Your Honor:

I write on behalf of the 43 defendants (listed on attached Ex. A) represented by Fish & Richardson P.C. across the four lawsuits captioned above brought by Parallel Networks asserting U.S. Patent No. 6,446,111 (“the ’111 patent”).

At the March 1 status conference for the four cases captioned above, the Court directed that the Defendants respond to a proposal under which Plaintiff would be limited to asserting five claims of the ’111 patent, and claim construction would be limited to five phrases from those claims, followed by a summary judgment/*Markman* process. Since the hearing, Defendants have reached out to the Plaintiff in the hope of securing agreement about the conduct of discovery, disclosures, and related matters under the “five for five” proposal. However, Plaintiff was not willing to make any commitments at this time.

While we are still working on it, we are unable to provide a uniform commitment to the proposal. We cannot emphasize enough, however, that our clients uniformly
