★★★★☆ Best Choice Fire Tablet for Quality, Size and Price

October 20, 2018

Digital Storage Capacity: 16 | Offer Type: With Special Offers | Color: Black | Style: Fire HD 8 | [Verified Purchase](#)

This review is for those stuck between purchasing a Fire 7 or a Fire HD 8 Tablet:

Let me just get this off my chest first. I DO NOT RECOMMEND a Fire 7 AT ALL if your looking for a quality tablet that's small and inexpensive like I was. The only reasons I can see anyone buying a Fire 7 is if it's for a very, very young child as a starter tablet or if your an adult who will only use it to read books. Otherwise the Fire HD 8 is going to be your best bet.

The Fire HD 8 is great quality for it's size and yes even it's price. It's the perfect size unlike the Fire 7 which to me really isn't much larger in screen size than my iPhone 6+. The Fire HD 8 comes with an ample amount of storage to be able to handle whatever updates it throws at you upon setup, and that's just the 16GB. Anything below 16GB is not enough to handle device updates and allow for storage space for much of anything. There's not much money saved either in buying a Fire 7 8GB with a micro SD Card, been there, done that and I won't do it again!

Now onto the fun stuff. The Fire HD 8 is HD! It has a longer battery life, downloads faster, has better sound quality and video quality than the Fire 7. It's also easier to start up a game and actually play it than the Fire 7. Everything [Read more](#)

Amazon Customer

★★★★☆ Great for what it is. Even better with Google Play store side loaded

October 6, 2018

Digital Storage Capacity: 32 | Offer Type: With Special Offers | Color: Marine Blue | Style: Fire HD 8 | **Verified Purchase**

I got my Fire HD 8 on release day and set up was a breeze. I side loaded the Google Play store (check Youtube, it's easy) and installed my favorite Google apps, Youtube, Google Play Music, Google 1, Google Drive, Google Docs and a slew of other apps I like from the Play Store that Amazon's app store does not provide and I'm loving the tablet. It's no speed demon but for the price I wasn't looking for cutting edge technology. I also bought the cover and the docking station and switch between the two easily as I retire to my bedroom for the night. I previously was using a Fire 6 tablet and a Samsung Galaxy tab S3. The Kindle Fire 6 was great for it's size and the Galaxy Tab was great (older now, less reliable battery life due to age) for the same reasons but this Kindle Fire HD 8 blends the best of both worlds for me regarding size. It's a nice companion to have near, lets me use the apps that I like, moderate gaming, lots of reading and now having both Amazon Music and Google Play Music, a slew of options for music. If you are looking for a workhorse you're better off with your iPad or mainstream Android tablet . If you are looking for a nice reliable multimedia hub, look no further than this tablet. The price is on point for the features it has provided thus far and I am happy with my purchase. it is a great middle of the road tablet and the price it can't be beat. I'm giving it 4 stars instead of 5 because there is nothing revolutionary about this tablet. It's not a must have by any means but it fits the casual niche perfectly.

☆☆☆☆ **Apps not compatible**

October 5, 2018

Digital Storage Capacity: 16 | Offer Type: With Special Offers | Color: Black | Style: Fire HD 8 | **Verified Purchase**

Got the new fire 8 last night and tried to set it up with the apps that I had used on my previous fire tablets. It appears that apps for EA are not longer available. They do not appear in my library nor in the appstore. A rep from Amazon told me that some apps that previously worked are not longer compatible with the new fire. When I commented about not being able to use an app that I got via Amazon and spent money in using Amazon coins, I was more or less told "oh well".

☆☆☆☆ **Device won't connect to wifi don't buy it!!!**

October 12, 2018

Digital Storage Capacity: 16 | Offer Type: With Special Offers | Color: Black | Style: Fire HD 8 | **Verified Purchase**

I would like to give this first hd 8 a half star but it won't let me. I've had this thing for 9 days and have spent several hours each day looking for help as to why this device will not stay connected to wifi. It continuously searches for a connection even after you have connected to your home wifi. It stays connected for only 30 seconds and drops the connection then it will reconnect and drop again then reconnect and drop again then reconnect and drop again.....you get the idea. You cannot even chat with amazon tech support because, you guessed it, it won't stay connected to the WiFi. Yes I have reset modem, fire hd and even turned off said 2.4GHz on my router. Nope nothing works. I would like to return this product for a refund but I throw out the packaging the day I got the thing. My recommendation is to purchase a different product.
