17

A. First I sent out a, at the direction of -- or legal counsel sent out at my direction a email to all employees of SCO requesting any information they might have on this topic. And along with legal counsel I reviewed all of the responses that came back to see what would be pertinent.

And then I also talked to a number of 12 employees who had involvement with SCO and SuSe, including Darl McBride, Andy Nagle, Erik Hughes. And there may have been others that I also talked to. Reviewed a number of documents that I thought might be applicable. And that's, I think, the majority of what I did in preparing for this topic.

Q. Great. Back in December when you were 19 deposed and presented some information on other 20 aspects of this topic, you prepared an exhibit that we marked as Exhibit 320 at that time. If you could take 22 just a quick look at that.

23 While you're scanning it, as I recall 24 counsel represented this was SCO's attempt to catalog 25 the documents that it found to be responsive to

CEO level, including emails involving Darl McBride and the other CEO's of the UnitedLinux consortium.

To your knowledge have those emails all been produced to IBM in this litigation?

My understanding is they have.

Do you recall the dates, perhaps just the rough inclusive dates, of the emails that you reviewed? That is, about when they began and about when they ended?

Α. Well, there are emails that went all the way back to before Darl McBride involving Ransom Lov I think Benoy Tamang, who was another executive with SCO, that were the primary executives involved with the formation of UnitedLinux in conjunction with SuSe. So those would have been back in I believe the 2001 time frame.

17 Perhaps for frame of reference let's try Q. 18 and establish when it was that discussions and efforts 19 to form UnitedLinux began. Do you recall about when that was? 20

21 A. My understanding is it was in the 2001 22 time frame.

23 Ο. Prior to that 2001 time frame do you know 24 whether there were any agreements between Caldera or any of its predecessors and SuSe?

Page 10

18

19

20

Topic 23, at least as they existed back in December of 2005?

A. Yeah. And I don't believe it was my deposition. I think it was most likely Erik Hughes's deposition.

I apologize if I misspoke, I think that's O. correct. In any event, this document, Exhibit 320, at least to my reading, does not list any documents that appear to be directly responsive to SuSe or to relate to SuSe, perhaps better said.

My question is: In preparing for your 12 testimony today did you attempt to prepare any sort of 13 a similar document or a document similar to Exhibit 320 to catalog the documents that would be responsive to SuSe or to relate to SuSe?

A. No, I did not attempt to create a document similar to this.

Are you able to list or describe in any 18 19 more detail the documents that you did review that you 20 believed were related to SuSe and responsive to this 21

22 Well, I believe there was a number of 23 emails between SCO employees and SuSe employees, mostly around the formation and operation of UnitedLinux at a number of different levels, at the

Page 12

Page 11

A. I'm not aware of any other agreements.

Okay. How about any communications or just general business relationships of any kind that may have existed before 2001?

Α. There may have been some, but none that I have identified.

And none that others whom you contacted О. could identify, I take it?

That were -- yeah, no.

10 Yeah, no. So fair to say then that the O. 11 most significant and perhaps the first involvement between The SCO Group -- and by the way, let's make clear at the outset as we've done in the past. When I say "SCO" or "The SCO Group" I mean to include the 15 current SCO Group and all of its predecessors in 16 interest as appropriate in the context of the 17 question --

> Which is --Α.

Q. -- do you understand?

A. Yes.

21 O. Okay. And we have been able in past depositions to make that distinction, and if one needs 23 to be made please do so. In other words, if it's

24 clear that the question doesn't apply to SCO but does apply specifically to a predecessor in interest, let

CHRISTOPHER SONTAG Page 13 Page 15 1 me know. So we continued in some capacity with 1 2 Okay. 2 UnitedLinux into the fall of 2003 time frame, at which A. 3 But for shorthand purposes and efficiency point I believe when UnitedLinux itself really ceased 4 I'm just going to say "SCO" and "The SCO Group." 4 to function as a viable entity. 5 O. Did SCO have any communications with SuSe 5 A. Okay. 6 after the fall of 2003 and the effective end of the 6 All right. Is it fair to say then that 7 UnitedLinux effort? 7 most significant and perhaps the first involvement between SCO and SuSe began with respect to the efforts 8 I'm not aware of any other communications 8 9 other than may have been informal that occurred. 9 to form UnitedLinux? There was a number of obvious communications 10 I believe so. A. 11 throughout the period of, you know, the suspension and All right. As part of that effort, that 11 the effective winding down of UnitedLinux. being the UnitedLinux project -- if I may describe it 12 12 13 But so far as you know no formal 13 as that -- were there any formal agreements that were 14 communications between SCO and SuSe after the fall of 14 executed between SCO and SuSe? There were formal agreements for the 15 2003? 15 formation of UnitedLinux that were entered into by all 16 A. Not that I'm aware of, no. 16 17 Q. Any formal agreements between the two 17 of the parties. So SCO, SuSe, Conectiva, Turbo. 18 entities after the fall of 2003? 18 And perhaps my question wasn't a good 19 one. I understand that that's the case and obviously 19 A. Not that I'm aware of. 20 During your last deposition you and I SuSe and SCO would have been signatories to that 20 agreement, but I meant anyone on one agreement between 21 discussed several emails and other documents, which at least to my reading -- and I don't mean to unfairly SuSe and SCO that you're aware of? 22 characterize them -- but it suggested that there was a 23 Not that I'm aware of. I believe all of disagreement, if you will, or a difference of opinion 24 the agreements were related to UnitedLinux involving between SuSe and SCO as it pertained to the all the parties. Page 16 Page 14 UnitedLinux project and SCO's participation in that Let's move forward then from the 1 beginning of the UnitedLinux project in around 2001, project. Do you recall in general the discussion that 3 we had about those emails? and I'd like to get some idea of when SCO's 4 In general, yes. participation, let's say active participation, in the Α. 5 UnitedLinux project ended? 5 Q. Would it be fair to say that SuSe did in fact object to SCO's handling and its release of its 6 Uh-huh. Α. 7 SCO Linux product? Q. When in your mind did that occur? I think it would -- there's more We announced as the four companies 8 8 9 complexity to that than -- than can be characterized 9 UnitedLinux in I believe November of 2002, and all the 10 10

companies participated in the launch and announcement. And we had a product announcement of development workl 1 12 that occurred prior to that point and a release of

Obviously we filed our lawsuit against 14 IBM in March of 2003 and then publically announced our 15 suspension of our Linux related activities and 16 business in May of 2003, though we still continued 17 participating as required in UnitedLinux all the way 18 19

18 through that point, and even beyond. 19 20 Not participating in any fashion that we 21 believed was -- you know, we felt we had to abide by 22 contractual obligations of our agreements with the 23 UnitedLinux, and at the same time winding down our Linux related activities and winding down our agreements and obligations to our customers.

at that level. I would refer you to some of the discussions that Darl McBride laid out in his December deposition regarding his communications with executives from SuSe, and I think he lays out very well the nature of those discussions.

Q. Did you review any correspondence -strike that.

Was there any correspondence between Mr. McBride and any of the SuSe executives?

Yes, I believe there was.

And to your knowledge -- strike that. Did you review that correspondence in preparing for today's testimony?

Α. Briefly.

And to your knowledge has all of the Q. correspondence been produced to IBM --

products early into 2003.

14 15 Q. -- in litigation?

You indicated at the outset that among the folks that you spoke with were Mr. McBride, Mr. Nagle, and Mr. Hughes. What specifically did Mr. McBride have to say in response to your inquiry about information responsive to this topic?

Α. Mr. McBride and I had talked on a number of occasions previously, so it was not a long extensive conversation since I already knew much of his characterization of the communications he had with SuSe and the other CEO's of UnitedLinux. 12

13 But we did talk about it briefly and he 14 also referred me to his deposition in December of last year stating that that was probably the best, you 15 know, description of the nature of those communications. And I did briefly review those portions of the deposition that related to those SuSe 19 communications.

- Okay. How about Mr. Nagle. What, if 21 anything, did he have to add to your preparation for 22 today?
- Mr. Nagle I had talked to on a number of 24 occasions, and he also had reported to me very early in my career at SCO so I had a fair amount of

may use that phrase, in any sort of a business pursuit or product development, things of that nature?

Page 19

- A. Outside of UnitedLinux?
- Yes, sir. Q.
  - I'm not aware of any. Α.
- Prior to the time that Novell acquired SuSe -- and I don't mean to characterize that transaction in any specific way -- but when the two entities combined, prior to that time had SCO ever 10 threatened to sue SuSe?
  - Not to my knowledge. Α.
- 12 And conversely are you aware of any 13 communications or any indications from SuSe that indicated that it intended at any time to commence litigation or to sue SCO? 15
  - Α. No.
- 17 Q. Is there anything else that you believe 18 is responsive to Topic 23, and specifically the communications and agreements between SCO and SuSe 20 that we have not discussed this morning?
  - No. I do not. A.
- 22 Well, let's move on. O.

(Exhibit 1678 was marked for identification.)

24 MR. DRAKE: Let me hand you what we've marked as Exhibit 1678, which is the September 2nd,

Page 18

knowledge of his activities and -- related to SuSe. And he was on the board of the UnitedLinux association

2 and so I talked to him extensively throughout the

course of managing him and also had conversations with him subsequent to that point regarding questions I had 6 on various aspects of UnitedLinux.

And fairly recently had talked to him again about was there any other documents or other information that he was aware of. But most of my 10 information from Mr. Nagle were based on conversations 11 over a number of years that I've had with him.

- And finally Mr. Hughes, someone you 13 mentioned as someone that you had interviewed, what did Mr. Hughes have to offer, if anything?
- We briefly discussed aspects of his 16 understanding of the productizing of UnitedLinux, you know, base products. I also reviewed, you know, some of the documents that he had put together for legal counsel and briefly talked to him about if there was 20 any other documents or information that he was aware 21 of that would be responsive to this topic.
- 22 Q. I think your earlier answers would have 23 addressed this but let me make it clear. To your knowledge were there any efforts, apart from the UnitedLinux efforts where SCO and SuSe partnered, if I 25

Page 20 2005, notice. It contains the three topics on which

you've been designated this morning. If you would 3 turn to Page 4 and just take a quick moment to review 4 Topic 3.

- Have you had a moment to review Topic 3? Q.
- A.
- Q. And are you prepared this morning to discuss Topic 3?
  - A.
- Q. Again for shorthand purposes and to try 11 to expedite the deposition this morning I'm going to refer to this topic generally as communications regarding open sourcing of Unix. Are you comfortable with that characterization?
  - A. Yes.
- 16 Okay. You hesitated. Tell me -- I want O. 17 to make sure we're on the same page, so if there's 18 anything we need to do to define better terms I'll 19 certainly try to do it.
  - If I think it becomes an issue I'll certainly try to help clarify.
  - O. Great.

23 MR. JAMES: And let me just say, Curt, 24 for the record, in preparing for this topic I know that Mr. Sontag focussed more on outside type

Page 21

communications because Erik Hughes testified as a 30(b)(6) witness in some detail on communications within SCO and plans and those sorts of things relating to open sourcing Unix. And Chris knows some about that but focussed more on outside third-party communications.

MR. DRAKE: And that's certainly fair. There is, and has been, some duplication. There will be some more today, undoubtedly, because some of the things that I want to talk to you about are internal communications. So I appreciate that clarification, you know, I'll apologize if there is some duplication. We'll try to minimize it and work through the topic.

MR. JAMES: And let me also say we prepared, I think to assist in this thing on this topic -- and I'll give you a couple copies now -- a little list that Chris and I were able to put together based on what Chris has done relating to, I guess the 19 portion of Topic 3 that talks about open sourcing or public disclosure of any product containing Unix code.

THE WITNESS: Discussion or the actual, and these were the topic areas that we identified that I felt was relevant to the topic.

24 MR. JAMES: And these would be outside or 25 public types of communications.

20

21

First of all tell me how did you go about gathering the information that resulted in the preparation of Exhibit 1679?

Sure. Again, as part of the process in conjunction with our attorneys and their direction an email was sent out to all of the SCO employees asking for any information they may have on these topic areas. And I, in conjunction with legal counsel, reviewed any of the responses that came back. So that was one area.

I also talked to a number of SCO employees who I felt had familiarity with activities related to open sourcing of Unix source code, potentially, and to various open source licenses.

- Let me interrupt you at that point. I apologize for doing so. Tell me who those employees were, please.
- 19 A. Sure. Sandy Gupta, for one, who was our 20 chief technology officer and vice president of 21 engineering. And he also talked to a number of his 22 engineers in response to my questions. 23

I also talked to Blake Stowell, who was our director of PR relations. And because I knew he had some familiarity with either press releases that

Page 22

4

Page 23

MR. DRAKE: Okay.

(Exhibit 1679 was marked for identification.)

MR. DRAKE: If I may, let me just trade documents with you there, Mr. Sontag, I'll give you the one that we've marked as Exhibit 1679, which is a one-page document that Mr. James has just handed me and has explained a little bit about its preparation.

- Tell me if you would, please, again what it is that this document represents.
- This document represents, you know, either discussions or disclosures of, you know, some 12 element of a Unix source into an open source entity. 13 So in some cases there was discussions of open 14 sourcing a certain utility or otherwise, and to my knowledge in some of those cases the actual open 16 sourcing process did not occur.

So there was in some cases public 18 disclosure of the intent and some cases the follow through of actually open sourcing, I do not believe, 20 in some cases occurred. But this was, you know, my 21 effort to put together a list of the categories and 22 areas that I thought were relevant to the topic.

23 Great. Well, I appreciate your effort. 24 Let's take a moment and go through this so that I can 25 understand, you know, item by item what you

were done or previous information inside of SCO of press releases and otherwise that might have related to this topic.

And then I also did some searching myself in reviewing of documents that I thought would be pertinent and pulled out of any of those information that I felt was appropriate to the topic and compiled it into this list.

- Ο. Did you speak with Jay Peterson?
- Yes, I did, actually. Α.
- Did you speak with Mike Davidson? Q.
- No, I did not. Α.
- What did Mr. Peterson contribute, if Q. anything, to either your investigation or the 15 preparation of Exhibit 1679?
  - Mr. Peterson remembered that we had either announced or potentially had actually open sourced Cscope as a technology, and he also thought there was a number of other utilities, and I think he mentioned GREP, he wasn't specific in more detail than that.

22 Those were the two that he specifically 23 identified which led me to ask more questions of, you 24 know, Mr. Gupta and to also do some research added to 25 that some additional items that were -- that Mr. Gupta

actually identified in an announcement related to AIM, GREP and SREP that I also added into the list.

For the reporter's benefits we're going to be using a lot of acronyms, if you want to stop us and get those at this time or you want to add them later, that's -- that's fine. GREP, for instance, is G-R-E-P, all caps, no periods.

I interrupted you with the inquiry about Mr. Peterson and Mr. Davidson. You were telling me other things that you did in addition to those interviews to compile the information that went into Exhibit 1679.

13 Α. Yes. So a number of discussions with 14 Mr. Gupta, and at least one or two conversations with Mr. Peterson. The email sent generally to all the 16 employees. A number of responses in that regard, 17 reviewing them, and then a number of documents that I thought might be applicable, or at least have some information that would help identify items that may be 20 of appropriate inclusion in this list.

21 A common theme -- and you've heard this 22 question many, many times but I need to ask it -- did you discover or come upon any documents that were responsive to this topic that aided you in your 25 investigation that have not been produced to IBM in

prepared at or near the time of this --2

Yes. Α.

Q. -- grant to the TIS committee?

And at that time it would have been by one of our predecessors, it would have been Novell.

Q. I wasn't altogether clear with your description of how this came to an end. Was the license in fact granted?

The license was granted to the committee Α. but the committee shortly thereafter disbanded.

To your knowledge did the committee use the license in any way prior to the time that the 12 committee itself was disbanded?

14 My understanding is that they did not, 15 and my understanding is that they did not provide any 16 licenses out in any fashion.

Do you know more about the TIS committee, who formed it, the nature of the committee itself, things of that nature?

Generally. It was formed by a number of application tool developers, I believe Microsoft was on the committee as well as a number of other tool developers. I believe Borland at the time, Novell was on the committee. And the purpose of the committee was to develop an application tools development

Page 26

25

A. Not that I'm aware of.

All right. Well let's take it from the top, as they say, and talk about ELF, that's E-L-F, license agreement.

Yes. A.

Q. To T-I-S. Tell me about that, please.

All right. My understanding there was an ELF license, a limited ELF license was granted to kind of a consortium called the TIS committee, Tools Interface Standard, that was mostly just an idea, it never really amounted to much. 12

Shortly after the committee was formed it 14 was disbanded. There was no real product produced of 14 15 the committee. And again, like I said, it was a 16 limited license and for use only within the Tools Interface Standard Committee. And with the disbanding 17 of that committee and the limitations of that license my understanding of that was basically stillborn.

Q. Who was the source of your information 21 for the ELF license grant?

22 I happened to be familiar with the fact 23 that there had been a document providing a license grant to the TIS committee.

There is a discreet license that was

environment for the creation of Unix applications on 32-bit Intel, along with some compatibility with Microsoft and Windows applications in some fashion.

Is it your understanding that SCO has made allegations in this case against IBM that IBM has in some manner misused the ELF code or some portion of it?

A. Yes, that is my understanding.

Is it also your understanding that it's Q. the same ELF code that is at issue with IBM that was the subject of this limited license to the TIS group?

That is my understanding. A.

You indicated that the license was Q. limited. Can you describe in a little more detail the manner in which the license was limited?

MR. JAMES: Object to the extent that calls for a legal conclusion.

THE WITNESS: I think the license grant stands on its own, but I -- in general my understanding was that it was limited to being used within a TIS committee specification for purpose of TIS compatibility, and no other use or license was granted and all other rights were reserved to SCO.

BY MR. DRAKE: What type of license was it? Was this a source code license or was it a

19

20

21

22

23

- Okay. Let's move on to Item Number 2, 10 which is Open S-A-R. That's capital O, small p-e-n capital S-A-R, one word. 11
- 12 Right. My understanding was it was a 13 monitoring utility. There was some level of joint 14 development or some relationship with a company called 15 Starnix, and there was a number of emails that I 16 reviewed that showed there was some discussion of 17 potentially open sourcing a version of what was called 18 SAR with the name of OpenSAR, that required agreement 18 19 on the part of SCO and Starnix.

There was, my understanding, an announcement, but ultimately there wasn't an agreement 21 on what appropriate open source license could be used and so the actual open sourcing of OpenSAR, to my knowledge, did not occur. 24

And what type of entity is Starnix?

communications that I've seen.

Okay. The next item is A-W-K. Tell me 2 3 about that, if you would, please.

It's a minor Unix utility. They're -- I came across some communications that stated that there was discussions of open sourcing it that were a public nature, but I was not able to find any other communications or other information of the actual open sourcing of that utility.

- You have a parenthetical reference there 11 that says "(utility)" with an asterisk, and as I understand Exhibit 1679 the asterisk means "may not have been open sourced." Correct?
- Correct. So there was discussions of 1.4 open sourcing it in some public fashion, there was some internal discussion as well, but then I was not 17 able to find specific information of the actual open sourcing of the AWK utility.
- 19 AWK you say, okay. You say they were 20 external discussions?
- 21 There was public communications or 22 announcements related to open sourcing the AWK 23 utility.
- Apart from just announcements was there Q. 25 another entity, another external company or someone

Page 30

Page 32

Page 31

- I don't know much about it.
  - Do you know anything at all?
- Not really. I know they were an entity A. that was doing some joint development.
- You mentioned emails. Do you recall which parties or which individuals were involved in the emails that you reviewed?
- There was internal SCO emails as well as emails in conjunction with, I believe Starnix's employees, on appropriateness and nature of what should be open sourced and which license would be appropriate and how to accomplish that.
- Again on the SCO side who was most Q. involved, if there was any one such person?
- I'm not specifically aware of any one person. I just obtained a string of emails, I believe all of which have been produced.
- 18 What, again, was the reason, at least based upon your understanding, as to why the OpenSAR 19 material was not ultimately open sourced? 21
- Based on our review of the emails it appears that SCO and Starnix could not come to agreement on which open source license and what portions of the source code to open source, and so just kind of trailed off is the appearance of the

- with whom SCO was having these discussions?
  - Not that I'm aware of. A.
- And what was the method in which the open Q. sourcing of the AWK utility was being contemplated?
- I am not sure, and I'm not -- I'm also not sure on which license was contemplated as well.
- You've indicated the years are 1999 through 2001. What is that time frame intended to relate?
- Generally this is kind of the time frame of when these kind of discussions or communications may have occurred. Some of this is based on memory of Jay Peterson or other engineers of thinking something had occurred in this regard. But no specific document, and in some cases -- or emails or otherwise that help further refine that information that I was able to become aware of.
- O. In those instances in which material code was actually open sourced did SCO document the open sourcing of the material?
- In a number of cases it did document its contributions to open source and put out a press release, and that we can find a open source repository publically for which we can see that open source contribution had been made to and continue to be

15

19

20

21

23

24

25

In some cases for some of these we can find no documentation or press release or repository or any other information of a landing place for some of the discussions of open sourcing that may or may not have occurred.

- Well, for those -- or in those instances, I should say, in which code was actually open sourced, did SCO maintain a discreet file or a discreet repository of information in which it maintained records of the code that it actually open sourced?
- For a single file across all the different groupings of the company, no, I don't 13 believe that exists. There was some records for 14 specific projects. For example, the AIM Benchmark has 15 15 16 some documentation of its process of being open 17 sourced, email, other documents related to it. But the -- in many other cases there isn't a specific 18 19 repository.
- 20 So you were not able to go to the open O. 21 source file --
- 22 One location, no. A.
- 23 -- if you will, open it up and find everything you needed to be prepared for today? 24 25

A.

Page 34

open source donations to have landed.

And I believe he did a number of other searches and so on but, again, his response back to me is this is as much as he was able to identify and find

- Is SCO continuing to undertake any efforts to try to make this determination of whether there was a landing place for these things, as you've described it?
- Ultimately for, you know, more A. investigation on public repositories, given that is public information that IBM or anyone could search those locations as well we did, you know, spend a fair amount of resource and time on that looking for them. But I don't believe we were intending to spend more time searching in public locations. And I'm not aware of any other information or documents or additional people that could be talked to that are still with SCO that would have any more information on these particular open sourcing activities. 20
  - Okay. How about GCC Bug Fixes? Q.
- There were -- in the process of SCO A. UnixWare being able to support the GCC development 123 environment there were a number of bug fixes that were made by SCO employees that were assigned back to the

Okay. Anything else about the AWK utility that we haven't discussed that you believe is germane or relevant?

No. A.

O. Next is Cscope. Tell me about that, if you would, please.

- All right. Cscope was another source viewing utility that was open sourced in the, again, 1999 to 2001 time frame for which I was able to identify that it was specifically released under BSD style open source license. And that's the majority of the information I have on Cscope.
  - Okay. Next AIM, A-I-M Benchmarks.
- A. It is a performance test suite that we announced and actually did release under a GPL style open source license in August of 2001. Same with the announcement of the GREP utility. However, we have not been able to find any documentation or repository or outside landing location for GREP or SREP that were 19 also announced in August of 2001. 21
- Do I understand correctly then that the 22 AIM, GREP and SREP were all intended to be open sourced at near the same time --
  - Yes. A.
    - -- as a package, if you will? O.

I don't believe it was intended to be a package. I don't even recall if it was one specific announcement or several open source announcements of these different areas. But I was able to identify the AIM Benchmark, you know, specifically being open sourced and having a, you know, having a landing place, so to speak, and the license for which it was open sourced under.

Page 35

Page 36

I was able to identify communications and public announcements for GREP and SREP, and also I believe Jay Peterson had mentioned he thought that they had been open sourced. But when Sandy Gupta did some further due diligence on this he was unable to identify if that process actually had been completed and the actual open sourcing had occurred.

- Do you know what type of exercise or investigation Mr. Gupta undertook to try to make that determination?
- I think my understanding is he talked to A. a number of different engineers inside of the Murray Hill facility who would have knowledge on these various utilities and what was done with them.

He also did. I believe, some searching on standard open source locations where he would expect, you know, source forge or otherwise, these types of

9 (Pages 33 to 36)

Page 37

Free Software Foundation under the GPL. And that activity, as I understand it, took place in 2001. And again it was a very limited nature of a few bug fixes, and that was the extent of the -- what was assigned or licensed to the Free Software Foundation.

What does GCC stand for, if you know? Q.

It's just slipped my mind, but it's

basically a compiler and development environment.

- 9 O. All right. The next item is back to ELF, has a parenthetical explanation there. Tell me about 10 that if you would, please. 11
- So there was a request in January of 2003 13 made to, actually Darl McBride and myself, from 14 executives at Ximian requesting we open source ELF. 15 And we respectfully declined at that time. And again 16 in September of 2003 a request was made of the Free 17 Standards Group for us to open source ELF, and again 18 we respectfully declined.
- 19 O. Is Exhibit 1679 complete in that to your 20 knowledge it includes all of the efforts either attempted or successful in which SCO open sourced 22 code?
- Well, open sourced Unix related code. 23 A.
- 24 Q. Yes.

1

6

7

8

12

25 A. Yes. marked as Exhibit 1680. I'm not going to have many

questions for you about this document, but first of

Page 39

Page 40

- all let me ask you: It appears to be authored, or at
- least refers to two individuals near the top on
  - Page 1. Juergen Kienhoefer, J-u-e-r-g-e-n,
- K-i-e-n-h-o-e-f-e-r, and then a second individual
- whose first name is only listed, that being Ranjit, if 7

I'm pronouncing that correctly. R-a-n-j-i-t. 9

Do you know who Mr. Kienhoefer is, if I'm 10 pronouncing that correctly?

- I'm only vaguely familiar with the name. 11 A.
- 12 And what do you know about O.

Mr. Kienhoefer? 13

- I believe at one point he was an employee 14 of SCO or one of its predecessors. 15
- Do you know how long he remained with SCO 16 17 or one of its predecessors?
- I do not. 18 A.
- Do you know, for instance, if he came to 19 O. 20 Caldera from Santa Cruz Operation?
  - I do not. A.
- 22 How about Ranjit? Do you recognize that Q. 23 first name?
- No, I do not. 24 Α.
- Turn if you would to Page 3 of that 25 Q.

21

5

G,

10

11

12

14

exhibit. And toward the bottom of the page under the category OpenSource UW7 1-i-b-c, and let me ask you:

Does the grouping of the four letters l-i-b-c have any 3 particular pronunciation? 4

I believe it would be libc.

That's what I thought it had been 6 Q. referred to in the past. So libc is -- is an accurate 7 reference or pronunciation. Okay. 8

In undertaking your investigation, your preparation for today's testimony, did you come across any information that established that SCO or any of its predecessors had actually open sourced any of libc 13 code?

- A.
- If the date that is referenced as Page 1 15 of the document, that being September 23rd of 1999, is 16 accurate, do you know which entity would have been 17 responsible for the preparation of this document? 18 That is, whether it would have been Santa Cruz 20 Operation or Caldera?
- 21 A. I believe this would be The Santa Cruz 22 Operation.
- Is it fair to say, Mr. Sontag, based upon 23 Q. your understanding that The Santa Cruz Operation back 25 in 1999, or thereabouts, was considering, and in fact

In your efforts, Mr. Sontag, to go back and determine the history of efforts with respect to open sourcing, were you able to determine when, just discussions in general, about the concept of open sourcing Unix code began? And by that of course I mean with respect to SCO or its predecessors.

7 Right. I am aware that there were discussions internally inside of SCO by specifically Ransom Love to possibly open source elements of the Unix kernel, though those discussions were short lived and determined, I think, very quickly to be an inappropriate direction for the company to take. 12 13

Were you able -- or perhaps I should say 14 better said -- do you have any information that would allow you to go back to The Santa Cruz Operation and determine what, if any, discussions it may have had 16 about open sourcing Unix code?

17 All right. Earlier on I had a number of 18 discussions with SCO employees that had come from The 19 19 Santa Cruz Operation, including Mike Davidson, and was not made aware of any specific, major Unix source code contributions anticipated or acted upon by The Santa 23 Cruz Operation. 24

(Exhibit 1680 was marked for identification.)

25 BY MR. DRAKE: Let me show you what I've

2

3

4

5

6

7

Page 41

endorsed the notion of open sourcing Unix code as part of its business plan?

A. I'm vaguely aware that there was some discussions, but other than creating kind of an experimental emulation layer that would allow the running of Linux applications, which we called LX Run there were some discussions, but my understanding there was no specific activities related to open sourcing any Unix materials, that I'm aware of.

- 10 What is your understanding of LX Run? Q. 11 What -- what is that?
- 12 It was a small emulation layer that would 13 allow system calls that would be expected to go to a Linux kernel to instead be serviced by a Unix 15 operating system kernel.

16 So in other words there's no common code, 17 just kind of a mapping layer that takes one call and maps it into the call expected by another operating 19 system.

20 (Exhibit 1681 was marked for identification.)

MR. DRAKE: Let me hand you what we've 22 marked as Exhibit 1681. And again I'm not going to 23 ask you many questions about this, but it appears to be another document that was authored by

25 Mr. Kienhoefer.

2

3

7

21

- I'm not sure, but it may be Kean Johnson. but again, I'm not 100 percent certain.
  - Fair enough. 0.

(Exhibit 1682 was marked for identification.)

BY MR. DRAKE: Exhibit 1682 is an email string, take a moment just refer to that, if you would, please.

8 Just in the interest of time -- and this 9 applies to every document I show you, as I hope you know from past occasions -- I'll give you as much time 10 as you need to read it in as much detail as you need. 12 So I don't want to interrupt you, but I also would 13 like to move forward and not keep you here all day if 14 we don't need to.

- 15 Let me quickly scan through this and see A. 16 if I can get the overall gist.
- 17 Q. That's great. 18
  - A. All right.
- 19 First of all the email is from an O.
- 20 individual whose name is Tom Hull, H-u-l-l. Do you 21 see that?
- 22 A.

23

25

2

9 10

11

12

13

- Q. Do you know Mr. Hull?
- 24 Α. I do not.
  - O. Do you know what role he played

Page 42

- Have you ever seen this document?
- 2 A. I believe I may have seen it a couple of 3 years ago.
- 4 If you turn to Page 9, please. Do you 5 happen to know to whom this document or these slides 6 were presented?
  - I do not, but it appears to be a internal A. kind of strategy document.
- And Slide 17 on Page 9 is captioned "Other Approaches For Application Compatibility" and it begins with "Common API between Unix and Linux:
- OpenSource our libc to Linux." Do you see that?
- 13 Yes. Α.
  - What does "API" stand for? O.
  - Application programming interface.
- 16 And the next bullet point says: "Common
- ABI OpenABI effort (Kean)." What is ABI? 17
- 18 I believe that stands for application 19 binary interface.
- 20 Okay. Can you identify the person Kean whose name is referred to parenthetically there on 22 Slide 17? Do you know who that is?
- 23 I believe that would be a SCO engineer in 24 The Santa Cruz Operation.
  - The last name by chance?

presumably with Caldera back in 2000, August of 2000'

Α. I do not.

- 3 O. It's to Mr. Peterson, whom you do know, I 4 take it, correct?
  - Yes. A.
  - In the third full paragraph on Page 1 the Q. second sentence says, quote:

"I think there is a general expectation that once Caldera takes over, much more/most/almost all of UnixWare will be open sourced," Do you see that?

Yes.

- 14 Is it your understanding that that was in fact the strategy that Caldera had at the time of the acquisition of the UnixWare assets from The Santa Cruz 16 1.7 Operation?
- 18 My understanding was there was some Α. internal discussions, but ultimately it was determined to not be an appropriate strategy to open source the 20 21 Unix and UnixWare source.
- 22 You mentioned earlier in your testimony 23 that Mr. Love had supported the notion of open 24 sourcing UnixWare code and that that -- I don't mean to mischaracterize because I'm not exactly sure what

Page 45

you said -- I thought you said was short lived or for a sort period or something like that?

A. I think it was along the lines of there was some, you know, kind of strategic strategy, brainstorming kind of discussions that occurred, you know, now that we have this asset, you know, what if we did this or that.

And my understanding that was the nature of the discussions and that ultimately in conjunction 10 with the executive management, in conjunction with the board, the decision was made not to open source significant portions of the Unix and UnixWare source code.

- Q. Can you book end that discussion for me? 15 Do you know when those discussions at Caldera began 16 and when they ended?
- 17 I would assume some of those discussions 18 may have occurred even early on in the, you know, 19 discussions with old Santa Cruz Operation even during 20 the, you know, investigation of the possible 21 acquisition all the way through the acquisition. So 22 time frame would be in the, you know, late 2000 into 23 sometime into 2001 time frame.
- .24 Q. Well, you correct me if I'm wrong, but my 25 recollection of the dates of that acquisition were

A. That would have been a Caldera board at the time.

Page 47

Page 48

And do you know what the reasons were for O. the board's determination not to pursue this open sourcing of UnixWare code?

MR. JAMES: Objection. Beyond the scope. THE WITNESS: Just in general I heard some discussions that from what I had heard from board -- the board discussions that they had paid a significant amount of money for The Santa Cruz Operation and Unix Systems Laboratories assets and 12 felt that it was appropriate to maintain those assets in a more traditional licensing scheme.

- BY MR. DRAKE: That basically was a better business plan not to open source code, correct?
  - A.

Q. Would you turn to Page 2, please, of 18 Exhibit 1682. And with reference to the subparagraph of one there it says, quote:

> "Need to do a quick partition of what is/is not owned by SCO, and get Legal involved to clear up rough spots like the HAL" -- all cap no periods --"code."

Do you see that?

Page 46

that it began in about August of 2000?

A. Yes.

16

- O. About the date of this -- this email that we're looking at here in Exhibit 1682, and the transaction closed in May of 2001. Is that consistent with your memory?
  - A. Approximately that time frame, yes.
- And were the discussions about open Q. sourcing UnixWare code have extended at least throughout that period of time? 10
- 11 I believe so, and possibly even somewhat 12 beyond after the acquisition was complete.
- 13 You mentioned a moment ago that at some 14 point, though, the board, presumably of Caldera --15 well, strike that.

Which board was it that finally made the decision not to pursue this notion of open sourcing 17 18 UnixWare code?

- 19 A. Well, again, I believe it was in 20 conjunction with the management team and the board that the final determination of some of these strategy 22 and brainstorming discussions was not to open source 23 the Unix and UnixWare source code.
- 24 Would that have been a Caldera board or a 25 SCO Group board, if you know?

Yes. A.

- O. Do you know what is being referred to there with respect to the HAL, H-A-L code?
- Not specifically, but in general there -in UnixWare and OpenServer there were components included in those operating systems that were likely like -- licensed from other entities. And my understanding is it's continual process of making sure that the license agreements and contracts related to 10 those license terms are, you know, upheld and sourced 11 from other sources other than internally are 12 appropriately accounted for, and if there's any issues  $\cdot 13$ to make sure that those code modules are appropriately 14 used or removed.
  - Well, are you aware of any efforts that were undertaken to clear up any possible legal problems with the HAL code?
    - Not specifically with any HAL code. (Exhibit 1683 was marked for identification.)
- 20 BY MR. DRAKE: Let me show you what we'v 21 marked as Exhibit 1683. It's a lengthy document and my question will only pertain to some information that 22 23 appears on Page 6.

24 Have you ever seen this document, 25 Mr. Sontag?

12 (Pages 45 to 48)

Page 49 Page 51 1 A. I may have, but it doesn't specifically 1 My understanding it was a brainstorming 2 2 kind of activity around possibly open sourcing some come to mind. 3 or, you know, some portions of Unix. Again, it did Sure. There is a paragraph that appears Q. not go very far, as far as I'm concerned. 4 about halfway down the page that says, quote: 5 Was there one particular person who was 5 "Caldera's Open Access Model means tasked with developing and maintaining project Kahuna 6 6 that their products will immediately 7 7 during the time that it existed? be placed in Quadrant Two, 8 I'm not aware of any specific one person. 8 A. proprietary and open. This means 9 Are you aware of a group or any 9 that Caldera will provide free access 10 individuals at all who had any significant 10 to the sourse code of those products. 11 Some of Caldera's technologies will 11 contributions to project Kahuna? 12 be moved immediately into Quadrant 12 My understanding Ransom Love was highly 13 13 involved with project Kahuna, but I'm not aware of One, open and public." specific other people that were primarily tasked with 14 Do you see that? 15 Yes. 15 project Kahuna. A. 16 O. Would there -- to your knowledge would 16 In your view is this consistent with O. 17 there have been an engineering-type person or an 17 questions that I asked you just a moment ago that 18 operations-type person who would have been involved in being that it was Caldera's business plan, at least in 19 the fall of 2000, to open source UnixWare code? 19 addition to Mr. Love? 20 Very well could have been. Α. 20 A. I don't know specifically the discussions 21 of these Caldera products they're talking about, the 0. But you don't know who that might have 21 22 been? 22 other divisions of Caldera which include the Unix 23 Systems Laboratories and Santa Cruz Operations 23 No, I do not. 24 (Exhibit 1685 was marked for identification.) products, or if this is specifically talking about the MR. DRAKE: Exhibit 1685. 25 Caldera products which involved some of their Linux Page 52 Page 50 1 Q. Do you recognize this document? products, management products and so on. 2 Not specifically. 2 (Exhibit 1684 was marked for identification.) A. I'll represent to you that based upon the 3 BY MR. DRAKE: Let's move to another one, testimonies -- testimony of others we are informed 4 1683. Whoops, that would be 16 --5 this is sort of an internal newsletter or MR. JAMES: 1684. internal-type document that Caldera published from 6 MR. DRAKE: -- 84. 6 7 time to time. This one being the issue of October 7 Q. Do you recognize this document? 8 8 31st, 2000. I do not. A. 9 All right. 9 Well then you probably won't be able to Α. tell me who the author was, but I need to ask you 10 Do you happen to know how this document

- anyway. Do you happen to know who authored this 11 12 document?
- 13 A. No, I cannot.
- 14 Do you happen to know what the purpose was or what the intended use of the document was? 15
- It appears to be a proposal, a 16 17 brainstorming-type document, an idea.
- 18 See up in the upper right-hand corner 19 that it refers to, I assume a website, and it includes 20 a reference to Kahuna, K-a-h-u-n-a. Do you see that? 21
  - Yes. A.
- 22 You and I have discussed this briefly in O. 23 the past, but tell me if you would again, please, what your understanding of project Kahuna, what it
- 25 involved?

- 11 was disseminated?
  - I do not. Α.
  - O. Do you know to whom it was disseminated?
- 14 It appears to be an internal use document 15 for inside of Caldera.
- 16 Do you know again with any more specificity who might have received this document? 17 18 Would it have been all the employees of the company, would it have been limited to management level 19 employees, things of that nature? 20
- 21 I do not know specifically.
- 22 Turn to Page 2, if you would, please. 23 About halfway down the page it says, quote:
- 24 "Will you Open Source UnixWare?" 25

And the second line says:

12

13

Page 5.5 Page 53 about ELF that you placed on Exhibit 1679? "We plan to open source the Unix 1 Yes. And I may have gotten the date 2 kernel 5 on which it is based." wrong on the -- I have it down as September 2003 and 3 Do you see that? it looks like it was March of 2003. But this is the 4 A. Yes. request that I was referring to here. Q. 5 Do you know who is responsible for making 6 I just wanted to make sure that -- well, 6 the statement, quote: Q. 7 strike that. 7 "We plan to open source the Unix 8 Was there more than one request from the 8 kernel 5 on which it is based"? Free Standards Group for the open sourcing of the ELF 9 No. I do not. 10 code? 10 Do you know who was the editor or the 11 Not that I'm aware of. 11 primary person who was responsible for the publication Α. So in all likelihood it took place in 12 Q. 12 of this Caldera connection newsletter, if I may March or the spring of 2003 as opposed to the fall? describe it as such? 13 13 14 A. 14 A. I do not. 15 Great. And I take it that you indicated Q. 1.5 Do you know, for instance, whether or not in your earlier testimony that --16 16 Drew Spencer would have been the editor or the person 17 Was declined. 17 responsible? Α. 18 -- request was declined? I do know that Drew Spencer was on the Q, 18 Α. 19 Yes. 19 executive management team of Caldera, I believe in a A. 20 20 capacity of chief technology officer. But I don't (Exhibit 1687 was marked for identification.) 21 Let me hand you Exhibit 1687. And my 21 know of his involvement specifically with the 22 questions with respect to this document will be 22 document. Do you know how long Mr. Spencer remained 23 limited to just one paragraph of information which 23 O. 24 appears on Page 27. It's the Bates stamp Page 590. with the company? 24 25 Which page? 27? 25 I believe sometime into 2001. Page 56 Page 54 Yeah, it's -- the pagination for the MR. DRAKE: We've been at it for a little 1 2 document is Page 27. over an hour, let's take a quick break, let you 3 All right. 3 stretch your legs and we'll get back on. A. So you can use that. THE VIDEOGRAPHER: Going off record. The Q. 4 And 590 for the Bates? A. 5 time is 10:17. Right. Do you have that? 6 Q. 6 (There was a break taken.) Let me just scan a little bit to see if I 7 Α. 7 (Exhibit 1686 was marked for identification.) can get some context. 8 THE VIDEOGRAPHER: Back on record. The 8 Sure. With respect to timing and 9 9 time is 10:27. 10 context, if it helps you, Page 1 of an attachment --O. BY MR. DRAKE: Mr. Sontag, I've handed 10 and I'm assuming it goes with the primary document -you Exhibit 1686, which is an email string which 11 indicates it was probably used at a shareholder 12 involves Mr. McBride. And take a quick moment and meeting in 2005 by Mr. McBride. 13 scan that if you would, please. 13 Could very well be. Okay. 14 14 A. All right. On Page 27 of the exhibit in the 15 15 My question is: Toward the bottom of the paragraph that appears under the slide at the top it 16 16 first page of that document it says, quoting in part: 17 says, in part: 17 "Just as a reminder, one of the "SCO and its predecessors have made 18 things we talked about over dinner 18 19 contributions to the open source was getting SCO to donate the 19 20 community such as the first graphical ABI/ELF" -- or ELF -- "document to 20 installer for Linux ..." the Free Standards Group." 21 21 It then refers to Open W-B-E-M. Is that 22 22 Do you see that? a typo, the Open W-B-E-M, should that be OpenWEBM? 23 23 Yes. Α. There is a -- and it's a number of 24 This email is dated March 3rd of 2003. 24 25 letters and acronyms together -- but there is a Does this discussion relate to one of the two entries 25

Page 59 Page 57 Development Labs. Are you familiar with the entity W-B-E-M type or similar spelling graphical installer 2 known as Open Source Development Labs? 2 that Caldera did create for Linux, I believe. Q. And it is properly spelled referred to as 3 A. To some extent, yes. 3 4 Do you know how long Caldera remained a W-B-E-M as it is here in this document? 4 member or had an agreement with the Open Source 5 I'm not 100 percent certain. 5 6 Development Labs? Fair enough. To your knowledge is 6 Q. 7 I'm not aware how long their membership 7 Mr. McBride's statement there, or at least the went. I am aware that by the time I was with SCO in, 8 statement that appears in this document, correct in you know, by the fall of 2002 to -- by early 2003 I do 9 that SCO did contribute OpenWBEM to Linux? 9 not believe there was any continued membership with 10 10 A. I believe so. 11 OSDL. 11 Ο. In your mind would that constitute an 12 Do you know what the purpose was or open source contribution? O. 12 reason was for Caldera or SCO's discontinuing its 13 13 À. Yes. participation with the Open Source Development Labs? 14 Does that contribution appear on O. 15 Α. No. 15 Exhibit 1679? MR. JAMES: Objection. Beyond the scope. 16 No, it does not. 16 A. THE WITNESS: No, I do not. 17 Do you know why it does not? 17 Q. (Exhibit 1690 was marked for identification.) 18 18 I limited my listing on that list to Unix Α. 19 O. BY MR. DRAKE: Exhibit 1690 is what 19 related open source contributions. This was a Linux 20 appears to be a collection of power point slides, the 20 related open source contributions. So it was not first page of which indicates that it was at least based on Unix source code. prepared for the meeting with Intel executives. Do 22 O. The contribution that is referred here is you see that? 23 23 not based on Unix source code --24 A. Yes. 24 No, it is not. 25 If you would turn to Bates Stamped Q. -- is that your testimony? Okay. 25 Page 60 Page 58 Page 563, it's about three-fourths of the way down the (Exhibit 1688 was marked for identification.) 1 2 document. Q. BY MR. DRAKE: Exhibit 1688 is a one-page 2 3 Okay. A. document. Have you seen this document before? 3 4 This slide is captioned "Caldera 4 A. I may have. Proposal." I know this is before the time that you 5 5 Take a quick moment and just scan as much joined the company, but are you familiar with of it as you need to, but I believe the first discussions that appeared to have been ongoing between 7 7 paragraph is all you need. Caldera and Intel back in the fall of 2000? 8 Okav. Α. 9 I'm vaguely aware there was some 9 Is it your understanding that this discussions with Intel in that time frame. 10 document reflects contributions of Unix related code Do you know what the nature of the 11 that were made by Caldera? 11 discussions was or what the intended purpose was? 12 12 Yes, and that would refer to the GCC Bug 13 Not specifically. 13 Fixes. This is what I was referring to was a number How about generally? Do you know what 14 of bug fixes that were provided. 14 was being considered or discussed between those two 15 So Exhibit 1688 is just a fuller 15 16 explanation of the category that you describe as GCC 16 entities? 17 At that time frame, no. Bug Fixes on Exhibit 1679? A. 17 Referring to the first description under 18 O. Correct. 18 Α. the heading there which says, quote: 19 19 Q. Okay. "Caldera will 'open source' 'SCO"" --20 (Exhibit 1689 was marked for identification.) 20 BY MR. DRAKE: Hand you Exhibit 1689. Do 21 both those words being in quotes --21 22 "technology." you recognize Exhibit 1689? 22 23 Goes on to say: A. I do not. 23

"Enhanced System V4 (now System 6)

kernel" and "LKP Linux capability."

24

25

It appears to be an agreement which was

25 entered into by Caldera with the Open Source

whether or not FUR was open sourced during or shortly after July of 2000? 3

A. Probably want to go back to Sandy Gupta and ask of him and have him do some research with the appropriate engineers and employees that may have knowledge of this work.

To your knowledge was FUR based upon Unix Q. code?

I do not know.

(Exhibit 1692 was marked for identification.)

11 BY MR. DRAKE: Exhibit 1692 appears to be a press release, and my questions will be directed to 12 material that appears at the bottom of Page 2. Again 13 not to fast forward too quickly for you, but the 15 paragraph that appears at the bottom of Page 2 refers to SCO's contribution of Cscope, which we discussed 16 17 earlier in Exhibit 1679.

A.

19 And also FUR, or F-U-R, that we just O. 20 discussed in the preceding exhibit.

> Okay. A.

Do you see that? 22 Q.

> A. Yes.

Does this suggest to you that in fact 24 Q.

25 both those materials or both those elements of code,

Page 62

if I may describe them as such, were open sourced by 2 SCO?

Well I know specifically that Cscope was. A. It appears in this press release that at least FUR was discussed, but I don't know specifically if FUR was actually open sourced.

Q. The conclusion of that paragraph says,

quote:

9 "... and currently offers a free Open 10 License Software Supplement (SkunkWare) CD that includes many 11

cutting-edge Open Source 12

technologies." 13 Do you see that? 14

> Yes. A.

Q. What does that mean? What is the SkunkWare that was being offered pursuant to a free

open source or open license, I should say? 18

My expectation that would be various open 19 source packages that could be combined and added on to the Santa Cruz operating -- Santa Cruz operating

22 system products. Q. Would these be open source products that 23

Santa Cruz had obtained from third parties or would 24 they be packages that Santa Cruz itself had developed?

16 (Pages 61 to 64)

23 not it was in fact open sourced?

Page 67 Page 65 conjunction with our filing of the lawsuit. 1 1 It could be both. I believe also shortly thereafter there Are you familiar with the SkunkWare 2 2 Q. 3 was also a letter sent regarding notice on Sequent product? 3 that was sent in the same time frame, and then the 4 A. No. actual termination letters that were sent either 100 5 All right. Let's move to Topic 4, and 5 days or 60 days after those notices -- notice letters 6 just for your ease of reference try to retrieve the 6 had been sent, also to either legal department of notice for you so that you can get some background. 7 Sequent or to Mr. Palmisano of IBM. I've handed you the portion of the 8 You want me to continue? September 2nd, 2005, notice which includes Topic 4. 9 9 10 Please. Take just a moment and refer to that, if you would, Q. 10 11 There was a face-to-face discussion that A. 11 please. occurred between representatives of IBM and SCO and 12 Α. All right. its legal counsel that occurred, I believe, in Are you prepared to discuss Topic 4 this 13 Q. June 3rd of 2003. And then there was some subsequent 14 14 morning? meetings between Mr. McBride, Mr. Darl McBride, Kevin 15 15 Yes, I am. A. McBride, Mr. Palmisano the CEO of IBM, and Mr. Lineen, 16 16 Tell me what you did, if anything, to who was at the time chief corporate counsel for IBM. 17 specifically prepare to testify on Topic 4. 17 18 And Armonk --A. I reviewed a number of documents, which 18 were the correspondence between SCO and IBM related tb19 O. I'm sorry, did you say Mr. Lavine? 19 Lineen, sorry, the corporate counsel of A. our notices, and then terminations of UnixWare and the 20 Sequent -- no, I'm sorry -- the AIX and Sequent-based 21 IBM at the time. operating systems, as well as discussions with Darl 22 Q. Mr. Lauderdale. 22 23 No. Ed Lineen. Α. 23 McBride. Lineen, I'm sorry. I'm confusing with 24 0. 24 And I also, at the direction of legal 25 Mr. Lavine. 25 counsel, did send a request out to SCO employees Page 68 Page 66 Oh, no, Lineen. 1 A. requesting any information they may have on these 2 Great. Okay. communications. But primarily was the correspondence O. 2 That was in Armonk, and that was in the 3 and the communication with Mr. McBride. A. 3 fall of 2003. And then there was a number of 4 Let's start in reverse order in terms of 4 follow-up meetings with Mr. Lineen and Mr. Darl the things you've just listed for me. What, if 5 5 McBride. I believe on one occasion another 6 anything, resulted from the request that you sent out face-to-face that involved another IBM executive, I to SCO employees to elicit any information that they 7 7 believe by the name of Mr. Zeitler. And then a number 8 might have? of phone conversations that followed later into the 9 I don't believe this was anything that 9 A. year of 2000 -- late into 2003, possibly into 2004, to 10 10 was pertinent. 11 some extent. Okay. How about anything from the 11 O. 12 Q. Who was involved in the phone calls that discussions with Mr. McBride, anything that was 12 13 you've just referred to? 13 significant or different than the information I believe primarily Mr. Darl McBride and 14 contained in the correspondence in the notices that 14 15 in most cases it was Mr. Lineen. 15 you referred to? To your knowledge were any notes 16 O. 16 A. No. He simply provided me with some maintained of the conversation that Mr. McBride had 17 17 additional chronology of discussions that occurred, with Mr. Lineen? 18 most of which I was already aware of. 18 I'm not aware of any notes. 19 Run down that chronology for me. I know A. 19 Q. Are you aware of any written 20 20 that might be tedious, but do your best. documentation whatsoever of the conversations that All right. So we have related to the 21 took place between Mr. McBride and Mr. Lineen? 22 Topic 4, communications with IBM consisted of the 22 I'm not aware of any. initial notice letter that was sent on our issues with 23 Α. 23 Okay. Anything else, any other 24 AIX. It was sent, I believe, March 6th of 2003 from 24

communications that you're aware of between SCO and

25 Darl McBride to Mr. Palmisano, the CEO of IBM, in

Page 69 Page 71 IBM after late 2003, early 2004? A. No. 2 Not that I'm aware of. 2 Q. You listed -- strike that. 3 To your knowledge were there any either 3 Apart from these discussions between O. Mr. McBride and Mr. Befi are you aware of any written or oral communications between SCO and IBM 4 discussions or communications on this topic that concerning the alleged breach of either the IBM or the preceded March 6th of 2003? Sequent Unix licensing agreements prior to March 6th 6 6 7 7 A. On this topic, no. of 2003? 8 You listed a number of documents that 8 Prior to March 6, 2003, Mr. McBride had 0. Α. included so-called notice letters, termination 9 9 made me aware that he had a discussion with a Mr. Tony letters, things of that nature. Did you review or did 10 Befi who was, as Mr. Befi referred to, the pep 11 you become aware of any documents that have not been executive responsible for SCO. Had an initial meeting 11 12 with him in the late summer, early fall of 2002 produced to IBM and which are responsive to Topic 4 and that we're discussing this morning? 13 introducing himself. And I think that conversation, 13 14 14 that's also, I believe, discussed in fair amount of No, I'm not aware of any. 15 Are you aware of any internal memorandal 15 details in Mr. McBride's deposition. 16 that SCO has prepared that contain information or Did you -- I'm sorry to interrupt you --16 contain a discussion of these issues? And I want to did you review Mr. McBride's discussion of that topic 17 17 make a distinction between the letters and the notice in his deposition in preparation for --18 documents that we've discussed. 19 19 I did. A. 20 I believe there was some correspondence 20 Okay. Please continue, Q. in conjunction with legal counsel that I believe would 21 21 A. At his request. 22 be, you know, work product, protected. And based on talking to Mr. McBride and 22 23 MR. JAMES: Or even attorney-client also the deposition, he had a follow on conversation 23 24 where he called Mr. Befi, who said if you have any privilege. 24 25 THE WITNESS: That too. 25 issues or problems to give him a call. Page 72 Page 70 1 BY MR. DRAKE: You should be learning 1 Mr. McBride called him with concerns that 2 these things. Part of Topic 4, Mr. Sontag, includes he was becoming aware of in the October time frame of 3 the concluding phrase, quote: 3 2002 regarding things he was hearing about project "... and any curative measures 4 Monterey that had been in joint development between 5 proposed to IBM by SCO prior to the IBM and SCO. And he made his concerns about what he 6 purported termination." was hearing about project Monterey known to Mr. Befi 7 requesting that he look into the project Monterey Do you see that? 7 A. 8 Yes. 8 issue and respond back to him. 9 O. Do you understand what the phrase 9 There was no follow-up conversation from 10 Mr. Befi until early in March of 2003, a few days 10 "curative measures" means in that context? Not being an attorney, probably not the before we filed the lawsuit, but nothing of substance. 11 11 12 full nature of what that means. But in a general 12 And as I understand your testimony then you have spoken to Mr. McBride in preparation for 13 level, yes. 13 Well, tell me just generally so that 14 O. today's testimony and you have also, at his request, 15 we're certain we understand one another what you reviewed his deposition testimony as it would be relevant to this topic; is that correct? understand "curative measures" to mean in that 16 17 context. 17 A. That is correct. 18 Any proposed remedies or otherwise to A. 18 In talking to Mr. McBride in preparation 19 solve the problem. for today did you gain any additional information 20 Well said. about these conversations or communications that is 20 21 Are you aware of any such measures or not reflected in Mr. McBride's deposition testimony? 21 22 proposals to solve the problems that were made by SCO 22 I don't believe so. 23 to IBM prior to March 6th of 2003? 23 In other words, did Mr. McBride have 24 Prior to March 6th? A. 24 anything to add to what he said in his deposition on 25 Q. Yes, sir. this topic?

Page 73 Page 75 1 Related to Topic 4? 1 Indeed he has, but I just want to make A. 2 2 Yes, sir. sure that whether there's any documentation that Q. 3 3 exists that has not been produced to which a claim of Other than what's in the documents, the privilege has not been made? 4 4 correspondence with IBM documents and the 5 Not that I'm aware. 5 communications in the meeting that was held on Α. 6 The second page of Exhibit 1693 at the 6 June 3rd and possibly additional conversations beyond O. 7 7 that point that I've already laid out, I'm not aware top is a continuation of Mr. McBride's quote, actually 8 8 of anything. it's answered in the next question. But he says in 9 O. And I meant to limit my question to those 9 part: 10 curative measures offered before March 6th. So the 10 "... so we sat down in early January June 3rd conversations and things would not apply, 11 with IBM for three or four more 12 discussions." 12 correct? 13 Do you see that? 13 Α. All right. So no. 14 Are you aware of any other communications 14 A. Okay. Yes. Q. 15 15 that are responsive to Topic 4 that we have not Did you participate in any of those Ο. discussed this morning or that are not reflected in 16 discussions or those meeting? 17 documents that have been produced to IBM in the A. Yes, I did. 17 18 How many, if you know? 18 litigation? Q. A. I'm not aware of any. 19 I believe it was two or three 19 Α. 20 20 (Exhibit 1693 was marked for identification.) conversations that occurred. Can you take me through each of those in 21 BY MR. DRAKE: Let me show you what we've 21 Q. 22 22 marked as Exhibit 1693. My question will pertain to a sequence. 23 quote from Mr. McBride that appears about 23 MR. JAMES: I think I may be able to help 24 some here. You're crossing over, I think to some three-fourths of the way down on the first page of 25 Exhibit 1693, and it refers to what Mr. McBride degree, on two topics, Topic 4 and Topic 19. And Page 76 Page 74 1 Chris prepared and brought with him today I think a describes as a conversation that he recalls having 2 little chronology to the best he could put together with Mr. Steve Solazzo, S-o-l-a-z-z-o, on 2 3 about some of the meetings and the approximate dates 3 December 9th, presumably of 2002. Do you see that? and who participated. And let me just give those to 4 4 A. Yes. 5 you so you can mark them if you choose. 5 Q. Are you aware of any document which 6 MR. DRAKE: Thanks. Let's go off the memorialize any aspect of the conversation that 7 7 Mr. McBride supposedly had with Mr. Solazzo on record for just a minute, that will give us a chance December 9th of 2002? to change tape and give me a chance to digest this and 8 9 9 I believe there was a document that we'll get back on. A. THE VIDEOGRAPHER: Going off record. 10 Mr. McBride created at the request of legal counsel 10 11 that was a memo that he generated for legal counsel of 11 This is the end of Tape Number 1. The time is 11:04. 12 his conversations leading up until end of January of 12 (There was a break taken.) 13 2003, including his conversations with Mr. Solazzo, 13 (Exhibit 1694 was marked for identification.) 14 THE VIDEOGRAPHER: Back on the record. 14 Karen Smith, I believe was her name, and a number of 15 This is the beginning of Tape Number 2. The time is 15 other conversations that he participated, some of 11:12. 16 16 which I participated in as well. But the documents that were created which 17 BY MR. DRAKE: Mr. Sontag, I agree with 17 18 the comments made by Mr. James before the break, that memorialize some or all of these discussions were 18 created at the direction of counsel? 19 is, that there is a duplication and overlap between a 19 20 couple of the topics on which you've been designated 20 That is correct. 21 today. 21 O. And have not presumably been produced in

And I understand that what we've marked

as Exhibit 1694 is a document that you prepared

primarily to be responsive to another topic, but which

in my judgment does apply to the discussion we've been

22

23

24

22

23

this litigation?

Though I believe Mr. McBride has

24 explained a lot of those meetings and conversations in

his deposition that he gave in December of last year.

Page 77 have a follow on meeting and set up a meeting for the 1 having. 2 2 following day that involved a number of IBM attorneys So I'd like to take a moment and just go 3 through and make sure I understand how this document 3 and a few IBM executive employees in a conference call was prepared, what it was intended to portray, things for us to explain to a larger group of people inside 5 of IBM what we were doing with the SCOsource of that nature. So if you would begin at the top and 6 with respect to the entry of December 9th, 2002, tell 6 announcement. 7 So that's the meeting on December 12th. 7 me what Exhibit 1694 portrays and what is intended to 8 December 10th? 8 explain? O. 9 A. I'm sorry, December 10th. And I was 9 Specifically created for Topic 19, but it A. 10 is a number of communications and meetings between SQC 0 involved with Mr. McBride on that call. Tell me what was discussed in the and IBM from November 1st, 2002, through March 6th of 11 conference call of December 10th, 2002, please. 12 2003 related to our concerns about intellectual property in Linux. 13 That conference call we explained to them 13 14 The December 9th entry indicates 14 in general what we were planning on announcing with O. 15 telephone call from Solazzo to McBride; is that 15 regard to SCOsource, how the program worked, how we 16 believed it was friendly to the Linux community. That 16 correct? Steve Solazzo, yes, to Darl McBride. 17 we were not the first to raise issues about 17 A. 18 intellectual property in Linux, but we felt that we 18 Yes. To your knowledge were there any O. 19 had at least a significant solution to a lot of the 19 other participants in the phone call? 20 Not that I'm aware of. 20 problems with the SCOsource product. A. 21 And we also strongly expressed that we And what is your understanding of the 21 22 had concerns about intellectual property possibly substance of the conversation that took place on that 22 23 being in Linux, specifically statements that had been 23 date? 24 made by IBM executives and by Red Hat executives of 24 A. We had been briefing -- SCO had been their concerns about intellectual property in Linux. 25 briefing a number of partners on our forthcoming Page 80 Page 78 And we raised that we were concerned about that. announcement of SCOsource and the -- I believe this 2 We raised that we were concerned about 2 telephone call was set up between Mr. McBride and getting value for our intellectual property that may 3 Mr. Solazzo to brief Mr. Solazzo on what we were doing 3 4 be -- may be contained in Linux and that IBM with SCOsource, the briefings with other partners and 4 5 executives on the meeting or someone on the call 5 so on -- because I had done many of them -- had been, 6 stated that they understood what we were trying to 6 I believe, very positive. 7 accomplish and thought they had a possible plan or 7 The briefing that Mr. McBride had with 8 they understood, and let's have a follow-up 8 Mr. Solazzo was not, according to Mr. McBride, very conversation and strongly requested of us that we 9 9 positive. It was a great deal of contention and postpone our SCOsource announcement from going to be 10 Mr. Solazzo saying things like, you know, I've heard 10 within one or two days of December 10th until January. 11 about this SCOsource announcement and our general 11 12 So we agreed to postpone our announcement 12 counsel said words that, you know, can't be said in 13 13 public about it, blah, blah, blah. of SCOsource, because IBM was a very large and 14 important partner to SCO. And a follow-up meeting was 14 He, I believe, immediately pushed for SCO to not make the announcement because of IBM's concerns 15 scheduled for January 15th of 2003 to follow up on the 15 that our raising any issues around intellectual 16 ideas of what could be done as a -- to help SCO get 16 17 value for its intellectual property, that it was 17 property and Linux would be very damaging to Linux. possibly a different plan from what SCO was already 18 Our view was that -- and I believe this 18 19 was expressed by Mr. McBride in this call -- was that 19 proposing with SCOsource that it was planning on we were doing a very community friendly announcement | 20 announcing. 20 21 So that was the basis for the follow-up 21 of SCOsource, that it was an add on to Linux, that it 22 meeting of January 15 that involved Karen Smith and was a license of additional libraries and additional 22 23 Bob Butler, Darl McBride and myself. 23 intellectual property protection, which is allowed for 24 Before moving to that conference call of

24

25

within Linux in terms of warranties and otherwise.

Mr. Solazzo strongly requested that we

25

January 15th, did anyone other than you and

Page 81

Mr. McBride participate in the conference call on December 10th on behalf of SCO?

Α. No.

14

15

- Were any of your -- SCO's attorneys Q. present or did they participate in that conversation?
- No. And we felt significantly outgunned just having Mr. McBride and myself on a phone call with a large number of IBM attorneys.
- 9 Well, did you understand who would be 10 participating on behalf of IBM before the call took 11 place?
- 12 A. Yes.
- All right. So you could have had your 13 Q. own attorneys participate with you if you chosen to, 14 15 correct?
- At this point we did not have a full-time 16 A. 17 in-house attorney, so we were the only available 18 resources instead.
- 19 But you had retained the Boies, Schiller O. 20 firm as of December 10th, 2002, had you not?
- I'm not sure specifically the date that 21 we retained them, but it was still in the process of 22 them getting involved with us and there was no Boies,
- Schiller attorneys available on December 10th in
- 25 Lindon, Utah for this call.

significant that we haven't discussed?

Just my distinct recollection that, you

know, we had strongly said we have concerns about, you 3 know, intellectual property issues. SCO intellectual 4

Page 83

Page 84

property issues in Linux and that we felt it important

6 to put out a program to monotize it and, you know, if IBM had concerns about that, had other proposals that, 7

8 you know, we were -- because they were an important

partner of ours that they we would be willing to 9

10 listen to them on it.

- You mentioned a moment ago that a 11 representative of Red Hat had made comments about 12 13 concerns about Linux and intellectual property issues, 14 or words to that effect. I don't mean to
- mischaracterize what you said earlier. Do you remember that testimony? 16
  - Yes. Α.

17

19

20

25

2

- 18 O. Who at Red Hat were you referring to?
  - I believe it was Matthew Zulik, who was A. the CEO of Red Hat.
- Okay. Were there any discussions between 21 Q.
- SCO and IBM on this topic between December 10th and
- January 15th of 2003? 23
- 24 A. No.
  - Let's move to that next conference call Q.

Page 82

Was Mr. Tibbitts general counsel to SCO as of December 10th, 2002?

A. I can't remember the exact date when he started full time. It was probably right around this time, but he was not available for this meeting.

- Well, would you agree that if you had felt it necessary to have counsel you could have made arrangements to have counsel participate with you?
  - Α.

MR. JAMES: Objection. Beyond the scope.

- O. BY MR. DRAKE: Did you make any 11 contemporaneous notes of the discussion or the conference call that took place on December 10th? 13
  - No. I did not. A.
  - To your knowledge did Mr. McBride? Q.
- I do not believe he did either. A. 16
- About how long did the conference call 17 O. 18 last?
- Somewhere between -- around an hour, I 19 A. 20 helieve.
- 21 Was it just a audible conference as Q. 22 opposed to a video teleconference?
- 23 Yes. Α.
- Okay. Anything else about that 24 Q.

25 conference call of December 10th that you think is

then and tell me what took place on that occasion.

So this was the follow-up conference call 3 that was on January 15th that we -- Mr. McBride and myself had an expectation that IBM would come into 4 this conference call with proposals or suggestions or 5 solutions for a better program to help SCO monotize 6 its intellectual property with regard to Linux, then 7 the SCOsource program for which we had already briefed 8 9 them on.

There was no substantive ideas or 10 suggestions or recommendations made by either Karen 11 Smith or Bob Butler on that phone call. And I believe at that point we let them know that we were planning on moving forward with our SCOsource announcement that 14 we had postponed on their behalf from December. 15

And that was the last discussion we had 16 17 with -- with IBM before we, I believe, actually put out the press release and had conducted a number of 18 press interviews leading up to the Linux World show 19 20 later in January of 2003.

21 Was this conference call that took place on January 15th a scheduled call, if you will? That is, you knew it was coming some period of time in advance? 24

25

Yes, I believe so. A.

6

Page 85

O. Had SCO decided that it was going to sue IBM as of January 15th, 2003?

> MR. JAMES: Objection. Beyond the scope. THE WITNESS: To my knowledge, no.

BY MR. DRAKE: When was that decision made?

MR. JAMES: Same objection.

THE WITNESS: It was a very serious decision and one that was not made over night. But it was made over a period of time leading up until March of 2003. But mostly in the February and early March time frame that decision was made. 12

BY MR. DRAKE: Well, there comes a point 14 in time when one decides to file suit and sue someone, would you agree?

> A. Yes.

Do you know when that discreet point in 17 Q. time occurred with respect to SCO's decision to sue 18 19

MR. JAMES: Beyond the scope.

THE WITNESS: Again, I don't view it as a discreet point. It was a very heavy decision that we had to make that was, you know, carefully made, like I 23 said, mostly through February into early March of 24

25 2003.

Page 86

BY MR. DRAKE: Well, you agreed with me that there is a discreet point in time when one makes a decision to file suit. Did we not reach agreement on that point?

That final determination and decision was made probably on March 3rd or March 4th or March 5th.

- That's all I'm trying to get at. If it's your testimony that the final decision to sue IBM was made on March 3rd, 4th or 5th --
- Early March, yes. 10
- -- and not before, that's fine. 11 Q.
- 12 A.
- And that decision was made by whom, if it 13 Q. was one person? 14

MR. JAMES: Objection. Beyond the scope. 15 THE WITNESS: Primarily by Mr. McBride in 16 consultation with legal counsel and in consultation 17 with the board of directors. 18

BY MR. DRAKE: Would it be fair to say 20 that even though the final decision had not been made as of January 15th, 2003, that that was one of the options that SCO was considering, that is the option of filing suit against IBM? 23

MR. JAMES: Objection. Beyond the scope. THE WITNESS: I think it was starting to

become an option by mid January of 2003. Mostly primarily due to the -- the conversations and -- and the unusual demands from IBM in December of 2002 that gave us first rise to having concern about IBM, who was a significant partner to SCO.

BY MR. DRAKE: Have you told me everything that you can recall about the discussion that took place on January 15th, 2003?

Again, I think you can refer to Mr. McBride's deposition, he may have some additional 10 elements of the conversation that may be in his 12 deposition that I haven't specifically alluded to, but as much as I can recall right now, yes. 13

Q. I'm just -- and indeed he does discuss that. I'm just interested in anything that you may have to add that we haven't already discussed.

No, I think basically I've raised the 17 A. 18 most salient points. 19

And do you recall how things were left, 20 if I may describe it as such, at the end of that conference call January 15th, 2003?

I believe it was some, you know, we agreed to disagree, for the most part, was my view on 23 how that conversation ended. That we let them know we were planning on moving forward. I think we also let

Page 87

them know that we were fairly disappointed that they did not have any concrete proposals that we would view were a better solution than what we were already planning on doing with the SCOsource announcement. And I think that's the primary nature of the

5 conclusion of that conversation. Okay. The next entry on Exhibit 1694

refers to a phone call that took place, as it 8 indicates here, sometime between January 15th and 9 January 23rd of 2003. What can you tell me about that 10 11 conversation?

And I think it was likely closer to 12 A. January 23rd, either the 22nd or 23rd. But it was a 13 conversation, I'm not sure who initiated, between Darl 14 McBride and Karen Smith for which she, I believe, had 16 seen that we had announced our SCOsource program and that we had done a number of press interviews leading up to, you know, kind of our announcement that we were planning on doing at a Linux World show of the 19 20 SCOsource program.

My understanding from Mr. McBride was 21 that it was a contentious conversation. My 22

recollection was I was right next to Mr. McBride while he was on the phone as we were traveling together to

Linux World, but I did not hear the conversation

Page 89 Page 91 specifically. BY MR. DRAKE: This would be a 2 2 It appeared to be very animated and face-to-face download, as it were? 3 3 concluded with her being very mad that we had Yes. A, 4 4 announced the program that we had suspended, that we O. Okay. All right. Anything else to add 5 had told them that we were going to announce on the 5 that explains more about the face-to-face meeting 6 between Mr. McBride and Ms. Smith? 15th. And either in this phone call on the 24th or 7 7 the face-to-face meeting that Mr. McBride and Karen A. Smith had on the 24th, my understanding is that 8 Okay. Let's move on to the last category Q. 9 that's described as late January of 2003. Tell me Ms. Smith demanded that we retract the press release 10 10 and withdraw the announcement. what's intended by that entry? 11 11 I was aware that there was a conversation And that was the nature of what I 12 understand to be predominant parts of that cell phone between a number of IBM attorneys and one of SCO's attorneys, Mark Heise, that occurred in late January 13 conversation on the -- somewhere between the 15th and 13 14 23rd. of 2003 regarding various legal questions that I 15 You said a moment ago that you weren't believe IBM had. And I believe Mr. Heise made best 16 sure who placed the call to whom. This indicates a 16 attempts based on what we knew at the time to answer 17 those questions. 17 cell phone call from McBride at airport to Smith in her office. 18 Q. Okay. A few moments ago you indicated 18 19 A. 19 that you participated in some meetings with IBM That could very well be. 20 representatives in January of 2003, correct? 20 Q. Anything more about that conversation that you have to add that we haven't discussed? 21 21 A. Yes. 22 We now moved through each of those as you 22 Again, there may be additional in Q. 23 recall them. Would you explain for me what you 23 Mr. McBride's deposition, but that's my recollections 24 of that conversation. remember being discussed or what took place during 25 And then the meeting the next day on those meetings? Q. Page 92 Page 90 1 January 24th of 2003 took place at the Linux World A. Well those would be the January 10th --2 conference; is that correct? 2 I'm sorry, January 15th meeting, and then was 3 Mr. McBride that participated in the meeting with That is correct. Α. Ms. Smith later in January of 2003. 4 4 Q. Were you present during that face-to-face 5 5 Q. I see. meeting? 6 So I had one phone call in January of 6 I was not. Α. 7 2003 that I participated in. 7 Do you have any additional information that explains what took place during that meeting 8 So you did not participate in any 8 9 face-to-face meetings with IBM representatives in 9 apart from what Mr. McBride has already described in December or January -- December of 2002 or January of 10 10 his deposition? 11 2003, correct? 11 I was aware that the meeting was going to 12 A. That is correct. 12 take place, it was a breakfast meeting between 13 0. Go back to Exhibit 1693, if you would, 13 Mr. McBride and Ms. Smith. And I did shortly after please, and turn to the second page. This is the the meeting get a download from Mr. McBride of the 14 quote that I referred to -- referred to earlier in 15 15 nature of the meeting, that Ms. Smith was basically which Mr. McBride says, quote: 16 yelling at Mr. McBride, making threats, telling him 16 17 "So we sat down in early January with 17 that we had to withdraw the SCOsource program, that IBM for three or four more 18 IBM would discontinue significant business with SCO. 18 19 A number of other topics as well. 19 discussions." 20 Do you see that? 20 When you say you received a download, do 21 21 you mean to say you received an email? Α. Yes. 22 That quote suggests to me that he's 22 No. Mr. McBride talked to me after the Q. 23 referring to face-to-face meetings, and I don't want conversation, within an hour or two after the 23 to unfairly characterize it but I want to make sure 24 breakfast meeting. 25 25 I'm aware of all the face-to-face meetings that took MR. JAMES: It's techy-talk, Curt.

Page 93 Page 95 September 2nd notice. I didn't highlight that for you place between any SCO representative and any IBM 2 but -representative in January 2003. 2 3 Topic 11 --I don't know if I necessarily view his Α. 3 4 -- find it easily. Yes, Topic 11, Q. statement that we sat down being that all of these 4 please. Have you had a moment to look at that? 5 were face to face. 6 I did. 6 Q. And that's all I want to clarify. Α. 7 And as I understand your designation, Q. 7 Yes. Α. 8 Mr. Sontag, see if it agrees with your understanding. 8 That may very well be just a phrase that You are here to talk this morning about SCO's business he used not intending it to be literally interpreted 9 relationships with Microsoft and Sun, correct? as sit down face-to-face meetings. 10 11 A. Yes. 11 A. Yes. 12 O. What have you done -- and let's start So with that in mind let me just ask you 12 O. 13 with Microsoft, if we may -- what have you done to 13 then: Does Exhibit 1694 include all of the conversations, be they phone calls or face-to-face prepare to testify on the topic that involves SCO's business relationships with Microsoft? meetings, that took place between SCO representatives Again, I sent out an email to all -- or 16 and IBM representatives from December of 2002 to late 16 requested that our legal counsel send out a letter to 17 2003? 18 all of our -- email to all of our SCO employees 18 A. Yes, I believe so. requesting if they had any information on the topic, 19 Great. And I believe I misspoke, I meant O. 20 and given that I was familiar with most of the people 20 to say late January of 2003. 21 that were involved in these relationships, for the 21 That's the way I took it, yes. most part, I talked to those who had participated in 22 22 Well, based upon recent questions and those relationships either recently or further back in answers then we have moved forward to Topic 19 of the 23 23 the past, but still felt I was very familiar with the February 19th notice, which I've not shown you but I nature of the conversations and communications and 25 didn't mean to omit that, but just for completeness Page 96 Page 94 discussions that occurred. sake let's do that at this point. 1 2 Reviewed a number of documents that I was 2 (Exhibit 1695 was marked for identification.) aware of that were involved -- involved in the 3 3 O. BY MR. DRAKE: I'll hand you relationship with Microsoft and Sun. That was my Exhibit 1695, which includes Topic 19. Have you take a quick look and make sure that we have in fact primary preparation for this topic. Starting at present and kind of working 6 6 exhausted that topic. O. back in time let me ask you: Is there a person today 7 7 A. Okay. at SCO who is tasked with or given the responsibility 8 8 Are there any other communications and O. 9 of being the primary contact or liaison between SCO meetings that took place between SCO representatives 9 10 and Microsoft? and IBM representatives between November 1st, 2002, 11 A. That would be either Darl McBride or and March 6, 2003, that we have not discussed? 11 12 12 No. The only thing I would add is that I myself. And how long has that been the case that 13 Q. would view the Tony Befi call from October of 2002 to 13 either you or Mr. McBride would be the primary contac 14 be somewhat related, but given the dates these are all 14 15 or liaison with Microsoft? the communications for which I am aware of. 15 16 Since we started a relationship with them And similarly with respect to the overlap 16 17 in early 2003. between Topic 4 of the September 2nd, 2005, notice and 17 Prior to that time was there a similar 18 Topic 19 of the February 14th, 2006, notice, let me O. 18 designation of a person from SCO or Caldera, its 19 just refer you back to Topic 4 and ask you whether we 19 predecessors, who was given the responsibility of have also now completed a full discussion of all the 20 20 communications between SCO and IBM concerning IBMis21 being a primary Microsoft contact? 21 I don't believe there was much 22 A. alleged breach of the agreements. Have we talked 22 relationship between Caldera and Microsoft. And with 23 about all the communications of which you are aware? 23 the old Santa Cruz Operation and Microsoft that 24 I believe so. 24 A. relationship had been from a long time ago when they Okay. Let's move to Topic 11 then of the 25

Page 97

had been involved with Xenix development together in the, I believe, 1980's time frame.

And I wouldn't recall specifically who those people would have been way back in those kind of time frames.

- Well, The Santa Cruz Operation did have a fairly longstanding relationship with Microsoft, did it not, for the very reason that you just identified --
- 10 Α. Yes.

2

3

4

5

6

7

8

9

11

21

- -- as Xenix code? Q.
- 12 Yes. A.
- 13 Did that relationship continue with the O. 14 acquisition of the UnixWare assets and the Unix code 15 by Caldera?
- 16 A. I believe there was very little 17 interaction between Santa Cruz Operation and Caldera and Microsoft. 18
- 19 It may be obvious but tell me why there 20 was little, if any, relationship between -- a positive productive business relationship between Caldera and 21 Microsoft? 22
- 23 A. My understanding is they had kind of gone 24 their separate directions on their business and Microsoft had very little involvement with continued

Page 98

Xenix development or participation, and that was mostly being done by The Santa Cruz Operation and there was little reason for them to be discussing

ioint business at that point. 4 5

- In your judgment would the absence of a business relationship between Caldera and Microsoft be due to the fact that Caldera was perceived in pursuing a business plan as a Linux company and Microsoft was not?
- 10 That would be speculation on my part. A. 11 There's a possibility.
  - Is it consistent with your understanding of the business plans and the business directions of those two companies?

MR. JAMES: Objection. Beyond the scope. THE WITNESS: The companies -- both companies were certainly pursuing different business 17 strategies and didn't have very much overlap at all.

- Q. BY MR. DRAKE: Wasn't Microsoft perceived 19 19 20 as a competitor of Caldera?
  - To a certain extent, I believe so. Α.
- To what extent would Microsoft have been 22 Q. 23 considered a competitor of Caldera?
- MR. JAMES: Objection. Beyond the scope. 24 THE WITNESS: They both provided server 25

operating system products.

- BY MR. DRAKE: That --O.
- Obviously very different platforms. Α.
- That competed with one another and were Q. very different, correct?
- To a certain extent. I mean, you know, the businesses primarily were interested in a Unix or Unix-like solution or were primarily interested in a Windows solution, chose that path, though there are some that would choose a heterogeneous environment that would have some of both. 11
  - Between let's say May of 2001 when the O. acquisition of the Unix Ware product -- Unix assets was completed and early 2003, the time frame that you mentioned a moment ago, are you aware of any instances in which Caldera or SCO partnered with Microsoft to pursue any common business strategy?
    - I'm not aware of anything. A.
- What was it in early 2003 that prompted or began the business relationship between SCO and 20 21 Microsoft?
- As we were forming up the, you know, 23 SCOsource and IP licensing programs we had become aware that Microsoft was starting to pursue a 24 increased Unix compatibility functionality in their

Page 100

Page

products. And we approached them in I think the early part of 2003 letting them know that we had Unix intellectual property, A, that we were concerned about if they might have issue, but B, that we had licensing programs that they may be interested for additional technologies that they could apply into their Windows products. Specifically a product that was called Services for Unix by Microsoft.

Were there meetings that took place, face-to-face meetings in this time frame, early 2003, that took place between SCO and Microsoft to explore 11 any of the issues that you just described?

My understanding was most of -- or my recollection is most of the meetings were done over the phone via conference calls. There were a number of times in, you know, the early part of 2003 that we did meet face to face, but primarily most of the conversations we had with Microsoft were scheduled teleconference calls.

- Were records or the equivalent of minutes 20 O. maintained that would document what was discussed during these conference calls and teleconferences 22 23 between Microsoft and SCO?
  - No, not really. I mean, I'm not one that generally takes notes and I was, for SCO, the primary

3

5

6

20

21

Page 101

person driving the meetings. Generally my approach was to work from working documents, as we got to a

draft of a legal document of a license with them that was what I used as the basis for our discussion points in many of the meetings that we had.

So is it your testimony that you never made any notes of the conference calls and the discussions that you had with Microsoft?

6

7

8

9

11

20

25

4

5

7

8

Generally it wasn't necessary because we were having early on very preliminary discussions, and then later on as they determined it was appropriate, you know, we made a -- a presentation of a memorandum 13 of understanding of a term sheet, and then ultimately 14 working legal documents for their licensing of some of 15 the SCO UnixWare intellectual property for use in 16 their services for Unix product. It was fairly 17 straightforward.

Q. If you remember you must be pretty good 18 19 to work without notes.

I've never really used much in terms of 21 written notes, other than occasionally I'll write 22 something down on a yellow sticky note for just a 23 brief moment until I've, you know, accomplished that, 24 and that is rare.

(Exhibit 1696 was marked for identification.)

I don't. I don't know if this is a 1

Microsoft sourced document or a SCO sourced document

Page 103

Page 104

And that was going to be my next question: Does SCO maintain a discreet file which it designates the Microsoft File?

I believe in general we have in our corporate files for most of the major customers accounts or other partner relationships that we have.

Okay. To your knowledge was SCO 9 maintaining a file for Microsoft back in September of 10 11 2002?

12 A. I believe so.

To your knowledge has that Microsoft file 13 O. been produced in discreet form to IBM in this 14 15 litigation?

A. Yes, I believe it has. (Exhibit 1697 was marked for identification.) MR. DRAKE: Let me hand you Exhibit 1697. Sorry.

20 MR. JAMES: Sorry. I got it.

Q. BY MR. DRAKE: Ask you to identify that 21 22 document if you can, please.

It is a SCO Microsoft Corporate Software Licensing Agreement.

Q. And it says "Proposed Term Sheet,"

Page 102

BY MR. DRAKE: Let me show you what I've 1 2 marked as Exhibit 1696. Ask you if you can identify 3 that document, please?

Well, this appears to be a document that lists a number of agreements between, I assume it's Santa Cruz Operation and Microsoft, mostly from the 1980's. Well before my time.

Can you identify the document with any more specificity? That is, date of creation, author, circumstances that led to its preparation, anything of 11 that nature?

12 A. I cannot.

13 Would you turn about halfway down through the exhibit to Bates Number 238, please. In the upper 14 15 left-hand corner it says "Microsoft File" and then it 16 bears a series of numbers which appears to be a date 17 9-24-02. Do you see that? 18

Where is this? A.

Upper left-hand corner. 19 Q.

20 Α. Okay.

Do you see that, "Microsoft File"? 21 O.

22 A. Yes.

9-24-02. Do you know what that reference 23 Q. 24 pertains to, that being the Microsoft File and the

25 date? correct?

Yes. A. Are you able to tell whether this is a Q. complete document; that is, whether this single page that I've marked as the exhibit includes all the proposed terms that were being discussed by the parties back in February of 2003?

Yes, I believe so. I helped create this Α. document so ...

Well that helps. Okay. A software licensing agreement was ultimately entered into between SCO and Microsoft, correct?

A.

Without wanting to put you through a Q. difficult task, are you able to quickly review Exhibit 1697 and tell me how the terms of the final agreement that was entered into compared to the terms that are listed here?

I believe the source code license ended up being broader than just run time libraries.

In what respect? O.

To pretty much the entire UnixWare 7.1.3 22 source code base for which we could provide them with 23

And it was done in a number of pieces that they wanted 24

25 to be able to do an evaluation initially and then

6

7

12

13

15

Page 105

determine suitability, and primarily their services for Unix product offering, and then be able to purchase a broader license, give them more rights than just an evaluation license.

And then I believe there was some additional term of additional licenses, even the possibility of a source code sublicensing capability, which my recollection is they did not opt for that option.

So the scope is certainly greater than this initial term sheet of February.

- Do you recall the date of the actual software licensing agreement signed by Microsoft?
  - A. It was April or May of 2003. (Exhibit 1698 was marked for identification.)
- 15 16 BY MR. DRAKE: Let me hand you what's been marked as Exhibit 1698. This is an email string 17 which again at the top indicates, quote: 18

"Some initial market feedback on the SCO source announcement. Clearly MS

21 will use it as FUD."

Do you understand "MS" to refer to 22

23 Microsoft there?

4

5

7

8

9

10

11

12

13

14

19

20

1

2

3

4

5

6

7

10

16

17

21

Yes, I do. 24 A. 25

And "FUD" refers to what? Q.

particular email applies to the business relationship between Microsoft and SCO.

Page 107

Page 108

- BY MR. DRAKE: Well the email clearly, 3 you know, relates to Microsoft and SCO --
  - Not the --Α.
  - Q. -- whether in your judgment --
    - -- business relationship. A.

8 That's why we're here and I can only ask O. you whether in your judgment information like that 9 reflected in Exhibit 1698 did affect the business relationship between the two entities. 11

In your judgment did the SCOsource announcement in any way affect the then developing business relationship between Microsoft and SCO?

A. I don't believe Microsoft was interested in a -- in SCOsource per se, but specifically they 16 were interested in an intellectual property license to 17 our Unix IP or use in Microsoft products that would allow them greater Unix compatibility. 19

(Exhibit 1699 was marked for identification.)

20 BY MR. DRAKE: Exhibit 1699 is an email 21 from Mr. Anderer to Mr. McBride, at least in part. It 22 is an email string that includes those gentlemen as well as an attachment which is labeled "Confidential

Draft Term Sheet" and bears the date of February 21

Page 106

A. I would assume fear, uncertainty and doubt.

Okay. Do you recall whether or not the Q. SCOsource announcement was used by Microsoft to create 4 a fear and uncertainty and doubt in the marketplace?

I don't have a specific recollection of that.

- Well, you were the primary contact along 8 with Mr. McBride, correct? 9
  - Yes. Α.
- And you don't recall Microsoft using the 11 12 SCOsource announcement to create discord or fear and uncertainty and doubt in the marketplace shortly after the SCOsource announcement was made?
- 15 Α. Not that I saw.

MR. JAMES: Objection. Beyond the scope.

- BY MR. DRAKE: Well you understand, Mr. Sontag, you're here today to talk about the 18 business relationship between SCO and Microsoft? 20
- Would you agree that things that might O. affect that relationship are clearly within the scope of the designated? 23

24 25

MR. JAMES: Objection. Argumentative. THE WITNESS: I don't believe this

2003. With respect to the latter document and the one to which you're referring to at this point let me ask

you this:

2

3

5

6

7

8

9

16

17

Did you have any role in creating the draft term sheet that appears as part of Exhibit 1699?

A. No. I believe this is a Microsoft generated term sheet.

- That came from Microsoft, correct? O.
- I believe so, yes.
- Was there an exchange of term sheets 10 between the two parties that ultimately, you know, led 11 to the culmination of the software licensing agreement 12 being signed? 13
- Yes, I mean, this was the initial term 14 A. sheet that I helped draft --15
  - Right. We now have --Q.
  - -- that we discussed earlier. A.
- 18 Q. Sorry.
- This was a -- I believe the next follow 19 A. 20 on term sheet that was generated by Microsoft, and then there was further negotiations, and I'm not sure if we went to another term sheet or -- I believe we went straight to a legal document that incorporated 23
- our negotiated changes to this term sheet. 24 25

And you've anticipated my question, which

4

5

9

12

17

19

20

1

2

3

4

5

6

7

8

9

10

11

12

13

15

24

Page 109

was going to be: Are you aware of another term sheet which existed between February 21st, 2003, and the actual date that the licensing agreement was signed?

- I'm not aware of any other preliminary A. term sheets.
- Refer to Page 3 of that exhibit, and O. about halfway -- well, three-fourths of the way down under Number 2 the bullet point says:

"The above license would include broad modification and distribution rights."

Do you see that?

A. Yes.

4

5

6

7

8

9

10

11

12

13

14

16

18

3

4

5

6

7

8

9

10

14

17

18

If this document as you believe was 0. generated by Microsoft, what was your understanding of 15 the breadth of the modification and distribution rights that it was seeking? 17

Well I believe they were asking for the 19 moon with that bullet point. Certainly something that 20 we weren't going to provide them for the limited 21 amount of money that they were talking about paying at 21 22 this point.

23 If they were asking for the moon -- which Q٠ 24 is a very good description -- what would that include 25 in terms of, you know, rights to use code, disclose

distribution licenses for those, to even more sophisticated licenses that included source code sublicensing rights.

And that far extreme is only one party for which I'm aware of, which was Sun Microsystems, that a source code sublicensing right. And they paid, you know, over \$100 million in total for that right. And obviously the other extreme is limited license that were, depending on the size of the company, 5,000, 10,000 to \$50,000 for a source viewing license 11 at various times.

- BY MR. DRAKE: And I don't mean to O. interrupt you, but would it be fair then to 13 characterize with Microsoft as seeking under this term sheets to be something akin to what Sun had acquired in its licensing agreement?
- Certainly they had made that request for A. this bullet point, but it was not something that 18 ultimately was, you know, part of the final terms of the signed agreement.
- Okay. And let's move to the terms of the final agreement. And to the extent you can generally, 22 can you compare what rights Microsoft acquired in that 23 software licensing agreement to those that Sun had 24 acquired in its very broad license as you've described

Page

Page 111

```
code, distributed, make derivative works, things of
that nature? Can you explain any more fully?
```

Α. Sure.

MR. JAMES: Objection. Lack of foundation.

MR. DRAKE: Go ahead.

THE WITNESS: Want to give me a little more foundation?

MR. DRAKE: I don't think you need it because you were involved in the transaction, you drafted the term sheets and you know what was going on. I appreciate the objection but I'll let you 12 13 answer the question.

MR. JAMES: Well let me just object to the extent that that comment suggests that Mr. Sontag 16 drafted the term sheet that he's looking at.

MR. DRAKE: Fair enough. Go ahead.

THE WITNESS: Not based on this term sheet and that specific statement, but there are 19 various Unix licenses that SCO and its predecessors 21 entered into with various Unix licensees.

22 Very limited licenses that were for 23 source viewing purposes only, under a confidential basis, to licenses that allowed for development of, you know, derivative works products and then

it? In general given -- I mean, the document speak for it --

Q. Sure.

-- themselves. Sun did not have a source A. code sublicensing right but they acquired in the final agreements. And there was a number of agreements that were part of the final Microsoft licensing agreement.

MR. JAMES: You may have misspoke. MR. DRAKE: You just, I think did

misspeak, which Mr. James is going to correct you You said Sun did not --

THE WITNESS: I'm sorry, Microsoft did not. I was trying to make the comparison to Sun but I 14 obviously said that wrong. Okay.

- BY MR. DRAKE: All right. What was the 1.6 final consideration, total amount that Microsoft paid 17 for its software licensing agreement, just in general 18 19 terms?
- 20 And again it was a number of options they had, but I think in total it was on the order of 17 to 21 \$18 million that was the total amount that they 23 ultimately opted for.
  - Was SCO willing back in 2003 to offer a software licensing agreement that was similar in terms

4

19

23

THE WITNESS: I believe there was some brief discussions in that regard. My recollection is that Microsoft was not interested in a source code sublicensing capability so it didn't go very far.

- BY MR. DRAKE: But really wasn't a topic of discussion?
- It wasn't a -- it wasn't a major topic of 13 A. 14 discussion.
- Apart from the business relationship O. between SCO and Microsoft that included the licensing 16 of software that we're talking about, did SCO and Microsoft begin any sort of partnering efforts to jointly pursue the development of products?
- There were a number of discussions and 20 meetings that occurred about ongoing partnership that 21 could -- and joint business opportunities between the 22 companies that occurred through the summer and fall of 23 24 2003 and even continued into 2004.
  - What types of business opportunities were

Unix products and Microsoft Windows products. Did 2 that ever come to pass --

Page 115

1116

Page

A. No.

- -- that there were any actual efforts Q. undertaken to do that?
  - No. A.
  - Q. Why not?

Ultimately I think Microsoft became A. concerned with all of the huge amounts of, you know, uproar regarding SCO's lawsuit with IBM and determined 10 they didn't want to have too close of a relationship 11 with SCO. And so ultimately they backed away from pursuing some of those partnerships and business 13 opportunities with us. 14 15

- With respect to this notion of O. engineering development, if I may characterize it as that as opposed to this -- the reseller component that you described. Sticking with engineering development, was there one person at Microsoft with whom SCO had the most involvement and the most dealings in discussing that option?
- Our primary contact was a gentleman by A. the name of Rich Wickham. 23
  - How do you spell the last name? Q.
  - W-i-c-k-h-a-m, I believe. A.

Page 114

being discussed or pursued in that time frame?

I think some of them were along the lines of us providing them with engineering support and expertise on improving their Unix compatibility and their products. So in some ways doing development work for them of some of their services for Unix products, that was discussed.

There was also discussions of joint product deliverables or bundles of combined Microsoft and SCO Unix solutions to customers we believed would 10 11 be interested in a heterogeneous offering of Windows, 12 Unix, Office, exchange-type solutions in conjunction 13 with Unix.

I think those were the primary areas of discussion of how we could work together. And 15 actually I can think of one more of -- of SCO possibly reselling through our channels some of the Microsoft products was investigated, since we had a strong channel presence in the small, medium business space. Had a 4,000 or more resellers that would potentially 20 be interested and capable of selling Microsoft products in conjunction with SCO product offerings. 22

Q. Let's take the first category that you 24 mentioned, this effort to explore engineering and development which would increase the compatibility of

And would you and Mr. McBride have continued to be the primary SCO contacts in these discussions?

Primarily, yes. A.

Would there have been an engineering or Q. development person at SCO who also would have been involved by chance?

Erik Hughes got involved in the marketing level on the potential bundling of some, you know, combined SCO and Microsoft products and the feasibility of creating those combined products. So he -- he ended up getting involved at a certain level and participating in some discussions with Microsoft 13 personnel from that level. 14

I believe there was some level of engineering discussions that occurred, I can't remember who specifically would have headed that.

- When was it that Microsoft backed away, 18 as you described it, from pursuing any business 19 relationship of this nature with SCO? 20
- It was getting sporadic by late 2003 that -- I mean, we were still talking and we were 22 talking well into 2004, but significant discussions started to decline by late fall of 2003. And then I think by the late 2004 we realized that there was not

Page 119 Page 117 going to be a business relationship with Microsoft of 1 A. Yes. 1 2 What do you know about Vintela and what any form. Q. 2 3 the focus of that program was? 3 Did anyone from Microsoft ever come out O. Again I believe they had a management and say that that was the reason that they backed 4 5 product and a, I believe, directory service away? By that I mean kind of the general reason that integration product that they believe would be you gave a moment ago, concern about the lawsuit and 6 valuable to both Linux, Unix and Windows customers 7 7 all the other attendant issues? 8 that had to manage all of those collectively. 8 A. Not specifically. To your knowledge did the effort to work 9 9 I want to move to what I described as the O. 10 with Microsoft come to fruition with respect to the reseller component that you described earlier. 10 Did those discussions kind of follow the 11 Vintela program? 11 I believe Vintela did end up having some same timeline and the same ultimate outcome as the 12 A. 12 engineering development component we've been 13 business relationship with Microsoft over time on 13 products that they developed. 14 14 discussing? How extensive, if you know? 15 O. 15 They continued on further, but ultimately 16 I do not know. A. 16 the overall time lines they kind of waned If you refer to Page 3 of that document. 17 approximately the times I've mentioned. 17 The next to last -- actually about the middle portion 18 18 So the notion of reselling Microsoft Q. of the page it says, in part, quote: 19 19 products? 20 "We need to have Microsoft and Sun Or bundled products. 20 A. 21 take us into their reseller base and Bundled products, thank you, took place a 21 solve the problem that their little longer or a little more in the future than the 22 22 23 resellers are having." engineering and development component? 23 Do you see that? 24 That's my recollection, yes. 24 25 Α. Yes. 25 But nevertheless came to nothing at some Page 120 Page 118 Is that notion the same reseller concept 1 point? 1 that we were talking about a moment ago or is it the 2 Α. 10

Again, any discussion in this regard was 11 A. early on in the negotiations of our, you know, early 12 2003 IP license, and it was something that Microsoft did not express interest in. This I view as a 14 brainstorming effort on the part of Andy, I believe 15 16 this would be Andy Nagle, not being aware of the previous discussions that occurred. 17

Well I understand your answer, but just so that I'm clear. Are you aware of any instance in 19 20 which SCO made an offer, whether accepted by Microsoft 20 21 or whether Microsoft expressed interest in it or not, 22 did SCO ever make an offer to Microsoft to say we'll 23 sell you a full IP license for X dollars?

I'm not aware of any specific offer being A. 24 25 made.

You may have addressed this as part of your initial answer in terms of preparation, but tell me if there was anything specific to SCO that you did -- SCO -- to Sun that you did to prepare for testifying on that topic today?

Same thing I did for Microsoft. A.

We talked a moment ago about this 7 longstanding relationship The Santa Cruz Operation had had with Microsoft. Was there a corresponding one, to your knowledge, that The Santa Cruz Operation had with 11 Sun?

12 Santa Cruz Operation, no. But I do Α. believe that Unix Systems Laboratories, which was now a portion of Santa Cruz Operation, did have a longer term relationship with Sun.

And that --Q.

Joint development efforts on various A. things and so forth.

Okay. Can you describe just generally for me your understanding in that regard. What type of working relationship existed?

A. My general understanding is there was a number of joint development projects that were entered 23 into between, effectively AT&T, Unix Systems 25 Laboratories division, and Sun Microsystems on some

Page 130

132 Page

Page 1\$1

(Exhibit 1704 was marked for identification.) BY MR. DRAKE: Exhibit 1704 is a lengthy document, I don't want to put you through the tedium of reading the whole thing. I would -- you need to refer to more of it, please do, but I want to ask you to fast forward to Page 825, the Bates number, about three-fourths or so of the way down the document.

825? A. Yes, sir.

Q. Yes. A.

And this appears to be a power point 11 slide, and I don't want to ask you a lot of questions, 12 but the first bullet point there says:

"Reallocating Unix engineers to 14 Microsoft funded projects helps our 15 short term bottom line." 16

And my question is: Was there an 17 instance or an occasion where SCO did reallocate some of its Unix engineers to Microsoft funded projects?

A. No.

20 That was never done, was it? 21 0.

22 A. No.

All right. Let's shift gears at this 23 point to the other half of the topic, and that goes to

business relationship with Sun.

level of joint development on certain compatibility of Unix product offerings and some exchange of licensing of intellectual property in some cases, and -- and those sorts of things occurred in the, I think, late '80s, early '90s time frames and -- and such.

And carry that forward in time for me, if you will, and describe any ongoing efforts that took place between Sun and Novell, Santa Cruz Operation, Caldera, ultimately SCO Group?

I believe there may have been some additional, you know, joint business or joint standards, specification works done by the companies, but I'm not aware of, you know, significant joint 13 development efforts that occurred after the early to mid, I think, '90s kind of time frame.

Okay. And would that be true to the 16 Q. 17 present?

I believe so. A.

18 That there are no significant partnering 19 efforts, if I may describe them as that, to co-develop or market develop products? 21

A.

Tell me what you know about the business 23 O. relationship between Caldera and then The SCO Group 24 from the point in time when you joined the company in

Okay. There was a number of discussions A. with Sun about, again, joint business opportunities that were proposed, I think in the October, November of 2002 time frame.

A meeting I believe was held down in Sun's campus, for which I participated, that involved Darl McBride, myself, a SCO sales -- scales or 10 11 alliance sales representative for SCO, I think was 11 Mike Ballengee but I'm not sure on that, and I believe 12 a number of SCO engineers, where we had a meeting with 13 13 a number of Sun executives to discuss possible joint 14 14 15 projects together. 16

And we introduced our concepts of what we were thinking of doing with SCOsource and further IP 17 licensing and expressed if they were interested in 18 licensing up to any of the newer versions of, you know, UnixWare that we'd be happy to talk to them.

We started having some follow-up 21 discussions with Sun in the January, February time 22 frame -- or January time frame -- number of meetings, 23 phone calls, face-to-face meetings as well. And then 24 negotiated a UnixWare 7.1.3 IP license to Sun that was

business opportunities to work together in that regard and there was some initial interest and discussion in 3 that area.

Page 1**3**5

Page 136

i

Did any of those discussions ever come to anything? Were there ever any joint development efforts that were undertaken by SCO and Sun?

Joint development creating combined product offerings, no.

Joint efforts on anything, apart from the software license that was entered into in February of 103?

A. No.

And why was that? Why, in your judgment, Q. did none of these joint discussions ever come to anything?

Ultimately you'd have to ask Sun that A. question but --

Well, I'm interested in your perspective Q. for SCO. 19

My perspective would be, you know, they 20 likely didn't want to be too closely associated with 21 SCO, and though interested in potential joint, you know, our small medium business opportunities and so on, it wasn't a significant -- significant enough

market, I assume, for them to consider pursuing. 25

Page 134

completed by the end of February of 2003.

- How much did Sun pay and how much has it paid for the software license that was negotiated in February of '03?
- I believe the total amount was paid over a number of quarters, but was I believe \$10 million.
- Back to your description of the joint business opportunities that were discussed in the fall of 2002, early 2003. Tell me a little bit more about that, if you would, please. What types of things were being discussed by the parties, the type of opportunities were?

A. I believe we talked to them about, you know, they have mostly a corporate and enterprise 14 product offering and sales force and, you know, 16 channel. And SCO has a, you know, small, medium business focus, product set of offerings and channel. 17

And there was some level of synergy 19 between kind of those offerings, that there were cases 20 where we could be bringing them into our customers who 20 21 had needs for an enterprise or data center solution and vice versa, you know, with our S&V or replicated type capabilities of multiple, you know, stores locations or retail offerings that we provided.

So we talked about as they're joint

Why in your mind would Sun not want to be too closely associated with SCO?

Well again, you know, publically there was a lot of, you know, issues raised about is there some alliance between SCO and Sun or SCO and IBM, and they did not want to be too closely associated with SCO.

Because of SCO's litigation with IBM? Q. MR. JAMES: Objection. Lack of foundation.

THE WITNESS: Again, that's my belief. (Exhibit 1705 was marked for identification.)

Q. BY MR. DRAKE: 1705, Mr. Sontag. Based 14 upon your prior answers I'm just going to go very quickly through this.

This is an email string which includes one from Mr. McBride to others in October of 2002, and it refers in part to further discussion on how Sun can play a role in SCO's UnitedLinux efforts.

Would that type of discussion have been part of these discussions in the fall of 2002 that you 21 22 described for me?

A. Yes, I believe so.

(Exhibit 1706 was marked for identification.)

BY MR. DRAKE: Exhibit 1706 is an email

34 (Pages 133 to 136)

	Page 137		Page 1

regard.

What did you do to prepare to testify on Topic 14 today?

A. I, through our legal counsel, had an email sent out requesting any information from any employees on this topic. I also talked to our IT director, Mark Cowley, as well as several of his employees, John Gail -- well, specifically John Gail. I also had a brief conversation with Dean Zimmerman 11 who is -- actually that's on the web. That's another 13 topic.

And I also talked to Sandy Gupta requesting the information from him regarding this topic as well.

And what did you determine based upon Q. 18 those conversations?

MR. JAMES: Objection. Vague.

20 THE WITNESS: I was able to compile a 21 listing of the limited use of Linux that still

continues within SCO and a number of different, you

know, either competitive evaluation systems or a few

internal IT systems throughout the company, and did

prepare a schedule that has information in that

Page 142

Page 144

Page 113

MR. DRAKE: Based upon your gesture I'm hopeful that there's a document we may be able to see.

MR. JAMES: Once again there is a document that is responsive to 14(b). And while you're marking that let me just say for the record with respect to 14(a), SCO sales or distribution of Linux after May 14th, 2003. To the extent that includes revenue-type information and identify -identification of the products, I think Erik Hughes in 11 his capacity as a 30(b)(6) representative covered that 12 thoroughly.

MR. DRAKE: He did, and my examination of 14 Mr. Sontag on that point would be very brief only to confirm that the information provided by Mr. Hughes is 16 in fact complete and exhaustive with respect to that topic.

MR. JAMES: Okay.

MR. DRAKE: So I'm not going to replow 20 that ground, but I am going to ask you -- and I might as well now -- to just confirm that point. But let's 22 begin with some foundation.

23 Are you familiar with the information that Mr. Hughes has provided in the past with respect to sales of Linux products by SCO?

A. Iam

And have you confirmed that in fact that Q. list or those materials are complete and exhaustive and include all of the sales of Linux products by SCO?

Α. Yes.

Q. All right.

(Exhibit 1708 was marked for identification.)

BY MR. DRAKE: With that let's move to Exhibit 1708, and tell me what this document is, please.

This is a document that lists SCO's A. internal use of Linux on a number of our internal servers at -- at this point in time as of about a week ago was when this was prepared.

So in Utah we have servers 40, OpenServer, UnixWare, Windows and BSD servers that we 16 run various IT and other information applications on. 17 And we have 26 Linux servers that we use for kind of internal applications that are basically Legacy 20 applications that would be very difficult and expensive for us to port off of Linux, and given it's 22 our own internal use of effectively at least a portion 23 of our own IP for which we're concerned about, we've been slowly migrating off of our use of Linux as it was appropriate, upgrading the new systems and so on.

But we still have 26 Linux servers used in Utah. We have 97 OpenServer, UnixWare, Windows or BSD servers that are in use in our Santa Cruz facility in California. And two Linux servers that are primarily used for benchmark testing and competitive analysis.

And then in our New Jersey facility we have 200 Unix servers, primarily. Predominantly UnixWare. Several OpenServer servers that are also 9 running in New Jersey, and we have one Linux server 10 that's being used in New Jersey half time that is 11 being used primarily for competitive benchmark and so 12 13 on.

You described the overall category of 14 Linux servers as being Legacy servers. What did you 15 mean by that? 16

So certain applications -- and I've 17 A. listed them below here -- that are running on those 18 Linux server. Internal web applications, you know, expense reporting, vacation reporting, those kinds of applications are running internally. A number of 21 databases that we have that historically were running 22 on Oracle on top of Linux, a number of backup servers 23 and a few other applications as well. 24

What are some of the database servers

36 (Pages 141 to 144)

CHRISTOPHER SONTAG Page 145 Page 14 Exhibit 1709, which is an email string from April of that are still running? 1 2 2004. Have you had a chance to make your way through 2 Well we have an Oracle database, I think 3 that? 3 it's being used for sales reporting or something that 4 A. Yeah, I'm quickly scanning it right now. is still hosted off of a Linux server internally. 4 5 The first email is one from Janet 5 Any other Oracle databases that you're Q. 6 Sullivan to Craig Bushman dated April 22nd, 2004. 6 using other than sales reporting? 7 You're starting at the back? 7 Not that I'm aware of. 8 8 And why would it be difficult to move off I am. Not with any intent to confuse 9 you. And she says, in part, quote: 9 these servers if SCO chose to do so? Well an estimate from, I think Mark 10 "As a result it has been pointed out 10 11 to me that our own IT department is 11 Cowley, was that it would be in terms of, you know, porting the applications and so on as much as \$800,000 12 in the process of a server 12 13 consolidation project on SuSe Linux. in expense to us to do that work on rapid order. 13 Can this be so?" 14 14 And given the, you know, small size of 15 And goes on. Are you aware of the fact 15 the company and limited financial resources, \$800,000 that such a project was going on in April of 2004? 16 is a lot of money to us. And again, like I said 17 Generally. I wouldn't characterize it as earlier, given our use of Linux internally is IP for 17 a server consolidation on SuSe Linux. It was a server 18 18 which, you know, we believe we own, we don't see that consolidation project that was consolidating UnixWard 19 to be a problem. servers, OpenServer servers. They were trying to 20 Is the \$800,000 figure a hard cost or is Q. reduce the number of servers that we had overall in that --21 That's an estimate. That's an overall the company, and I believe this project also reduced 22 the number of Linux servers as well. 23 estimate to do the entire work to completely remove 23 24 But in the end ended up running SuSe any Linux servers internally. Q. 24 25 Linux? 25 So that would include some component of Page 118 Page 146 There was a number of servers that hardware as well as some person --2 continued to run on SuSe Linux. 2 A. Potentially, yeah. Are those same servers continuing to run 3 3 Q. Q. -- hours to do the porting? 4 Yes. today? 4 A. 5 I suspect that to be the case. A. 5 Do you have any sense of how these O. 6 Part of the group that was listed in 6 numbers that you've listed for the present compare to O. 7 Exhibit 1708? 7 each of the past two or three years? 8 Yeah. These -- the Linux numbers have Yes. 8 A. 9 Okay. You can slip that aside. Let's 9 been declining. move to the last topic, and that would be Topic 18. 10 10 And can you describe that with any degree 11 On the February 14th, notice, if you have that in in terms of percentage of numbers or whatever over 12 front of you. Please take a moment, review it. 12 time? 13 A. 13 I didn't attempt to do that or request 14 And you anticipated the topic because you that type of information. Q. 14 15 mentioned just a moment ago that you talked to 15 So these numbers are accurate, I believe Q.

somebody about websites, so tell me --

-- tell me what you've done in that

my preparation, had an email sent out by our legal

counsel, at my direction, that the -- was sent out on

this topic to all of SCO's employees requesting any

So again similar to a lot of the rest of

I also talked to Mark Cowley about this

1 particular topic and Dean Zimmerman, who has had involvement with our websites. I also talked to Sandy Gupta a fair amount regarding this topic as well, and he in turn asked a lot of questions of a number of SCO engineers in the New Jersey facility specifically about questions that I had on this topic. So that's predominantly what my preparation was.

Did your preparation include trying to determine how many websites SCO has maintained over the past, say, five years?

Well, primarily we only have a number of 11 12 public websites, Caldera, that's ended up becoming 13 SCO, and a associated FTP site. With regard to 14 project Monterey SCO never maintained any public 15 websites or FTP sites related to project Monterey. 16 Those were always maintained by IBM.

17 Did -- with respect to the project 18 Monterey and related websites, did SCO have the ability to make contributions or any way control 20 information that was posted on those websites?

My understanding was that IBM primarily 21 controlled what was put on those websites. 22

Yes, sir, but did SCO have the ability to 23 make any contributions or in any manner control those 24 25 websites?

Well, back to my initial question: Were you able to determine how many public websites SCO has control over, sponsored in the last five years or so?

Page 191

Page 152

One or two. Α.

Just --Q.

I believe so, yes. A.

> Ο. The first would have been Caldera?

And then transferring that website over to basically being SCO.com, and there's associated FTP 10 sites for some documentation drivers, patches, updates and so on.

> And those are still in existence? Q.

Α. Yes.

(Exhibit 1710 was marked for identification.)

BY MR. DRAKE: Exhibit 1710 is an email string from May of 2003 which includes an email toward the bottom of Page 1 that says, quote:

"You may want to discuss this with Chris to see if we should temporarily change our website to the numerals instead of 'go Linux'." Do you see that?

Yes. A.

Would you conclude that the Chris that's O. 25 referred to there would be you?

Page 150

I suspect they had some ability to participate in adding some level of content in that they were a partner with IBM on project Monterey.

Was there a person -- strike that. Do you know when the project Monterey websites first installed, first put into operation?

The public websites? A.

Yes, sir. Q.

3

4

5

6

7

8

9

18

20

22

23

24

No. I do not. A.

10 Was there a person at SCO who was responsible for working with IBM in terms of 11 maintaining and contributing to the websites? 12 13

Again, my understanding based on people 14 that are still with SCO that would have had any 15 understanding on this topic, there was nobody at SCO 16 that was involved in maintaining the public IBM websites related to project Monterey. 17

Was there an internal website that SCO 19 maintained with respect to project Monterey?

There was for development purposes 21 maintained a number of development documents related 21 to project Monterey.

O. Have those documents been provided to IBM in this litigation?

I believe they have.

Most likely. Α.

Was such a change made after May 29th of Q. 2003, that is, the change to the numerals instead of "go Linux"?

Well, I don't believe she was talking A. about a -- a website. I believe she was talking about a 800 number.

Okay. That may explain some of the confusion I had with numerals. So you think that's a reference to an 800 number not a website?

If you look right above it it has a 800 go Linux, and I think that's really what's being referred to. I don't believe we had a go Linux website.

Did, to your knowledge, the website ever include a reference to "go Linux"?

Well up until May of 2003 we had a Linux business that we did marketing and other associated things with, so I would not be surprised.

(Exhibit 1711 was marked for identification.)

BY MR, DRAKE: Exhibit 1711 is a email 22 string from June 9th of 2003?

18

19

O. Was any determination made in June of 18 2003 to remove the ability to buy Linux materials from 19 20 the SCO website?

A. I believe so.

21 Do you know --22 Q.

May have taken some period of time. A.

And that was going to be my next 24 O.

25 question: Do you know when that was actually

Page 1\$5

determined we needed to take a number of steps and various executives had, you know, responsibilities, including the website or contracts or otherwise.

(Exhibit 1712 was marked for identification.)

BY MR. DRAKE: Show you what's been marked as Exhibit 1712, and I apologize for the dark highlighting residue that appears in the middle of the page, but I hope you can read that.

It says, as I read it, quote:

"I would like to spend some time on the Linux cleanup action that came from Kit. It has implications on LKP that we should discuss as a group. Basically the action is to remove Linux materials from SCO.com by the

end of 2004."

Do you see that?

Yes. Α.

Were Linux materials available on SCO.com Q. as late as the end of 2004? 20

In terms of being able to purchase product, I do not believe so. In terms of documents or otherwise, there may have been some still available in certain locations on our website.

Kit would refer to Kit Broughton who

Page 154

accomplished?

A. I believe it was done over the course of, you know, June, July into the -- you know, some forgotten link in some hidden corner of the web page, may have been into the fall time frame and so on.

Did SCO maintain any documentation of its efforts to accomplish that task; that is, the removal of the ability to purchase Linux products through its website?

I don't think we specifically documented the process but, you know, we did -- with the suspension of Linux that we've put out that order in 13 May of 2003 we started the process of having everybody 14 go through and remove Linux related, you know, product 15 offerings and, you know, discontinue our Linux related 16 activities. Including, you know, removing Linux references from our websites and -- well, that process was done over time as we were able to do it.

Was there an active directive that was 20 sent out to SCO employees shortly after May 14th of 2003 to actively remove Linux products from the 21 website? 22

I don't know if it was a directive in 23 A. 24 writing, but certainly we had a discussion in 25 executive staff meetings in the end of May where we reports to me, and I tasked her with, you know, when I became aware that this was still some, you know, Linux documents or otherwise on our website, to work with appropriate people to, you know, remove all of those

Page 156

materials. Well, what Linux document or Linux Q.

materials were available on SCO.com in 2004? When in 2004? Α.

At any time. O.

Well early in 2004 -- oh, we're talking Α. 2004.

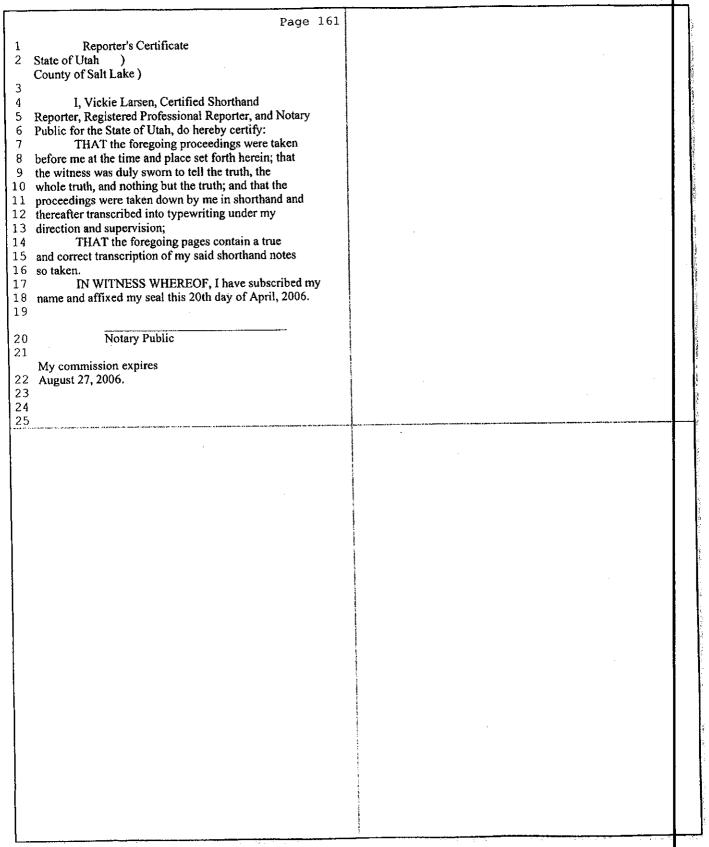

I'm not aware specifically what Linux materials. I would assume marketing materials or educational materials would be what this is referring to.

Would Kit Broughton know what 16 materials -- what Linux materials were available on 17 SCO.com in 2004? 1.8

Well I had talked to Kit about this and 19 she didn't specifically mention anything in 20 particular, but I'm very confident that it was likely to be marketing or -- or other types of materials, support, educational materials, that may have been still available on the website in some obscure 24

25 location.

	Page 157		Page 159	9 (
