	PAT. NO.	Title
1	7,890,940	Compilation and runtime information generation and optimization
2	7,890,883	Information processing for creating a document digest
3	7,890,773	Storage medium conversion method, non-transitory computer readable storage medium and device
4	7,890,765	Generating and verifying trusted digital time stamp
5	7,890,390	Managing part number preferredness
6	7,890,321	Noise reduction device, program and method
7	7,889,742	Method and system for improving data throughput
8	7,889,087	Immersion detection
9	7,888,983	Predetermined duty cycle signal generator
10	7,886,224	System and method for transforming tabular form date into structured document
11	7,886,202	System and methods for recording, displaying, and reconstructing computer-based system and user events
12	7,886,148	Secure execution of a computer program
13	7,886,106	USB sharing switch with automatic switching capabilities
14	7,886,015	Method and system for future defined email recipient
15	7,886,007	Arrangement for implementing transmission of multimedia messages
16	7,885,886	Method for structuring, pricing and settling a current mortgage price indicator contract
17	7,885,868	Reading, organizing and manipulating accounting data
18	7,885,258	Packet switch equipment and bandwidth control method using the same
19	7,885,184	Method and apparatus for re-establishing anonymous data transfers

20 7,884,824 Method for processing status information on determined functions in wireless terminal device
21 7,882,509 Expander-based solution to the dynamic STP address problem
22 7,882,373 System and method of reducing power consumption in a storage system through shortening of seek distances
23 7,882,281 SAS reference Phys for virtualization and traffic isolation
24 7,882,267 Methods, systems, and products for providing communications services
25 7,882,088 Method and system for transferring data from a data warehouse
26 7,881,992 Methods and systems for processing and managing corporate action information
27 7,881,742 Method and apparatus for power control during DTX operation
28 7,881,256 Mobile station supervision of the forward dedicated control channel when in the discontinuous transmission mode
29 7,877,707 Detecting and interpreting real-world and security gestures on touch and hover sensitive devices
30 7,877,421 Method and system for mapping enterprise data assets to a semantic information model
31 7,877,386 Business object search method process and presentation
32 7,877,317 Method and system for finding similar charts for financial analysis
33 7,877,253 Systems, methods, and apparatus for frame erasure recovery
34 7,876,940 Universal image processing
35 7,873,939 Processing logic modeling and execution
36 7,873,625 File indexing framework and symbolic name maintenance framework
37 7,873,358 Method and system for providing inbound traffic redirection solution
38 7,870,360 Storage area network (SAN) forecasting in a heterogeneous environment
39 7,869,835 Method and system for pre-loading and executing computer instructions within the cache memory
40 7,869,568 Radiation imaging apparatus, and method and program for controlling radiation imaging apparatus
41 7,869,539 Methods, systems, and computer program products for rateless coding
42 7,869,075 Image processing apparatus and method thereof
43 7,868,736 Security device, vehicle authentication device, method and program
44 7,866,054 Apparatus and method for indicating direction
45 7,865,490 Document data creating apparatus, document data creating method and control program of the same
46 7,864,984 Line position calculating method, correction value obtaining method, and storage medium having program stored thereon
47 7,864,931 Personal calendaring, schedules, and notification using directory data
48 7,864,106 Pulse doppler coherent radar or ultrasound detection method and system for SNR enhancement
49 7,861,215 Method, system, and program product for modeling processes
50 7,861,161 Report system and method using prompt objects
