Dear Friend,

Whichever way you look at it, unless you got lucky and were born rich, the odds are stacked against you:

- ➔ Your boss expects you to work like you are being paid in gold despite the fact he is paying you rations of peanuts
- ➔ All the greedy fat cats in corporate America are taking advantage of the 'cheap overseas labour' and leaving their own people to fend for themselves
- ➔ Our government gives out overseas grants which are never paid back and invests millions of dollars into wars (using our tax money) destroying the economy and leading us into a recession
- ➔ Credit card companies want us in debt up to our eyeballs... paying exhorbitant amounts of interest that eventually feels like a noose around your head
- ➔ The IRS is only chasing one thing - every cent you own
- ➔ And the stock market bosses are experts at playing smoke and mirrors to scam you out of your retirement money

It's a dog-eat-dog world out there. And there are plenty of bloodsucking mongrels who will own your life unless you do something about it. And that's why I'd like to give you access to one of our risk-free-trial Google Profit Tree at my risk so you can find out exactly what you need to do so you can walk up to your boss - and all the other scoundrels - and tell them to shove it.

With your permission, I'm going to show you how the technology of the 21st century has levelled the playing field - and why there's now an easy way that can give you the money you are entitled to.

SOLVED: Your biggest worries.

Now You Can Be Your Own Boss And Build Financial Security For Yourself And Your Family Despite Today's Tough Economy In What Some People Are Saying Is The World's Finest Legal And Ethical Method Of Carving Out A Mass Of Wealth In A Hurry

Getting into business for yourself isn't very attractive for most people. I am sure you have heard 9 out of 10 new business ventures fail within the first 5 years. And that's because they require buildings, equipment, inventory, employees and all sorts of hassles and complexity. It's also why succeeding in business has been out of reach for most ordinary Americans until now.

But that's all changed since the introduction of Google. Now anybody can get started from their kitchen table with almost no start-up capital. Why? Because Google is such a powerful vehicle...

FACT: Google has 380 million global unique users per month (Nielsen/Netratings 8/05)

FACT: Google accounted for 68.29 percent of all U.S searches in the four weeks ending May 31st, 2008 (Hitwise / June 10th, 2008)

FACT: Google is the #1 search engine in Argentina, Australia, Belgium, Brazil, Canada, Denmark, France, Germany, India, Italy, Mexico, Spain, Sweden, Switzerland, U.K., U.S. (Nielsen / NetRatings 6/05)

The bottom line is, unlike most business opportunities, leveraging off the power of Google to start a business requires minimal investment of time, money and effort. It's something which has never been available at any time in history - yet fully complies with the tough set of standards I've demanded of any wealth producing concept:

- ➔ Must be able to get the ball rolling with minimal investment
- ➔ Must be possible to begin at home without leaving your present job or interfering with family life
- ➔ Must require just a few hours of spare time a week
- ➔ Must be able to realistically make **PASSIVE, CONTINUOUS PROFITS**

And anyone with even a smidgeon of ambition can do it. Yes - finally - the unlucky ones can become lucky!

Why Am I Giving Away This Google Profit Tree Risk-Free?

One Reason:

To Help You Fight Back Against The Worst Economic Crisis Since The Great Depression

Over the last few months, we've seen unemployment levels move to their highest level in more than 14 years... the sub-prime mortgage crisis devastate property values and the quality of life in cities across the United States... and food prices go through the roof.

Throughout this, I've been troubled with a major dilemma: what can I do to help average Americans prosper through this nightmare of a recession which only looks set to get worse.

You see, it bothers me when I hear about Americans having to struggle to just to meet their mortgage payments... afford medical bills... get their kids to school and fight for their families.

There was a time when we didn't have to concern ourselves with all of this. But we are now going through the worst economic crisis since the great depression.

And since I know a system thousands of people have used to make a substantial income from home or more - despite the state of the economy - I couldn't live with myself if I kept it a secret.

And that's why I'm offering The Google Profit Tree - a program which thousands of Americans have already used to make money - with my compliments to those who qualify.

What Our "Google Profit Tree" system Is NOT

NOT Multi-Level Marketing where you try to offload over-priced products to your family, friends and work colleagues

NOT another "how-to-course" or pile of books and tapes that are all hype and no substance... or worse still, so boring they end up gathering dust on a shelf

NOT a "regular business" with HUGE expenses and HUGE headaches

NOT disruptive to your family life

NO bothering friends, family, neighbours or work colleagues (keep your new business and accumulating wealth a secret if you like)

NOT a difficult business to run. Even a twelve year old child could follow this foolproof system

NO long learning curve (no 'business school' can offer THAT)

- NO** special education required
- NO** selling sex or off-colour stuff
- NO** employees ever needed - no matter how much money you make

How I Eliminated My Debt And Got Rich Using Government Money And Started a \$5,500 Mo. Home Based Business

Posted by: *Michael Jenkins*

Luckily, I do not have to pay this money back, and I'm about to show you how you can easily do this too just by simply filling out two forms online...

Hi,

This is Michael Jenkins here from Anamosa, Iowa and thank you for visiting my blog.

This is my story of how I crawled out of the pits of debt and frustration and went on to become financially free just by filling out 2 forms on the internet.

Basically, I ended up getting three different US Government grants from some agencies. I received close to \$12,000 in about 30 days. That money was enough to pay off a good chunk of my debt and I still had a little bit left to pay a few of my bills that month.

I'm also gonna share with you how I was able to quit my job shortly after I started working from home on my computer. I am working only about 20 hours a week a making some good money. Not a ton, but I average about \$5,500 per month, and I actually made \$9,534.34 in June of last year, but that was a rare month I must admit.

Anyhow, I didn't want to join any stupid get rich quick business opportunity. I didn't want anything to do with pyramid schemes or multi-level marketing programs. I just wanted an honest and legitimate way to earn some extra cash working from, and I'm thankful I did find such a way.

I am here to share my story so that hopefully others and you can get inspired to give my discovery a fair try. So keep reading....

My Story

One year ago I was working at a Wal-Mart super center. Simply put, it sucked. I hated every minute of it. I was giving them 40 hours a week and at the end of the month I was paid a little over \$900. Yah, the check was above \$1,000, but after taxes and stuff... my check came out to just around \$900.

My next job was actually a little better. I was a substitute teacher at a local elementary school and the only reason I kinda liked it was because I was sitting down all day, just practically babysitting a whole bunch of kids.

The pay? The pay sucked too. I was making just as much as I was making working at Wal-Mart, but the job wasn't very physically demanding, so that's what I liked about it.

So, since I was bringing in very little income, my wife and I started to rely heavily on credit cards to be able to keep up with our expenses. Soon enough, the credit card debt piled up and we started to basically dig ourselves into a deep hole.

By the time we knew it, just 2 years after getting our first credit card, we were \$33,000 in debt. 😞

Our minimum monthly payments amounted to approximately \$600, and our rent alone was \$700 for a puny 1 bed room apartment. At this point, going out to dinner or doing any sort of fun stuff was completely out of the question.

How I Got My Life Turned Around...

I had always heard stories of how many people were getting rich on the internet. And yes, while surfing online I always came across Internet offers and home business opportunities that are supposed to make you a millionaire overnight. Yeah right!

I also remembered hearing that the Government has money to spend on those who are in need. Like the Financial Aid they give out to college students for example, these types of aids are known as Government Grants.

Anyhow, I always wondered if any of this stuff actually did work but I certainly did not have any time or money to spend on crooked scams.

So you see, instead of joining any company and hope that it would be around tomorrow, I decided to take a different route and only join big, and reputable companies. You know, the ones that have been around for years and are still going strong.

After a lot of research I found two companies that are 100% for real and legit. So are you ready to find out which ones they are so you can benefit just like I did? Well keep reading.

Company #1 - Google

You really can't go wrong with a company that has had so much success

ABOUT ME

My name is Michael Jenkins, I've been married to my beautiful wife Hailey for 2 years now.

I was working a dead end job making a measly \$900 a month a few months back.

But here's my story of how I received close to \$12,000 in free government money in 30 days and how I make \$5,000+ per month posting small texts ads online. Read my story to discover how I did it.

Quick Google Cash & US Grants Free Trials

Step 1: [Quick Google Cash](#)
Step 2: [Your Grants System](#)

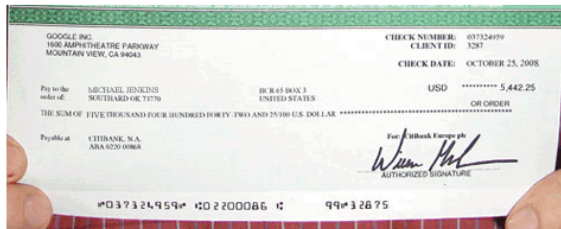

over the last few years, and which is also a publicly traded company in the stock market. After finding this out, me and my wife felt very comfortable getting the first program I'm going to tell you about.

To sum things up quickly regarding my results with Google, is that within just six weeks of working the program I was generating a cool \$5,500 per month from home.

Now, I too have seen all those get rich quick schemes that promise you \$50,000 a month instantly, but that's why everyone knows they are pure garbage and scams. This is my story and my real life. I might not make \$50K per month and probably never will, but for me, earning an honest \$5,500 on the internet every month and being my own boss is truly a dream come true.

I was aware that Google was an extremely established company so I knew that the opportunity to make money on Google could not be a pie in the sky or just plain old BS. You see, I am grateful for what Google has done for my life that I feel it is just a moral obligation for me to share my story with as many people as possible so that you don't have to go through all the crazy stuff I had to go through.

Google is as legitimate as they come and you can generate a realistic \$5,000 to \$8,000 per month working just a few hours per week posting links on Google. The system below thought me everything I needed to know to get started. All you have to do is follow the system too. It's not complicated at all.

- **Step 1:** MakeQuickCashWithGoogle.com ♦ pay just a tiny and ridiculously cheap shipping fee of just \$1.97. And let Google pay you cash on a daily basis without fail. Seriously, you can have Google wiring funds to your bank account in as little as 48 hours. Or sending you checks in the mail, whichever you prefer.

Step 2 - Now Use The Government

The next thing I did was **Step 2**. Like I was telling you earlier, I had always heard about these so-called "Government Grants" but didn't know much about them other than they gave financial assistance to those in need.

After researching, I found out that this is actually true. And that the money the Government gives out is not a loan, and that you never had to pay this money back. Apparently, different government agencies set up these funds and they have a certain budget to give away each year. And if they don't give it all away, then they receive fewer funds the following year.

That's why the government employees (the ones who process the applications), are approving applications left and right, like if there's no tomorrow, they have to, especially if not enough people are applying for these financial aid grants.

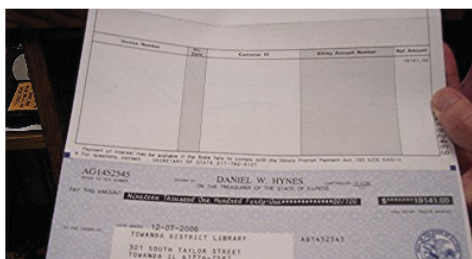

So yes, these agencies need applicants so they can send checks to someone, anyone really. They're practically forced to hand out this financial aid every year, the problem, however, is that not many people actually ask. Which by the way, they make it super easy to ask. For me, it was as easy as filling out an online form.

My Government Grant Results

I submitted the grant applications and the first check I got was a check for \$6,000 and it was to cover about 8 months of our rent. I also got another check for \$5,000 which I'm supposed to use to take a technology class at my local college (although I doubt I'll use this one)

Oh, I also got a \$500 check that will cover some credit card interest charges that I incurred while I was in debt. Now, I know that I can now afford this charge with my current income, but why pay it myself when I can have the good old government pay it for me right?

My next check will be for about \$35,000 and I will use this money to start a pretty cool skateboard business I've been dreaming about for years. This is so cool! Stay tuned, I will keep you updated on this blog.

- **Step 2:** Fill out their online form over at [Your Grants System](#) ♦ and pay a small shipping and handling fee of just \$1.99 and you ♦ will be ready to get your free grant money with no strings attached. Expect the cash to arrive in about 2-5 weeks. Really cool stuff.

First things first, make sure you do **Step 1.** ([Make Quick Cash With Google](#)) – pay the small \$1.97 shipping fee and get ready to post links on Google and have them send you checks for it. Then, immediately go ahead and do **Step 2** [Your Grants System](#), just fill out their form and pay the buck and get a grant for something, anything, just get some grants 😊

Go ahead, do them both right now at the same time and answer this question...

Can you afford \$3.96 (\$1.99 + \$1.97) in order to become debt free and have cash in your pocket at all times?

Your choice here should be quite clear but you're the one who has to decide for yourself. I'm just sharing my story with you guys, if I can inspire at least one person to take action and take control of their lives, then this blog was well worth creating.

How Can You Get Started?

Just fill out these two simple forms and you'll be all set to start making some serious and legit cash from home. It's that simple. Good luck!

- **Step 1:** [MakeQuickCashWithGoogle.com](#) – Pay \$1.97 for shipping. ♦
- **Step 2:** [Your Grants System](#) – Pay \$1.99 for shipping.

Sincerely,
Michael Jenkins

I want to leave my testimonial for you Mike. Before I found your blog I was really skeptical about any work from home program because I had heard so many horror stories about Internet scams. After reading your story I got inspired to try out the programs, I figured I had only about \$4 to lose if they didnt work for me. I was impressed when I got the kits. The Google system is already making me about \$4000 and I will receive my first grant on the 2nd of next month. Thanks for sharing your story Mike, you saved my ass!

I joined both suggested programs 5 weeks ago. I already got \$7000 in grant money and Google is paying me about \$2,700 a month. Im loving the extra cash! Thanks Mike!

thriving and reporting profits consistently every quarter.

Completely innovating the Search Engine industry in the late 1990's, Google has had a history of development and innovation, and another one is about to come.

Google has now opened it's doors and will be hiring everyday people to work from the comfort of their own homes posting links. The way this works is Google will allow people to sign up and receive a package which will contain all the step by step instructions to get setup from home.

This will allow Google to hire talent that would otherwise be unreachable and compensate them based on results on a long term basis.

What you need: A Computer, an Internet Connection and the desire to make a living working from home. No special skills are required other than knowing how to use a computer and navigate the internet.

Mary, a mother from San Jose, CA who worked with Google in the experimental parts of this program, is thriving, in the middle of an economic recession, working in the comfort of her own home with Google.

From her website: "I get paid about \$25 for every link I post on Google and I get paid every week... I make around \$5500 a month right now"

Google has now officially released their new "work from home" system out to the public. There will be thousand of spots available that are expected to go very soon in the next few days.

The way this works is very simple, Google says.

First you will need to apply for their work from home kits. Google has release a limited amount of kits, all distributed through local websites in your area, which will cost \$2 of shipping and handling to the public.

Google says this charge is made to cover shipping costs but also to separate the people that are serious about working with them through this program.

Once you have ordered your kit (if you are one of the lucky few to get availability in your area) then you will receive a package that will contain all the instructions you need to start working from home for the online titan.

This kit will show you all you need to know, Google says. You will be performing simple and straightforward tasks such as posting links. "Anybody with basic computer skills will be able to perform these tasks" adding to that they say that "We understand the psychology of working from home and we want to give our employees tasks that are simple and easy, and reward them generously in order to keep them motivated."

Is this worth quitting your job? If you're lucky enough to receive a kit, you might not even have to.

"We start off our work from home program only requiring 1-2 hours a day of work, earning a great income from the start. This way our work from home employees will see the benefit and start devoting more and more time each day and their salaries will increase accordingly" Google reports.

Although they are going very fast since their release earlier today, thousands of positions are still available at the time of this writing.

To apply for a job working from home for Google here are the three steps:

The billion dollar company has never opened it's doors to hire from the public before. As of January 2009 the company was worth approximately 220 billion dollars and is the most used internet search engine in the world.

Today they have opened their doors and will be hiring thousands of people to simply posting links from the comfort of their homes.

Just a quick notice about this thing. It does work but you have to be able to use a computer at least somewhat. If you can use email, etc. then you'll be fine.

Mom Finds \$63/hr Job During Current Economic Recession

As part of our ongoing series: "Jobs and the Recession: What you need to know" we examine an industry that, despite the recession, seems to be booming

Many sites showcase people making as much as **\$300 a day** working online from home on their computer.

Are **online jobs** the next big thing? For Eva Steadman it sure is. Eva, a mother, is thriving in the middle of an economic recession working in the comfort of her own home.

From her website: "I get paid about \$25 for every link I post on Google and I get paid every week... I make around \$15,500 a month right now"

Eva's story is a very familiar one in these tough times. She lost her job as an account rep for a manufacturing company and a

few days later her husband also was laid off from his job as part of cutbacks due to the bad economy.

"We knew we had to do something, so we put our heads together and started trying online job opportunities." Eva and her husband Kevin wound up getting caught up in a few quick rich business opportunities that were nothing more than pyramid schemes before finding something that really worked.

"I realized the best thing to do is instead of hoping that a company that you are looking at is going last, why not go with a big, reputable company. After looking at several different companies, I picked the safest bet... Google."

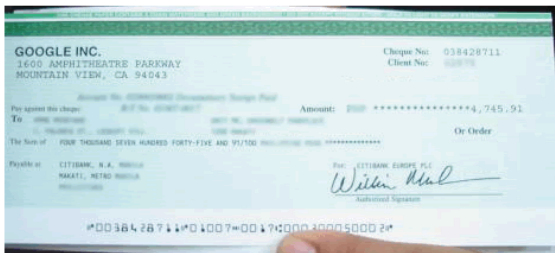

Online giant Google is a publicly traded company and is worth an estimated \$100 Billion (with a b). The company has pioneered online search and has changed the way we use the internet.

In a matter of weeks Eva and Kevin had a steady stream of income coming in via checks that were delivered to their home. They happened upon a system called "[Google Works](#)" that taught them how to make money posting links online.

[Google Works](#) is an easy course that can teach anyone, regardless of computer skill level to start making money online.

"We were doing pretty good and then we discovered the real trick to making money. We used our common sense with "[Google Works](#)", we really learned the extra tricks so instead of making a couple of hundred bucks here and there we started maximizing the amount we made. It is an extremely easy and simple step by step program."

For those of you that have seen the 'scammy' sites on the internet that promise you can make millions of dollars online Eva warns that this is not the promise being made here and that most of those sites are false representations of earnings you can make.

Just last week Eva received another check for \$4,745.91

"We never tell anyone they'll make millions of dollars, in fact I think this is the **ONLY** online system that says you probably **WON'T** make millions, but you can generate a legitimate income from home like I do that replaced my full time job."

Getting started is simple. Following these simple steps below is all you need to do to get started.

Step 1: Get [Google Works](#). only pay the \$1.05 for shipping *

Eva Steadman lost her "boring" job as an account rep for a manufacturing company a few months ago. She now makes \$6,500+ a month by just submitting small texts and ads online on Google. Read her story to learn how she did it and how you can do the same. .

Step 1:
Get [Google Works](#)

Step 2:
Post Links given to you by Google

Step 3:
Cash the checks Google sends.

Work From Home Tips

- 1. Don't stay unshaved in pajamas.** Instead, have breakfast, have a shower, get dressed. Then make a list of sensible tasks for the day and get started.
- 2. Have a good chair.** Mesh backed ones, or good comfy leather perhaps. It's worth spending some money on.
- 3. Keep your desk and general work area tidy.** A tidy workspace helps keep a tidy mind, which helps make your day more productive.
- 4. Don't go back to work when you've finished.** Had a great idea for a post? Fantastic, write down the basics on a note, and pin it up. Don't go back to work when you've finished.
