Subject: RE: Wi-LAN v Alcatel-Lucent et al / Proposal to narrow case

Counsel – per the parties' agreement, the Defendants identify the following prior art references to prove that the asserted claims are invalid. We reserve the right, however, to present other documents, including prior-art references, for other purposes.

Due to traveling schedules, we have not been able to obtain final approval of this list from lead counsel for all defendants. Therefore, we may need to substitute no more than one or two references. Rather than asking to extend the deadline (due to the difficulties of getting in touch with everyone on a Sunday), we wanted to provide a preliminary list now. We will confirm the list no later than midnight tonight.

1. U.S. Patent 6,018,528
 2. "Spread Spectrum and Time Division Multiple Access Satellite Communications" by Mohanty
 3. TIA/EIA IS-95-A Standard
 4. PCT Application WO 93/15573
 5. PCT Application WO 95/03652
 6. U.S. Patent No. 5,533,013
 7. "CDMA for Cellular and PCS" by Tiedemann
 8. "The PCS CDMA System Overview" by Zehavi and Tiedemann
