UNITED STATES DISTRICT COURT
WESTERN DISTRICT OF WASHINGTON
AT SEATTLE

IRONBURG INVENTIONS LTD., a
United Kingdom Limited Company,

Plaintiff,

v.

VALVE CORPORATION, a Washington
corporation,

Defendant.

Case No. C17-1182-TSZ

ORDER ON MISCELLANEOUS
MOTIONS

I. INTRODUCTION AND SUMMARY CONCLUSION

This matter comes before the Court upon defendant Valve Corporation (“Valve”)’s motion to seal, Dkt. 194, and motion to compel, Dkt. 196, as well as plaintiff Ironburg Inventions Ltd. (“Ironburg”)’s motion to retain confidentiality, Dkt. 205, and motion to seal, Dkt. 207. The Court has carefully reviewed the parties’ motions, the governing law, and the balance of the record, and ORDERS as follows: Valve’s motion to seal (Dkt. 194) is GRANTED IN PART AND DENIED IN PART; Ironburg’s motion to retain confidentiality (Dkt. 205) is GRANTED IN PART and DENIED IN PART; and Ironburg’s motion to SEAL (Dkt. 207) is GRANTED IN PART and DENIED IN PART. The Court reserves ruling on Valve’s motion to compel (Dkt.

1 196) until the Court has completed an *in camera* review of the documents on Ironburg’s
2 privilege log, and the parties have submitted their additional briefing due by no later than
3 **Tuesday, August 28, 2018.**

4 II. DISCUSSION

5 A. Valve’s Motion to Seal the Deposition Transcripts of Mr. Rule and Mr. Burgess and
6 Ironburg’s Related Motion to Retain Confidentiality

7 Ironburg has designated the deposition transcripts of two of its witnesses, Simon Burgess
8 and John Rule, as “Confidential” under the Stipulated Protective Order entered into by the
9 parties in the U.S. District Court for the District of Georgia before the case was transferred to
10 this Court. Dkt. 52. Mr. Burgess is a co-inventor of Ironburg’s patents and co-founder of
11 Ironburg itself. Because Valve quotes and discusses portions of those transcripts in its
12 contemporaneously filed motion to compel, Dkt. 197, and also filed portions of those transcripts
13 as Exhibits C and D to the Declaration of Mark D. Schafer in support of Valve’s motion to
14 compel, Dkt. 198, Valve filed its motion to compel and Exhibits C and E under seal and also
15 filed redacted copies of those documents in accordance with LCR 5(g). *See* Dkt. 196 (redacted
16 motion to compel); Dkt. 197 (sealed motion to compel). Valve explains that Ironburg did not
17 agree to reduce or remove the confidentiality designations for any portions of the Burgess and
18 Rule deposition transcripts, and should therefore provide the information required by LCR
19 5(g)(3)(B) by explaining the reasons for keeping the documents under seal. *See* LCR 5(g)(3)
20 (“[T]he party who designated the document confidential must satisfy subpart (3)(B) in its
21 response to the motion to seal or in a stipulated motion.”).

22 A party seeking to seal a judicial record bears the burden of overcoming a strong
23 presumption in favor of access to court records by meeting the “compelling reasons” standard.
24
25
26

1 *Ctr. for Auto Safety v. Chrysler Grp., LLC*, 809 F.3d 1092, 1096-97 (9th Cir. 2016) (citing
2 *Kamakana v. City & County of Honolulu*, 447 F.3d 1172, 1178 (9th Cir. 2006)). Under this
3 standard, a court may seal records only when it finds “a compelling reason and articulate[s] the
4 factual basis for its ruling, without relying on hypothesis or conjecture.” *Id.* The court must then
5 “conscientiously balance the competing interests of the public and the party who seeks to keep
6 certain judicial records secret.” *Id.* What constitutes a “compelling reason” is “best left to the
7 sound discretion of the trial court.” *Id.* (citing *Nixon v. Warner Commc’ns, Inc.*, 435 U.S. 589,
8 599 (1978)). The Ninth Circuit has “carved out an exception” to this general rule, *Foltz v. State*
9 *Farm Mut. Auto Ins. Co.*, 331 F.3d 1122, 1135 (9th Cir. 2003), which applies to sealed materials
10 attached to a discovery motion *unrelated to the merits of the case.* *Ctr. for Auto Safety*, 809 F.3d
11 at 1097.¹ Here, however, the two deposition transcripts at issue, especially Mr. Burgess’
12 transcript, are “more than tangentially related to the merits of a case” because they relate to the
13 ‘525 and ‘770 patents at issue in this litigation. *Ctr. For Auto Safety*, 809 F.3d at 1101. As a
14 result, the Court finds that Ironburg must demonstrate compelling reasons for keeping the
15 deposition transcripts under seal in this case.
16
17

18 With respect to the deposition transcript of Mr. Burgess, a citizen of the European Union
19 who was voluntarily deposed in London, Ironburg contends that his deposition transcript retains
20 certain confidential health information relating to his ability to competently testify and provide
21 accurate answers. Dkt. 203 at 4. Ironburg argues that revelation of this information would not
22 only disseminate private, confidential information, but would cause embarrassment that would
23

24 ¹ Under this exception, a party need only satisfy the less exacting “good cause”
25 standard. *Foltz*, 331 F.3d at 1135. The “good cause” language comes from Rule 26(c)(1),
26 which governs the issuance of protective orders in the discovery process: “The court may, for
good cause, issue an order to protect a party or person from annoyance, embarrassment,
oppression, or undue burden or expense...” Fed. R. Civ. P. 26(c).

1 persist on the Internet. Thus, Ironburg argues that Mr. Burgess' medical information
2 demonstrates good cause to maintain his deposition transcript under seal to protect him from
3 annoyance, embarrassment, oppression, or undue burden pursuant to Fed. R. Civ. P. 26(c). In
4 addition, Ironburg argues that Mr. Burgess is entitled to heightened protection of his personal
5 information under Article 8 of the European Convention on Human Rights, as well as the
6 General Data Protection Regulation that went into effect in May 2018. Dkt. 203 at 4-5. Finally,
7 Ironburg asserts that any less restrictive alternative would leave Mr. Burgess vulnerable to public
8 embarrassment, as no portion of his deposition transcript can be disclosed without disclosing the
9 medical condition because such information is "necessary to explain the context of his
10 testimony." *Id.* at 6 (citing *United States v. Dorrell*, 758 F.2d 427, 4356 (9th Cir. 1985) (the "rule
11 of completeness" embodied in Fed. R. Evid. 106 seeks to avoid the unfairness inherent in "the
12 misleading impression created by taking matters out of context.")).

14 With respect to the May 11, 2018 deposition of John Rule, Ironburg's outside counsel in
15 the United Kingdom, Ironburg asserts that "the same international privacy protections for
16 citizens of the European Union described above" warrant maintain his transcript under seal. Dkt.
17 203 at 6. Ironburg asserts that "[w]hile Mr. Rule did not disclose any attorney-privileged
18 information during his deposition, there is good cause to maintain Mr. Rule's deposition
19 transcript under seal to protect the public interest of confidentiality between clients and their
20 attorneys." *Id.* at 7.

22 The Court finds that, although neither party has opposed sealing portions of Mr. Rule's
23 deposition transcript, Ironburg has not established any compelling reasons for keeping the
24 excerpted portions of his deposition transcript under seal. *See* Dkt. 197, Ex. E; Dkt. 200
25 (excerpts of John Rule's May 11, 2018 deposition transcript). Ironburg concedes that Mr. Rule
26

1 did not disclose any attorney-privileged information during his deposition, and the fact that he is
2 a citizen of the United Kingdom, without more, is not sufficient. Accordingly, Valve's motion to
3 seal, Dkt. 194 is GRANTED IN PART and DENIED IN PART, and the Clerk is directed to
4 UNSEAL the excerpts of Mr. Rule's deposition transcript set forth in Dkt. 200. By contrast, the
5 Court GRANTS Valve's request to seal the portions of Mr. Burgess' transcript filed in support of
6 Valve's motion to compel, Dkt. 199, as discussed in greater detail below.

7
8 Although the deposition excerpts at issue in the two motions are distinct, the second
9 motion involving Mr. Burgess' deposition transcript is Ironburg's motion retain confidentiality.
10 Valve asks the Court to de-designate as confidential only a few specific portions (the "disputed
11 excerpts") of the Burgess transcript so that Valve can reference them in this case as well as a
12 contemporaneous *Inter Partes* Review ("IPR") proceeding.² Ironberg agrees that the following
13 portions of the Burgess transcript, which consist of the transcript cover page, appearances, index,
14 and court reporter certification, may be de-designated: 1:1-3:7, 3:12-13, 4:6-7, 5:1-25, and
15 208:5-209:25. However, Ironburg objects to de-designation of the other disputed excerpts,
16 which disclose the substance of Mr. Burgess' testimony. Dkt. 236 at 3. Ironberg points out that
17 Valve does not actually oppose the *sealing* of the entire Burgess transcript in this action, and the
18 confidentiality designation of the Burgess transcript does not in any way affect Valve's ability to
19 use the sealed Burgess transcript to advance its claims and defenses in this litigation.³ Rather,
20 Valve is only asking the Court to de-designate the disputed excerpts for use in the IPR
21
22

23 ² Specifically, the disputed excerpts include 1:1-3:7, 3:12-13 (indicating Exhibits 48
24 and 49), 4:6-7 (indicating Exhibit 64), 5:1-25, 38:14-41:6, 44:5-45:21, 46:23-47:24, 100:9-19,
25 110:13-112:17, 113:1-4, 113:12-25, 115:1-119:7, 160:14-162:1, and 208:1-209:25.

26 ³ Moreover, as the Court has stayed the litigation relating to the '688 and '229 patents in
this case, Dkt. 148 at 2, Ironberg claims that Valve cannot properly seek the transcript in
connection with the claims in this litigation relating to those patents. Dkt. 236 at 2.

1 proceeding. Dkt. 236 at 2. Ironburg asks the Court to deny Valve’s request for de-designation of
2 the excerpts, reiterating the same arguments discussed above for maintaining Mr. Burgess’
3 deposition transcript under seal. Dkt. 205 at 2.

4 Valve responds that the disputed excerpts relate to Mr. Burgess’ fabrication of two
5 prototype Scuf controllers, information Mr. Burgess already publicly disclosed in attempt to
6 obtain public promotion in online reviews. Valve asserts that Mr. Burgess’ testimony is relevant
7 to the question of whether that online review qualifies as prior art, and to the disputed flexibility
8 of the controller paddles reviewed by Burns. Valve asserts that these two topics are relevant
9 both to the ongoing IPR involving Ironburg’s ‘688 patent and ‘229 patent, and to this litigation
10 involving the ‘525 and ‘770 patents, because they factor into the issue of patent validity.⁴

12 Having reviewed Mr. Burgess’ deposition in its entirety, and considered the argument of
13 counsel during the August 21, 2018 hearing, the Court finds that Ironburg has not demonstrated
14 compelling reasons for maintaining Mr. Burgess’ deposition transcript under seal, or in fact, why
15 it should remain “confidential” pursuant to the protective order. Ironburg has made no showing,
16 apart from apparent concern about a negative outcome in the IPR proceeding, of any injury that
17 would result from de-designating the Burgess transcript, with the exception of a few portions that
18 reference medical or financial information. Mr. Burgess’ status as a citizen of the UK, without
19 more, does not meet the compelling reasons test, as Ironburg has not shown how the EU laws
20 relating to privacy or data protection renders the disputed experts protectable. Moreover, Mr.
21 Burgess has already disclosed most of the allegedly sensitive “commercial information”
22
23

24 ⁴ Moreover, Valve asserts that it has never divulged the information in the disputed
25 excerpts to any persons or entities not authorized to receive confidential information under the
26 protective order, such as the USPTO’s patent trial and appeal board (“PTAB”), and Valve and
its counsel have at all times maintained the confidentiality of the Burgess transcript pending
the Court’s decision on the instant motion. Dkt. 225 at 4.

1 discussed in the transcript in an attempt to obtain a positive review of his product. As a result,
2 Ironburg's concern that the narrow portions of his testimony at issue in this motion contains
3 confidential commercial information rings hollow.

4 Accordingly, Ironburg's motion to retain confidentiality, Dkt. 205, is GRANTED IN
5 PART and DENIED IN PART. For the sake of simplicity, the Court directs that all portions of
6 Mr. Burgess' transcript that have already been filed in this case remain under seal. Ironburg
7 shall meet and confer with Valve, and identify those portions of Mr. Burgess' transcript that
8 contain medical information or sensitive financial information. After excising those portions of
9 the transcript that contain medical or financial information, Ironburg shall file the remainder of
10 the transcript that contain medical or financial information, Ironburg shall file the remainder of
11 Mr. Burgess' transcript with the Court **within ten (10) days of the date of this Order.**

12 B. Ironburg's Motion to Seal

13 Ironburg's related motion to seal Exhibit B and Exhibit F to the Declaration of Robert
14 Becker, Dkt. 207, is GRANTED IN PART and DENIED IN PART. Specifically, Ironburg's
15 motion to seal the entire deposition transcript of Mr. Burgess, which was filed under seal as
16 Exhibit B to the Declaration of Robert Becker in support of Ironburg's motion to retain
17 confidentiality, is unopposed by Valve. *See* Dkt. 209. Ironburg's motion to seal this transcript,
18 Dkt. 207, is GRANTED, subject to the Court's instructions above.

19 However, Ironburg's request to seal the transcript of a hearing before the USPTO Patent
20 Trial and Appeal Board ("PTAB"), which was filed under seal as Exhibit F to Mr. Becker's
21 declaration, Dkt. 210, is DENIED. Valve opposes this motion on the grounds that Ironburg did
22 not file a motion to seal when it filed the PTAB hearing transcript in the IPR proceeding, and
23 therefore the entire transcript is already publicly available, with the exception of one redacted
24 sentence discussing Mr. Burgess' health. Dkt. 216. Valve argues that the limited details
25
26

1 regarding Mr. Burgess' health condition in the transcript was already publicly disclosed, and
2 therefore there is no good cause to seal any portion of the transcript.

3 Ironburg's motion to seal the PTAB hearing transcript, Dkt. 210, is DENIED. Dkt. 207.
4 The confidential medical information disclosed on page 22 of the transcript is limited, and
5 certainly no more detailed than what Mr. Burgess himself disclosed via Twitter in February
6 2014. See Dkt. 227, Ex. E. Ironburg's reply brief, Dkt. 218, did not meaningfully respond to
7 Valve's arguments, or provide any specific reason for keeping the PTAB transcript under seal in
8 this case. Accordingly, the PTAB transcript (Dkt. 210) shall be UNSEALED.
9

10 III. CONCLUSION

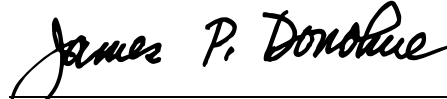

11 Accordingly, the Court ORDERS that Valve's motion to seal (Dkt. 194), Ironburg's
12 motion to retain confidentiality (Dkt. 205), and Ironburg's motion to SEAL (Dkt. 207), are all
13 GRANTED IN PART and DENIED IN PART. The Court reserves ruling on Valve's motion to
14 compel (Dkt. 196) until the Court has completed an *in camera* review of the documents on
15 Ironburg's privilege log, which the parties shall provide the Court by no later than **Tuesday,**
16 **August 28, 2018**. In addition, the parties shall provide the Court with additional briefing
17 regarding the issue of waiver of the attorney client privilege, as discussed during the August 21,
18 2018 hearing, by no later than **Tuesday, August 28, 2018**. Finally, as discussed at the hearing,
19 plaintiff shall a document, indicating whether any of the patent prosecuting attorneys will be
20 testifying, either live or by deposition, in the upcoming trial and the subject matter of their
21 testimony. This document will also be filed by no later than **Tuesday, August 28, 2018**.
22

23 //
24

25 //
26

1 The Clerk is directed to send a copy of this Order to counsel for both parties.

2 DATED this 22nd day of August, 2018.
