) to the '985 Patent.

379. For at least this reason, Doyle's inequitable conduct during the prosecution and reexaminations of the '906 Patent infected the prosecution of the '985 Patent.

380. On or about November 13, 2008, a request was filed to lift the stay on the prosecution of the '985 Patent in light of the completion of the 2005 reexamination of the '906 Patent.

381. On or about March 20, 2009, the Patent Office allowed the claims in the '985 Patent for the same reasons set forth by the Patent Office during the reexaminations of the '906 Patent.

382. The examiner's reasons for allowance of the '985 Patent included the following statement: "[T]he claims [of the '985 Patent] are allowable as the claims contain the subject matter deemed allowable in both Re exam 90/006,831 [the 2003 reexamination of the '906 Patent] and Re exam 90/007,838 [the 2005 reexamination of the '906 Patent] for the same reasons as set forth in the NIRC of the two Re exams."

383. The examiner's reasons for allowance of the '985 Patent confirm that Doyle's inequitable conduct during the prosecution and reexaminations of the '906 Patent infected the prosecution of the '985 Patent.

384. Eolas filed the complaint in this action on October 6, 2009, the same day that the '906 Patent issued.

385. As a result of Doyle's pattern of inequitable conduct, Eolas came to this Court with unclean hands.

386. As a result of Doyle's inequitable conduct, and the unclean hands of Eolas, the '906 Patent and the '985 Patent are unenforceable.

387. A judicial determination of the respective rights of the parties with respect to the unenforceability of the claims of the '985 Patent is now necessary and appropriate under 28 U.S.C. § 2201.

388. This action qualifies as an exceptional case, supporting an award of reasonable attorneys' fees, costs, expenses, and prejudgment interest for Perot Systems against Plaintiff pursuant to 35 U.S.C. § 285.

#### **X. PEROT SYSTEMS' PRAYER FOR RELIEF**

WHEREFORE, Perot Systems respectfully prays that this Court:

A. Dismiss the Complaint with prejudice in its entirety and award Plaintiff nothing by its Complaint;

B. Adjudge, declare, and decree that Perot Systems has not infringed (literally or by equivalents), and is not infringing (literally or by equivalents), any valid claim of the '906 Patent;

C. Adjudge, declare, and decree that Perot Systems has not induced, and is not inducing, infringement of any valid claim of the '906 Patent;

D. Adjudge, declare, and decree that Perot Systems has not contributed to, and is not contributing to, infringement of any valid claim of the '906 Patent;

E. Adjudge, declare, and decree that Perot Systems has not willfully infringed, and is not willfully infringing, any valid claim of the '906 Patent;

F. Adjudge, declare, and decree that the claims of the '906 Patent are invalid;

G. Adjudge, declare, and decree that the claims of the '906 Patent are unenforceable;

H. Permanently enjoin Plaintiff, its successors, and assigns, and anyone acting in concert therewith or on its behalf, from attempting to enforce the '906 Patent against Perot

Systems or any parent, affiliate, or subsidiary of Perot Systems, or its respective officers, agents, employees, successors, and assigns;

I. Adjudge, declare, and decree that Perot Systems has not infringed (literally or by equivalents), and is not infringing (literally or by equivalents), any valid claim of the '985 Patent;

J. Adjudge, declare, and decree that Perot Systems has not induced, and is not inducing, infringement of any valid claim of the '985 Patent;

K. Adjudge, declare, and decree that Perot Systems has not contributed to, and is not contributing to, infringement of any valid claim of the '985 Patent;

L. Adjudge, declare, and decree that Perot Systems has not willfully infringed, and is not willfully infringing, any valid claim of the '985 Patent;

M. Adjudge, declare, and decree that the claims of the '985 Patent are invalid;

N. Adjudge, declare, and decree that the claims of the '985 Patent are unenforceable;

O. Permanently enjoin Plaintiff, its successors, and assigns, and anyone acting in concert therewith or on its behalf, from attempting to enforce the '985 Patent against Perot Systems or any parent, affiliate, or subsidiary of Perot Systems, or its respective officers, agents, employees, successors, and assigns;

P. Enter a judgment against Plaintiff and in favor of Perot Systems in all respects;

Q. Find this case exceptional and award reasonable attorneys' fees, costs, expenses, and prejudgment interest to Perot Systems pursuant to 35 U.S.C. § 285;

R. Award the costs of this case to Perot Systems; and

S. Award to Perot Systems any further general or special relief to which Perot Systems is entitled.

**X. PEROT SYSTEMS' JURY DEMAND**

Perot Systems demands a trial by jury of all issues so triable pursuant to Federal Rule of Civil Procedure 38.

Dated: October 8, 2010
