MR. WILLIAM H. BAUMGARTNER, JR.

EXHIBIT I

1 document, and it just went to this little item here and changed
2 the background color of the page to white. What it's doing
3 when it does this, it's called parsing the document. It takes
4 this document, and if you see these little pieces of text with
5 these little angle brackets surrounding them, those are called
6 text formats. The browser recognizes those as things that
7 direct it to do something, but they are separate from the
8 actual text, for example, that might be placed on the page.

9 Q Let me stop you there and ask you a couple of questions,
10 Dr. Doyle.

11 For this HTML source page you indicated that that was
12 a text-based format?

13 A Yes, it is.

14 Q How does a web page get created in the first place?

15 A Well, typically, especially back then in -- at the time
16 that Mosaic was existing, the web page authors would take a
17 text editor and just type out a series of HTML commands and lay
18 out the page in the -- in a text file.

19 Q So in this instance when www.acme.com was written in the
20 address or URL section of the computer, it went out and fetched
21 a web page that someone had created?

22 A That's correct. Then the web page author would have
23 written this text page and placed it on a server out on the
24 Internet.

25 Q Do you need to be a computer scientist to write a web page
