Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
1a	<p>providing at least one client workstation and one network server coupled to said network environment, wherein said network environment is a distributed hypermedia environment;</p>	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that the client workstation receives, from the network server over the network environment, at least one file containing information to enable a browser application to display at least a portion of a distributed hypermedia document within a browser-controlled window. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p>

		 <p>The screenshot shows the CDW website homepage in a Mozilla Firefox browser window. The URL is http://www.cdw.com/. The page features a red navigation bar with the CDW logo, a search bar, and links for 'Shop CDW', 'My Account', 'Products', 'Services', 'Solutions Center', and 'What CDW Offers'. A central banner advertises 'SIMPLIFY WITH WINDOWS 7' with a 'Explore Windows 7' button. To the right, there is an 'Account Log On' section with fields for 'Enter User Name' and 'Forgot User Name?', and 'Forgot Password?' and 'Log On' buttons. Below the banner, there are sections for 'Featured Brands' (APC, Eaton, Netgear, Microsoft) and 'CDW Recommends' (HP Elitebook 6930p). A red box highlights the 'SIMPLIFY WITH WINDOWS 7' banner and the 'Account Log On' section.</p> <p>Source: Webpage of CDW at URL http://www.cdw.com/</p>

		 <p>The screenshot shows a Mozilla Firefox browser window displaying a CDW website page for the SonicWall TZ 200 security appliance. The page features a red header with the CDW logo and a main content area with a large image of the appliance. A red box highlights the image, and a zoom control is visible below it. The browser's address bar shows the URL: http://www.cdw.com/shop/products/default.aspx?edc=1792394&cm_sp=homepage-_-MainFeature1-_-Sonic.</p> <p>Source: http://www.cdw.com/shop/products/MediaPopOut.aspx?EDC=1792394&fi=&cm_sp=Product-Description-Photo+Gallery</p>
Spire	A method for running an application program in a computer network	Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers and comprises a method for running an application program in a computer network environment, comprising the following elements. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	environment, comprising:	<p>causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1pre supra which is expressly incorporated herein.</i></p>
5a	providing at least one client workstation and one network server coupled to said network environment, wherein said network environment is a distributed hypermedia environment;	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes at least one client workstation and one network server coupled to said network environment, wherein said network environment is a distributed hypermedia environment. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1a supra which is expressly incorporated herein.</i></p>
5b	executing, at said client workstation, a browser application, that parses a first distributed hypermedia	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that the browser parses a first distributed hypermedia document to identify text formats included in said distributed hypermedia document and for responding to predetermined text formats to initiate processing specified by said text formats. In addition, CDW Corp. provides the infrastructure (e.g.</p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	document to identify text formats included in said distributed hypermedia document and for responding to predetermined text formats to initiate processing specified by said text formats;	<p>servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1b supra which is expressly incorporated herein.</i></p>
5c	utilizing said browser to display, on said client workstation, at least a portion of a first hypermedia document received over said network from said server, wherein the portion of said first hypermedia	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that the browser displays, on said client workstation, at least a portion of a first hypermedia document received over said network from said server, wherein the portion of said first hypermedia document is displayed within a first browser-controlled window on said client workstation. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1c supra which is expressly incorporated</i></p>

*Allegation not limited to the browser in use

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	document is displayed within a first browser-controlled window on said client workstation,	<i>herein.</i>
5d	wherein said first distributed hypermedia document includes an embed text format, located at a first location in said first distributed hypermedia document, that specifies the location of at least a portion of an object external to the first distributed hypermedia document,	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that the said first distributed hypermedia document includes an embed text format, located at a first location in said first distributed hypermedia document, that specifies the location of at least a portion of an object external to the first distributed hypermedia document. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1d supra which is expressly incorporated herein.</i></p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
5e	wherein said object has type information associated with it utilized by said browser to identify and locate an executable application external to the first distributed hypermedia document,	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that said object has type information associated with it utilized by said browser to identify and locate an executable application external to the first distributed hypermedia document. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1e supra which is expressly incorporated herein.</i></p>
5f	and wherein said embed text format is parsed by said browser to automatically invoke said executable application to execute on said client workstation in order to display	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that when said embed text format is parsed by said browser, it automatically invokes said executable application to execute on said client workstation in order to display said object. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1f supra which is expressly incorporated</i></p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	said object	<i>herein.</i>
5g	and enable interactive processing of said object within a display area created at said first location within the portion of said first distributed hypermedia document being displayed in said first browser-controlled window.	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that interactive processing of said object is enabled within a display area created at said first location within the portion of said first distributed hypermedia document being displayed in said first browser-controlled window. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 1g supra which is expressly incorporated herein.</i></p>
5h	wherein said executable application is a controllable application and further comprising the step of:	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network and format the communications so that said executable application is a controllable application further comprising the following steps. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
		<i>See the evidence and information cited for claim element 2pre supra which is expressly incorporated herein.</i>
5i	interactively controlling said controllable application on said client workstation via inter-process communications between said browser and said controllable application;	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network and format the communications so that interactive controlling of said controllable application on said client workstation occurs via inter-process communications between said browser and said controllable application. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for claim element 2a supra which is expressly incorporated herein.</i></p>
5j	wherein the communications to interactively control said controllable application continue to be exchanged between the controllable application and the browser even after	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network and format the communications so that communications to interactively control said controllable application continue to be exchanged between the controllable application and the browser even after the controllable application program has been launched. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	the controllable application program has been launched;	<i>See the evidence and information cited for the claim elements 1g and 2a supra which is expressly incorporated herein.</i>
5k	wherein additional instructions for controlling said controllable application reside on said network server, wherein said step of interactively controlling said controllable application includes the following substeps:	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that the additional instructions for controlling said controllable application reside on said network server, wherein said step of interactively controlling said controllable application includes the following sub-steps identified below. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its default and expected use.</p> <p><i>See the evidence and information cited for the claim element 4k supra which is expressly incorporated herein.</i></p>
5l	issuing, from the client workstation, one or more commands to the network server;	<p>Users of CDW Corp.'s websites, the websites themselves and/or the servers hosting those websites (and/or the combination thereof), operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that the client workstation is caused to issue one or more commands to the network server. In addition, CDW Corp. provides the infrastructure (e.g. servers, CDW Corp.'s websites, etc.), in addition to instructions to users, and causes them to use CDW Corp.'s websites in an infringing manner in its</p>

	<p>application to parse a first distributed hypermedia document to identify text formats included in said distributed hypermedia document and to respond to predetermined text formats to initiate processes specified by said text formats;</p>	<p>workstation to execute a browser application to parse a first distributed hypermedia document to identify text formats included in said distributed hypermedia document.</p> <p><i>See the evidence and information cited for claim element 1b supra which is expressly incorporated herein.</i></p>
6c	<p>computer readable program code for causing said client workstation to utilize said browser to display, on said client workstation, at least a portion of a first hypermedia</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein, causing said client workstation to utilize said browser to display, on said client workstation, at least a portion of a first hypermedia document received over said network from said server, wherein the portion of said first hypermedia document is displayed within a first browser-controlled window on said client workstation.</p>

*Allegation not limited to the browser in use

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	document received over said network from said server, wherein the portion of said first hypermedia document is displayed within a first browser-controlled window on said client workstation,	<i>See the evidence and information cited for claim element 1c supra which is expressly incorporated herein.</i>
6d	wherein said first distributed hypermedia document includes an embed text format, located at a first location in said first distributed hypermedia document, that specifies the location of at least	CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that said first distributed hypermedia document includes an embed text format, located at a first location in said first distributed hypermedia document, that specifies the location of at least a portion of an object external to the first distributed hypermedia document.

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	a portion of an object external to the first distributed hypermedia document,	<i>See the evidence and information cited for claim element 1d supra which is expressly incorporated herein.</i>
6e	wherein said object has type information associated with it utilized by said browser to identify and locate an executable application external to the first distributed hypermedia document,	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that said object which has type information associated with it utilized by said browser to identify and locate an executable application external to the first distributed hypermedia document.</p> <p><i>See the evidence and information cited for claim element 1e supra which is expressly incorporated herein.</i></p>
6f	and wherein said embed text format is parsed by said browser to automatically	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media</p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	<p>invoke said executable application to execute on said client workstation in order to display said object</p>	<p>operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that when said embed text format is parsed by said browser, it automatically invokes said executable application to execute on said client workstation in order to display said object.</p> <p><i>See the evidence and information cited for claim element 1f supra which is expressly incorporated herein.</i></p>
6g	<p>and enable an end-user to directly interact with said object within a display area created at said first location within the portion of said first distributed hypermedia document being displayed in said first browser-controlled window.</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. Each comprises computer readable program code for causing said client workstation to enable interactive processing of said object within a display area created at said first location within the portion of said first distributed hypermedia document being displayed in said first browser-controlled window.</p> <p><i>See the evidence and information cited for claim element 1g supra which is expressly incorporated herein.</i></p>
7pre	<p>The computer program product of</p>	<p>CDW Corp.'s websites, the CDW Corp.'s websites themselves and the servers hosting CDW Corp.'s websites and/or the users' computers accessing CDW Corp.'s websites (and/or the combination</p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	claim 6, wherein said executable application is a controllable application and further comprising:	thereof), operate in a hypermedia network environment that includes client workstations executing browsers which further comprises the computer program product of claim 6, wherein said executable application is a controllable application and further comprising the element set forth below. <i>See the evidence and information cited for claim element 2 pre supra which is expressly incorporated herein.</i>
7a	computer readable program code for causing said client workstation to interactively control said controllable application on said client workstation via inter-process communications between said browser and said controllable application.	CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein, causing said client workstation to interactively control said controllable application on said client workstation via inter-process communications between said browser and said controllable application. <i>See the evidence and information cited for claim element 2a supra which is expressly incorporated herein.</i>
8	The computer program product of claim 7, wherein the communications	CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	<p>to interactively control said controllable application continue to be exchanged between the controllable application and the browser even after the controllable application program has been launched.</p>	<p>medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. Each comprises the computer program product of claim 7, wherein the communications to interactively control said controllable application continue to be exchanged between the controllable application and the browser even after the controllable application program has been launched.</p> <p><i>See the evidence and information cited for claim elements 1g and 2a supra which is expressly incorporated herein.</i></p>
<p>9pre</p>	<p>A computer program product for use in a system having at least one client workstation and one network server coupled to said network environment, wherein said network environment is a</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. Each comprises a computer program product for use in a system having at least one client workstation and one network server coupled to said network environment, wherein said network environment is a distributed hypermedia environment, the computer program product comprising the following elements.</p> <p><i>See the evidence and information cited for the claim elements 1pre and 1a supra which is expressly incorporated herein.</i></p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	distributed hypermedia environment, the computer program product comprising:	
9a	a computer usable medium having computer readable program code physically embodied therein, said computer program product further comprising:	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein, said computer program product further comprising the following elements.</p> <p><i>See the evidence and information cited for the claim element 6a supra which is expressly incorporated herein.</i></p>
9b	computer readable program code for causing said client workstation to execute a browser application to parse a first distributed hypermedia document to identify text	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein, causing said client workstation to execute a browser application to parse a first distributed hypermedia document to identify text formats included in said distributed hypermedia document and to respond to predetermined text formats to initiate processes specified by said text formats.</p> <p><i>See the evidence and information cited for claim element 1b supra which is expressly incorporated</i></p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	<p>formats included in said distributed hypermedia document and to respond to predetermined text formats to initiate processes specified by said text formats;</p>	<p><i>herein.</i></p>
<p>9c</p>	<p>computer readable program code for causing said client workstation to utilize said browser to display, on said client workstation, at least a portion of a first hypermedia document received over said network from said server, wherein the portion of said first</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein, causing said client workstation to utilize said browser to display, on said client workstation, at least a portion of a first hypermedia document received over said network from said server, wherein the portion of said first hypermedia document is displayed within a first browser-controlled window on said client workstation.</p> <p><i>See the evidence and information cited for claim element 1c supra which is expressly incorporated herein.</i></p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	<p>hypermedia document is displayed within a first browser-controlled window on said client workstation,</p>	
<p>9d</p>	<p>wherein said first distributed hypermedia document includes an embed text format, located at a first location in said first distributed hypermedia document, that specifies the location of at least a portion of an object external to the first distributed hypermedia document,</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that said first distributed hypermedia document includes an embed text format, located at a first location in said first distributed hypermedia document, that specifies the location of at least a portion of an object external to the first distributed hypermedia document.</p> <p><i>See the evidence and information cited for claim element 1d supra which is expressly incorporated herein.</i></p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
9e	wherein said object has type information associated with it utilized by said browser to identify and locate an executable application external to the first distributed hypermedia document,	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that said object which has type information associated with it utilized by said browser to identify and locate an executable application external to the first distributed hypermedia document.</p> <p><i>See the evidence and information cited for claim element 1e supra which is expressly incorporated herein.</i></p>
9f	and wherein said embed text format is parsed by said browser to automatically invoke said executable application to execute on said client workstation in order to display	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that when said embed text format is parsed by said browser, it automatically invokes said executable application to execute on said client workstation in order to display said object.</p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	said object	<i>See the evidence and information cited for claim element 1f supra which is expressly incorporated herein.</i>
9g	and enable interactive processing of said object within a display area created at said first location within the portion of said first distributed hypermedia document being displayed in said first browser-controlled window;	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that it enables interactive processing of said object within a display area created at said first location within the portion of said first distributed hypermedia document being displayed in said first browser-controlled window.</p> <p><i>See the evidence and information cited for claim element 1g supra which is expressly incorporated herein.</i></p>
9h	wherein said executable application is a controllable application and further comprising:	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers and where said executable application is a controllable application that further comprises the elements set forth below.</p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
		<p><i>See the evidence and information cited for claim element 2pre supra which is expressly incorporated herein.</i></p>
<p>9i</p>	<p>computer readable program code for causing said client workstation to interactively control said controllable application on said client workstation via inter-process communications between said browser and said controllable application;</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein, causing said client workstation to interactively control said controllable application on said client workstation via inter-process communications between said browser and said controllable application.</p> <p><i>See the evidence and information cited for claim element 2a supra which is expressly incorporated herein.</i></p>
<p>9j</p>	<p>wherein the communications to interactively control said controllable application continue to be exchanged</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers,</p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	<p>between the controllable application and the browser even after the controllable application program has been launched; and</p>	<p>wherein the communications to interactively control said controllable application continue to be exchanged between the controllable application and the browser even after the controllable application program has been launched.</p> <p><i>See the evidence and information cited for claim elements 1g and 2a supra which is expressly incorporated herein.</i></p>
<p>9k</p>	<p>wherein additional instructions for controlling said controllable application reside on said network server, wherein said computer readable program code for causing said client workstation to interactively control said controllable application on said client workstation</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers, wherein the additional instructions for controlling said controllable application reside on said network server, wherein said step of interactively controlling said controllable application includes the following elements.</p> <p><i>See the evidence and information cited for claim element 4k supra which is expressly incorporated herein.</i></p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	includes:	
9l	computer readable program code for causing said client workstation to issue, from the client workstation, one or more commands to the network server;	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers, wherein the workstation possesses computer readable program code for causing said client workstation to issue, from the client workstation, one or more commands to the network server.</p> <p><i>See the evidence and information cited for claim element 4l supra which is expressly incorporated herein.</i></p>
9m	computer readable program code for causing said network server to execute one or more instructions in response to said commands;	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers, wherein the computer readable program code causes said network server to execute one or more instructions in response to said commands.</p> <p><i>See the evidence and information cited for claim element 4m supra which is expressly incorporated herein.</i></p>
9n	computer readable	CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	<p>program code for causing said network server to send information to said client workstation in response to said executed instructions; and</p>	<p>users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers, wherein the computer readable program code causes said network server to send information to said client workstation in response to said executed instructions.</p> <p><i>See the evidence and information cited for claim element 4n supra which is expressly incorporated herein.</i></p>
9o	<p>computer readable program code for causing said client workstation to process said information at the client workstation to interactively control said controllable application.</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein, causing said client workstation to process said information at the client workstation to interactively control said controllable application.</p> <p><i>See the evidence and information cited for claim element 4o supra which is expressly incorporated herein.</i></p>
10pre	<p>A computer program product for use in a system</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory</p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	<p>having at least one client workstation and one network server coupled to said network environment, wherein said network environment is a distributed hypermedia environment, the computer program product comprising:</p>	<p>of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes at least one client workstation and one network server coupled to said network environment, wherein said network environment is a distributed hypermedia environment, the computer program product comprising the following elements.</p> <p><i>See the evidence and information cited for the claim elements 1pre and 1a supra which is expressly incorporated herein.</i></p>
<p>10a</p>	<p>a computer usable medium having computer readable program code physically embodied therein, said computer program product further comprising:</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers, said computer program product further comprising the following elements.</p> <p><i>See the evidence and information cited for the claim element 6a supra which is expressly incorporated herein.</i></p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
10b	computer readable program code for causing said client workstation to execute a browser application to parse a first distributed hypermedia document to identify text formats included in said distributed hypermedia document and to respond to predetermined text formats to initiate processes specified by said text formats;	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein, causing said client workstation to execute a browser application to parse a first distributed hypermedia document to identify text formats included in said distributed hypermedia document and to respond to predetermined text formats to initiate processes specified by said text formats.</p> <p><i>See the evidence and information cited for claim element 1b supra which is expressly incorporated herein.</i></p>
10c	computer readable program code for causing said client workstation to	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable</p>

	utilize said browser to display, on said client workstation, at least a portion of a first hypermedia document received over said network from said server, wherein the portion of said first hypermedia document is displayed within a first browser-controlled window on said client workstation,	medium has computer readable program code physically embodied therein, causing said client workstation to utilize said browser to display, on said client workstation, at least a portion of a first hypermedia document received over said network from said server, wherein the portion of said first hypermedia document is displayed within a first browser-controlled window on said client workstation. <i>See the evidence and information cited for claim element 1c supra which is expressly incorporated herein.</i>
10d	wherein said first distributed hypermedia document includes an embed text format, located at a	CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers.

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	<p>first location in said first distributed hypermedia document, that specifies the location of at least a portion of an object external to the first distributed hypermedia document,</p>	<p>CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that said first distributed hypermedia document includes an embed text format, located at a first location in said first distributed hypermedia document, that specifies the location of at least a portion of an object external to the first distributed hypermedia document.</p> <p><i>See the evidence and information cited for claim element 1d supra which is expressly incorporated herein.</i></p>
<p>10e</p>	<p>wherein said object has type information associated with it utilized by said browser to identify and locate an executable application external to the first distributed hypermedia document,</p>	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that said object which has type information associated with it utilized by said browser to identify and locate an executable application external to the first distributed hypermedia document.</p> <p><i>See the evidence and information cited for claim element 1e supra which is expressly incorporated herein.</i></p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
10f	and wherein said embed text format is parsed by said browser to automatically invoke said executable application to execute on said client workstation in order to display said object	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that when said embed text format is parsed by said browser, it automatically invokes said executable application to execute on said client workstation in order to display said object.</p> <p><i>See the evidence and information cited for claim element 1f supra which is expressly incorporated herein.</i></p>
10g	and enable interactive processing of said object within a display area created at said first location within the portion of said first distributed hypermedia document being	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that it enables interactive processing of said object within a display area created at said first location within the portion of said first distributed hypermedia document being displayed in said first browser-controlled window.</p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	displayed in said first browser-controlled window;	<i>See the evidence and information cited for claim element 1g supra which is expressly incorporated herein.</i>
10h	wherein said executable application is a controllable application and further comprising:	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers and where said executable application is a controllable application that further comprises the elements set forth below.</p> <p><i>See the evidence and information cited for claim element 2pre supra which is expressly incorporated herein.</i></p>
10i	computer readable program code for causing said client workstation to interactively control said controllable application on said client workstation via inter-process communications	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein, causing said client workstation to interactively control said controllable application on said client workstation via inter-process communications between said browser and said controllable application.</p> <p><i>See the evidence and information cited for claim element 2a supra which is expressly incorporated</i></p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	between said browser and said controllable application;	<i>herein.</i>
10j	wherein the communications to interactively control said controllable application continue to be exchanged between the controllable application and the browser even after the controllable application program has been launched;	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers, wherein the communications to interactively control said controllable application continue to be exchanged between the controllable application and the browser even after the controllable application program has been launched.</p> <p><i>See the evidence and information cited for the claim elements 1g and 2a which is expressly incorporated herein.</i></p>
10k	wherein additional instructions for controlling said controllable application reside on said network	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers.</p>

Claim	Claim Language	Exemplary Evidence from CDW Corp.'s websites
	server, wherein said computer readable program code for causing said client workstation to interactively control said controllable application on said client workstation includes:	<p>CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that said step of interactively controlling said controllable application includes the following elements.</p> <p><i>See the evidence and information cited for claim element 4k supra which is expressly incorporated herein.</i></p>
10l	computer readable program code for causing said client workstation to issue, from the client workstation, one or more commands to the network server;	<p>CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of users of the CDW Corp.'s websites each comprise a computer usable medium (such as a DVD/CD-ROM, the hard-disk/volatile memory of the user of the CDW Corp.'s websites, the hard-disk/volatile memory of the server from which the CDW Corp.'s websites are hosted, and etc.). The computer usable medium has computer readable program code physically embodied therein. The computer usable media operate in a hypermedia network environment that includes client workstations executing browsers. CDW Corp.'s servers transmit a series of communications to client workstations in the distributed hypermedia network. CDW Corp.'s servers format the communications so that the client workstation is caused to issue one or more commands to the network server.</p> <p><i>See the evidence and information cited for claim element 4l supra which is expressly incorporated herein.</i></p>
10m	computer readable	CDW Corp.'s websites, as well as the CDW Corp.'s servers which host them, and the computers of
