COUNT I
(INFRINGEMENT OF U.S. PATENT NO. 5,748,484)

7. Express Card incorporates paragraphs 1 through 6 herein by reference.

8. This cause of action arises under the patent laws of the United States, and in particular, 35 U.S.C. §§ 271, *et seq.*

9. The '484 patent is entitled "System for Printing Social Expression Cards in Response to Electronically Transmitted Orders." Express Card has an exclusive license to the '484 patent with rights to enforce the '484 patent and sue infringers. A true and correct copy of the '484 patent is attached as Exhibit 1.

10. The '484 patent is valid, enforceable and was duly issued in full compliance with Title 35 of the United States Code.

11. Express Card has been damaged as a result of Apple's infringing conduct described in this Count. Apple is, thus, liable to Express Card in an amount that adequately compensates it for Apple's infringement, which by law, cannot be less than a reasonable royalty, together with interest and costs as fixed by this Court under 35 U.S.C. § 284.

(Direct Infringement)

12. On information and belief, Apple has and continues to directly infringe one or more claims of the '484 patent in this judicial district and/or elsewhere in Texas and the United States, including at least claim 1 by, among other things, making, using, offering for sale, selling and/or importing systems that infringe the '484 patent including, but not limited to the

technology associated with Apple's "Cards" app. Apple is thereby liable for infringement of the '484 patent pursuant to 35 U.S.C. § 271.

(Indirect Infringement – Inducement)

13. Based on the information presently available to Express Card, absent discovery, and in the alternative to direct infringement, Express Card contends that Apple has and continues to indirectly infringe one or more claims of the '484 patent, including at least claim 1 by inducing others (e.g., end users of "Cards") to use the patented systems in violation of one or more claims of the '484 patent.

14. Apple has been on notice of the '484 patent since at least service of this action. In accordance with Fed. R. Civ. P. 11(b)(3), Express Card will likely have additional evidentiary support after a reasonable opportunity for further investigation or discovery on this issue.

15. On information and belief, since Apple has been on notice of the '484 patent, Apple has knowingly induced infringement of the '484 patent, including at least claim 1 of the '484 patent, and possessed specific intent to encourage others' infringement.

16. On information and belief, since Apple has been on notice of the '484 patent, Apple knew or should have known that its actions would induce actual infringement of the '484 patent, including at least claim 1 of the '484 patent.

17. Apple provides support to users of its "Cards" app.

18. Apple has not produced any evidence as to any investigation, design around or that any remedial action was taken with respect to the '484 patent. In accordance with Fed .R. Civ. P. 11(b)(3), Express Card will likely have additional evidentiary support after a reasonable opportunity for discovery on this issue.

(Indirect Infringement – Contributory)

19. Based on the information presently available to Express Card, absent discovery, and in the alternative to direct infringement, Express Card contends that Apple has and continues to indirectly infringe one or more claims of the '484 patent, including at least claim 1 by contributing to the direct infringement of others, including entities such as end users of Apple's "Cards" app, to make, use, offer for sale, sell and/or import systems that infringe one or more claims of the '484 patent, including at least claim 1.

20. Apple has and continues to contribute to the direct infringement of others, such as end users of Apple's "Cards" app, by offering to sell, selling and/or importing into the United States a component of a patented apparatus that constitutes a material part of the invention, knowing the same to be especially made or especially adapted for use in infringement of the '484 patent and not a staple article or commodity of commerce suitable for substantial noninfringing use. An example of such a material component offered for sale, sold and/or imported by Apple is Apple's "Cards" app and the technology associated therewith.

21. On information and belief, Apple has been on notice of the '484 patent since at least service of this action, or before, but has continued since that time to cause others to directly infringe the '484 patent as alleged herein. In accordance with Fed. R. Civ. P. 11(b)(3), Express Card will likely have additional evidentiary support after a reasonable opportunity for further investigation or discovery on this issue.

22. Since Apple has been on notice of the '484 patent, Apple knew or should have known that Apple's "Cards" app and the technology associated therewith constituted material components of the inventions claimed in the '484 patent, are especially made or especially adapted for use in infringement of the '484 patent, and are not a staple article or commodity of commerce suitable for substantial noninfringing use.

23. By virtue of at least this Complaint, Apple has been provided with written notice of Express Card's allegation that Apple has and continues to contributorily infringe the '484 patent and written identification of exemplar products that infringe one or more claims of the '484 patent (e.g., systems used by end users of Apple's "Cards" app) and written notice of an exemplar material part of these devices (e.g., Apple's "Card" app and the technology associated therewith) that are especially made or especially adapted for use in infringing the '484 patent and are not staple articles or commodities of commerce suitable for substantial noninfringing use.
