(C) each of W, X and Y is a base in which:

(i) (a) W=one of A, T/U, G, and C,

X=one of A, T/U, G, and C,

Y=one of A, T/U, G, and C,

and each of W, X and Y is selected so as to be different from all of the others of W, X and Y,

Patent Products: Deferred Examination

Basic Concepts Under Consideration

- Applicant may choose to defer examination for a certain number of years from U.S. filing date, as well as payment of certain fees.
- Applicant may not defer the basic filing fee or any requirements concerning 18-month publication.
- Applicant may activate examination at any time.
- Third party may activate examination after publication.

United States Patent and Trademark Office

Patent Products: Deferred Examination

Expected Benefits

- Non-deferred cases will be examined more quickly.
- The upfront cost of filing will be reduced.
- Delayed payment of certain fees will allow additional time for applicant to consider the commercial viability of inventions before further expenditure of funds.
- The Office can devote its time and resources to applications deemed more pressing by applicants.
- Pendency will be reduced because some applications will not proceed to examination.

United States Patent and Trademark Office

Patent Products: Petty Patent

- **Petty Patent**
 - **Application could undergo less stringent examination based on either Office search or a pre-exam search report.**
 - **USPTO could use a short form office action.**
 - **After grant of a “petty patent”, applicant still has option for a regular examination under reexam or reissue process.**
