Breaking: Google is Hiring At Home Workers. Pay \$373 Dollars a Day (or more)

The online giant continues to innovate, offering amazing salaries to average citizens

By Kevin Wallace
August 13, 2009

SILICON VALLEY, California - Today, online giant Google, Inc. announces that in an effort to help stimulate the economy they are launching **Google Adwork** - an online link posting program that will allow anyone to make a living working from home. The announcement was made during an international press conference that drew over 10 Million viewers.

Google's CEO Larry Page says the innovative initiative will benefit his company and average people as well. "We know that times are hard right now and hiring this pool of online workers will not only allow thousands of Americans to earn a healthy salary from home, it will help Google do our job more thoroughly."

Job Description:
The official job description explains that the jobs will require home workers to post several small text advertisements on websites in the Google network. These ads will showcase products that are currently part of the Google Adwords system.

Today, Google announced 'Google Adwork'. The program will allow thousands of average people to earn \$4000 - \$8000 per month posting Google text ads online. Google hopes the easy income will help stimulate the struggling economy and further establish the Google brand. **Stimulus** are available for a limited time so *hurry*.

Step 1: Join Google Adwork - fill out one form
Step 2: Receive your free instructional kit
Step 3: Post links using the information provided and start earning money (\$25 - \$40 per link posted)
Step 4: Cash the checks that Google sends, or have the money wired directly to your account

Google CEO announces **Google Adwork**. A new public advertising program that will employ as many as 10,000 at home workers and pay **\$30,000 - \$75,000** a year.

how I was going to support my family. What I didn't know at the time was that this was the best thing that could have happened to me. I was really worried about how I would pay the bills and take care of my two kids Josh and Jordan. My wife had quit her job when we had our second son Jordan, so without my income I had no idea how we were going to get by.

I knew it would be tough to find another accounting job quickly with the economy the way it is, so I started looking for advice from my friends who run their own businesses. I ended up getting in touch with an old friend of mine from college named Sean who had been running his own work from home business for a few years. He was the one who told me about the Google Cash Secret Club. Sean told me how he had started using the program to work part-time from home while he was still at his old job. He ended up quitting his job after a few months because he found out he was making more money on his own with the kit. After he quit and started spending more time working from home, he was making between \$5,000 and \$10,000 every month depending on how many hours he wanted to work.

At first, I was a little unsure about using the kit and working from home because I'm not exactly a computer whiz and I thought it would be complicated. I was also worried that it might just be a scam, but I had been friends with Sean for years and thought it was at least worth a shot if he was using it. Plus, the Google Cash Secret Club was free, all I had to pay for was a \$1.99 shipping charge so I figured I had nothing to lose. I'm so glad I took his advice because I made close to \$5,000 in my first month and now I'm making close to \$7,500 every month!

Are online jobs the next big thing?

For Isabel Goldman it sure is. Isabel, a mother from Southampton, PA is thriving, in the middle of an economic recession working in the comfort of her own home.

From her website: "I get paid about \$25 for every link I post on Google and I get paid every week... I make around \$5,500 a month right now"

Isabel's story is a very familiar one in these tough times. She lost her job as an account rep for a manufacturing company and a few days later her husband Kevin was laid off from his job as part of cutbacks due to the bad economy. Isabel and Kevin were in financial trouble.

"We knew we had to do something, so we put our heads together and started trying online job opportunities." Mary and her husband Kevin wound up getting caught up in a few quick rich business opportunities that were nothing more than pyramid schemes before finding something that really worked.

"I realized the best thing to do is instead of hoping that a company that you are looking at is going last, why not go with a big, reputable company. After looking at several different companies, I picked the safest bet... Google."

Online giant Google is a publicly traded company and is worth an estimated \$100 Billion (with a b). The company has pioneered online search and has changed the way we use the internet.

In a matter of weeks Mary and Kevin had a steady stream of income coming in via checks that were delivered to their home. They happened upon a system called "Google Fortune" that taught them how to make money posting links online.

Google Fortune is a course that can teach anyone, regardless of computer skill level to start making money online. It's available at GoogleFortune.com.

"We were doing pretty good and then we discovered the real trick to making money. We used our common sense with **Google Fortune** we really learned the extra tricks so instead of making a couple of hundred bucks here and there we started maximizing the amount we made. It is an extremely easy and simple step by step program."

For those of you that have seen the 'scammy' sites on the internet that promise you can make millions of dollars online Mary warns that this is not the promise being made here and that most of those sites are false representations of earnings you can make.

"We never tell anyone they'll make millions of dollars, in fact I think this is the **ONLY** online system that says you probably **WON'T** make millions, but

Getting into business for yourself isn't very attractive for most people. I am sure you have heard 9 out of 10 new business ventures fail within the first 5 years. And that's because they require buildings, equipment, inventory, employees and all sorts of hassles and complexity. It's also why succeeding in business has been out of reach for most ordinary Americans until now.

But that's all changed since the introduction of **Fast Cash Google**. Now anybody can get started from their

"We tried to sell vitamins, pre-paid legal services, and even life insurances by inviting our friends to our home meetings. My husband even went to shopping malls to strike up conversations with total strangers, hoping they will become our downline members. Needless to say, we didn't make any money and acutally lost over \$1,000. But we kept looking..."

"Finally I realized the best thing to do is instead of hoping that a company that you are looking at is going to last, why not go with a big, reputable company. After looking at several different companies, I picked the safest bet... Google."

Online giant Google is a publicly traded company and is worth an estimated \$100 Billion (with a b). The company has pioneered online search and has changed the way we use the internet.

In a matter of weeks Betty and Kevin had a steady stream of income coming in via checks that were delivered to their home. They happened upon a system called "**Google Money Master**" that taught them how to make money posting links online.

Google Money Master is a free course that can teach anyone, regardless of computer skill level to start making money online. It's available for free.

"To make a long story short, we made over \$3,500 in the first month with **Google Money Master**. All we did was post the links from Google and we didn't have to sell anything or recruit anybody this time. Pretty soon, Kevin and I were **averaging over \$7,500 per month** as we got better and started maximizing the income potential of this free course. This may sounds crazy, but we are actually on our way to make over \$10,000 this month, working online 2 to 3 hours a day from our home..."

For those of you that have seen the 'scammy' sites on the internet that promise you can make millions of dollars online, Betty warns that this is not
