- Q. When did Lycos first consider selling the '420 and '664 patents?
- A. We first considered selling our patent portfolio as a whole in 2009, and so there was never any specific discussion about the '420 patent or that other patent in suit, but it would have been included within the portfolio, so, therefore, indirectly it would have been included within the sale. It was just a straight sale of the whole portfolio.
- Q. And when Lycos first considered selling its patent portfolio, was that a situation where Lycos was contacted by someone who was interested in selling the patents?
 - MS. ALBERT: Objection. Vaque.
 - Q. Or purchasing. Sorry.
- A. We were contacted by a number of parties about buying specific patents, or the whole portfolio or brokering licenses for the portfolio over time.
- Q. Was Lycos ever contacted by a license about
 -- strike that.
 - Was Lycos ever contacted about selling the

'420 and '664 patents?

- A. Not specifically.
 - MS. ALBERT: Objection. Vaque.
- Q. What patent was Lycos contacted about?
- A. I believe we were contacted at one point about the '799 patent, and we may have been contacted on another specific patent, that I just don't remember right now, but we never engaged in any talks to sell an individual patent. The only talks we engaged in came in 2009 as related to the entire portfolio.
- Q. And who did Lycos engage in discussions with in 2009 regarding sale of the entire portfolio?
 - A. Altitude Capital Partners.
- Q. When you say "the entire portfolio," how many patents are you referring to?
- A. At the time I believe we had around 28 patents. As well as patent applications that were pending. That was a guess.
- Q. Just generally, what fields were those patents in?
- A. Variety of fields. Search, advertising, online advertising, obviously. Some patents I would need to mention here to explain to you exactly what

they do, I don't really know. Some patents had to do with back-end load balancing of networks.

I think they all come within that general sphere. There might be a couple outliers, I'm not sure. Oh, and the game patent.

- Q. Did Lycos ever conduct in the 2009 time frame an evaluation of the value of its portfolio as a whole?
 - A. No, it did not.
 - Q. Is Lycos aware of anyone else who did?
 - A. No.

22

2.3

2.4

- Q. When did Altitude Capital first contact Lycos?
- A. I believe we were contacted in late 2008 maybe. And then -- I don't think we were initially interested, but then 2009 hit and we had an adverse ruling in the ongoing patent litigation that we then wanted to get rid of. We had basically a demand to become profitable. So we were looking at all ways to cut costs.

Maintaining patents is an expense. Every single year both with outside law firm and for the maintenance fees.

So as part of that I was told to go ahead

and have discussions about selling the patents, if I
wanted. They really weren't -- our parent company
at the time from Korea wasn't very experienced with
patents and didn't have a lot of appreciation for
them.

So it just wanted to reduce costs basically, and expense. So I think that's what made me perhaps contact Altitude again.

I'm just trying to remember what happened after that point.

- Q. Just stepping back, who is Altitude or what is Altitude Capital?
- A. It's a company based out of New York that they do invest in intellectual property portfolios, and I assume try to monetize those portfolios through licensing or however they do it.
- Q. Was there a particular person that you were in contact with at Altitude Capital?
 - A. Yes.

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

- Q. Who was that?
- A. Howard -- no, sorry. Warren Hurwitz,

 H-U-R-W-I-T-Z.
- Q. What was the result of your contacting
 Altitude Capital again?

- A. At a certain point we entered an LOI, 1 letter of intent to purchase that portfolio.
 - Q. When you say the patent portfolio, you mean the entire portfolio?
 - The entire portfolio. Against my better advice.
 - Q. Do you recall what the terms of the LOI were?
 - Α. Generally. They changed because we, at first we entered an LOI subject to, I believe, 90 days of due diligence. We, I believe, initially we were going to sell them the patent portfolio in whole for around 4 or 4 and a half million.
 - Q. Do you know who conducted -- well, first, do you know if any due diligence occurred subject to that letter of intent?
 - Α. Yes.

2

3

5

6

8

9

10

11

12

13

14

15

16

17

20

21

24

- 18 Do you know who conducted the due Ο. 19 diligence?
 - A. Altitude itself did. They had an in-house counsel.
- Q. Do you know if they had any outside counsel 22 involved? 2.3
 - A. They did.

Q. Who was that?

2.4

- A. It was Dickstein Shapiro.
- Q. At the time that it occurred was Dickstein Shapiro still representing Lycos?
- A. They had not started to represent Lycos yet. I did not have any direct communications with Dickstein at that time.
- Q. Does Lycos have any knowledge as to the results of that due diligence?
 - A. Only what I was told by Warren.
 - Q. And that is?
- A. And that is -- well, one of the issues was with the patents in suit at the time, we wanted out of litigation, and so we either needed them to step in after the fact. If we sold them and assigned them, we no longer have standing to prosecute the litigation, and we didn't want to remain in it in name or any capacity. Or we had to finish up the litigation, so we could do the deal. And to sell them outright, it came to a point where they also didn't like the jurisdiction. I don't know if they liked the patents differently or not, they are pretty careful of not sharing that type of information with me. It came to a point where they

didn't want to step into the litigation, so I had more pressure on me to just reach settlement to get done with it. And that dragged on for quite a bit because the final settlement with Blockbuster took so long, we reached an agreement and they changed, we thought they changed the agreement, so we had to file a motion about it. It took a while.

And Warren also came back, and a couple of patents that we liked, we thought there were more value, they pushed back on, they thought they found some weaknesses in some other patent, namely the game patent. They were worried about some of the prior art on that game patent. And I don't remember specifically, but they also made some comments about the patents in that suit, but I don't remember what their comments were. But it was a way, the whole thing was a way to push down the price of the LOI, which they ended up doing, and we entered a second LOI.

- Q. When did -- do you know when Lycos entered that second LOI?
 - A. Sometime in 2009.
- Q. Do you recall what the terms of that second LOT were?

Veritext Corporate Services 973-410-4040

1	A. They were I'm trying to remember what
2	the payment was going to be. It got dropped way
3	down to about 1.25 million perhaps, and I believe
4	one of the conditions was that we attempted to have
5	this summary judgment vacated in that litigation,
6	and that may I can't remember if there was one
7	price if we got it vacated, and one price if we
8	didn't. That seems to ring a bell, but I don't
9	remember.
10	MS. O'BRIEN: Shall we go ahead and take a
11	break to change the tape?
12	VIDEOGRAPHER: This will be the end of tape
13	3, going off record, the time is 2:05.
14	(Recess was taken at 2:05 p.m.)
15	(Reconvened at 2:09 p.m.)
16	VIDEOGRAPHER: We are back on record,
17	beginning of tape 4, the time is 2:09, you may
18	continue.
19	Q. Do you recall how long the second letter of
20	intent with Altitude was in effect?

24 settling with all matters with Blockbuster in the

again, things were really contingent upon our

additional 30-day due diligence period, however,

21

22

23

800-567-8658 973-410-4040

I believe there was only supposed to be an

litigation. As long as that was pending we couldn't complete a sale, and that kept on lingering. And it was around that time frame that Dickstein took over as counsel for us directly. Again, that would have been, you know, June, July 2009.

- So Lycos's negotiations with Altitude Capital continued after the settlement agreement with ChoiceStream and Blockbuster?
 - Α. No.

1

2

3

5

13

14

15

16

17

18

19

20

21

22

23

2.4

- Ο. Do you know why not?
- Α. Because by that time it was already spring of 2010 and our parent company had just entered a letter of intent with Ybrant to sell Lycos, so that would have been a transaction out of the ordinary course, which would have prohibited doing that at that point.

Second, if we were going to have a new parent, that parent may have a very different opinion of the patent portfolio and the price. was not legal advice, I could disclose I had advised from a business standpoint the company to not accept 1.25 million for the entire portfolio, because I thought it was absurd. But in their cost-cutting frenzy, they were just doing, they were just doing

- anything. So when it got to that point, our hands
 were tied. And I think Ybrant wanted to look at
 this after the fact if they were buying our company.
 They wanted to buy it in place. So we stopped all
 negotiations at that time.
 - Q. Did Lycos ever begin negotiations regarding the sale of its patents after it entered -- after its acquisition by Ybrant?

MS. ALBERT: Okay. Vague.

- A. Say that one more time. Sorry.
- Q. It's a terrible question. Let's try again.
- 12 A. I didn't say that.

6

14

15

16

17

18

19

20

21

22

- Q. That's fair. I will, I will own that. Did
 Lycos and Altitude Capital ever have any other
 negotiations regarding the sale of patents after the
 spring of 2010?
 - A. After the --
- MS. ALBERT: Objection. Vague.
- A. After the fall of 2010, yes.
 - O. And when was that?
 - A. That would have been sometime late spring or summer 2011.
- Q. What patents were involved in that negotiation?

Veritext Corporate Services 973-410-4040

- A. Well, I was contacted by another -- at that time we were not, we did not -- let me step back.

 We had received an offer from a third party, another party related to the patents in suit here.
 - Q. And who is that third party?
 - A. Stayko Staykov. And that is S-T-A-Y-K-O S-T-A-Y-K-O-V.
 - Q. Who is Stayko Staykov?

- A. He's from that Borat movie, I think. No, he owns an intellectual property investment type of company. I believe it was called Eidos, E-I-D-O-S, if I remember correctly. And a smaller company. And he's invested in intellectual portfolio s before, and he contacted me.
 - Q. And when did he contact you?
- A. Sometimes in the spring of 2011. And he came up and met with me.
- Q. When you said the patent at issue in this case, which patents specifically did he indicate that he was interested in?
 - A. The '664 patent and the '420 patent.
- Q. Any others?
- A. Well, I mean, I think the discussion necessarily included the whole patent family. So if

I remember correctly, he -- I don't know if he actually cited those two specifically, but he wanted the family of patents.

- Q. When did you first meet with him?
- A. Spring of 2011, I believe.

1

2

3

15

16

17

18

19

20

21

22

2.3

24

- Q. Did he make an offer to purchase the patent of families at the time? The family of patents at that time?
- A. After our meeting he did some brief due diligence and sent me some information about himself, and then made an offer.
 - Q. And what was that offer?
- A. It's hard for me to remember right now, but it was in the 1 million range. And, again, at this point we're only talking about this one patent family, not the whole portfolio.
- Q. Did he say why he was interested in this patent family?
- A. I think he just said so that he could monetize it in some fashion.
- Q. Did he tell you how he identified this patent family?
 - A. I know that Dickstein had him contact me.
 - Q. How did you respond to the offer from Mr.

Staykov?

2.4

- A. I told him it was too low.
- Q. Did you provide a counter offer?
- A. It took a while for me to get any response from Israel, which is where our parent company's kind of business is operated. It's not where our parent company is operated. Our parent company is located in Indiana, but the business operations of Ybrant is in Israel. It took me a while to get a response back.

In the meantime I spoke with our CEO, who told me to see if I could get other parties involved, and that's when I reached out to Altitude again and said, hey, you know, the previous LOI's have no effect anymore, but I wanted to give you a courtesy call, give you a heads-up that we're in discussion to sell this one patent family, not our portfolio anymore, and that we have an offer on the table. And if you want to throw in your hat, let me know. So they were a little perturbed by that whole thing, but it's business. And then Dickstein also put me in contact with another company, which was Hudson Bay Capital, and Alex Burger.

Q. Is Dickstein representing Lycos at the

Veritext Corporate Services 973-410-4040

time?

2.4

- A. No. Dickstein made the introductions, but they were not involved in the discussions.
- Q. After you reached out to Altitude Capital did they respond?
- A. In the meantime I met with Alex Burger's company, then was Hudson Bay Capital, he came up and met with me with one of his colleagues to discuss this family of patents. He then went back and did some very quick due diligence over a span of days, and then made an offer, and I had not heard back from Altitude yet, I conveyed the highest offer we had to Altitude, and eventually Altitude came back and made an offer. I conveyed all this to Staykov. Staykov made more of an offer, and the three parties basically negotiated off themselves until we finally agreed at 3.2 million with Hudson Bay.

I believe, I believe Altitude had gone up to 3 million, and I believe Staykov had gone up to 2.5 million before he dropped out. And Hudson's last offer was more of take it or leave it at 3.2, and I wanted to get it done. And we ended up accepting that, although we threw a couple of additional patents into the mix for the extra

1 200,000.

3

4

5

6

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

2.3

2.4

- Q. So then the 3.2 is, the 3.2 million was the highest offer that you received?
- A. Yes, to date. Yeah, and Altitude basically made his 3 million the final offer, so I never went back to Altitude with the 3.2.
- Q. So just stepping back, that first meeting you had with Alex Burger of Hudson Bay, you said one of his colleagues was there. Do you know who that was?
 - A. I don't remember.
- Q. Do you know what was discussed during that initial meeting?
- A. It was very background type of stuff. They told me about them, the background, the company. I told them about Lycos. And we just discussed the possibility of selling these potential patents.
- Q. Did they discuss any of their plans to monetize the patents?
- A. They did not. And, again, they never specified any specific patents within the family per se. It was all discussion on the family as a whole.
- Q. So then your discussions with Hudson Bay, did they ever specify an amount for specific

1 patents?

3

4

5

6

8

9

11

12

13

14

15

16

17

19

20

21

2.4

- A. No.
 - Q. Do you know if Hudson Bay ever did an evaluation of the value of the specific patents?

 MS. ALBERT: Objection. Vaque.
 - A. I have no idea.
 - Q. Similarly, do you know if Altitude Capital ever did any evaluations of the value of the patents in the '799 family?
- MS. ALBERT: Same objection.
 - A. I don't know if it did a valuation. I know it conducted due diligence. Extensive due diligence.
 - Q. Were there any factors that influenced Lycos's decision to sell the '799 patent family to Hudson Bay other than the 3.2 million purchase price?
- MS. ALBERT: Objection. Vague.
 - A. No. It was just all based on the highest price we could get. And the size of Lycos, it was a good amount of cash.
- Q. About how long did the negotiations with Hudson Bay last?
 - A. It was short. It all happened very

- quickly. Within the span of an -- I was going back and forth with people for a couple weeks, and it was done. It was very fast.
- MS. O'BRIEN: I will hand you what I will
 mark as Exhibit 17, and I'll just note for the
 record this, when it was produced, was marked
 confidential, outside counsel only. Printer just
 hates me today.
- 9 And this is a document that was produced 10 last night by I/P Engine.
- 11 (Exhibit No. 17, marked; Letter dated May 12 16, 2011.)
 - Q. And obviously take your time to look at the document, I will just first ask if you recognize the document.
 - A. Yes, I recognize it.
 - Q. What is it?
 - A. This would be the letter of intent that
 Lycos entered with Hudson Bay. It's a little
 earlier in 2011 than I had remembered. I thought it
 was June or July, but that's close enough.
- Q. I want to just look at the first page, the section "form of acquisition."
- 24 A. Yes.

13

14

15

16

17

18

19

20

21

- Q. About maybe a third of the way down the sentence that begins "The purchase agreement."
 - A. Yes.

1

2

3

4

5

6

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

2.3

24

- Q. It refers to a royalty-free, worldwide license back to the patents. Do you see that?
 - A. Yes.
- Q. Do you know if Lycos placed any value on the license back of the patents in this agreement?
 - A. Monetary value?
- Q. Right.
 - A. No. It was more just cross our T's, dot our I's and be protected going forward so nobody could sue us on patents we sold, or I'd look like an idiot.
 - Q. Do you know if at the time Lycos was practicing any of the patents in Schedule A of this agreement?
 - MS. ALBERT: Objection. No foundation.
 - A. I really don't know.
 - Q. And just looking at the section No. 2, purchase price, do you see that on the bottom of the first page?
- A. Yes.
 - Q. It refers to "Purchasers shall pay to the

seller \$3,100,000 in exchange for the patent"; do you see that?

A. Yes.

16

17

18

19

20

21

22

23

2.4

- Q. Was that \$3.1 million an amount that was proposed by Hudson Bay or by Lycos?
- Hudson Bay, because at that point Lycos wasn't throwing any numbers out there. To be honest with you, I was being honest with all parties saying I have a third-party offer, I can't tell you who it is, but this is the offer. If you want to beat it, beat it. And they kept on increasing the amount, and until we get to the 3 million, and that's when Altitude said this is our final offer. T don't think Altitude didn't believe me that we had all these other offers. And so I took them at their word and Hudson Bay offered 3.1, that was the highest, Eidos dropped out, I had heard final offer from Altitude, accepted this offer and didn't go back to Altitude, and Altitude was mad at that. And I said don't say final offer if you don't mean it.
- Q. Okay. I think we can put that one aside.

 MS. O'BRIEN: Mark as Exhibit 18 document

 produced IPE 0022792 through 796.

(Exhibit No. 18, marked; Letter dated June

1 | 15, 2011.)

16

17

18

19

20

21

22

23

2.4

- Q. Obviously take your time to look at it, my first question is do you recognize this document?
 - A. Yes.
 - O. What is it?
- A. This is an amendment to the letter of intent that we just looked at.
- Q. Do you know what the purpose of this amendment was?
- I think we extended the time by which we could close, and we added an additional patent to the sale, and increased the purchase price to 3.2 million. I believe that was the purpose. all of a sudden when we were negotiating final agreement, they requested this additional patent that we had never discussed with anybody specifically. So it wasn't anything on our radar, but they said it was a mistake not to include it in the original, and I said, well, we already negotiated the purchase price, you're going to have to give something for it. And our parent company at the time was fine with just getting an extra 100,000. They had -- 3.1 was already more than they had expected, so we just threw another 100,000 in

1 there for good faith.

3

4

6

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

2.3

- Q. Did Hudson Bay ever explain why they wanted to add this additional patent?
- A. No. I was mistakenly leaving it out. It should have been included. I don't know why that is though.
- Q. And just looking at the first page of the agreement, it refers to Hudson Bay Master Fund, and then also to Smart Search Labs Incorporated.
 - A. Yes.
- Q. Do you know why Smart Search Labs
 Incorporated was added to the agreement between
 Hudson Bay and Lycos?
- A. I was told that the ultimate, that the contractual parties would ultimately be Smart Search Labs. That was my only understanding.
 - Q. And who told you that?
 - A. I believe it was Alex Burger.
 - Q. And he didn't explain why?
- A. No.
 - Q. Did the change in the parties have any impact on your decision to enter into the agreement with Hudson Bay and Smart Search?
- MS. ALBERT: Objection. Vague.

A. I know I had discussions with them, because in my opinion it caused some potential risk, greater risk to Lycos, because I didn't know anything about Smart Search. I didn't know how they were funded, I didn't know anything about them. So I did have a little bit of concern about it. I just don't recall how we got around that. What type of assurances he gave me in terms of payment and whatnot.

I mean, as this deal -- there wasn't that much risk because it was just the one. If it was a deal where we were going to be paid out over time or something like that, it would have been one thing, but we were being paid immediately. And once we got our money and transferred the patents effectively the transaction is over. The risk was small, but still, I didn't know anything about this company, didn't know whether it was adequately funded, didn't really know anything about it. I know I had discussions with him about that, because it did raise concerns, but apparently I got over whatever I had.

Q. I think you can put that one aside too.

MS. O'BRIEN: Mark as Exhibit 19 document

24 produced Lycos 000001.

2.3

(Exhibit No. 19, marked; Patent Purchase and License Agreement dated June 22, 2011.)

- And, again, please take your time to look at it and the first question is just do you recognize that document?
 - Α. Yes.

1

2

3

4

5

6

8

9

10

11

12

13

14

15

16

21

22

23

2.4

- Ο. What is it?
- Patent purchase and license agreement that Α. we entered, Lycos entered with Smart Search Labs to sell the patent family that we've been discussing, along with the two additional patents.
- Q. Do you recall which were the two additional patents?
 - Not without looking at the agreement.
- And I think the schedule of patents is listed on Lycos 22, if that helps.
- 17 It would be the final two patents.
- 18 Estimating the usefulness of an item in a collection 19 of information, patent 6640218 and serving content to a client, patent No. 7228493. 20
 - Q. And did either Hudson Bay or Smart Search ever explain why it was interested in the '218 patent?
 - Α. It did not.

- Q. Do you have any understanding of the fields that the '218 patent is in?
- MS. ALBERT: Objection. Vague.
- A. I don't.
- Q. If you turn to page 9 of the agreement, which is Bates No. Lycos 12.
 - A. Yes.
- Q. There's a section 5.05, patent litigation, do you see that?
- 10 A. Yes.

13

- Q. Has Smart Search made any payments to Lycos in connection with this case?
 - A. In connection with this case, no.
- Q. Have you had any involvement in this case other than responding to the subpoena as being here today?
- 17 A. No, I have not.
- Q. During the negotiations did Lycos assume that the patents it was selling were valid?
- MS. ALBERT: Objection. Vague, asks for legal conclusion.
- A. Yes, we assumed they were valid.
- Q. Do you know if Smart Search and Hudson Bay assumed that the patents were valid?

- 1 MS. ALBERT: Objection. Speculation.
- 2 A. I hope so.
 - Q. Did anyone raise any concerns about the validity of the patents during the negotiations?
 - A. No.

- Q. And similarly, did anybody raise any concerns about the enforceability of the patent during negotiations?
- MS. ALBERT: Objection.
- 10 A. No.
 - Q. We were discussing that the final amount of the sale of the patents was 3.2 million.
 - A. Yes.
 - Q. Is there any reason that Lycos wouldn't have agreed to sell the patents in this agreement to Google for \$3.2 million?
- MS. ALBERT: Objection. Speculation, vague.
 - A. No reason we wouldn't have sold to whoever would have given us the most.
 - Q. Similarly, do you have reason to believe that Lycos wouldn't have licensed the patent in this agreement for \$3.2 million?
- MS. ALBERT: Objection. Vague, speculation.
 - A. No, I have no -- can you repeat the

1 | question? Sorry.

MS. O'BRIEN: Would you mind rereading it for me, I don't know if I can.

(Read back.)

- A. No. I have no reason to believe one way or the other.
- Q. Do you have any reason to believe that Lycos wouldn't have licensed the patents in this agreement for \$3.2 million in 2004?

MS. ALBERT: Objection. Speculation.

- A. I have no reason. What we would have done in 2004, I mean, like I said, a lot of this was internally driven. We would have been a much different company back then, larger in all respects, much bigger parent company, and just the overall business forces would have been different. This was largely driven by our lack of profitability at the time, our need for some cash, things like that. Circumstances being completely different, I have no idea what we would have done back then.
- Q. And just to confirm, was Lycos profitable in 2004?
- 23 A. No.
- Q. Was Lycos profitable in 2005?

Veritext Corporate Services 973-410-4040

- 1 A. No.
- Q. If we can take a quick break, I think I'm finished, I will check my notes.

VIDEOGRAPHER: Going off record, the time is

6 (Recess was taken at 2:41 p.m.)

(Reconvened at 2:45 p.m.)

(Exhibit No. 20, marked; Subpoena.)

VIDEOGRAPHER: We are back on the record.

- The time is 2:45, you may continue.
- 11 Q. I've handed you what's been marked
- 12 | Exhibit 20, which is notice of subpoena for Lycos,
- 13 Inc. Do you recognize this document?
- 14 A. Yes.

8

9

10

20

21

22

2.3

24

- Q. Did Lycos collect documents in response to this subpoena?
- 17 A. Yes.
- Q. What did Lycos do to collect documents in response to this subpoena?
 - A. Reviewed all the categories, and I searched my own emails, and I searched our former CEO's emails. He and I would have been the only two to have real communications surrounding the sale of the patents. Also, yeah, or related to my discussions

with Altitude, things like that in the past, and 1 2 certain things were, you know, specific like, you 3 know, the WiseWire merger, I had to get those documents from Iron Mountain, because those 5 documents are long gone, but we still had them somewhere, so I had to order those, produce, look 6 McDermott, Will and Emery had sent back at through. some point a lot of documents that were ours 8 9 relating to all the patents that they had looked at 10 in our portfolio, so I had like seven boxes of documents, and I went through all those documents 11 12 and pulled those related to any of the patents requested in here, unless it was like the complaint 13 or something. And, again, looked up other specific 14 15 documents, such as the Ken Lang consulting 16 agreement, and the purchase agreement, and I already 17 knew of the license agreements we had entered, so I 18 went into our system and pulled those. I don't 19 think there was anything else for me to do because, as I said, I was the only one still at the company 20 21 that would have any documents responsive, other than the ones that were specifically mentioned, and I 22 2.3 knew where they were.

Q. You can put that one aside.

2.4

In 2004 would Lycos have known what other contributions would be necessary to commercialize the inventions claimed in the '420 patent?

MS. ALBERT: Objection. Vague, no foundation.

A. I don't know what Lycos would have known about that in 2004, nor do I know if it even considered it.

Since I've been in the company, there's never been a discussion about that patent.

- Q. Similarly, was there ever any discussion about commercializing the '664 patent since you were at Lycos?
 - MS. ALBERT: Same objection.
- 15 A. No.

- Q. Did Lycos at any time believe that Google had successfully commercialized the '420 patent?
- MS. ALBERT: Objection. Vague.
 - A. We never did any analysis of anything Google was doing in relation to these patents in suit or that family.
- MS. O'BRIEN: I have nothing further.
- MS. ALBERT: I just have a couple of, if I can, follow-ups.

CROSS-EXAMINATION

BY MS. ALBERT:

2.4

- Q. Earlier you had testified that you believed Altitude had done extensive due diligence on the family of patents that they were bidding on; do you recall that?
 - A. Yes.
- Q. What is that, what is your testimony based on? How do you know that?
- A. It's based on the volume of requests that I received from them for due diligence, and the amount of documents I personally produced relating to the chain of title of the patents, past assignments. It was a lot of documents were hard to find because I had to go back to Iron Mountain and get a lot. I had to piece together certain chains of title through various mergers and whatnot. So that was time consuming.

I produced all of our patent files related to all of those, all the patents in our portfolio, and I know they also spent a number of days with McDermott, Will & Emery themselves discussing their analyses to the extent -- well, obviously McDermott had to be careful in terms of what it discussed,

- 1 because we were not yet represented, but there was
- 2 | some due diligence that they did with McDermott.
- 3 They contacted McDermott with my approval. So it
- 4 was just based on the amount of the overall
- 5 documents that were delivered. It seemed like they
- 6 | weren't leaving much unturned.
- Q. Did they provide any documents to you
- 8 relating to their due diligence?
 - A. In terms of requests or?
- 10 O. Results.
- 11 A. No.

9

- 12 Q. No?
- 13 A. No.
- Q. Did they discuss with you any results relating to their due diligence?
- 16 A. Yes.
- 17 Q. What did they discuss?
- A. When Alex came back to me to push back on
- 19 | the original LOI, he gave me a list of criticisms or
- 20 concerns that had been raised during due diligence.
- 21 | He seemed like he wasn't interested anymore in
- 22 monetizing the game patent, and originally that was
- one of the patents that they thought could be
- 24 | lucrative within our portfolio. After due diligence

they weren't really sure of that. There was not much interest in it.

They also didn't have interest in, especially after the summary judgment ruling, of getting involved in that litigation. He did mention, however, that they had interest in two of the other patents within the family of patents, but he did not or would not disclose to me which patents those were, and that was a negotiation tactic, and I didn't ask.

So basically he just, he basically tried to make it out to be these two patents were the only ones they were really interested in, and they were only doing us a favor by taking the rest.

- Q. But he didn't specify which ones?
- A. No.

- Q. You had stated that it was Alex, did you mean Warren Hurwitz?
 - A. Yes, Warren. No, it was Warren.
- Q. All right. Just one more. If you pull out -- well, let me step back.

You had testified earlier, and I'm paraphrasing, I'm not trying to put words in your mouth, so if I'm, you know, if I flub it up, let me

Veritext Corporate Services 973-410-4040

- know, that you weren't sure whether the Overture/
 Lycos settlement agreement covered the patents in
 suit in this case, the '420 and '664; do you recall
 that? We can take a look at it, it's Exhibit 15, I
 think the question is from.
 - A. I don't believe that the Overture licensure agreement had anything to do with these patents. I don't think it's in this agreement.
 - Q. I just want to clarify, because I believe in the line of questioning, if you look at page six of the agreement, the cross license agreement section, paragraph 11.1, I believe the questions were, do you know whether the '420 patent would be included in this cross license, and I believe your testimony was you do not know.
 - A. Well, no patent is specifically included. It depends on whether the patent covers the criteria in here, which is in the field of art covered by the claim of the licensed patents made by the terms of this license by licensee.
 - Q. And by licensee they're referring to Lycos?
 - A. Yes.

2.4

Q. Would that first sentence there mean that it had to be an invention created by Lycos during

1 | the term of the patent -- strike that.

Does that first sentence mean that the invention, that Overture would have a license to --would have to be made by Lycos during the term of this agreement?

MS. O'BRIEN: Objection. Vague.

- A. I'm just going to take a second to read this.
 - Q. That's fine.
- A. Yes, it would have to be within the field of art covered by the terms of this license agreement.
 - Q. And do you know or do you have a recollection when the '420 patent was filed?
- A. It was before this license agreement, so it would not come within this.
- Q. And the same question regarding the '664 patent, do you have a recollection of when that patent was filed?
- A. Also before this agreement was entered. So it would not be included in this section.
- Q. Okay. I think that's all I have.
- MS. O'BRIEN: I think I have just one

24 follow-up.
