The Need for Change

- **USPTO has an unacceptable backlog of applications**
 - About 1,000,000 pending Utility, Plant and Reissue applications
 - About 625,000 have not received a first action
 - Average time to first action is between 18 and 33 months, depending on Technology Center
 - Filings continue to increase

UPR Applications Filed

We can't hire our way out...

- **Hired nearly 1,000 examiners in FY 2005**
- **Hiring 1,000 again in FY 2006**
 - Improved hiring and training practices to reach these targets
- **Even with these hires, pendency doesn't turn around**

Claims Rule Package

- Focuses initial examination on applicant-designated representative claims
- No limit on the number of claims filed or allowed
- Applicant may select up to 10 representative claims, including all independent claims
- If an application requires more than 10 representative claims, applicant must submit an examination support document that covers all the representative claims designated for examination
- 71 Fed. Reg. 61 (03 January 2006)

Continuations Rule Package

- Limits the number of continuations and RCEs that may be filed by right
- Focuses interaction between applicants and examiners on the initial actions in prosecution
- Allows filing of additional continuations or RCEs with appropriate showing
- Focuses examining resources on new applications
- 71 Fed. Reg. 48 (03 January 2006)

Related changes

- **Forthcoming rule packages**
 - IDS practice
 - Markush claims
- **Internal procedural changes to follow**
 - Change MPEP and other policies to improve examination practice
 - Internal changes will complement the final rules

Feedback

- **Comment period on the proposed rules closes May 3, 2006**
- **Open to alternative solutions that fix these problems**
- **Need constructive suggestions rather than simple complaints about these proposed solutions**
- **Comments addresses:**

Continuations: AB93Comments@uspto.gov

Claims: AB94Comments@uspto.gov

1. Other Solutions

If you disagree with the proposed rule changes to continuations and claims as the solution to the current challenges facing the USPTO, then, other than hiring, what regulatory or procedural solutions would you recommend?

Guest Panelists

2. Continuations/Balance of rights

Continuation practice is viewed by some members of the Patent community as the proper way to ensure that applicants obtain full protection for the most desirable implementations of their ultimate commercial products. What should be the proper balance between applicants maximizing their return on their invention and the notice function of patent claims?

Guest Panelists

3. Examination Focus

The USPTO proposal includes focusing the initial examination on a representative set of claims. Do you feel this will positively impact the quality of examination? If not, why not?
