## "Alexa, can I work for you?"

The Amazon Alexa team focuses on bringing user-delighting, voice-activated experiences to Amazon customers. The Alexa team first began with the development of [Amazon Echo](#), a new category of [device](#) designed entirely around your voice. It's always ready, connected, and fast — just ask for information, music, news, weather, and more. Echo begins working as soon as it detects the wake word.

But the team of speech scientists, voice designers, developers, and more didn't stop there. The Echo family of devices has grown to include [Echo Dot](#) and [Amazon Tap](#), and Alexa is now available on [Fire tablets](#) and [Amazon Fire TV](#). The [Alexa Voice Service](#) is bringing Alexa to other connected products, and the [Alexa Skills Kit \(ASK\)](#) allows third-party developers to easily build and add their own skills to Alexa, like ordering an Uber or making a Capital One credit card payment.

We are currently located in Seattle, Boston, Sunnyvale, Irvine, Poland, Germany, the UK, India (Bangalore), Italy, and Luxembourg, and continue to grow rapidly. We are pioneers working to build the best solutions to unique problems. Come join us.

Are you looking for careers with Alexa.com, the marketing analytics software service? If you are interested in careers with this team — which is a separate Amazon subsidiary — please visit [alexa.com/about/careers](https://alexa.com/about/careers).

## Meet the Alexa Team

Meet the Alexa Team

### Meet the Alexa Team

"The Echo may be the closest thing we'll have to a Star Trek computer at home." - CNET Meet the team that created Echo and Alexa.

Meet the Alexa Software Team

### Meet the Alexa Software Team

Creating and testing Alexa's software capabilities is an interesting challenge – we ship new features every week! Just ask the team.

Meet the Alexa Science Group

### Meet the Alexa Science Group
