Our Virtual Terminal allows you to manually process credit card transactions from any computer with an Internet connection and a standard browser. You simply login to a secure web site with a Login ID and Password and you are able to charge credit cards, perform authorizations, and process credits. In addition, you have complete online reporting of your transaction history.

IntelliPay is trusted by thousands of merchants processing millions of dollars of transactions across the globe and is certified by the biggest private banking networks in the world.

Today, over 90 percent of online purchases are made with a credit card! For your business to truly compete in the Internet world, a merchant account associated with the IntelliPay payment processing system is essential!
