DIVISIONAL APPLICATIONS

Are only permitted if the Office imposes a restriction, or lack of unity, requirement in the parent application and the claimed invention was not elected in the parent.

- Thus “involuntary” divisionals would be permitted; and “voluntary” divisionals would not be permitted.

Can only claim the benefit of a single parent application, which had the restriction, or lack of unity, requirement, unless a timely petition (with a satisfactory showing that the amendment, argument of evidence could not have been submitted during the prosecution of the prior filed application) is submitted.

A single continuation or RCE of each divisional application will be permitted (without petition).

Proposed Changes to 37 CFR 1.78(d)(1)

Benefit Claims under 35 USC 120, 121, or 365(c)

Permitted Condition 2 (proposed § 1.78(d)(1)(ii)):

- ◆ A divisional application may claim the benefit of only a single prior-filed nonprovisional application, provided:
 - The prior-filed application was subject to a requirement of unity of invention under PCT Rule 13, or a requirement for restriction under 35 USC 121, and
 - The divisional application contains only claims directed to an invention or inventions that were identified in such requirement but were not elected for examination in the prior-filed application.
- ◆ Thus, only “involuntary” divisional applications are permitted.
