

APPENDIX A, MANZETTI DECLARATION

The Pittsburgh Life Sciences Greenhouse (PLSG) provides capital investments and customized company formation and business growth services to our region's life sciences enterprises. We support biosciences companies with promising innovations in the following concentrations: Biotechnology Tools, Diagnostics, Healthcare IT, Medical Devices and Therapeutics.

We're propelling the sustainable growth of southwestern Pennsylvania's life sciences economy by accelerating research and technology commercialization with seed and early-stage companies; connecting investors with our Investment Portfolio companies; expanding established life sciences ventures; and relocating biomedical companies to Pennsylvania.

CONCEPT TO COMMERCIALIZATION™

PLSG primarily focuses on guiding researchers, entrepreneurs, and emerging companies through the difficult challenges faced in the early stages of company development. By helping them build sustainable business models and secure capital investments, we make it possible for companies to deliver biomedical innovations to the marketplace more quickly and efficiently than they ever could alone.

In addition to nurturing young companies, we fuel the expansion of life science companies in the growth and maturity stages by supporting new product and market developments and by introducing them to new investors.

There are 218 clients in the PLSG Concept to Commercialization™ Pipeline.

PLSG IMPACTS SINCE INCEPTION

- Created 20,000 sq. ft. lab/office incubator space
- Regional life sciences company formation rate has increased from 2-3 per year to 15-20 new companies per year
- Imported 10 companies to SW Pennsylvania
- Invested \$15.2M in VC Funding
- Assisted with \$13M in SBIR Funding to regional companies
- 4,000 individuals trained in biotechnology

SNAPSHOT OF PLSG INVESTMENT HISTORY
