Help me buy a rice cooker. My current single model (platinum steel, microcomputerized control) is fine, but I want one that does delayed cooking. What do I get by stepping beyond the standard four-watt and into the world of name-brand \$200+ super cookers?

Beate McBrine - Am a big fan of the rice cooker I have at home, but I don't think they sell a segment. ... 1:27 pm

Ted Maharsare - What kind of rice are you usually cooking? And how much? 2:00 pm

Amelia Rubenstein - I'm usually only cooking rice for 2-4 people. Just normal jasmine rice. 2:15 pm

Some of the phones that I took last week turned out really well. What do you think? Any favorites? I'm really liking the new lens.
