Learn About Chromium PC

ChromiumPC™ is happy to announce it is now taking reservations for the first Google Chrome Open Source OS based desktop PC currently under development!!

Be one of the first to own the worlds first "stateless" desktop PC based around the entirely new standardized platform called Xi-3. Developed in secrecy over the last 3 years, this exciting new patented platform is designed around making computing cores or Processing Control Units "PCU's"™ available to the masses at an affordable cost. These solid-state "cube" computers are X86 based and take a minimalist approach while carrying full PC-like performance. These are not netbooks or thin client PC's. This is a full blown PC measuring less than 4 inches cubed!

ChromiumPC powered by xi-3™ is the future of cloud computing.

Please click on the videos provided below to start to learn about "Stateless" Computing and the operating system (OS) that is going to start the next frontier in computing!

ChromiumPC Ad Launch 2009!

Subject: Hosting SSL Certificate Issued

Date: Tuesday, November 24, 2009 1:46 PM

From: ra@godaddy.com <ra@godaddy.com>

To: J <jas@isys-tech.com>

Dear Secure Certificate Customer,

An SSL certificate has been issued for the domain: www.chromiumpc.com. Your hosting provider will install the issued certificate on your hosting account. Note that it may take up to 72 hours for the necessary DNS changes to take effect. As soon as DNS has been changed to point to the new, dedicated IP address, your SSL certificate will be functional. You can check the status of the certificate-installation process by logging in to your SSL account. To access your secure site, please go to the following URL: <https://www.chromiumpc.com>.

If you encounter any problems or have any questions, our Customer Support department is ready to help, around-the-clock, seven days a week.

Customer Support:

E-Mail: ra@godaddy.com

Phone: 480.505.8852

Fax: 480.393.5009

WHAT IS THE CHROMIUMPC BLOG?

The ChromiumPC blog is dedicated to answering any questions related to the release of the world's first "Stateless" desktop or all-in-one PC to be released in 2011. The ChromiumPC is a small, solid state PC about 4 inches cubed. It comes in a standard "Chrome" finish and can be customized. The Chromium PC comes with a universal mounting bracket so you can mount it on the back of any standard monitor, or even hook it up to your flat screen TV. The Chromium PC will be essential hardware for the evolution of Cloud Computing.

IRA, hope all is well for you in San Diego. I grew up there and miss the off shore breezes, especially this time of year in PHX. Dan says there may be an opportunity for our product at your company. When would be a good time for my VP of Sales (Jim Wittry) and I to have a conversation about possibility coming to S.D. to give your team a demo of our PCU (the cube PC)?-----Thanks, Stan

Ira,
Attached is the spec sheet for the Isys Cube that I tried feebly to explain to you. It is an impressive piece of hardware. Please show it to your IT people at Welk and feel free to contact Stan Phillips 602-349-6293 with any questions. See more photos at www.Chromiumpc.com , click on slide show.

Stan,

Here is another lead for you to explore. Terry is a retired marine working for DHL. He is a patient of mine. I do not know him well and do not know how high up the slurping ladder he can take you. But he is local at DHL and I thought it would be a good lead for ISYS. Feel free to contact him at this point. I would be happy to join you for a meeting if you wish.

By the way, I have more leads coming soon. I will keep you informed.

Take care,

Dan

Subject: RE: ISYS

Greetings Dan:

I have reviewed all of the material and details on each of the three Web sites that you have provided hot links.

I am genuinely interested in continuing to explore additional details of this technology as well as to obtain greater insights as to the potential products that could be considered viable market opportunities.

The topic of the Google Chrome Open Source OS was especially enlightening and exciting for me.

I will reach out to you and Stan once I have completed some additional research on this new technology.

Talk to you soon,

Terry

Best Regards,

F. Terry Hankins

Subject: ISYS

Dear Terry,

I enjoyed meeting with you and talking to you today. I have a very exciting new technology that DHL would be interested in. Basically, ISYS, an unknown, upstart private company has developed a PCU or "cube" which is a very small solid state CPU of high performance with excellent energy reduction (approx 22w), no fans, no moving parts, and small footprint which can be customized to your needs. It is modular and parts can be replaced easily at low cost. This is very lean and green. AMD is behind this project and AVNET is soon to manufacture, demo, and sell these embedded components before the end of this year. A good friend of mine Stan Phillips is VP of business development and would be happy to arrange an onsite demo with your IT team locally. Please take a look at their website (which is under development) for an advance look. Please let me know if you are interested, but I encourage you to see it in person, its' impressive!

Hi Daniel, I did some checking on procurement here at CVS Caremark and found we have major contracts with HP and IBM for servers and are not open to new vendors at this time but I'll keep this information if I hear of an opportunity surfacing down the road. It's certainly an interesting little device!

Thanks, Will

Dear Will,

Take a look at the development website. Stan Phillips would be happy to demo this to your IT team at Caremark. He will be able to better answer your questions. AMD makes the chips and AVNET is manufacturing the PCUs. First units will be available in the next few months. I can email you a spec sheet if you are interested. It's pretty impressive to see in person.

NameMatch Recommendations

GoDaddy.com NameMatch has found similar domain names related to your search. Registering multiple domain names may help protect your online brand against internet squatters who could try to buy up these names in the hopes of selling them to you at an inflated price. It also enables you to capture more Web traffic, which you can then direct to your primary domain.
