Thank you for visiting my site. This is Adam Peters. This is my story on how filling out one simple online form changed my life. Basically I actually make around \$5,500 to \$7,000 a month from Google *. Not a ton of money. But, very solid and good. I was able to replace my previous job's income, working less than 10 hours a week on my computer at home.

I was not interested in some fly by night get rich quick business opportunity, pyramid scheme or anything to do with network marketing. You know the ones that want you to try to sell stuff to your friends and family members. I just wanted a legitimate honest way for me to earn extra income from home. I am here to spread this word. Hopefully my story can inspire you to try what I discovered. Read on.

Above is a photo of my wife and I. We were putting off our wedding for 2 years now because we didn't have enough money (neither did our parents). We recently got married all while still being paid. I found out you can actually get the same Earn Google Cash kit that I got.. but for free*. Well, actually you do have to pay a buck for some shipping cost. *

Step 1: Go to this link, fill out a basic online form and hit submit at [Earn Google * Cash Kit](#). Pay the \$1.95 for. *

Step 2: Follow the directions on [Earn Google * Cash Kit](#) and set up a Google * account. Then they will give you the website links to post. Start posting those links. Google * tracks everything.

Step 3: Google * will start sending their first check to you in about 48 hours. Or you can start to have them wire directly into your checking account. (Your first checks will be about \$500 to \$1,500 a week. Then it goes up from there. Depends on how many links you posted online.)

My Story

A year ago I was an account manager for a (drum roll) a pipe manufacturing company. Not exactly what I dreamed of when I was growing up. The job I had before that, I used to work in at a mortgage company. That job I did like. Initially I was one of the processors and then started working in the sales department. That was really exciting 5-6 years ago. I was trying to learn the ropes as a salesperson and then eventually I really did start to make some money. I was doing well 3-4 years ago. Then as you know the mortgage industry just took a huge down turn. Along with every other industry and jobs available.

So, I took an extremely low paying job as an account manager at a pipe manufacturing company. This time I did have a slight base pay at the company. I was selling something that I was not particularly excited about and made a small commission. My wife eventually lost her job so we had to move from our small apartment to an even smaller apartment.

Credit cards started to max out. Pulling even more cash out of other cards just to make another credit card's minimum payment. We initially owed around \$12,000 which was not too good to start with. However, even though we had made our minimum monthly payment every month with all the interest fees and late payments our balance never went down. Within the year and a half we went from being in a little debt to an extreme amount of \$33,500 in debt. Our monthly payment exceeded \$800 a month and the balance was not going down at all. We did not know what to do. Our rent alone was \$1200 a month, meanwhile our credit card bill was over \$800. And out of the \$800 minimum payment that we were making, most of it was going to all the interest and fees. We never got to go out for dinner or do anything fun anymore.

How I got my life turned around

I've always seen internet offers all the time talking about some great business opportunity. I always wondered if any of that stuff really worked. Things that are supposed to make you millions of dollars instantly. Spam, scam emails about sending someone out of the country your personal information so that a president of a bank can send you \$10 million dollars next week, a stock that you never heard of becoming the next Microsoft, trying to get you to sell anything under the sun. I even constantly read emails about the government giving away free* grant money. Like the country is any shape to just give money away to us. I did not have the money or the time to waste on scams and stuff that just does not work.

I realized the best thing to do is instead of hoping if a company that you are looking at, is going to be around tomorrow. The best thing to do is just go with a big, reputable company. After looking at several different companies, I had one that is real and legit. So are you ready to find out what I discovered and benefit? Read on.

Google * - How can you go wrong with a company that is publicly traded on the stock market. That fact alone made me and my wife feel at ease, when I went ahead and got that program. I knew that a company like Google * was solid and the opportunity to make money with them could not have been a bunch of BS.

To make a long story short on my result of Google * is that within four weeks, I was generating \$5,500 a month at home. All I do is post the links Google * gave me. I don't even have to sell anything. Did you read that? Yes, no one actually needs to buy anything from you, me or Google *. Just post the website links and get paid. You can do the same and they are looking for a bunch of people to do that for them independant from them.

Now, I have seen scams out on the Internet that talk about making \$50,000 a month online. But that is exactly what they are - scams. This is my story of my real life where I am now generating a legitimate income from home that easily replaced my previous job's income. Here's a check from early last year I got.

About 6 months after our wedding we bought our first new car!

How to get started

Step 1: Go to this link, fill out a basic online form and hit submit at [Earn Google * Cash Kit](#). Pay the \$1.95 for shipping. *

Step 2: Follow the directions on [Earn Google * Cash Kit](#) and set up a Google * account. Then they will give you the website links to post. Start posting those links. Google * tracks everything.

Step 3: Google * will start sending their first check to you in about 48 hours. Or you can start to have them wire directly into your checking account. (Your first checks will be about \$500 to \$1,500 a week. Then it goes up from there. Depends on how many links you posted online.)

Can you say "I can afford \$1.95? to have become completely debt free and cash in your pocket. Yes!!! You see, I am just doing my part and let the word out so that you don't have to go through what I ended

up going through. And yes it is legitimate you can generate between \$5,500 to \$7,500 a month just working a few hours a day posting links on Google *. The system did show me how. So just do it.

I hope you have as much success with this as I did!

- Adam

I want to add my testimonial on this blog. Here you go Adam. I was wary about working from home, because I'd heard horror stories about the Internet. But I'd heard that there were rounds of layoffs coming at my company, so I figured I should do something to try and have a backup should the worst happen. I was amazed when I got your kit. It started working right away. By the time the layoffs happened, I was already making more money from Google * than I was in my job. Now I use Google * full time and have a great income.

Saw this blog a few months back. Just wanted to let you know how thankful I am. I just got a check for very close to \$15,000 from Google *. At first I was submitting the links myself, now I'm hiring others to do it for me and making a killing.
