

Exhibit L

Claim Chart For Adobe Showing Indirect Infringement Of The '985 Patent Through pdf authoring tools and Direct And/Or Indirect Infringement Via Its PDF Viewers

Claim	Claim Language	Evidence
1pre	<p>A method for running an application program in a distributed hypermedia network environment, wherein the network environment comprises at least one client workstation and one network server coupled to the network environment, the method comprising:</p>	<p>Adobe indirectly, by induced and/or contributory infringement, infringes all elements of this claim, set forth below, through its pdf authoring tools, including but not limited to:</p> <ul style="list-style-type: none"> • Acrobat Standard • Acrobat Pro <ul style="list-style-type: none"> ○ See Adobe Acrobat 9 Pro, http://www.adobe.com/products/acrobatpro/. "Adobe® Acrobat® 9 Pro software builds on the foundational feature set of Acrobat 9 Standard to provide business and creative professionals with additional capabilities, including enhanced security features, high-end print production support, and easy-to-manage electronic document reviews." • Acrobat Pro Extended <ul style="list-style-type: none"> ○ See Adobe Acrobat 9 Pro Extended, http://www.adobe.com/products/acrobatproextended/. "Adobe® Acrobat® 9 Pro Extended software was built to meet the demanding requirements of business and technical professionals, today and in the future. Use its simple-yet-sophisticated tools to organize and share the widest range of content — including documents, spreadsheets, e-mail, images, video, 3D, and maps — in a single, compressed PDF Portfolio." ○ See Adobe Acrobat 9 Pro Extended, http://www.adobe.com/products/acrobatproextended/. "Automatically convert a variety of video formats to SWF for reliable, cross-platform sharing of video, animations, and

applications in PDF documents. With native support for Adobe Flash® technology, no additional media player is necessary for playback. . . . Enable team members to review and comment on complex content, including 2D and 3D design data, video, and interactive maps.”

- **Creative Suite 4 Design Premium** (which includes Acrobat 9 Pro, see <http://www.adobe.com/products/creativesuite/compare/>)
- **Creative Suite 4 Design Standard** (which includes Acrobat 9 Pro, see <http://www.adobe.com/products/creativesuite/compare/>)
- **Creative Suite 4 Web Premium** (which includes Acrobat 9 Pro, see <http://www.adobe.com/products/creativesuite/compare/>)
- **Creative Suite 4 Master Collection** (which includes Acrobat 9 Pro, see <http://www.adobe.com/products/creativesuite/compare/>)
- **Technical Communication Suite 2** (which includes Acrobat 9 Pro Extended, see <http://www.adobe.com/products/technicalcommunicationsuite/>)
- **Distiller Server**
 - See Adobe Distiller Server 8, <http://www.adobe.com/products/acrdis/>. “Adobe® Distiller® Server 8 software converts PostScript® to Adobe PDF using a server.”
 - See Adobe Distiller Server 8 Centralized High-Volume Adobe PDF Creation From Postscript, p. 2, available at http://www.adobe.com/products/acrdis/pdfs/acrdis_datasheet.pdf. “Distiller Server 8 utilizes the industry standard Adobe PDF specification. Take advantage of the Adobe PDF 1.7 specification, the same version of Adobe PDF created by Adobe Acrobat(R) 8 software.”
- **Flash Paper**
 - See Macromedia Flash Paper 2, <http://www.adobe.com/products/flashpaper/>.

"FlashPaper 2 allows anyone to convert printable files into Macromedia Flash documents or PDF files with one click."

- See FlashPaper 2 Feature Tour, available at http://www.adobe.com/products/flashpaper/productinfo/features/brz_tour/ (wherein the narrator explains "users can interact with the documents using standard controls like zooming and scrolling").

- **Framemaker**

- See Migrating from Unstructured to Structured FrameMaker, p. 7, available at <http://www.adobe.com/devnet/framemaker/pdfs/migrationguide.pdf>. "Structured FrameMaker provides everything you need to create high-quality print and PDF output. Many other XML authoring tools do not include a high-quality print solution, and designing a layout for print and PDF is much more complex than publishing to the web."
- See <http://www.adobe.com/products/framemaker/> (noting "long-document and pristine PDF output support" as top features of Framemaker).

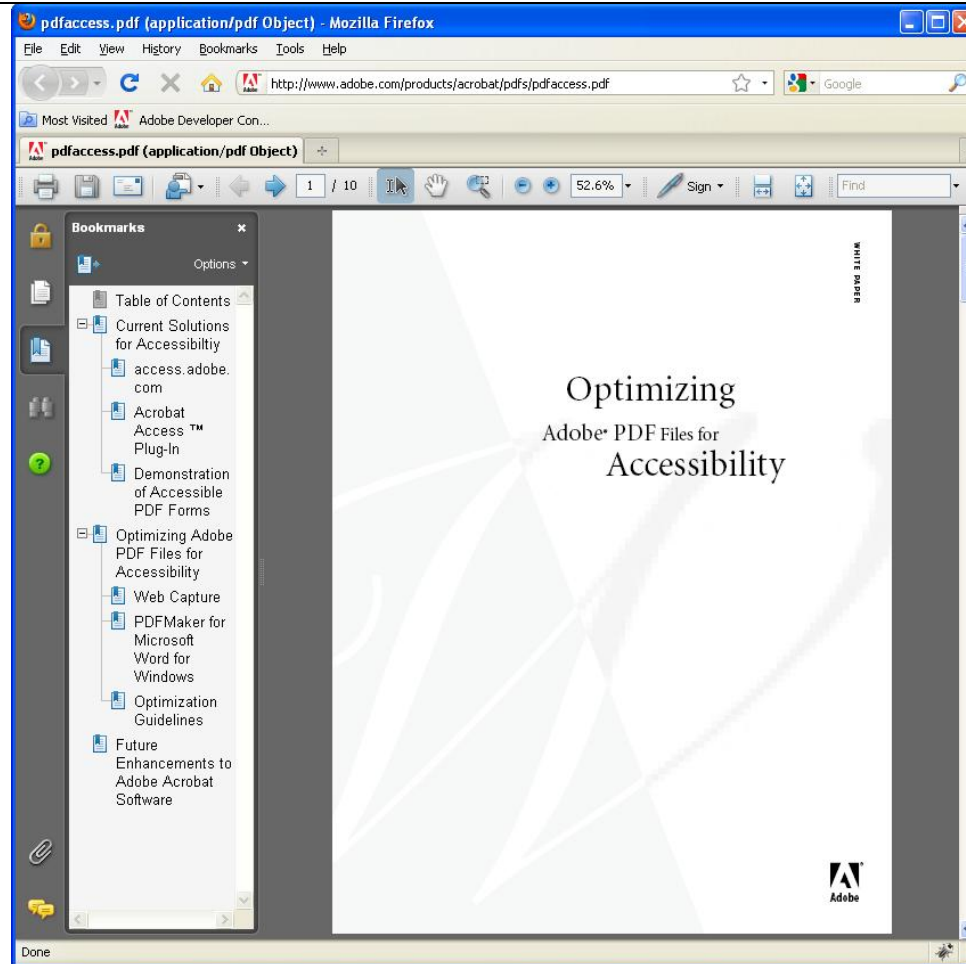

- **InDesign CS4**

- See Adobe FrameMaker 9, <http://www.adobe.com/products/framemaker/fag/>. "Adobe InDesign CS4 software is a professional page layout solution that breaks down the barriers between online and offline publishing. It allows you to create compelling print layouts, immersive content for playback in the Adobe Flash Player runtime, and interactive PDF documents."

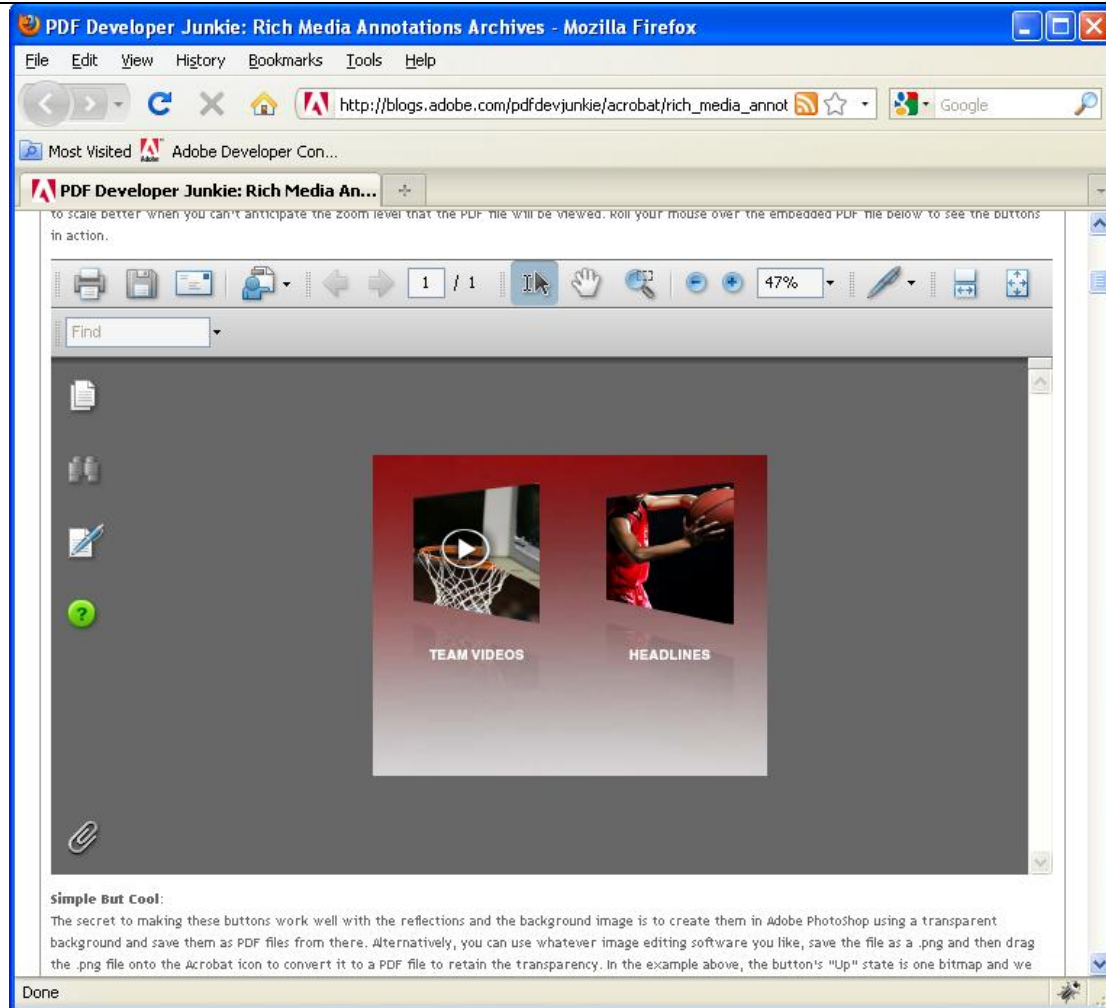

- **Pagemaker**

- See Recommendations for creating PDF files, <http://kb2.adobe.com/cps/320/320923.html>. "Adobe PageMaker 7.0.1a is designed to work with Adobe Acrobat 6.0.x and 7.0.x and enables you to export files directly from PageMaker to PDF."

		<p>and any other tools used to create pdf or similar content.</p> <p>For example, users of Adobe pdf authoring tools, the pdf authoring tools themselves and/or the servers hosting the pdf authoring tools (and/or the combination thereof) run an application program in a distributed hypermedia network environment, wherein the network environment comprises at least one client workstation and one network server coupled to the network environment. In addition, Adobe provides the infrastructure (e.g. the authoring tools/servers), in addition to instructions to users, and causes them to use Adobe pdf authoring tools in an infringing manner in their default and expected uses.</p>

Citation 1d(3): Using the HTML embed Tag to Display a PDF on Your Web Page, http://blogs.adobe.com/pdfdevjunkie/using_the_html_embed_tag_to_di.html. "Few people leverage the fact that you can display a PDF file in a web page just like any other graphic by using the embed tag in your HTML file. . . . Below is an example of simply adding the PDF file name to the src property of the embed tag . . . <embed src="FullScreenEmbed.pdf" width="500" height="375">" . . . You can navigate the PDF by clicking on it (to activate the embedded PDF) and then use the arrow keys on your keyboard to scroll through the document."

		<p>Citation 1d(4): PDF Support in Acrobat.com and Buzzword, http://blogs.adobe.com/acom/2008/09/pdf_support_in_acrobatcom_and.html (comment posted 7:01 AM, June 17, 2009 by Tad Staley of Adobe, instructing how to embed PDFs) "To copy the embed code to your clipboard you can do one of two things. In the Acrobat.com document organizer - the view where you can see all your uploaded files - highlight a document by clicking on the icon to the left of the name. Then choose the context menu - the little triangle at the right edge of the highlight - where you can choose "Copy Embed Code". Alternatively, you can open the document in Acrobat.com preview (just click the document link in the organizer), and you'll see a "Copy Embed Code" control on the right side of the screen.</p> <p>In either case, you will get an HTML string copied to your clipboard, which you can then paste into a blog or other HTML editor to embed the preview widget."</p> <p>In addition, as set forth above, the Adobe PDF plug-in also infringes this element directly and indirectly (through contributory and/or induced infringement).</p> <p>Citation 1d(5): Adding PDF Content, http://livedocs.adobe.com/flex/3/html/help.html?content=PDF_1.html. "JavaScript in an HTML page can send a message to JavaScript in PDF content by calling the postMessage() method of the DOM object representing the PDF content. For example, consider the following embedded PDF content:</p> <pre><object id="PDFObj" data="test.pdf" type="application/pdf" width="100%" height="100%"/></pre> <p>In addition, as set forth above, the Adobe PDF plug-in also infringes this element directly and indirectly (through contributory and/or induced infringement).</p>

and viewers can choose to download the PDF directly from the preview page, making the whole process simple and convenient.

3. Embed PDFs (and other files)
 While it's always been possible to view PDFs within a browser using the reader browser add-in, Acrobat.com now offers another way to deliver PDF content in a browser. With a click of the document's "Copy Embed Code" button, you can paste a reading "widget" directly into your web page. Unlike the Reader add-in, the widget only takes up a small portion of the page, though you can expand it to take up the entire page. An example is shown below.

4. Export Buzzword documents to PDF
 Of course, most documents began their life as something other than a PDF file. Adobe Buzzword now provides a great way to author a rich document - complete with graphics, tables, links and comments. And when the authoring / editing process is complete, you can simply export the

Citation 12a(4): Adobe Acrobat 7.0.5 Acrobat Interapplication Communication Overview, *available at* <http://partners.adobe.com/public/developer/en/acrobat/sdk/pdf/iac/IACOverview.pdf> (describing how Adobe® Acrobat® provides support for interapplication communication).

Citation 12a(5): Acrobat Interapplication Communication Reference, *available at* <http://partners.adobe.com/public/developer/en/acrobat/sdk/pdf/iac/IACReference.pdf> (providing a detailed reference off all the calls needed for implementing interapplication functionality and browser controls with Acrobat).

Source: Adobe Acrobat 7.0.5 Acrobat Interapplication Communication Overview, p. 13, *available at* <http://partners.adobe.com/public/developer/en/acrobat/sdk/pdf/iac/IACOverview.pdf>.

Citation 12a(7): Interapplication communication,

<http://www.adobe.com/devnet/acrobat/interapplication.html>. "You can also use the IAC support to render a PDF file into any specified window instead of the Acrobat or Reader window. The IAC support methods and events serve as wrappers for some of the core API calls in the Acrobat SDK. In this way, IAC supports enterprise workflows by making it possible to control Acrobat and Reader, display PDF documents in other applications, and manipulate PDF data from other applications."

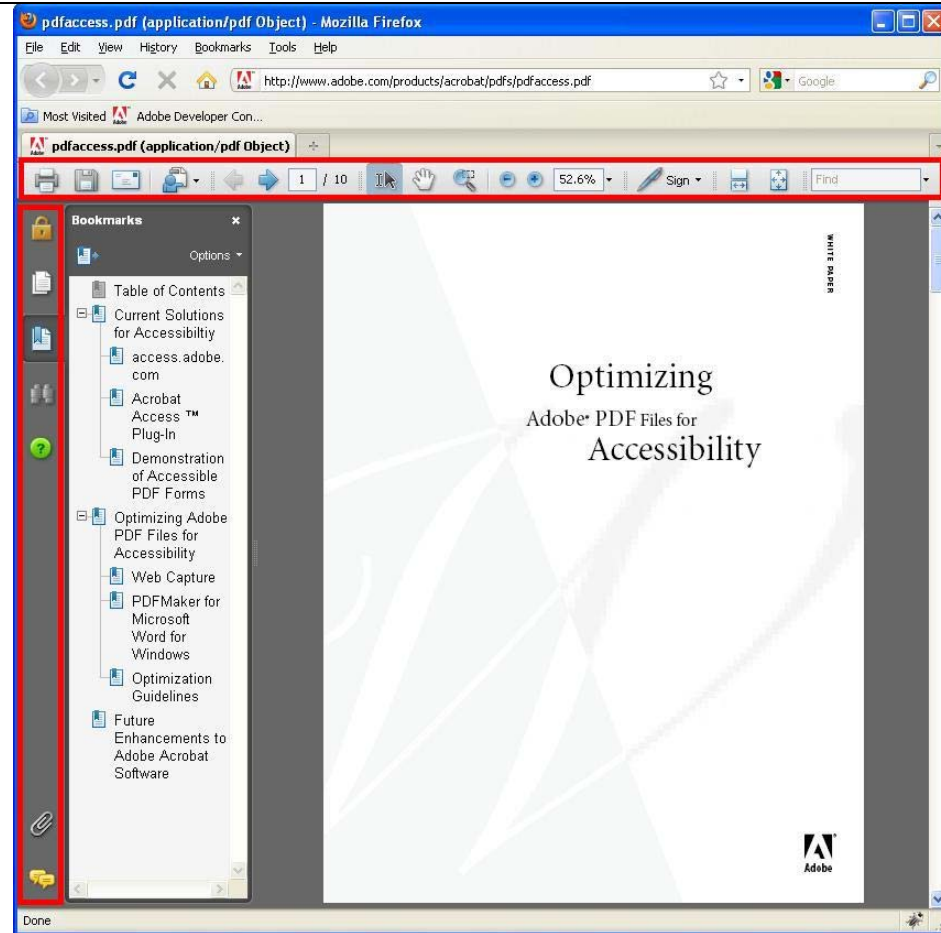

Citation 12a(8): PDF Portfolios and Backward Compatibility, http://blogs.adobe.com/pdfdevjunkie/2008/08/pdf_portfolios_and_backward_co_1.html. "[W]e added the PDF Portfolio feature to Acrobat 9 which lets developers leverage the power of Flash to create highly branded, highly interactive experiences for their document's audience."

Citation 12a(9): Rendering Interactive PDF Forms, <http://livedocs.adobe.com/livecycle/8.2/programLC/programmer/help/000309.html>. "The Forms service renders interactive PDF forms to client devices, typically web browsers, to collect information from users. After an interactive form is rendered, a user can enter data into form fields and click a submit button located on the form to send information back to the Forms service."

Citation 12a(10): Using Adobe Acrobat 9 Pro, p. 34, *available at* http://help.adobe.com/en_US/Acrobat/9.0/Professional/acrobat_pro_9.0_help.pdf (describing how to interact with a pdf file displayed within a browser). "Because keyboard commands may be mapped to the web browser, some Acrobat shortcuts may not be available. Similarly, you may need to use the tools and commands in the Acrobat toolbar rather than the browser toolbar or menu bar. For example, to print a PDF document, use the Print button in the Acrobat toolbar rather than the Print command in the browser."

		<p>Citation 12a(11): Guide to SDK Samples, Adobe Acrobat SDK, p. 67, available at http://www.adobe.com/devnet/acrobat/pdfs/samples_guide.pdf. (providing samples of using the Acrobat software development kit to write JavaScript code to implement interapplication communication). "AcrobatActiveXVB . . . Demonstrates how to use the Acrobat ActiveX control to embed a PDF document window with toolbars in a VB.NET application. It also shows how to use the ActiveX APIs to create user graphical interfaces to externally control the PDF window."</p> <p>In addition, as set forth above, the Adobe PDF plug-in also infringes this element directly and indirectly (through contributory and/or induced infringement).</p>
<p>13</p>	<p>The method of claim 12, wherein the communications to interactively control said controllable application continue to be exchanged between the controllable application and the browser even after the controllable application program has been launched.</p>	<p>Adobe indirectly, by induced and/or contributory infringement, infringes all elements of this claim set forth below through its pdf authoring tools, including but not limited to:</p> <ul style="list-style-type: none"> • Acrobat Standard • Acrobat Pro • Acrobat Pro Extended • Creative Suite 4 Design Premium • Creative Suite 4 Design Standard • Creative Suite 4 Web Premium • Creative Suite 4 Master Collection • Technical Communication Suite 2 • Distiller Server • Flash Paper • Framemaker • InDesign CS4

---------------------	---	---

Source: Rendering Interactive PDF Forms,
<http://livedocs.adobe.com/livecycle/8.2/programLC/programmer/help/000309.html>.

Citation 14pre(3): Rendering Interactive PDF Forms,
<http://livedocs.adobe.com/livecycle/8.2/programLC/programmer/help/000309.html>. “The following table describes the steps in this diagram. . . . 1 The GetLoanForm Java Servlet is invoked from an HTML page. 2 The GetLoanForm Java Servlet uses the Forms service Client API to render the loan form to the client web browser. (See Rendering an interactive PDF form using the Java API.) 3 After the user fills the loan form and clicks the submit button, data is submitted to the HandleData Java Servlet. (See Loan form.) 4 The HandleData Java Servlet uses the Forms service Client API to process the form submission and retrieve form data. The data is then stored in an enterprise database. (See Handling Submitted

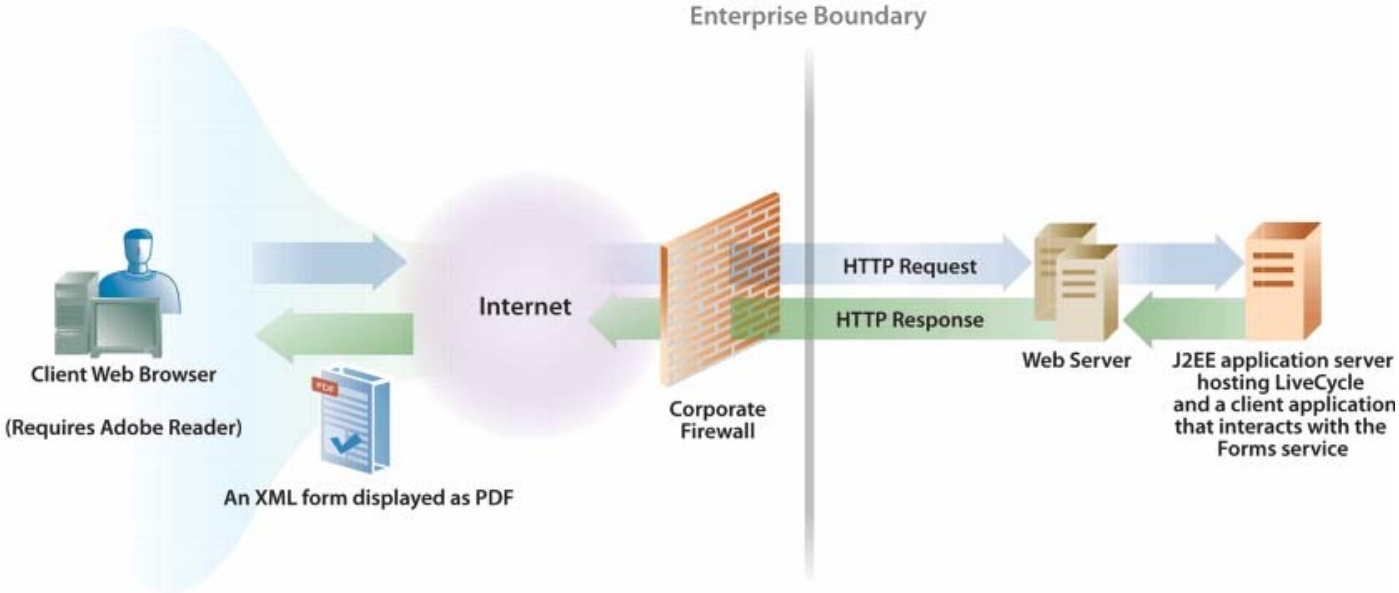

Forms.) 5 A confirmation form is rendered back to the web browser. Data such as the user's first and last name is merged with the form before it is rendered. (See Prepopulating Dynamic Forms.)"

Citation 14pre(4): Rendering Interactive PDF Forms, <http://livedocs.adobe.com/livecycle/8.2/programLC/programmer/help/000309.html>. "The sample loan application is an example of a Forms service application that exists as a Java Servlet. A Java Servlet is a Java program running on a J2EE application server, such as WebSphere, and contains Forms service Client API code."

Citation 14pre(5): PDF Portfolios and Backward Compatibility, http://blogs.adobe.com/pdfdevjunkie/2008/08/pdf_portfolios_and_backward_co_2.html. "We can use Acrobat JavaScript to control what happens when the document is opened. The application property "app.viewerVersion" will return the version number of Acrobat or Reader being used. Then we can use an "if" statement to branch the code. If the viewer number is too low, we can use "this.closeDoc()" to shut down the file."

Citation 14pre(6): Using Acrobat forms and form data on the web, <http://kb2.adobe.com/cps/325/325874.html>. "For a CGI script on a Web server to parse FDF data, you must submit the information from the Acrobat PDF form to a URL that includes the CGI script name. The script name must be followed by the pound (#) character and the capital letters "FDF", so the script recognizes the data as FDF. For example, the URL could read "http://cgi-bin/MyScript.cgi#FDF."

In addition, the Acrobat PDF plug-in also infringes all elements of this claim directly and indirectly (through contributory and/or induced infringement) for the reasons given above.

<p>14a</p>	<p>issuing, from the client workstation, one or more commands to the network server;</p>	<p>Users of Adobe pdf authoring tools, the pdf authoring tools themselves and/or the servers hosting the pdf authoring tools (and/or the combination thereof) issue, from the client workstation, one or more commands to the network server. In addition, Adobe provides the infrastructure (e.g. the authoring tools/servers), in addition to instructions to users, and causes them to use Adobe pdf authoring tools in an infringing manner in their default and expected uses.</p>  <p>The diagram illustrates the architecture for rendering and interacting with forms. On the left, a 'Client Web Browser (Requires Adobe Reader)' is shown. An arrow points from the browser to the 'Internet'. Below this arrow is a PDF icon and the text 'An XML form displayed as PDF'. From the Internet, an arrow points to a 'Corporate Firewall' (represented by a brick wall). A vertical line labeled 'Enterprise Boundary' is positioned to the right of the firewall. From the firewall, an 'HTTP Request' arrow points to a 'Web Server'. From the web server, an 'HTTP Response' arrow points back to the firewall. To the right of the web server is a 'J2EE application server hosting LiveCycle and a client application that interacts with the Forms service'. A double-headed arrow connects the web server and the J2EE application server. Below the diagram, the text 'Source: Rendering Interactive PDF Forms,' is followed by a URL: http://livedocs.adobe.com/livecycle/8.2/programLC/programmer/help/000309.html.</p>
-------------------	--	--

last name is merged with the form before it is rendered. (See Prepopulating Dynamic Forms.)”

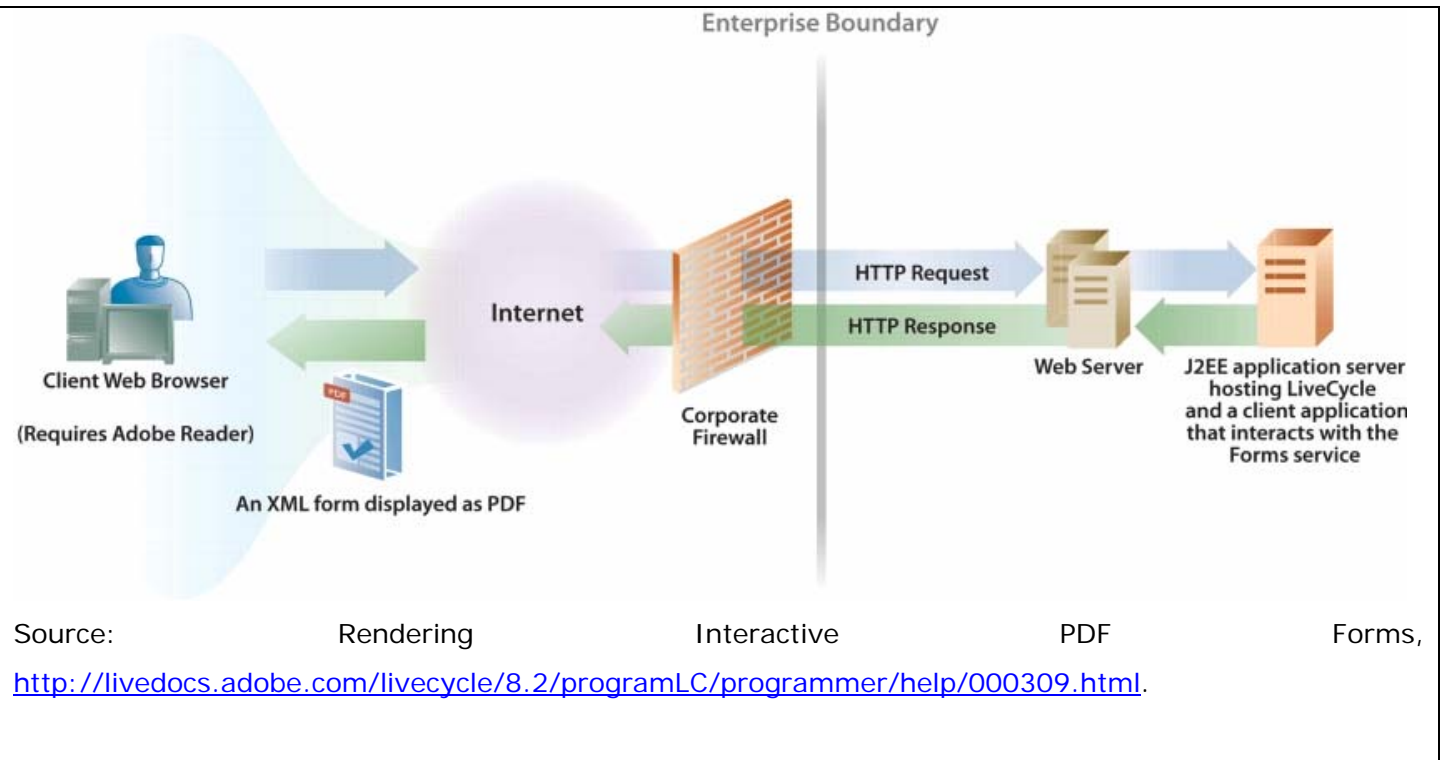

Citation 14a(4): Adobe Reader 8 User Guide, p. 24-25, *available at* http://help.adobe.com/en_US/Acrobat/8.0/Professional/help.pdf. “Allow Fast Web View Downloads PDFs for viewing on the web one page at a time. If this option is not selected, the entire PDF downloads before it is displayed. If you want the entire PDF to continue downloading in the background while you view the first page of requested information, also select Allow Speculative Downloading In The Background.”

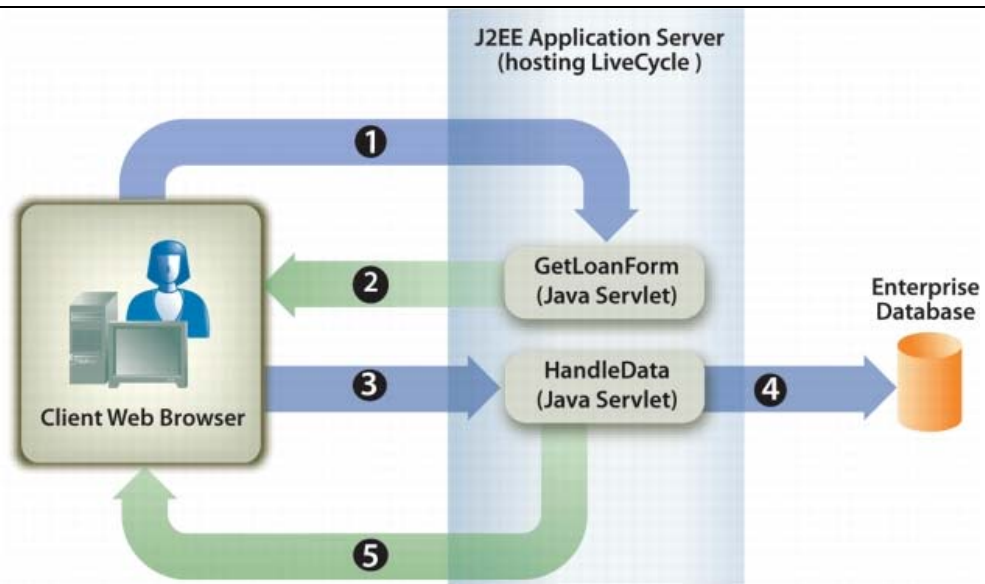

Citation 14a(5): Adobe Acrobat 8 Professional User Guide, p 68, *available at* http://help.adobe.com/en_US/Acrobat/8.0/Professional/help.pdf. “Fast Web View restructures a PDF document for page-at-a-time downloading (byte-serving) from web servers. With Fast Web View, the web server sends only the requested page, rather than the entire PDF. This is especially important with large documents that can take a long time to download from a server.”

Citation 14a(6): Using Acrobat forms and form data on the web, <http://kb2.adobe.com/cps/325/325874.html>. “Using Acrobat 5.x or Acrobat 6.0 Professional, you can create Adobe PDF forms that contain list and check boxes, radio buttons, text fields, or buttons that execute specific behavior. For example, a button could send form data to a script on a Web server.”

Citation 14a(7): Using Acrobat forms and form data on the web, <http://kb2.adobe.com/cps/325/325874.html>. “PDF forms that are viewed on-line within a Web browser maintain the same functionality as if they were viewed locally, including form submission functionality. To set up forms to work on the Web, you need to understand how much involvement the Acrobat applications have in the process and where the Web server takes over. You can create a form field

		<p>button that will submit the form data (FDF) to a Web address.”</p> <p>Citation 14a(8): Using Acrobat forms and form data on the web, http://kb2.adobe.com/cps/325/325874.html. “You must submit PDF forms from within a Web browser (for example, Netscape Navigator or Microsoft Internet Explorer). If you try to submit a PDF form in Adobe Reader, Adobe Reader returns the error "Acrobat Forms: You need to be running inside a web browser in order to submit this form."”</p> <p>In addition, as set forth above, the Adobe PDF plug-in also infringes this element directly and indirectly (through contributory and/or induced infringement).</p>
14b	executing, on the network server, one or more instructions in response to said commands;	Users of Adobe pdf authoring tools, the pdf authoring tools themselves and/or the servers hosting the pdf authoring tools (and/or the combination thereof) execute, on the network server, one or more instructions in response to said commands. In addition, Adobe provides the infrastructure (e.g. the authoring tools/servers), in addition to instructions to users, and causes them to use Adobe pdf authoring tools in an infringing manner in their default and expected uses.

Source: Rendering Interactive PDF Forms,
<http://livedocs.adobe.com/livecycle/8.2/programLC/programmer/help/000309.html>.

Citation 14b(3): Rendering Interactive PDF Forms,
<http://livedocs.adobe.com/livecycle/8.2/programLC/programmer/help/000309.html>. “The following table describes the steps in this diagram. . . . 1 The GetLoanForm Java Servlet is invoked from an HTML page. 2 The GetLoanForm Java Servlet uses the Forms service Client API to render the loan form to the client web browser. (See Rendering an interactive PDF form using the Java API.) 3 After the user fills the loan form and clicks the submit button, data is submitted to the HandleData Java Servlet. (See Loan form.) 4 The HandleData Java Servlet uses the Forms service Client API to process the form submission and retrieve form data. The data is then stored in an enterprise database. (See Handling Submitted Forms.) 5 A confirmation form is rendered back to the web browser. Data such as the user’s first and

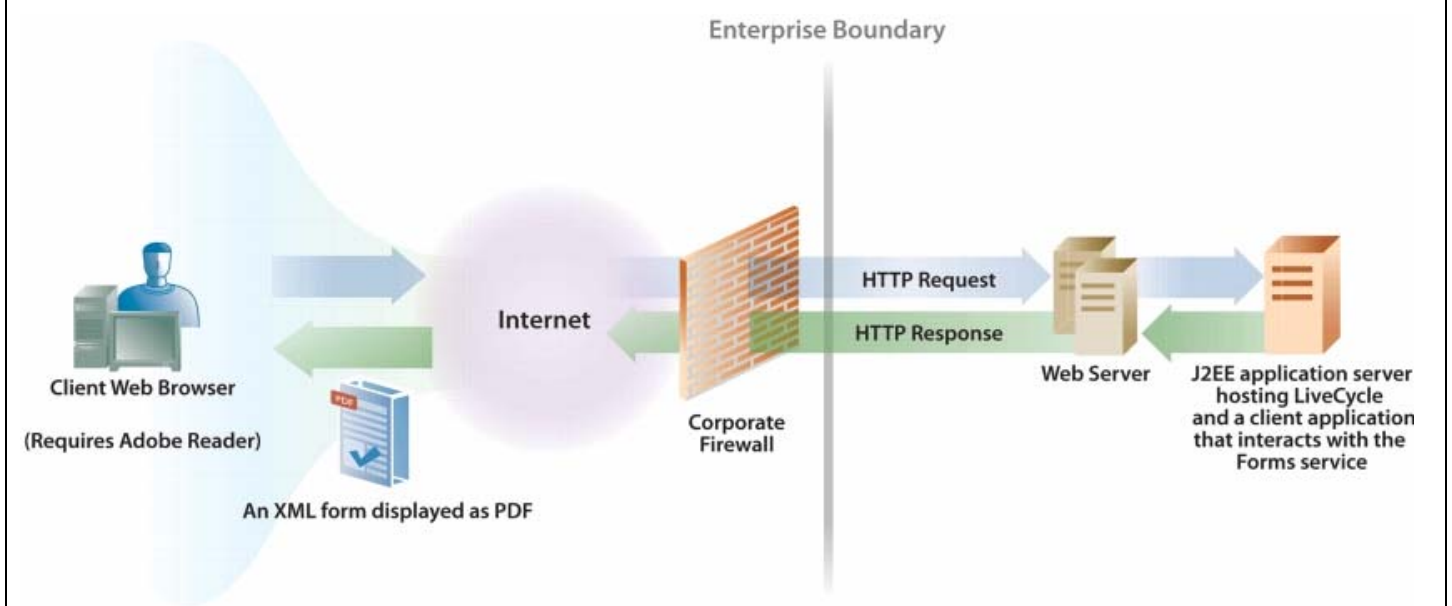

last name is merged with the form before it is rendered. (See Prepopulating Dynamic Forms.)”

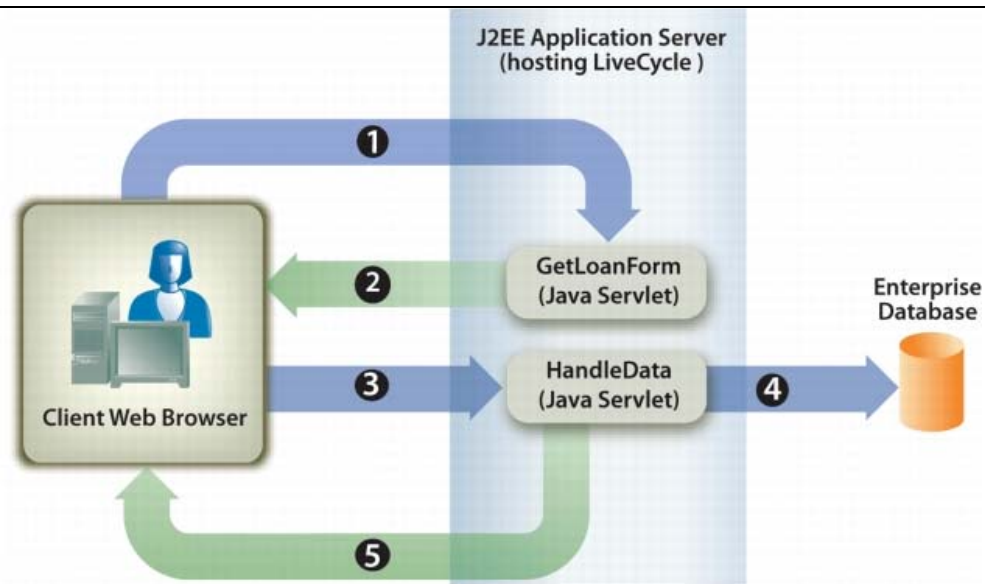

Citation 14b(4): Rendering Interactive PDF Forms, <http://livedocs.adobe.com/livecycle/8.2/programLC/programmer/help/000309.html>. “To render an interactive PDF form, perform the following tasks: 1. Include project files. 2. Create a Forms Client API object. 3. Specify URI values. 4. Attach files to the form (Optional). 5. Render an interactive PDF form. 6. Write the form data stream to the client web browser.”

Citation 14b(5): Using Acrobat forms and form data on the web, <http://kb2.adobe.com/cps/325/325874.html>. “Here's an example workflow of how a PDF file can be used to send PDF form information to a script on a Web server: 1. You create an Acrobat PDF form file in Acrobat, and then place the file on a Web server. 2. A user connects to your Web server and loads the PDF file. 3. The user fills out the PDF form fields and clicks the submit button. 4. The Acrobat viewer exports the form field information as an FDF file. 5. The FDF file is then sent to a specified URL. After this, the Acrobat viewer is no longer involved. 6. A CGI script at the specified URL receives the FDF file, reads it, and processes the information in it.”

Citation 14b(6): Adobe Acrobat 8 Professional User Guide, p 68, *available at* http://help.adobe.com/en_US/Acrobat/8.0/Professional/help.pdf. “Fast Web View restructures a PDF document for page-at-a-time downloading (byte-serving) from web servers. With Fast Web View, the web server sends only the requested page, rather than the entire PDF. This is especially important with large documents that can take a long time to download from a server.”

In addition, as set forth above, the Adobe PDF plug-in also infringes this element directly and indirectly (through contributory and/or induced infringement).

<p>14c</p>	<p>sending information from said network server to said client workstation in response to said executed instructions;</p>	<p>Users of Adobe pdf authoring tools, the pdf authoring tools themselves and/or the servers hosting the pdf authoring tools (and/or the combination thereof) send information from said network server to said client workstation in response to said executed instructions. and viewers can choose to download the PDF directly from the preview page, making the whole process simple and convenient.

3. Embed PDFs (and other files)

While it's always been possible to view PDFs within a browser using the reader browser add-in, Acrobat.com now offers another way to deliver PDF content in a browser. With a click of the document's "Copy Embed Code" button, you can paste a reading "widget" directly into your web page. Unlike the Reader add-in, the widget only takes up a small portion of the page, though you can expand it to take up the entire page. An example is shown below.

4. Export Buzzword documents to PDF

Of course, most documents began their life as something other than a PDF file. Adobe Buzzword now provides a great way to author a rich document - complete with graphics, tables, links and comments. And when the authoring / editing process is complete, you can simply export the

and viewers can choose to download the PDF directly from the preview page, making the whole process simple and convenient.

3. Embed PDFs (and other files)

While it's always been possible to view PDFs within a browser using the reader browser add-in, Acrobat.com now offers another way to deliver PDF content in a browser. With a click of the document's "Copy Embed Code" button, you can paste a reading "widget" directly into your web page. Unlike the Reader add-in, the widget only takes up a small portion of the page, though you can expand it to take up the entire page. An example is shown below.

4. Export Buzzword documents to PDF

Of course, most documents began their life as something other than a PDF file. Adobe Buzzword now provides a great way to author a rich document - complete with graphics, tables, links and comments. And when the authoring / editing process is complete, you can simply export the
