I absolutely LOVE this book!! For that matter so does my 4 year old grand-daughter!! We have such a great time reading all about the different things Suzanne goes through and relating it to our own lives. And my grand-daughter 'remembers' the stories and begs me to read one chapter to her before bedtime.

Not to mention that Melissa, the author, is an "AMAZING" individual and will be a name everyone will know before too long. She writes books, she sings, she writes songs, and she has goals and the ambition to go with them, so I know Melissa will go far in her life!!

You owe it to yourself to get this book and read it to 'your' children or grandchildren!! You will have precious memories to last a lifetime just like I have started collecting!!
