UNITED STATES DISTRICT COURT
WESTERN DISTRICT OF WASHINGTON
AT TACOMA

UNITED STATES OF AMERICA,

Plaintiff and Counterclaim-Defendant,

v.

WASHINGTON STATE DEPARTMENT
OF TRANSPORTATION,

Defendant and Counterclaimant.

CASE NO. 3:08-cv-05722 RJB

ORDER GRANTING THE UNITED
STATES' MOTION FOR PARTIAL
SUMMARY JUDGMENT

This matter comes before the Court on Counterclaim-Defendant the United States' Motion for Partial Summary Judgment. Dkt. 103. The Court has considered the pleadings filed in support of and in opposition to the motion and the remaining file herein.

I. FACTUAL AND PROCEDURAL HISTORY

The primary underlying facts of this case are well known by the Court and the parties and will not be repeated herein.

1 On January 30, 2009, the Washington State Department of Transportation (“WSDOT”)
2 filed a counterclaim against the United States seeking contribution under section 113(f) of the
3 Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended
4 (“CERCLA”), 42 U.S.C. § 9613(f), based on allegations that (1) the United States Army Corps
5 of Engineers (“USACE”) dredged the Thea Foss Waterway (“Waterway”) between 1902 and
6 1949, and (2) permitted others to dredge the Waterway in the 1970s and the early 1980s and
7 possibly other years as well. Dkt. 10.

8 WSDOT alleged that the United States is a potentially responsible person (“PRP”) liable
9 for contribution under 42 U.S.C. § 9613(f) because USACE’s permitting activities qualify it as
10 an “operator” of the Waterway, an “arranger” of the disposal of hazardous substances in the
11 Waterway, and/or a “transporter” of hazardous substances to the Waterway under 42 U.S.C. §§
12 9607(a)(2), (3), and (4), respectively. *Id.*

13 On July 6, 2009, the United States filed a motion for partial judgment on the pleadings,
14 seeking, in part, judgment on the matter of whether the United States is liable under CERCLA
15 for granting dredging permits to third parties. Dkt. 24. On September 15, 2009, the Court issued
16 an order denying the United States’ motion on the permitting issue. Dkt. 10. In its order, the
17 Court noted that “USACE’s liability, if any, will not be based on actual possession of the waste
18 but rather on what level of involvement the USACE engaged in when granting permits for
19 dredging and disposing of dredged materials.” Dkt. 47, at 10. The Court stated that while the
20 record was insufficiently developed at that stage to decide the permitting issue, “further
21 discovery is warranted to determine if liability is under 42 U.S.C. § 9607 is applicable.” Dkt. 47,
22 at 11.

1 On October 10, 2010 and after the completion of discovery, the United States filed this
2 motion for partial summary judgment on the permitting issue alleged in WSDOT's counterclaim.
3 Dkt. 103. The United States contends that its evidence shows that because USACE's
4 involvement in third parties' dredging was "purely regulatory," WSDOT cannot establish that
5 USACE is liable under section 113(f) of CERCLA, 42 U.S.C. § 9613(f), based on the issuance of
6 permits to private parties that authorized dredging or disposal activities in the Waterway. Dkt.
7 103, at 6. The United States also contends that even if the USACE were considered a potentially
8 responsible party, the "third party defense" provided in 42 U.S.C. § 9607(b)(3) applies. Dkt.
9 103, at 23.

10 The United States contends that the Seattle District of the USACE issues permits that
11 include dredging and disposing of dredged material under two statutory authorities: Section 10 of
12 the Rivers and Harbors Act ("RHA"), 33 U.S.C. § 403, and section 404 of the Clean Water Act
13 ("CWA"), 33 U.S.C. § 1344. Dkt. 103-1. According to the United States, when the USACE
14 receives a permit request pursuant to section 10 of the RHA or section 404 of the CWA, it
15 conducts a "broad analysis" to determine whether to grant a permit, including criteria such as
16 "environmental considerations, fisheries, wildlife, major species, [and] historical
17 [considerations]." Dkt. 103-6, at 5. Additionally, USACE would receive comments from
18 relevant state and federal agencies as well as reactions through a public notice and comments
19 system. Dkt. 103-6, at 22-23.

20 In granting a permit to allow dredging, USACE would apparently place conditions on
21 dredging operations. For example, USACE employees were "trained to put the amount of
22 material, the type of disposal, the type of dredging, quantities, all in the drawings" attached to
23 permits. Dkt. 103-6, at 18. The effect of placing this information in the drawings attached to the
24

1 permits served to “essentially limit[] the dredging” to the criteria and conditions set forth in the
2 drawings attached to the permit. *Id.* While the USACE may place conditions on a permit, the
3 United States contends that the USACE does not design a dredging project for entities that
4 request permits. Dkt. 103, at 7. According to the United States, “it is the permittee, not the
5 permitting agency, that decides where to dredge, how much to dredge, and what type of
6 equipment to use.” *Id.* As a result, the United States argues that the USACE does not “operate,
7 conduct, manage, direct or supervise the projects” for which it issues permits under CWA section
8 404 or RHA section 10. Dkt. 103, at 8.

9 On November 4, 2010, WSDOT filed a response. Dkt. 130. WSDOT contends that there
10 are disputed issues of fact regarding (1) the extent of USACE-permitted dredging and (2) how
11 much control the USACE exercised over the Waterway and its polluted sediments. Dkt. 130, at
12 1. WSDOT contends that several facts establish the extent to which the USACE was involved in
13 granting permits to dredge in the Waterway. Dkt. 130, at 2.

14 First, WSDOT points to a 1902 Act of Congress that appropriated money for public
15 works for the Waterway and other waterways around the country to support its contention that
16 the USACE “controlled” the Waterway. Dkt. 131-1 (Act of June 13, 1902, ch. 1079, § 1, 32
17 Stat. 331). WSDOT contends that because the Act granted the USACE “complete control of the
18 use, administration, and navigation” of projects such as the Thea Foss Waterway, the USACE
19 was Congressionally-mandated to exert dominance over all activities that took place there. Dkt.
20 130, at 3.

21 Second, WSDOT contends that several examples of correspondence from the early
22 twentieth century between the USACE and third parties demonstrate that the USACE “required”
23 the third parties to conduct dredging operations in the Waterway. Dkt. 130, at 4-9. According to
24

1 | WSDOT, because the USACE “required” these operations, it effectively controlled when and
2 | where third parties would dredge in the Waterway. *Id.*

3 | Finally, WSDOT argues that more recent permitting activities by the USACE
4 | demonstrates that the USACE retains “control” over the Waterway and the dredging operations
5 | that take place within it. Dkt. 130, at 9-11. WSDOT contends that because the USACE issues
6 | permits not as a disinterested regulator, but as “the entity that operates and controls the
7 | navigational project” that is the Waterway, any action that takes place within the Waterway that
8 | may affect its navigability would necessarily be conducted with the acquiescence of the USACE.
9 | *Id.*

10 | On November 18, 2010, the United States filed a reply. Dkt. 138. In its reply, the United
11 | States contends that WSDOT’s contention that the USACE “controlled” the Waterway is
12 | unsupported by relevant facts. *Id.* Additionally, the United States argues that even if the
13 | evidence that WSDOT sets forth is accepted as true, it does not create a genuine issue of material
14 | fact as to whether there is CERCLA liability when the USACE granted specific permits pursuant
15 | to its authority under the RHA and CWA. *Id.*

16 | **II. SUMMARY JUDGMENT STANDARD**

17 | Summary judgment is proper only if the pleadings, the discovery and disclosure materials
18 | on file, and any affidavits show that there is no genuine issue as to any material fact and that the
19 | movant is entitled to judgment as a matter of law. Fed.R.Civ.P. 56(c). The moving party is
20 | entitled to judgment as a matter of law when the nonmoving party fails to make a sufficient
21 | showing on an essential element of a claim in the case on which the nonmoving party has the
22 | burden of proof. *Celotex Corp. v. Catrett*, 477 U.S. 317, 323 (1985). There is no genuine issue
23 | of fact for trial where the record, taken as a whole, could not lead a rational trier of fact to find
24 |

1 U.S.C. § 9607(a), the classes of persons that may give rise to liability include “operators,”
2 “arrangers,” and “transporters.” 42 U.S.C. § 9607(a).

3 The United States argues that because the USACE’s permitting activities do not qualify it
4 as an operator, arranger, or transporter under section 107(a) of CERCLA, the USACE cannot be
5 held liable for contribution under section 113(f) of CERCLA as a result of its permitting
6 activities. Dkt. 103, at 14. In its response, WSDOT concedes that the United States is not liable
7 as a transporter under CERCLA. Dkt. 130, at 1-2.

8 The primary question that remains, then, is whether the USACE’s permitting activities
9 creates liability for the USACE as either an operator under section 107(a)(2) of CERCLA, 42
10 U.S.C. § 9607(a)(2), or as an arranger under section 107(a)(3) of CERCLA, 42 U.S.C. §
11 9607(a)(3). If summary judgment is not granted on either of those issues, then the “third party
12 defense,” 42 U.S.C. § 9607(b)(3), must be addressed.

13 A. Operator liability

14 Section 107(a)(2) of CERCLA, 42 U.S.C. § 9607(a)(2), provides that a party may be
15 liable if, at the time of disposal of any hazardous substance, it “operated” the facility “at which
16 such hazardous substances were disposed of.” Pursuant to the definitions provided in Section
17 101(9) of CERCLA, 42 U.S.C. § 9601(9), the “facility” in question here is the Waterway itself,
18 or some larger area of which the Waterway forms a part.

19 The Supreme Court clarified the standard for CERCLA operator liability in *United States*
20 *v. Bestfoods*, 524 U.S. 51 (1998). In assessing the liability of a parent corporation for the actions
21 of its subsidiary, the Court stated:

22 [U]nder CERCLA, an operator is simply someone who directs the workings of,
23 manages, or conducts the affairs of a facility. To sharpen the definition for the
24 purposes of CERCLA's concern with environmental contamination, an operator
must manage, direct, or conduct operations specifically related to pollution, that

1 is, operations having to do with the leakage or disposal of hazardous waste, or
2 decisions about compliance with environmental regulations.

3 Id. at 66-67 (1998). The analysis of whether a party is the “operator” rests on the relationship
4 between that party to the facility itself. *Id.* at 68.

5 Ninth Circuit case law identifies two theories on which operator liability may be
6 premised. *See Steadfast Ins. Co. v. United States*, 2009 WL 3785565 (C.D.Cal. November 10,
7 2009). The first theory is the “authority to control test” explained in *Kaiser Aluminum v.*
8 *Catellus Development Corp.*, 976 F.2d 1338 (9th Cir.1992). *See State of Washington v. United*
9 *States*, 930 F.Supp. 474, 483 (W.D.Wash.1996). Under the “authority to control test,” operator
10 liability attaches “if the defendant had authority to control the cause of the contamination at the
11 time the hazardous substances were released into the environment.” *Kaiser*, 976 F.2d at 1341.

12 The second theory is the “actual control” standard articulated in *Long Beach Unified*
13 *School Dist. v. Dorothy B. Godwin California Living Trust*, 32 F.3d 1364 (9th Cir.1994). *See*
14 *State of Washington*, 940 F.Supp. at 483. Under the “actual control” standard, to be an operator
15 of a facility, an entity “must play an active role in running the facility, typically involving hands-
16 on, day-to-day participation in the facility’s management.” *Long Beach*, 32 F.3d at 1367.

17 The United States relies on *United States v. Township of Brighton*, 153 F.3d 307 (6th Cir.
18 1998) to support its contention that when a regulator (such as the USACE) engages in “purely
19 regulatory activity,” such action “does not suffice to render a government entity liable” as an
20 operator. *Brighton*, 153 F.3d at 316. Under *Brighton*, “the dispositive question” is “whether the
21 government entity was running the facility or merely regulating it.” *Id.* at 316, n.11. As the
22 concurring opinion further explained, a regulator’s activities can only give rise to operator
23 liability “where its involvement extends beyond mere regulation and amounts to substantial
24 control, or active involvement in the activities of the facility.” *Id.* at 325 (Moore, J., concurring

1 in result). At the same time, however, the *Brighton* court noted that “mere regulation does not
2 suffice to render a government entity liable, but actual operation (or “macromanagement”) does.”
3 *Id.* at 316.

4 Also illuminating is the Third Circuit case of *FMC Corp. v. United States Dep’t of*
5 *Commerce*, 29 F.3d 833 (3rd Cir. 1994). There, the Court held that the United States was liable
6 as an operator of a World War II industrial facility under the “actual control” standard when the
7 United States

8 determined what product the facility would manufacture, controlled the supply
9 and price of the facility's raw materials, in part by building or causing plants to be
10 built near the facility for their production, supplied equipment for use in the
11 manufacturing process, acted to ensure that the facility retained an adequate labor
12 force, participated in the management and supervision of the labor force, had the
13 authority to remove workers who were incompetent or guilty of misconduct,
14 controlled the price of the facility's product, and controlled who could purchase
15 the product.

16 *Id.* at 844. WSDOT relies on *FMC Corp.* for operator liability by arguing that the USACE
17 “explicitly controlled all aspects of the...Waterway” by “taking vigorous and repeated actions to
18 maintain the full width and depth of that project.” Dkt. 130, at 15.

19 Given the case law, the proper standard to determine whether the USACE is subject to
20 operator liability for issuing permits is driven by the Supreme Court’s interpretation in *Best*
21 *Foods* as applied in the “actual control” standard in *Brighton*. Furthermore, cases such as *FMC*
22 *Corp.* provide an example of the type of “control” that an entity must exert before operator
23 liability may attach.

24 Here, WSDOT fails to meet its burden by demonstrating a genuine issue of material fact
as to whether the USACE’s permitting activities create operator liability under section 107(a)(2)
of CERCLA, 42 U.S.C. § 9607(a)(2).

1 First, WSDOT’s reliance on the 1902 Act does not suggest that the USACE exerted
2 “hands-on, day-to-day control” of the management of the Waterway (*Long Beach*, 32 F.3d at
3 1367) or that the USACE managed, directed, or conducted third party dredging operations in the
4 Waterway (*Bestfoods*, 524 U.S. at 66-67). The Act grants the USACE the duty to “prescribe
5 such rules and regulations for the use, administration, and navigation of *any or all canals and*
6 *similar works of navigation* that now are, or that hereafter may be, owned, operated, or
7 maintained by the United States...” Dkt. 131-1, at 45 (emphasis added). Included in this list of
8 “any or all canals” is the Waterway, as well as presumably hundreds of other public works.
9 While the Act does grant to the USACE some domain over the Waterway, it can hardly be said
10 that the Act provides that the USACE has “hands-on, day-to-day control” of the management of
11 the Waterway.

12 Second, the correspondence that WSDOT relies on to establish that the USACE
13 “controlled” the Waterway is not persuasive and does not establish a genuine issue of material
14 fact. Correspondence between the USACE and third parties could have demonstrated that the
15 USACE had a significant level of involvement when granting permits for dredging and therefore
16 implied that the USACE “managed, directed, or conducted operations” specifically related to
17 dredging in the Waterway. *Bestfoods*, 524 U.S. at 66-67. However, the evidence in this case
18 does not suggest that conclusion.

19 Contrary to the assertions of WSDOT, the correspondence does not establish that the
20 USACE “required” any third party to conduct dredging operations. The documents relied on by
21 WSDOT show that the USACE was involved in back and forth discussions that differ
22 significantly from the conduct of the United States in *FMC Corp.* As noted above, the Third
23 Circuit held in that case that the United States was liable as an operator when the government
24

1 affected to a significant degree nearly every aspect of an industrial facility. *FMC. Corp.*, 29 F.3d
2 at 844. While the evidence in this case shows that the USACE and third parties discussed
3 dredging operations, it does not show that the USACE planned specific dredging operations or
4 decided specifically when, where, or how a dredging operation would take place.

5 Furthermore, courts have found the United States not liable as an operator where the
6 government was more involved with the facilities in question than the permitting activities in this
7 case. *See, e.g. United States v. Iron Mountain Mines, Inc.*, 987 F.Supp 1277, 1287-88 (E.D. Cal.
8 1997) (United States was not an operator even though it provided financing and subsidies in
9 addition to acting as a regulator); *State of Washington*, 930 F.Supp. 485-86 (concluding United
10 States could not be considered an operator where it had exercised oversight of shipyard activities
11 in order to promote efficiency and control costs).

12 Finally, permits issued by the USACE pursuant to the RHA and the CWA show that the
13 USACE was not engaged in day-to-day, hands-on management of the Waterway. Particularly
14 relevant to this conclusion are facts established by the United States that are not rebutted by
15 WSDOT. The USACE does not design a dredging project for a third party but merely assesses
16 whether or not a permit should be granted. Dkt. 103-5, at 9. It is the third party that decides
17 where to dredge and how much material will be dredged. Furthermore, the USACE was not
18 required to conduct an after-action inspection for every project. Dkt. 103-6, at 15. For those
19 projects that did not require an after-action inspection, the USACE would not necessarily know
20 whether a project was performed in the manner in which it was permitted. *Id.* The evidence
21 shows that the USACE's level of involvement in the permitting process pursuant to the RHA and
22 the CWA does not rise to a level such that the USACE managed, directed, or controlled the third
23 party dredging operations. *Bestfoods*, 524 U.S. at 66-67.

1 The USACE's permitting activities do not give rise to operator liability pursuant to
2 section 107(a)(2) of CERCLA, 42 U.S.C. § 9607(a)(2), because there are no genuine issues of
3 material fact as to whether (1) the USACE managed, directed, or controlled third party dredging
4 operations or (2) the USACE had hands-on, day-to-day control of the management of the
5 Waterway. Accordingly, the United States should be granted summary judgment on the issue of
6 operator liability with regards to its permitting activities.

7 B. Arranger liability

8 Section 107(a)(3) of CERCLA, 42 U.S.C. § 9607(a)(3), provides that arranger liability
9 arises when “any person who by contract, agreement, or otherwise arranged for disposal or
10 treatment...of hazardous substances owned or possessed by such person, by any other party or
11 entity, at any facility...owned or operated by another party or entity and containing such
12 hazardous substances.” 42 U.S.C. § 9607(a)(3).

13 While the term “arranged for” is not defined in CERCLA, courts have explained the
14 concept. For example, one court determined that the issues involved in determining arranger
15 liability under CERCLA are distinct from those involved in determining owner or operator
16 liability. *Basic Management Inc. v. United States*, 569 F.Supp.2d 1106, 1116 (D.Nev. 2008).
17 Indeed, “arranger liability requires active involvement in the arrangements of disposal of
18 hazardous substances. However, control is not a necessary factor in every arranger case. The
19 Court must consider the totality of the circumstances ... to determine whether the facts fit within
20 CERCLA's remedial scheme.... [T]here must be a ‘nexus’ that allows one to be an arranger.” *Id.*,
21 *quoting Coeur D'Alene Tribe v. Asarco, Inc.*, 280 F.Supp.2d 1094, 1130-31 (D.Idaho 2003).

22 There are two lines of cases in the area of direct arranger liability: (1) “traditional”
23 arranger liability cases in which “the sole purpose of the transaction is to arrange for the
24

1 treatment or disposal of the hazardous wastes,” *United States v. Shell Oil Co.*, 294 F.3d 1045,
2 1054 (9th Cir.2002) (citations omitted), and (2) “broader” arranger liability, in which “control is
3 a crucial element of the determination of whether a party is an arranger.” *Id.* at 1055. With
4 respect to the broader arranger liability, the court noted that “[t]here is no bright-line test, either
5 in the statute or in the case law, for a broad theory of arranger liability under § 9607(a)(3).
6 Rather, we are required to sort through the fact patterns of the decided cases in order to find
7 similarities and dissimilarities to the fact pattern of our case.” *Id.* at 1055-56. After evaluating
8 the cases identified by the *Shell Oil* court as broader arranger liability cases, the applicable
9 standard was identified by one district court as follows: “Arranger liability requires a person to:
10 (1) own or possess waste and arrange for its disposal; or (2) have the authority to control and to
11 exercise some actual control over the disposal of waste.” *Coeur D’Alene Tribe*, 280 F.Supp.2d
12 at 1132.

13 More recently, the Supreme Court articulated principles regarding arranger liability that
14 are useful here. In *Burlington Northern and Santa Fe Railway Company v. United States*, 129 S.
15 Ct. 1870 (2009), the Court stated that interpreting the language of CERCLA required giving it its
16 “ordinary meaning” and concluded that “under the plain language of the statute, an entity may
17 qualify as an arranger under § 9607(a)(3) when it takes intentional steps to dispose of a
18 hazardous substance.” *Id.* at 1879.

19 Here, WSDOT is unable to overcome the United States’ motion for summary judgment
20 under either the *Shell Oil* standard or the principles articulated in *Burlington Northern*.

21 First, the United States did not exercise “actual control” over the hazardous substances to
22 the extent it establishes arranger liability under *Shell Oil*. In that case, the Ninth Circuit
23 concluded that the United States did not have “actual control” over waste disposal where “the
24

1 waste never belonged to the United States” and no U.S. official or employee had managed its
2 disposal. *Shell Oil*, 294 F.3d 1057-1058. In this case, WSDOT does not meet its burden of
3 proving arranger liability by demonstrating a genuine issue of material fact by showing (1) that
4 the USACE owned or possessed the hazardous substances, or (2) that a United States official or
5 employee arranged for or managed the disposal of the hazardous substances. Additionally, the
6 USACE had neither the authority to control nor exercised actual control over the disposal of the
7 hazardous substances.

8 Second, there is no indication that the United States took intentional steps to dispose of
9 the hazardous substances that were apparently dredged by the third parties. *See Burlington*
10 *Northern*, 129 S. Ct. at 1879. The USACE performed its regulatory function by issuing permits
11 to third parties in an attempt to maintain the navigability of the Waterway. The evidence
12 presented by WSDOT does not establish that the USACE took intentional steps to dispose of the
13 hazardous substances, particularly when one considers the evidence that shows that the USACE
14 itself did not undertake the work that it permitted and did not design the third party dredging
15 projects.

16 Finally, the Supreme Court in *Burlington Northern* also stated that the fact that the
17 defendant had taken precautionary steps to attempt to prevent the entities to which it was selling
18 from leaking or spilling hazardous substances further supports the conclusion that the defendant
19 there did not intend to dispose of hazardous substances. *Burlington Northern*, 129 S. Ct. at 1880.
20 Here, the USACE’s inclusion of general and specific conditions in the permits that it granted,
21 aimed at protecting human health and the environment (Dkt. 103-6, at 19-20), implies that the
22 USACE was not intending to arrange the disposal of hazardous substances.

1 The USACE's permitting activities do not give rise to arranger liability pursuant to
2 section 107(a)(3) of CERCLA, 42 U.S.C. § 9607(a)(3), because there are no genuine issues of
3 material fact as to whether the USACE (1) owned or possessed the hazardous substances and
4 arranged for their disposal, (2) had the authority to control and exercised some actual control
5 over the disposal of the hazardous substances, or (3) took intentional steps to dispose of the
6 hazardous substances that were apparently dredged by the third parties. Accordingly, the United
7 States should be granted summary judgment on the issue of arranger liability with regards to its
8 permitting activities.

9 C. Third party defense

10 As stated above, the United States should be granted summary judgment on both the
11 issue of operator liability and arranger liability. Accordingly, the Court need not determine
12 whether the United States should also be granted summary judgment on the issue of a "third
13 party defense" pursuant to 42 U.S.C. § 9607(b)(3).

14 **IV. ORDER**

15 Therefore, it is hereby **ORDERED** that the United States' motion for partial summary
16 judgment (Dkt. 103) is **GRANTED**. WSDOT's counterclaim seeking liability on the United
17 States under section 113(f) of CERCLA, 42 U.S.C. § 9613(f), for the USACE's issuance of
18 permits to private parties that authorized dredging or disposal activities in the Thea Foss
19 Waterway is **DISMISSED**.

1 The Clerk is directed to send uncertified copies of this Order to all counsel of record and
2 to any party appearing pro se at said party's last known address.

3 Dated this 7th day of December, 2010.

4 

5
6 ROBERT J. BRYAN
United States District Judge
