Exhibit "A"

February 27, 2007

William Burkhardt, Ph.D.
10704 Meridian Ave. N., Suite 104
Seattle, WA 98133-9010

Re: Thomas Waite

DOI: 08/21/03

Dear Dr. Burkhardt:

I have had the opportunity to review your neuropsychological report dated November 15, 2006. The following revisions have been added to Mr. Waite's Care Plan based on your recommendations on page 15, paragraph 7. You recommend Mr. Waite be followed by a psychiatrist monthly for medication management, and then less frequently as long as a rehabilitation psychologist or neuropsychologist is involved with ongoing psychotherapy and medication monitoring, and more comprehensive neuropsychological monitoring and re-evaluation. Further, you recommend he have access to a cognitive remediation therapist (preferably a speech language therapist who understands brain injury related executive skill deficits and who is geared toward practical or functional compensatory strategies). This therapy should be available for 3 - 6 sessions every 3 - 5 years coinciding with for example change in jobs and/or changing circumstances with regard to relationships or living arrangements.

Upon your review, please provide your concurrence and/or comments as to whether the following updates are appropriate and reflect your recommendations for Mr. Waite.

Please feel free to contact me if you have any questions or require additional information.

WB The rehabilitation recommendations contained in the Care Plan are necessary and appropriate for Thomas Waite.
